Do all the wise bikers demand that automobile motorists take the motorcycle exam prior to getting behind the wheel of their car? Does the great State of Michigan honor those demands and codify into law that automobile motorists must pass the motorcycle exam?

In article <7uqlhm$t3i$1@news.hawaii.edu>, jeffreyh@Hawaii.Edu says...
> Sure, but then you're limiting the number of possible people you can
> communicate with. At least we know that almost all the world's HF-licensed
> hams have CW ability; how many have digital ability is really not known.
>
>

This position could actually be a compelling argument to require
testing in ALL CURRENT MODES. I've stated publicly before that I would
support continued, mandatory CW testing provided the ham community
supported thorough send and receive testing in all other modes (phone,
RTTY, Amtor, Pactor, Packet, PSK31, satellites, etc.).
Why do I advance this position? Simple, because I believe the
importance of CW is overblown by its proponents. The vast majority of
countries only require the minimum CW speed of 5 WPM for HF licensing.
This is hardly sufficient for most emergency communications. I have also
discovered that most of the hams in my local club have stopped using CW
once they have attained the level of licensing they were seeking. I
suspect that this trait is not limited to just my club or just this
country, for that matter.
At least if we mandated thorough testing across all the modes, we
would increase the odds of being successful in our communications. When
the community of CW proponents embraces this across-the-board testing,
then I will believe the claim that their aim is universal communication.

http://www.laughingpoliceman.com

Greetings fellow radio enthusiasts

My wonderful radio club, The Laughing Policeman Wireless Society, has added a few more features to the web site, and we have additions that have been emailed to us, thanks. g8aso@hotmail.com

We have a Yagi antenna design program for Windows, a Morse code tutor, and a few modification files for Yaesu, Kenwood, Alinco, Uniden, and Tandy/Radio Shack scanners. An â€œAustralianâ€□ program for your desk top, an opticians delusion, and the only sensible screen saver we have ever seen. Add to this the complete and definitive list of BBS and Packet Clusters in the UK with location maps accurate to within a few yards, and you can see that our versatile site is improving as it approaches its 1st Birthday.

From the archives, we have received a decent recording of The DTI Song, and the rare and truly wonderful CF RAP! All the music files have been converted into MP3 format for ease of download and for improved quality.

NEW this week is the TV news report of the Aylesbury repeater bomb, again in MP3 for ease of download.

My sincere thanks to our willing band of helpers and all those who emailed me in the last few weeks, all replies are now complete.

Go direct to our download page here http://www.laughingpoliceman.com/free_downloads.htm and donâ€™t forget the free LPWS email that we now operate entirely for and on behalf of our amateur radio friends.

Please report any errors and omissions to me and I will get them rectified without delay, and donâ€™t forget to email me with any further additions etc. complete anonymity if required.

LPWS Publicity Officer G8ASO g8aso@hotmail.com

If you log on to the RAIN report(no dummies, it has nothing to do with weather) ; it stands for the Radio Amateur Information Network operated by a wonderful blind gent named Hap Holly, KC9RP,with whom I have had a QSO, Riley Hollingsworth sent a letter of suspension to W3CI, a chap named Kornwell Chan who apparently didn't like it too much. It seems that he's further invoked the wrath of Riley by threatening to retaliate against those who got him in trouble. I now have it from reliable sources that the retaliation will come by way of poison starch in their shirts.

It looks like "WaiverBoy" WB3HGW is taking up where his disgraced master WB2OTK stopped when he was cancelled by the FCC. Tom seems to think he is immune to any action by the FCC because he is a bed patient in his home. Tom, you got a free ride when you whined to Bob Dole and the Semitic King because you are too dumb to learn code. Now that you don't have "MOM" around to keep you straight, why are you diliberately interfering with amateurs who got their ticket fair and square, Knock it off!! You know you got a "freebie" to skam on on amateur radio!! Riley has been notified!! shame shame shame!!

How do you get your license without government services? Where do you get the parts to build the radio without commercial services? Where is the battery going to come from? Shouting is about all you could do without these services...

SB DX @ WW $OPDX.432
Ohio/Penn DX Bulletin No. 432

The Ohio/Penn DX PacketCluster
DX Bulletin No. 432
BID: $OPDX.432
October 25, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1CC, AI2Q, K2KQ, KF2TI, N2VW, N2NL, NA2M, WB2RAJ/WB2YQH & The 59(9) DXReport, AA4XR, N4GN, N4OKX, K6RIM, N7NU, K8YSE, NE8Z, BA1DU, CE6TBN, DL2GG, E21EIC, EP2FM, EU1EU, F6AJA & Les Nouvelles, G3SXW, G4ZVJ, HA0KHW, JA1ELY, JI3DST, JI3ERV/NH2C, LA7MFA, LX1NO, OK1YM, P43P, PS7AB, PY1KS, RN3ZQ, SP2BIK, UA0SJ, UK9AA, UN5PR, UN7LZ, ZS5BBO and 9K2HN for the following DX information.

10 METERS NET TO RETURN. Beginning the first weekend of November, the "Brazil DX Net" will return to 28430 kHz from 1200-1400z. All amateur radio stations are welcome.

3B8, MAURITIUS. The LNDX reports that Jacques, F6HMJ, will be active as 3B8/F6HMJ from November 15th through December 5th. He will be active on all bands and hopes to be on 160 meters. He will also be active during CQWW CW Contest, mostly on 10 meters.

4L, GEORGIA. Look for Omari, 4L5O, to be active in next week's CQ WWDX SSB Contest as a Single Operator/Single Band (28 MHz) entry with low power (100 watts).

8R, GUYANA. Olli, OH0XX, will operate 8R1K in the CQWW SSB Contest as a Single Op/All Bands entry. QSL via Suite 599, 1313 So. Military Trail, Deerfield Beach, FL 33442, U.S.A.

9G, GHANA. Excerpts from a press release by Roger, G3SXW, announces that the Voodoo Contest group will again be active from West Africa in the CQWW CW Contest (November 27-28th) for the SEVENTH year. After successes as 5V7A, the group returns to Ghana this year and will sign 9G5AA. They will enter as a Multi/Multi category installing seven full stations and 18 antennas at a new coastal site in Central Ghana. Team members (with personal 9G callsigns that are known) are: Jeff/9H1EL, Roger/G3SXW/9G5SX, Don/G3XTT, Fred/G4BWP, Cris/G4FAM, Andy/G4PIQ, Vince/K5VT/9G5VT, Mike/KC7V/9G5MF and Jim/KF7E. Just before the contest, November 24-26th, look

for activity on various bands, including short spells on 160 and 6 meters, which is likely to be all CW. QSL 9G5AA via GM4FDM, Tom Wylie, 3 King's Crescent, Elderslie, Renfrewshire, PA5 9AD, Scotland. Bureau replies may be requested by sending QSO details and your callsign by E-mail to Tom at: twylie@net.ntl.com
Also visit the Voodoo Contest Group Web site at: http://voodudes.com
The OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

9K, KUWAIT. Hamad, 9K2HN, will be participating in the CQWW SSB Contest as Single Ops/All Bands entry. QSL is OK via the Bureau or direct to: Hamad Alnusif, P.O. Box 29174, Safat 13152 Kuwait

AH2, GUAM. Members of the Guam Contest Club will be active in the CQWW SSB Contest as AH2R. The club was the Oceanic leader as a Multi-Single category in 1996 and 1997. Last year they made an effort in the Multi-Multi category and won the second place in the Oceania area (close behind of KH7R). This year they are trying to build an Oceanic record in the Muliti-Single category. The operators will be Aki/JI3ERV/NH2C, Kaz/JG3RPL/N1BJ, Seo/JR3RVO/WX8M, Toshi/JR7OMD/WI3O, Sam/JR8VSE and Taka/JR8PPG. They suggest to listen carefuly for them between 7075-7100 on 40 meters, and their sunrise/sunset is: 2012/0757z. QSL via JI3ERV (Direct or JA bureau, NOT KH2 bureau).

B1, CHINA. The contest callsign B1Z of The Beijing DX Club will once again be active during this upcoming CQ World Wide SSB DX Contest. They will participate in the multi-multi category. Operators include Tong/BA1AA, Cheng/BA1CO, Alan/BA1DU, Jerry/BA1FB, Guo/BA1GYS, Chen/BA1HAM, Qin/BA1KA, Ban/BA1MK, Chen/BA1MT, Zheng/BA1TU and Chen/BD1CU. QSL via JA4HCK only.

BORNEO/SPRATLY DXPEDITION UPDATE. The 1999 "Hillview Gardens" Borneo DXpedition has announced the operators and the schedule for this operation. The team is: Bob Schenck, N2OO/9M6OO - DXpedition leader; Jani Kusmulyana, YB0US/NM6US/9M6US - Hardware engineer; Mike Mraz, N6MZ; Tom Harrell, N4XP; Paul Newberry, N4PN; William Beyer, N2WB; and Jim Stahl, K8MR. All seven well seasoned operators (SSB/CW/RTTY). The schedule is as follows:
November 7-10: 9M6AAC Hillview Gardens, Sabah, East Malaysia
November 11-17: 9M6OO Layang-Layang Island, Spratly Islands
November 18-21: The team will be attending the SEANET Convention in Brunei
November 21-25: V85OO Brunei
November 24-29: 9M6AAC Hillview Gardens, Sabah, East Malaysia, with an entry expected in the CQWW-CW by the team.
They will have a Web page set up linked from: http://www.qsl.net/n2oo
Full updates will be posted as well as pictures from the team during the operation, however not during the 9M6OO "Spratly" activity as there is no internet access available there. Contributions for this DXpedition would be most appreciated. Contact point for this DXpedition is Bob Schenck, N2OO, and he can be E-mailed at: n2oo@arrl.net
or via mail: Bob Schenck, N2OO, P.O. Box 345, Tuckerton, N.J. 08087-0345 U.S.A.

C6, BAHAMAS. The Cinco Nueve Contest Group (CNCG) will be active between November 23rd and December 2nd. The members include Lee/N7NU, Al/K7AR, Ron/WJ7R and Bob/W7RR. They will participate in the CQWW CW Contest as C6AJX (QSL via N7NU). Outside the contest they will sign homecall/C6A. QSL to home calls. During the operation, or as uploads permit, logs and photos will be posted on the CNCG Web site at: http://www.qsl.net/k7ar

C6, BAHAMAS. Ed, WA3WSJ, will operate as WA3WSJ/C6A from Abaco Island (NA-080) in the Bahamas from November 23-30th. He will take his Elecraft K2 rig and operate QRP on 80/40/20/15/10 meters. QSL via WA3WSJ with SASE, IRC etc......

C6, BAHAMAS. The C6AGS CQWW SSB operation has been cancelled due to a direct hit by Hurricane Floyd on Treasure Cay.

CE0Z, JUAN FERNANDENZ ISLAND (Update). Marco, CE6TBN, reports that the Ministry of Telecommunication has granted them the callsign CE0Z for his DXpedition to Juan Fernandez Island Janury 6-16th, in the year 2000. For more details, please refer to OPDX.430. Marco also mentions that he is still looking for a sixth operator. If interested, send him an E-mail at: ce6tbn@qsl.net

CT3, MADEIRA ISLANDS. Siggi, TF3CW, will be back in CT3 during this year's CQ WW SSB/CW Contests as a Single Op/All Bands High Power entry. He is going to use the callsign CT3FN. QSL via HB9CRV only. He will be active before the contest as CT3/TF3CW. QSL via LX1NO only.

EV5, BELARUS. Igor, EU1EU (President of AGB - Activity Group of Belarus), reports that he will be active as EV5M during October through the New Year. Activity will take place on Thursdays, Fridays and Saturdays, every week. QSL via his home callsign EU1EU: Igor Getmann, POB 143, Minsk-5, 220005, Belarus. QSLs for EU930EU, UC2ABO and the club station EW1WC ("Argonauts") can also be sent to him.

FO0, AUSTRAL ISLAND. Marcel, ON4QM, will still be active from here as FO0DEH until October 30th.

HK, COLOMBIA (Bad News). Gerard, F2JD/HK3JBR, is heading back to Bogota after a few weeks vacation in France. During his stay all his equipement had been stolen.

HS0, THAILAND (CQWW Contest and More)......
Bruce, AA4XR, reports to OPDX that he will be active as HS0ZCY from November 20th through December 7th. Activity will be on 40-10 meters CW/RTTY. QSL via WB4FNH.

Look for RAST's HS0AC club station to join in during the big contest next weekend. Operators will be HS1CKC, HS0GBI, HS6NDK, E20NVH, E20REX/YL, E21EIC, JA0QZ, JA4RWN and G3NOM. QSL Manager is G3NOM.

Look for HS72A to be active during the CQWW SSB Contest. This is a special callsign to celebrate his Majesty King Bumipol's (HS1A) birthday. QSL Manager is Winit, HS1CKC. The King will be 72 years old, and the special operation will last until December 1999.

Also, look for the special JOTA callsign, HS0AJ, to be active. QSL Manager is HS7AHV.

IOTA NEWS......
AS-117. Takeshi, JI3DST, will be active as JI3DST/3, from Honshu's Coastal Island (Awajishima Hyogo) October 30th through November 1st. Activity will be on 15 and 10 meters during the CQWW SSB Contest. QSL via JARL Bureau or direct.

OC-177. The Indonesian Amateur Radio Society (ORARI) is planning a DXpedition to Samut Island, located north of Jakarta in the Thousand Islands. The operation will start on October 28th and last until November 1st. They are planning to participate in the CQWW DX SSB Contest. A special DXpedition callsign was issued with a prefix that has never been used. Look for 7A0K to be aired. The DXpedition will be on SSB and CW, 160-10m, including the WARC bands. The QSL information is via YB0AI.

SA-058. The "Grupo DX Caracas" is celebrating its 10th anniversary and will arrange a DXpedition on November 12-14th to Farallon Centinela Island in the Caribbean Sea, located in front of the coast of Venezuela. They will try to get on all bands on SSB and CW. Their callsign will be YW5FC. QSL via W4SO.

J3, GRENADA. Don, K2KQ, reports that he will be active as J3A as a Multi/Multi entry in both CQWW SSB and CW Contest. Ann, WA1S, will be the QSL manager for both contests.

KH2, GUAM. Dave, N2NL, reports that he will be active in the CQWW SSB Contest next weekend as KH2/N2NL, operating from Danny's, KH2JU, new hilltop QTH. It will be a serious Single Op/All Bands effort, 160-10 meters. He is also planning the same thing for the CQWW CW Contest. QSL via W2YC. Dave mentions that these 2 contests will probably be his last hurrah before he transfers back to the states early next year.

LS0, ARGENTINA. "The 59(9) DXReport" reports that the "Radio Club Villa Angela" will be active from the El Suazalito Region November 27-29th as LS0G. Activity will be on 40-10 meters CW, SSB, SSTV and PSK31. A special certificate will be available for 5 IRCs from LU4GO.

NCDXF PRESS RELEASE. At its Board of Directors meeting on October 17, 1999, in Cupertino, CA, the Northern California DX Foundation re-elected the following officers and directors:

President Len Geraldi K6ANP
Vice President Al Burnham K6RIM
Secretary Tom McShane NW6P
Treasurer Bruce Butler W6OSP
Director Lou Beaudet K6TMB
Director Rusty Epps W6OAT
Director Bob Fabry N6EK
Director Chuck Ternes N6OJ
Director Steve Thomas N6ST
Director Glenn Vinson W6OTC

Dave Pugatch, KI6WF, was newly elected as a Director.

Information pertaining to the Northern California DX Foundation is available at: http://www.ncdxf.org

OCEANIC TRIP (EAST MALAYSIA and BRUNEI). A JA group will visit Brunei to attend the SEANET Convention and East Malaysia in November. The operators are: JA3AA, JA3CF, JA3IG, JA3UB, JA3AER, JA3ART, JA3NGW, JR3WXA and JH3GAH. They will be active on 160-6 meters CW/SSB/SSTV. Their schedules are as follows:
November 18-21st - In Brunei signing V85TG and V8SEA. QSL V85TG via JH3GAH. QSL info for V8SEA will be announced on the air.
November 21-25th - In East Malaysia signing 9M8TG. QSL 9M8TG via JH3GAH.

OH0, ALAND ISLANDS. Look for OH2MAM to be active in the CQWW SSB Contest as OH0Z. QSL via OH1EH.

P4, ARUBA. Jacobo, P43P, will be participating in the CQWW SSB Contest as Single Op/All Bands (QRP?), from his QTH on the North Coast of Aruba with the callsign P40B. A new PHOTO QSL card is now available via his new QSL Manager, so update your QSL Manager records as follows. QSL P40B via Mario Ambrosi, I2MQP. These new and colorful P40B QSL cards are available for all contests, and, of course, for any previous QSOs made with P40B.

PJ2, NETHERLANDS ANTILLES. The Caribbean Contesting Consortium (CCC) will be active from Curacao during the CQWW SSB Contest as PJ2C. The team, consisting of Geoff/W0CG, Dan/K8RF, Hillar/N6HR/ES1HR, Harry/W8KKF, Ron/WA8LOW, Noel/W9EFL, Elsie/N7WDX and Mark/N4OKX will operate PJ2C as a Multi/Single entry next weekend. Various members of the CCC team have been active from the Caribbean in another operation which included VP5FXB, CY9RF, VP5CW and PJ9T. XYLs Cindy Howard, Marge Flasher and Tanya Tuell will join the team in support roles including photograpy, scuba diving and operating co-ordination. Outside the contest period, team members will be active from October 27th through November 1st as PJ2/homecall with a special emphasis on 160, 75 and 6 meters CW and SSB as preparations for the contest allow. QSL manager for PJ2C is W8KKF. Check out the PJ2C Web site at: http://asgard.kent.edu/ccc/pj2c
Following the operation, contesters and DXers will have the opportunity to vote on their choice for the QSL photo by logging on to the PJ2C web site and viewing a selection of photos from the operation.
ADDED NOTE: Contest operations by non-residents in the Antilles are no longer receiving PJ9 prefixes. PJ contest callsigns will now reflect the regular prefix of the appropriate island and reciprocal temporary callsign as PJ(x)/home call.

PY, BRAZIL. Alex, PY1KS, states that he will be active in the CQWW SSB Contest as a Single Operator Single Band Low Power entry. He has not decided if the band will be 10 or 15 meters.

QSL INFO AND NEWS.....
A message from Lech, LA7MFA, states the following: "It seams like there is a lot of different addresses of mine out there. I guess I have been

moving around too much lately: QSL for KH8/KK6HC goes via LA7MFA: Lech Slawomir Tomczak, Froeyas vei 61, 3472 Boedalen, Norway. All bureau QSLs will be answered. But I need some time to make my special color QSL card. I have been operating for 24 hours last Saturday/Sunday from Leone on Tutuila, Am. Samoa using my American callsign KK6HC. I was using IC751A with just 100W into a Butternut HF9VX antenna. I made total 1200 QSOs on 40, 30, 20, 15, 12 and 10m. The condx were very poor as my QTH was on the southern part of the island behind a huge mountain. I enjoyed this very first own radio expedition. Thanks to all who came to say hello. I was trying to make any QSO from the boat on the way back from ZK3CW/T31T expedition but it seems that LA7MFA/MM was not interesting enough. Nobody would bother to answer my CQ call! I will put a log search on my WEB page http://www.qsl.net/la7mfa shortly."

Jurek, SP2BIK, reports that their operation from the Polish Lighthouse in Krynica Morska during the "International Lighthouses Weekend" they operated on CW, SSB, FM and Packet Radio. They made over 1600 QSOs on HF bands. Presently, they are still waiting for printing of the QSL cards to be done. Once the cards become available, they will be distributed the same way they were received.

NEW QSL MANAGER. A new manager has been announced for the upcoming operations: PX7G, Fort Queijo (Nov. 12-16th); ZY7G, Fort Brum, (Nov. 19-22nd); and PQ7G, Fort 5 Pontas (Dec. 3-6th). QSL via PS7AB to the Bureau or direct to: Rony Reis, Caixa Postal 2021, 59094-970, Natal/RN, Brazil.

SEND NO GREEN STAMPS. UK9AA reports that they have a problem with the postal service in their country of Uzbekistan. He requests to "PLEASE, DON'T send your QSL cards with Green Stamp". He states that foreign letter asre being opened, and it is better to send IRCs instead of "Green Stamps".

RN PREFIX IS RUSSIAN. Igor, RN3ZQ, reports that many outgoing QSL Mail from the USA for the Russian radio amateurs (with prefixes RN) are being sent to the UN QSL Bureau (Kazahstan). This is wrong, RN prefixes are for RUSSIA.

SAVE YOUR GREEN STAMPS. Abdollah Sadjadian, EP2FM, reports that the station signing EP2AS on 30 meters on October 10th, stating to QSL via UR5SAS, is not a licensed station. He mentions that the EP2AS callsign was issued to Mostafa Shafii a good 40 years ago, and he was a very skilled CW operator. He may be a possible silent key now.

NO LONGER QSL MANGER. Jack, N2VW, reports to OPDX that in the past he was the QSL Manager (and licensee) for VP5O (1992), VP5N(1993), VP5R (1994) and P40T (1995). However, he no longer acts as a QSL manager for ANY of these callsign. Those particular logs are closed. These contest callsigns have been re-issued by the respective licensing authorities in recent years. He requests and states the following: "Please remove my call from your any of your data bases that show me as manager. Hope it works ... The flood of bureau cards is getting expensive. However,

those I do receive are redirected via the bureau if I can find a manager."

SPECIAL EVENT. For the 50 year anniversary of the Aviation Civil School, the club F6KRQ will be using the callsign TM0AC now until October 31st.

SV, GREECE. Look for SV1DKR to be active next weekend in the CQWW SSB Contest as a Multi/Multi entry. QSL cards are OK via bureau.

T8, BELAU REPUBLIC. Look for JA1WSX (T88WX), JH4OWG (T88??) and JA7AYE (T88??) to be active from Belau between October 28th through November 2nd. They will participate in the CQWWDX SSB Contest as T88WX as a Multi/Single category. Before and after contest they will operate on all bands with their own callsign. QSL T88WX via JA1WSX and the others via their home callsign.

TI, COSTA RICA. JA6WFM, JM6EBU (TI5EBU) and JM6UAA will be activate from here between October 29th through November 2nd. They will participate in the CQWW DX SSB Contest as TI5EBU together with TI5KD as a Multi/Single category. Before and after the contest they will operate TI5/homecall. QSL TI5EBU via JM6EBU and all others via their home callsign.

UA0, ASIATIC RUSSIA. Yuri, UA0SJ, lives in the city of Bratsk, 600 kilometers on the north side of Lake Baikal. He plans to be active in the CQWW SSB Contest as a Single OP/Single Band (15 meters) entry. Please send QSL via direct to: Yuri A. Maltsev, P.O. Box 2304, Bratsk-city, 665700, Russia (Asiatic).

UP2, KAZAKHSTAN. Valery, UN7LZ, will use the special callsign UP4L in both CQWW DX Contest (SSB and CW) as a Single Op/Multi-Band entry. QSL all direct cards to: Valery Zhilyaev, P.O.Box 7, Kostanay, 458000, Rep. of Kazakhstan.

UP5, KAZAKHSTAN. Romeo, UN5PR, will be active in the CQWW SSB Contest as UP5P as a Single Operator/All-Bands entry. Yuri, UN6P, will take his turn and be active in CQWW CW Contest as UP6P as a Single Operator/All-Bands entry. QSLs for UP5P and UP6P are via UN5PR direct: Romeo Y. Loparev, P.O.Box 73, Temirtau, 472300, Rep. of Kazakhstan. Romeo tells OPDX that their QSL-bureau in Kazakhstan is not working.

VQ9, CHAGOS ISLANDS. A report received from Rick, NE8Z, states that Ron, VQ9DX, has been looking for stateside on 1828 kHz for about 4 nights a week, but with no takers. He has had a couple of fair European openings at his sunrise, but no stateside. Ron states, "Currently we're back on the hook, not dockside, so I can't get to the club for sunrise for the next couple weeks at least. But continue to be QRV at our sunset on 1.828. Usually stick around till after W6 sunrise." QSL via AA5DX.

XU, CAMBODIA. Andy, G4ZVJ, was active for just 24 hours on September 18th, after eventually being issued the callsign XU7AAV in Phnom Penh. He made 850 CW QSOs. Andy will return to Cambodia around November 20th for approximately two weeks including the CQWW CW Contest. QSL via G4ZVJ. Also, check out the Web page: http://www.g4zvj.demon.co.uk/xu.htm

ZS5, SOUTH AFRICA. Edwin, ZS5BBO (NODXA member) will be active next weekend in the CQWW SSB Contest. He will be operating as a single operator on 10, 15 and 20 meters using his contest callsign ZS5T. Also, he mentions that he will be part of the International DX team consisting of K1DWQ (North America), PT7BZ (South America), DL8PC (Europe), VU2PAI (Asia) and himself, ZS5T (Africa). QSL cards can be sent direct via ZS5BBO, address ok in QRZ.COM / BUCKMASTER or International Call book. Edwin also mentions that an operator named Ron (no callsign given) will be active as ZS5T in the CQWW CW Contest as a Single Op.

ZX0, FERNANDO DE NORONHA. The Araucaria DX Group in Brazil has organized a multi-national operation from Fernando de Noronha for the CQWW SSB Contest as a Multi/Multi entry. The team will have U.S., Bulgarian, and Brazilian operators at the ZX0F contest station from Fernando de Noronha Island. Operators include PY5EG, PY5CC, PP5JR, PY5GU, PY0FF, PY5ZBU, K1CC, K1LZ, K1ZM, K2DM, N5FA, LZ1JK and LZ1JY. The group will be using all ACOM 2000 amplifiers from ACOM. The antenna system is as follows:
160 meters: Verticals using balloons, phased inv-L
80 meters: Rotatable dipole, 4-square, wire beams
40 meters: 3 el yagi, 2 el yagi
20 meters: 5 over 5
15 meters: 5 over 5
10 meters: 6 over 6
Several tribanders and beverages.
For further information check out the Web site at:
http://www.inepar.com.br/araucaria
-or-
For live WebCam pictures from the 10m tower: http://www.noronha.com.br
Special awards will be mailed to entrants who work ZX0F on all six bands during the contest.

Now wait a minute. As of this morning I was kicked off "Bullchittum's" BARFboard which actually is nothing more than a BARFbored since no one goes there anyway. Lo and behold what did I just receive? Oh me-my day is made. Whoopee. They claim I tuned on the mailing list option for the BARF forum? I did nothing of the kind. Heck, I was so happy over being kicked off the damned thing. I and my wife went out to the Pancake House this morning. She had an orange mandarin crepe and mine was a cherry kijafa crepe. It was filling and I felt like I was full of crepe. I ask the guy playing around with my screen name to stop. Do not mislead Martin into believing I did anything to get into his good graces because I don't give a flip about him or anyone connected with him and his BARFools. Here is the message received. Can someone shed some light on it-I said SHED!
AF2Y,Doc

Dear radiosigs,

You've turned on the mailing list option for the deja.comm.barf discussion forum.

HOW DID THIS HAPPEN?

* You joined or were made a member of "Better Radio Discussion Group", a Deja Community that uses this forum for its mailing list

* You don't know? Check your My Deja.com account at http://www.deja.com/mydn_forums.xp

WHAT IS THIS FORUM ALL ABOUT?

* Discussion of hot amateur topics

HOW WILL I RECEIVE MESSAGES?

* Deja.com will email you a single daily summary containing excerpts of all the new messages posted to this forum.

* You can receive individual email messages or a Daily Full-text Digest instead by visiting: http://www.deja.com/edit_sub.xp?group=deja.comm.barf

HOW DO I USE THIS SUBSCRIPTION?

* You can post messages to this forum by replying to any email messages you are sent from the mailing list or by sending email to: deja.comm.barf@list.deja.com

* You can also read and post messages to this forum on the Web: http://www.deja.com/group/deja.comm.barf

HOW DO I UNSUBSCRIBE OR MODIFY MY SUBSCRIPTION?

* To unsubscribe or to modify your delivery preferences, visit:
http://www.deja.com/edit_sub.xp?group=deja.comm.barf

Welcome!

>

Yeah, I heard all that. The Liberty Net was forced down to 3947.5 because K5BLB, WB0CXJ, KK7HO, etc., squatted on 3950 for the express purpose of preventing the Liberty Net from using 3950. They do this all the time. They know damn well that the Liberty Net uses 3950 every Saturday night, yet every Saturday night Sidney and Timmy The Turd try to pull this crap in order to prevent the Liberty Net from taking place.

Anyway, the guys from 3945 came up to 3947.5 and complained about K4GAR's signal splattering down on 3945. K4GAR's signal didn't sound wide to me, but at any rate that's what happened. Vic suggested that the folks on 3945 move down a few kc, which they could have easily done because the band was totally clear between 3938 and 3945. But the 3945 guys refused to move an inch and started jamming the Liberty Net instead. All the while, WB0CXJ is giving a running commentary on 3950 about the chaos on 3947.5, and K5BLB went down to 3945 to congratulate them for jamming the Liberty Net! Now, I personally think that K4GAR's transmissions are way too long, but as far as I can tell his signal is not too wide. So I think the guys on 3945 were way out of line, especially when they started JAMMING the Liberty Net.

Now keep in mind that all this was IN ADDITION TO the usual jamming and heckling that the Liberty Net was already being subjected to! The Liberty Net has endured this illegal, malicious jamming EVERY time it has been on the air for at least the last 7 years! I am just an SWL, but even I would like to get my hands around the throat of just ONE of these jammers .... there would be one less jammer on the air, I can assure you!

Ya gotta feel sorry for poor old K5BLB. He used to jam the Liberty Net with all kinds of music, sound effects, and profanity. But now he has to behave himself if he wants to keep his ham license. All he can do now is cheer on the other jammers. I bet old Sidney waxes nostalgic over the good old days when "Anchors Aweigh" and the most gawd-awful profanity eminated from Sid's jamming factory in Estancia, New Mexico. What a shadow of his former self he's become! Now he's forced to bitch and moan for hours on end about the Liberty Net every night with his pals Timmy The Turd and the others. Sad, really sad.

Clean Your Shack -- Empty The Packed Boxes -- Convince Yourself You're Finally Going to Get Organized, Make Room For Things You Will Buy At This AUCTION!! AND, let the Dallas Amateur Radio Club help with your project! DONATION and AUCTION information are included in this message.

It's that time of year again! The Dallas Amateur Radio Club is ready to host another of its famous DARC Annual Auction events and is seeking donations to this event. If you are located anywhere in the Dallas / Fort Worth metroplex and you have equipment to donate for the auction, please contact:

Bob Peters (leave a voice mail) at 877-753-9577 or email: soundimp@pobox.com; or Kim Walker at (pager) 214-816-2743 or email at W5TIT@w5fc.org

Donations will be accepted all the way through 8:00AM on the morning of the auction! Please call early, like NOW, to get your items picked up--we have warehouse room for storage!

***** ALL DONATIONS ARE TAX DEDUCTIBLE *****

Receipts will be available for your donation to this not-for-profit organization!
*****NO COMPUTERS*****
We truly thank you for your thoughts but, please, no computers or computer equipment!

!! THEN, THE AUCTION !!

When: Saturday, Feb. 19, 2000
Time: Doors open at 6:00AM, AUCTION begins 8:00AM sharp.
Place: Calvary Family Church
Address: 801 W. Kearney, Mesquite, TX

This is the Dallas Amateur Radio Club's largest single fundraiser every year. Help us make this an even greater success than any other year!
Contact:

Bob Peters (leave a voice mail) at 877-753-9577 or email: soundimp@pobox.com; or Kim Walker at (pager) 214-816-2743 or email at W5TIT@w5fc.org

boooo, hisssss

Here's a novel idea, get on the air and acutally make contacts using CW, fill your log book with call signs and get to understand proceedures used. I know it sounds crazy but try it. Novices did it for years, still do.

Gees John, even a pathetic CBer like me knows code. What does that say about you?

You say you love Ham radio, yet you refuse to learn one of the hobbies most basic principals in order to advance through the hobby. Because of this fact, you're going to stay at the same license level forever?

If this is true, it sure doesn't sound like you LOVE the hobby. People who love things don't let obstacles stand in their way. You sound like the kid who wants to be an engineer, yet he doesn't want to learn math the long way because he feels it is pass�, and he can get the same result with a calculator. If all the kids in school felt that math was obsolete, I guess it wouldn't be a requirement anymore, right? Are educational requirements supposed to be dictated by popular consensus?

If YOU truly love the hobby, stop making excuses and go out and learn it! It takes about 1 hour every night for two weeks to be at 7.5 wpm....THAT'S IT!

> so it certainly DOES have something to do
> with ham radio.

First of all Tim, he was not talking about an Esperanto Net. He message was solely designed to promote Esperanto as an alternative of English, which has nothing to do with Amateur Radio.

Second, as I said in the previous message, this is the seventh or eighth message thread (not message, thread!) relating to this topic that I have seen over the last month or so.

This topic has been talked to death. Several people in this newsgroup, myself included, have given various reasons, in past threads, why Esperanto cannot succeed as an international language, or succeed as a alternative language on ham radio (lack of wide-spread support, no incentitive to learn it, etc.).

But that does not seem to end it. Two or three days later, another message thread is started with the very same subject. It just goes on and on.

And many of the messages contain provocations. One message talked about English as the language of a conquering people. This message's subject line talks about someone demanding non-hams learn English. Utter nonsense. And, again, not at all related to ham radio.

I've had enough on this subject. I was hoping a nasty response would kill it once and for all. I doubt it, but one can hope.

Dwight Stewart

Well Russ, that email FAQ only goes out to those who post to this
group. You spoke of others using your email address, and that's why
you received the FAQ? Maybe you need to determine why others are using
your address to post to this NG... Did you P.O. someone enough that
that they'd forge your address?

20m is not a WARC band; it's been with us for about 80 years.

So on which bands have you spoken to all those no-code 10W JA stations?
Certainly not 20m.

So do we: The Tech-plus exam is 5wpm and gives one an HF license.

>This is hardly sufficient for most emergency communications.

Right, and the quickest way for one to build their speed is to get
on the air after they've passed their 5wpm test.

>I have also
>discovered that most of the hams in my local club have stopped using CW
>once they have attained the level of licensing they were seeking.

Depends upon what the OTs encourage. If no one is exposed to say, SSTV,
few would suddenly develop some innate drive to use it.

> At least if we mandated thorough testing across all the modes, we
>would increase the odds of being successful in our communications. When

I'm all for it. Tell us your plan to implement it.

Yeah, right. Only an unemployed DJ in "Windy Western Kansas" with waaayyy
too much free time on his hands would bother wasting so much bandwidth on such
an inconsequential figure as Eric Oyen.
Gee, it really sucks to be "found out," doesn't it, Drew? But as you're
so fond of saying, Deja.com tells all, Mr. Durigan.

"Where's all the RADIO CRYBABIES?"
"I wanna hear 'em TALK TOUGH!"

Well, John, id you hadn't just memorized the question pool
you should know that applicants for US ham licenses ARE
responsible for knowledge of all current modes, and may be
required to answer questions on any of them.

> Why do I advance this position? Simple, because I believe the

Wrong. Only with CW can you communicate without any input
device. You don't even need a key, you can touch two wires
together if you know Morse code. Try sending SSb, or any
other mode that way.

> Halicrafters receiver will be good for only AM band listening. Any
> advice would be greatly appreciated. Thanks!

Well, yes and no, yes you can build a small outboard oscillator that you can connect right to the antenna input and create a beat signal this can be easily done, but between your old Hallicrafters and the out boarded circuit the drift may be more than you really care for, I have done this before with older AM receivers and since a drift of 25-50 Hz can make music sound horrific you find yourself constantly tweaking your homemade BFO with these older receivers. With AM your receiver could drift several hundred cycles with no discernible change in the audio. Not so with SSB.

So yes, if you want to do if for fun and listen to amateur and other SSB transmissions, no if your looking for serious SSB reception using older AM SW receivers. I'm pretty sure if you take a wire from the antenna input of your reciever and find an old AM radio (working) you can tap around on the AM radio untill you find the oscilator circuit by tuning the AM radio you should be able to create a beat signal in the SW reciever.

Your not listening very well, When someone calls out Mayday in a language YOU don't understand it's really worthless information when he reports his Long/Lat position to you isn't it? What are you going to do now that you've heard his emotional cry for help? This problem was overcome long before I, and probably you, were born when ships would use 500Khz as a distress freq. It mattered NOT what language was spoken at either end. See, it worked and no one had to learn English or any other language.

P.S it's sounds like the same old bleeps because you can not currently copy it. Any experienced CW op would pick an SOS out of the noise like you hear your wife calling you to dinner.

1324. ACS Newsletter for 10/18/99

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-24 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7uu7o5jak1@news.hawaii.edu>
Source record: 129110

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!
.....

>From the Editor's Desk:

This week was a double whammy - the 10 year anniversary of the Bay Area earthquake, and a 7.1 temblor near Barstow early Sunday morning. The earth is certainly active; the USGS predicts a 70% chance of a 7.0 plus earthquake in the Bay Area in the next 30 years. Keep your gear packed and continue your training; somehow I don't think we'll have to wait that long.

A tip of the hat to the Santa Cruz Amateur Radio Club for their hospitality on Friday October 15th, when I was privledged to give a talk on the ACS program. I met some old friends, and some new ones, too! Many of the members weren't active in the club 10 years ago when the earthquake hit... and I found myself in a discussion about who did what where during the quake operation.... Had a lot of fun, and I look forward to seeing your group again, soon!

I hope that everyone had a good time at Pacificon '99 last weekend, and that you'll mark your calendars for next year!

Stay safe everyone -- see you next week! Dave Larton, Editor

Current Events:

BELLA VISTA, Calif. (AP) - Fires burned out of control across thousands of acres of brush and grass on Sunday in Northern California, where the blazes have destroyed scores of homes and forced thousands of people to evacuate.

Winds moderated in the afternoon and some of those forced on Saturday to flee a 20,000-acre fire in Shasta County were allowed to return to see if they still had homes. More than 100 structures were destroyed.

``There's people calling who I've known for 20 years, calling to see if their houses are okay,'' said volunteer Fire Capt. Jan Gross. ``I don't have the heart to tell them they've lost it.''

Karen Jane Savage, 44, a volunteer firefighter from Junction City, Calif., died after she was hit by a fire truck near the blaze, said Rose Wyckoff of the California Department of Forestry.

The fire was 20 percent contained Sunday, and full containment was expected by late Monday, Wyckoff said. Some 940 people were fighting the blaze.

Dozens of homes were destroyed Saturday by the fast-moving fire, which began at 4:15 a.m., fanned by winds gusting to 25 mph. The loss by Sunday was estimated at $5 million.

Exact numbers of homes destroyed would likely not be available until the flames were extinguished, fire officials said.

A fire about 50 miles northwest of Sacramento that started Saturday had burned more than 36,000 acres by Sunday morning. One home was lost, and some 430 firefighters, along with a dozen bulldozers, five helicopters and six air tankers, were fighting to keep the flames away from other homes in a vacation area near Lake Berryessa.

In Yuba County, about 50 miles north of Sacramento, a fire charred 5,120 acres and threatened about 500 structures in the Dobbins and Challenge areas, which were evacuated Sunday.

In Trinity County, a fire that began two months ago has so far burned 111,000 acres.

Along the central coast, meanwhile, two fires in the Los Padres National Forest continued to burn after scorching more than 85,000 acres.

Newly Licensed 10 Year Old Pacific Division Ham Key to Rescue:-

On August 28, Ricky Rothbart, KF6VSH, of San Rafael, a 10-year-old Pacific Division ham used Amateur Radio to help save the life of an injured fellow amateur. Rothbart, who earned his Technician class license in April this year, has received a Public Service Commendation from the ARRL. He also gained a new appreciation of Amateur Radio's emergency service potential.

Late on the afternoon, Ricky was in the family car heading home from a trip to LA. "Ricky was in the back seat monitoring his favorite repeater frequencies on his HT," his dad, George Rothbart, KF6VSG, relates. "Shortly after 6 PM, he suddenly said, 'Hey, Dad, there's a guy on the radio who is bleeding all over the place and needs help!'."

Apparently, the other ham had sliced his arm on plate glass and was bleeding profusely and asking on the air for medical help. The injured ham, Mike Lewis, KF6YDN, of Antioch, California, was mobile in a remote area of Pittsburg, California, at the time and his cell phone was not working.

Ricky quickly replied to the call, identifying himself and requesting the man's location and additional details.

Lewis asked that Ricky contact his father in law, and he gave the Rothbarts a number to call. George Rothbart got on his cell phone and left a message on the father-in-law's answering machine. Then, he dialed 911 and--with Ricky working the emergency on his ham radio--the Rothbarts were able to give the 911 dispatcher the necessary information to locate Lewis and provide medical assistance.

Both George and Ricky are ARRL members.

Thanks, ARRL Letter.

.....

What's New on the Web:

FEMA Unveils New Web Page For The Media

WASHINTON October 19, 1999 -- A new "For the Media" cybersection has been created on the FEMA Web page to assist the press in covering the agency and in gathering information for disaster-related news stories. The new Web section can be accessed directly at www.fema.gov/media or through the FEMA home page.

The media section includes the latest advisories, breaking news and disaster archives. It also provides downloadable, high-resolution photos and graphics, radio actualities, biographies, speeches, backgrounders and fact sheets, and a listing of FEMA public affairs officers. In addition, reporters can enroll in a list-serve to receive FEMA press releases via E-mail.

A new feature on the site includes a listing of evergreen story ideas, ranging from season-specific ideas to significant disaster anniversaries to success stories on risk reduction activities.

The FEMA Web site, which receives as many as 20 million hits a month, has more than 20,000 pages of information and a search engine. The new media section helps group the information most of interest to the press and provides a specific location for obtaining the latest news from the agency.

Federal Emergency Management Agency (FEMA)
Office of Public Affairs --- Washington, D.C.

.....

This week's EMCOMM Bulletin:

EMC206 Major Communications Change 2/2
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC206 Major Communications Change 2/2 For release 10/18/99

Continuation from EMC205:

Since l997 the RIMS system has continued to be improved to provide better ways of passing essential data needed to assist local governments (OA's) with their needs during an emergency. Of course the telephone is still a vital link, but much of the data that is so essential is now on the computer in the local emergency management office - within minutes of when it becomes available in the State computers.

Yes, any system can fail with the failure of the Internet, or for other reasons. RIMS hasn't yet failed (which of no assurance as emergency communicators know so well, but still a fact.) As part of backup systems, the state has a Satellite Terminal in

each of the 58 OA's. Each is linked to State OES, over which it and the OA can pass the RIMS data if necessary. In addition, the Auxiliary Communications Service (ACS) is developing means to pass the RIMS data over various forms of radio should that be required.

The major change in communications is that voice messages have given way to computer data messages, hence communicators must think in terms of digital data rather than in mike time. While microphone (mike) usage may be necessitated in severe loss of standard systems, the greater likelihood is that emergency systems MUST pass digital data. The reason: - because that is the form in which the emergency management community is NOW ACCUSTOMED to handling it on a day-to-day basis. To put it very bluntly: the government emergency community has become accustomed to the day-to-day use of SEMS forms in the RIMS database and format. They EXPECT to see it that way. From what we've witnessed with the use of RIMS, that is a quite reasonable expectation which serves a very valid purpose.

Therefore, we must emphasize strongly that EMCOMM units need to be able to place information in the hands of their served agency in the same RIMS format that they are accustomed to on a daily basis. Determine to do so, for that becomes a MAJOR benefit to the EMCOMM unit. Instead of thinking in terms of "standard radio message forms" think in terms of "RIMS FORMS". Do that and your unit will reap deep dividends of success.
(series end)

To subscribe to bulletins, use the Subscription Services web page at <http://acs.oes.ca.gov/subscribe.html>. If you don't have web access, just send an e-mail message to <mailto:emcomm-bulletin-sub@harthaven.com>.

By what? Esperanto? I think it's GREAT that anyone would voluntarily
learn a second language (as opposed learning one just to satisfy college
requirements).

> input device...

I've done that too...in fact some two way radios used a
common speaker/mike element. But, based on what most hams
learn from the learning-for-licensing-and-little-more today,
it's a bit much to expect today's yakker-hams to figure out
how to do that......adjustment of levels may be necessary,
probably beyond that for which a 'control' is available.

I once found that a pay phone mic element was dead, after I
had reached the party I was calling...so I talked loud into
the receiver....it worked, but was simplex...I had to move
it to my ear to hear the response, as well.

1332. Facts about Masons and Ham Radio

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-24 00:00:00 UTC
From: n4jzh@amsat.org
Message-ID: <3813143e.230079031@news.mindspring.com>
Source record: 129118

Seems to me there was some discussion about Masons
1st Fact: NO MAN can become a Mason unless he confesses
to the fact that a supreme being created and designed both us and the world.
2nd Fact: NO MAN can become a Mason if he is an Idiot(That rules out 99.999% of You)
or doesnt support his goverment, doesnt mean he has to agreeBUT!!!
he should make do until better times prevail
3rd Fact: MOST men in Masonary are outstanding, law abiding, morally clean GOD FEARING MEN.
always seeking Brotherly Love, being the first to offer relief to any man,woman or
child without harm to himself or his loved ones.
4th: Always seeking the truth which is a devine attribute and the foundation for sound,
and moral virtues. but on the other hand theTemperance to restrain ourselves from
the vices that ruin most men.
5th: The Fortitude such as I have here to speak on this matter. (MM for 15 yrs)
6th: The Prudence to know what is right and wrong and to regulate ourselves
as to be an example to our children and others. (Dont see that here or in Washington)
What happened to prayer in schools, yes maam, yes sir, and Thank You???

7th: Knowing that Justice will prevail and regulate each and every one of us both here
and in the afterlife.
I could go on and on but the bottom line is that Masons,
Do and Have Done more Charity work in the U.S. and around the world
than any other organization worldwide.
Just ask any Widow, Orphan, Crippled, or Burned Child
How Has a MASON affected there life.
So before further discussion on Masons>> 2B1ASK1
So Mote it Be...

The best quite so far that indicates the gap that has created this thread. No other comment has so clearly stated the attitude that is truly poisoning ham radio. There are good hams both with and without HF privileges. And both sides of this seemingly endless argument have techs and "yakkers". Lets get rid of the snobbery and make some QSOs.

Donnie, Donnie, Donnie
There you go clouding the issue with facts. Telling us that most Masons are pretty average guys with an above average committment to their jobs, families and the less fortunate.

Well, Donnie, the bad news is that we all know Masons like that. We all have friends or relatives who are members. And from that we know that, as a rule, they are seldom "out of work", and are exemplary providers for their families.

And many of us have seen the Shriners hospital in SC. And the Masonic Children's Home in NC. And the Scottish Rite children's hospital in Atlanta. But those are facts, Donnie. We don't want that.

Please don't do that, Donnie. We want to hear how Masons are mixed up with the Illumati and how they plan to rule the world and fly around in black helicopters and show the UN troops where the guns are.

Donnie, just listen to David J. Smith and you will know. Or go to: http://www.newswatchmagazine.org/

Hi!
I do not know to use graphics programs, but I want to make a nice QSL card. If you have some free time and you want to help to a small radio-amateur club, then please design a simple QSL card, and send it to my e-mail address (formater@eunet.yu). The QSL card can containst maximum 2 colors and the background color. Informations about radio club:
Call sign: YU7ADY
Europe
WAZ 15
ITU 28
LOC. KN05BT

Address: RADIO KLUB "HERTZ" ADA
24430 ADA PO. BOX 47

Thanks
Jozef, YU7ADY

I have kept my discussions regarding this subject on a
conversational level without resorting to insulting anyone. I choose to
continue to do so. Frankly, you don't know anything about my personal and
professional background that would justify making such a comment. Suffice
it to say that I use electronic test equipment almost on a daily basis
that most hams won't use in months, so I think it is premature for you to
judge how I earned my ticket. I have not questioned your ability nor have
I questioned anyone else's ability throughout this discussion. As a
matter of fact, a few days ago I mentioned to a CW advocate that I
respected his position.
If you would care to re-read my original comment CAREFULLY, I
suggested thorough send and receive testing of all modes. My comment was
geared toward putting these other modes on the same level as CW testing.
I think that would be very equitable.

> with only one license.

Boy you do love to split hairs don't you, well a motorcycle became an automobile when automobiles were defined as self propeled vehicles suitable for use on a street or roadway.

automobile \Au`to*mo"bile\, n. [F.] An automobile vehicle or mechanism; esp., a
self-propelled
 vehicle suitable for use on a street or roadway. Automobiles are usually propelled by
internal
 combustion engines (using volatile inflammable liquids, as gasoline or petrol,
alcohol, naphtha, etc.),
 steam engines, or electric motors.

Falls under the square vs rectangle heading. :)

Wrong wrong wrong. Explain to us who monitors (or did untill a few months ago) 500KHz the international maritime emergency frequency? Was it the Police? The Fire Department, was it your local Paramedics? nope, they didn't monitor this emergency frequency because it wasn't a part of what they do. Which is also why the Coast Guard would not respond to someone pinned under a tractor in an Iowa corn field somewhere. Stop this silly comparison to police, fire, and paramedics. There is no argument they do not need morse for what THEY do but it has nothing to do with whether morse is used for emergency use, there ARE emergencys that are not taken care of by local police, fire, and paramedics.

> Arabic, or Esperanto?

Depends, on which hotel you pick, but primarily on your language competence and that of the desk clerk... or whomever you might succeed in having summoned by the desk clerk. I have gotten into trouble in various similar situations, for example by assuming that my Spanish was adequate and/or assuming that the clerk's English was adequate. I had Classical Arabic for a semester at Yale 30 years ago, and although this probably gives me an advantage over someone with _no_ Arabic in reading, for example, simple roadsigns, etc, it's not much help in your hypothetical hotel check-in situation. OTOH my knowledge of Esperanto got me out of a sticky situation in the Czech Republic where English, German, French, and Russian helped not at all. My rule-of-thumb is to learn the pronunciation rules for the local language, so that I can at least red from aphrsebook without being completely unintellible, and also to learn how to say "Please bring someone who speaks English!" and "Please lead me to X" (I learned long ago that being able to ask "Where is the X?" in more-or-less flawless Z-ian does very little good if you can't understand the reply in Z-ian!), always however remembering that _their_ idea of "speaks English" may not be the same as mine, and may simply not cut the mustard. English is _very_ widely spoken, but not widely enough so that you can always avoid getting into deep trouble by assuming that there will alwys be someone around who speaks English when you need it. Esperanto is _not_ widely spoken, but not so rare that it's useless. There are parts of the world where Arabic (or Mandarin, or Spanish, or Malay, or whatever) is more-or-less _essential_, and other parts of the world where it's useless, and maybe even counter-productive.

"Depends".

Yes, they do NOW. A few years ago there were plenty of Liberty Net
participants who were more than willing to occupy and guard the freq
for 3-4 hours if necessary before Net time....until certain supposed
Net adherents (one in particular) decided that some ops weren't pure
enough and proceeded to run them off the freq with insults and
berating. Now look at 3950: a wasteland all week, chaos on Sat
nites. How much does it take for some to learn?

Hint to the disaffected: check down the band a bit. You just might
find a friendly, little-jammed, relaxing QSO made up of some who
weren't good enough for 3950!

P.S.: Find out who Konrad Wallenrod was and you might come to a better
understanding of all this.

: > and the vast majority of trucks up to around 1 ton or so
: > with only one license.

: Boy you do love to split hairs don't you, well a motorcycle became an
;automobile when automobiles were defined as self propeled vehicles
;suitable for use on a street or roadway.
: automobile \Au`to*mo"bile\, n. [F.] An automobile vehicle or mechanism; esp., a
: self-propelled
: &#65533; vehicle suitable for use on a street or roadway. Automobiles are usually propelled by
: internal
: &#65533; combustion engines (using volatile inflammable liquids, as gasoline or petrol,
: alcohol, naphtha, etc.), steam engines, or electric motors.

That's all very nice - but - a motorcycle is a "two wheeled motorized
vehicle". Trikes are treated as "automobiles". ~~~

: Falls under the square vs rectangle heading. :)

Falls under spliting wrong hair(s).

What are most truckers running these days in terms of hf. It seems I hear
alot of them on 2 meters but in terms of hf are they doing that in lieu of cb
It seems it would pass the time vs cb but how can they speak to anyone local
on hf. I have heard alot of truckers are using 10 meters Is this true and is
there
a common freq like channel 19 on 10 meters that they use or are they using
20 or 80 Can someone please advise. I have a good friend that is a trucker and
holds a ticket (General) and his wife want to buy him a nice gift in terms of
a rig but is looking to me for advice
Much thanks

The "un-official" frequency for ham truckers is 14.301-14.303
Note these guys and gals are all professional drivers and it
does not sound like ch-19. Some also run Counties on 14.336

Uh, yea, I guess so.

Sit around and wait as Kim suggests and you'll watch the next solar peak pass you by... When the FCC finally gets around to MAYBE making a change we should be right about in the middle of the next solar dip. Then you can wait another 5 or 6 years for the DX to come back. Or get on the air and start making a CW contact each night untill your code speed is up to 15 wpm or so, go take the test, then get on and work some great DX, the bands are getting better and better. Trust me, don't wait.
Besides the 11 year solar cycle, life is just to short. Do it now, right now.

1367. Yaesu 5100 extended mod problem

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-25 00:00:00 UTC
From: jmtsr@mindspring.com
Message-ID: <3814ae49.106535624@news.mindspring.com>
Source record: 129041

I just did the extended receive mod on the Yaesu 5100. When I turned it on after the mod to set the limits it will only let me set the UHF limits, but not the VHF.. it gets through with the UHF, and that's it. The VHF side is very limited. I have double checked the Mod instructions with the jumpers, etc..

The mod said when the unit was turned back on, you would see:

300.000 & 20.000

I get :

300.000 & 144.000

I have also tried the D/MR, F/W, REV, while turning on the radio, but still get the same 300.00 & 144.000.
What could be wrong?.. It will only set the limits for the UHF... anyone else run into this problem?

Here's my Jumpered list:

R4001
R4003
R4004
R4051
R4061
R4062
R4064
R4068
R4070
R4072

R4072 was unsoldered and jumpered.
R4067 was unjumpered for Band Switching. I replaced this, but still get the same results.
The only thing that I did , that the instructions didn't mention was I removed the head from the two ribbons connecting the control head.... didn't know if by removing one of the jumpers it reset the radio in some way, and that could be one reason, since the ribbons were not plugged in at the time of the Mod?

Thanks for any help.

You stupid idiot "liberty nit wit Net Memebers" seem to think that 3950 is "YOUR" frequency.
There are "no squatters" as you put it.!
On Amateur radio It Is a "First Come" basis for use of freqiency!
Whine, Cry, Spin all you like.
You SOB's interfere where ever you go and what a lame attempt to blame someone else for YOUR interference......
The liberty net moved in on top of a QSO on 3947 first, ran them off, then moved to 4947.5 and splattered both direction up 2.5 kHz(to 3950) and down 2.5kHz(to 3945)
All the while knowing that they were in the 3kHz pass band of everyone's receiver.
Now they're trying to blame their mis-deeds on the people that were using 3950 and the fact they couldn't use "their" frequency. One more time for the mentally challenge. There are no squatters, amateur radio frequencies are first come basis. The fact that you would even call some squatters indicates that you think 3950 is "YOUR" frequency, i for one want to see the deed. LOL LOL LOL LOL

>DADADAHDIT

That's American Morse (what was used on the telegraph wires); there is no exclamation mark for international Morse (what we use on the air).

American Morse contains such characters as didit dit for the letter C, dit didit for the letter R, didit didit for Y, didahdahdit for 1, et cetera.

It should be. Amateur got all their procedures from the maritime bands; not much originated on the ham bands.

Yep, I've learned alot this year. I learned alot by listening to 3950 - The Great Liberty Net. W1WCR is the greatest guy to ever hold a ham licenese! Then we have Al Parker, N2SAG, another man of great Intellegence. Kevin Strom, WB4AIO - Whom I've learned alot about my white heritage. We all need learn to stick together as whites.

I give my life to the Liberty Net!

Long Live 3950!

>On Amateur radio It Is a "First Come" basis for use of freqiency!
>

Yes, it is first come first serve. Your QSO was on 3950 first, which is why the
Liberty Net could not operate on 3950. But, come on now, we all know what
you're trying to do here. You and Sid start QSOs on 3950 just to cause trouble
for the Liberty Net; to force them to find another frequency in hopes that
there will be nowhere else for them to go. And then all you guys do is talk
about the Liberty Net all night long. It almost seems like the only reason you
guys get on 3950 is to cause trouble for the Liberty Net. You're not fooling
anyone! Why don't you guys show some courtesy to a regularly scheduled net?
Just QSY prior to net time and allow the net to operate on their scheduled
frequency. OF COURSE the Liberty Net has no "right" or ownership of 3950, but
most nets have a "scheduled" frequency that they prefer to operate on.
Everywhere else on the ham bands I hear gentlemen operators gladly and
graciously QSY off a frequency because they know a net is scheduled to come on
in a few minutes. Why can't you folks practice the same courtesy? Your so damn
filled with hatred of the Liberty Net that you just have to "put it to them"
one more time, don't you?

>
>You SOB's interfere where ever you go and what a lame attempt to blame
>someone
>else for YOUR interference......
>

Since I am neither an SOB, nor do I own an amateur radio transmitter that can
"interfere wherever I go", your above comment is not applicable.

>
>The liberty net moved in on top of a QSO on 3947 first, ran them off, then
>moved to 4947.5 and splattered both direction up 2.5 kHz(to 3950) and down
>2.5kHz(to 3945)
>All the while knowing that they were in the 3kHz pass band of everyone's
>receiver.

>

I didn't hear the beginning of the net, so I don't know about any QSO on 3947. But needless to say, if you folks would have showed some courtesy and allowed the Liberty Net to operate on their regularly scheduled frequency, none of last night's mess would have happened. 3 khz bandpass? My receiver has, among others, 2.3 and 1.8 khz filters, which I found more than sufficient to hear 3945, 3947.5, and 3950 without any adjacent-channel splatter. Besides, correct me if I'm wrong, but I don't think there is any FCC reg concerning a 3khz or 2.5khz separation, is there?

>
> Now they're trying to blame their mis-deeds on the people that were using 3950
>and the fact they couldn't use "their" frequency. One more time for the
>mentally challenge. There are no squatters, amateur radio frequencies are on a
>first
>come basis. The fact that you would even call some squatters indicates that
>you think 3950 is "YOUR" frequency, I for one want to see the deed. LOL LOL
>LOL LOL
>

Again ... it's not MY frequency (or yours). I've listened to 3950 for a few years now, and I know what's going on, and what you're trying to pull here. I remember what your friend K5BLB did to the Liberty Net, how Sid and WB0CXJ jammed 3950 practically every night, and jammed the Liberty Net every week. Now that Sid has been called on the carpet by the FCC, he's been forced to behave himself. But by no means has Sid's war against the Liberty Net stopped. I've been listening to 3950 for a few hours now, and K5BLB, WB0CXJ, and KK7HO have been "dissing" the Liberty Net all night long. Almost every time you guys (and WA9KJI, by the way) get on the air, all you folks do is lambaste the Liberty Net. It rules your every waking moment. You guys are so consumed with hatred and jealousy of the Liberty Net, it is amazing! Surely it will be your undoing. ... one can only hope!

1377. FS: HTX-404 Amateur UHF handheld transceiver

It would appear that GMDSS should be a back-up to Morse. The following
comes from long time radio officer:

I worry about the future of maritime communications.
We have most of our eggs in one basket: satellite communications
and the SITOR stations really don't have enough traffic to survive
financially,
in the long run, without government support. I don't really see
Globe Wireless (KPH/WCC/WNU) and Mobile Marine Radio (WLO/KLS) being
around 10 years from now.

On most of my voyages, even though deck officers have the new GMDSS
licenses and are now doing much of the communications work, they often
don't understand what they are doing.

The GMDSS false alarm rates still exceeds 95% due to transmission
errors,
improper forwarding of DSS transmissions, etc. Either the deck officers
make the mistakes themselves or they get exasperated and turn the
equipment
off. Thus the reliablility of the GMDSS system for ships that are truly
in distress is being compromised.

This has been a subject at internatinal conferences but no one wants to
"rock the boat" and admit that the GMDSS system isn't perfect and that a
licensed
WELL TRAINED operator is still needed. Cost savings are the orders of
the day.

It will take a major maritime tragedy before this is truly addressed.

(ex-maritime Radio-Electronics officer
and ex-owner/operator of WKM/West Haven, CT

Radio).

Anything that helps to break through language barriers which prevent amateurs from communicating with each other is certainly a welcome topic for this newsgroup. A Technician usually doesn't encounter such barriers with his VHF+ license, so it's no wonder that you might believe the discussion is off-topic.

>And, again, not at all related to ham radio.

We're communicators, first and foremost. Anything which helps facilitate communication among the world's amateurs is very much related to ham radio.

As a former member of MENSA with an IQ proven above the 99th percentile level, you'd think I had learned not to duel with an unarmed opponent. N-o-o-o!
However, as long as some uninformed person makes outrageous claims I know to be false, i.e: more Klingon speakers, Esperanto can't POSSIBLY work - to name but two, I will continue to refute them.
Sometime I wonder if it's not lack of knowledge but outright maliciousness.

After years of reading the ENDLESS code-no code arguments and downright ad hominem attacks relating to purported sexual preference (Who really gives a rat's rectum anyway), it's astounding that propounding the use of a planned, time tested language spoken daily in over 120 countries (!) can raise such a ruckus.

Oh well, don't confuse folks with the facts, I guess, after they have their minds made up.

>> else, especially that most critical position report.

>Understanding the word MAYDAY or even the cries for help in a language
>you don't understand, you will hear that the person is in distress and
>requires help.

To where will you send the help if you don't understand the person's
language? On the radio I could scream my location to you in say,
Vietnamese -- from my tone of voice you'd certainly understand that I
was distressed, but you'd be helpless to assist, for you wouldn't know
what I said.

This has all been thought about decades before you and I were born.
CW was chosen as the international mode over voice and all other modes.

>In Morse Code, emotions and cries sound no different
>than any other type of message, just the same ol beeps.

The Auto Alarm and SOS convey as much emotion as any verbal cry for help.
Until you been on the receiving end of a distress call, you have nothing
to draw upon to make the claim you have made.

>> >Why do people always insist on
>> >doing things backwards or the hard way? Just open your mouth and TALK!

>> What if the listener doesn't understand English?

>(OR MAYDAY???)

On the radio, it's assumed that everyone understands "mayday."

>He doesn't understand English but he took the time to learn Morse Code
>instead?!

This thread concerns HF radio communications, so yes, the world's HF
licensed have taken the time to learn Morse.

>Good thing the Air Traffic controll towers around the world
>all require ENGLISH over Morse Code!

You're bouncing around like a pin ball again. Stop it you'll get an ulcer.

In Herb Shoenbohm, we have the downfall of a tragic figure, a true Shakespearean tragedy. Here's a guy with more brains than God endows any of us, living on the pristine island of St. Croix, with loving Wife and family, and ham radio a-plenty.

One side of him is politically involved. His keen mind, facile in communications, is capable of sorting out complex issues of history and politics. He takes strong views, which he isn't reluctant to express nor have contested. There is a fun Herb who likes music and partying. Another side soars in times of disaster to help his fellow man.

But he is a troubled man, unable to determine right from wrong, riddled with bad judgement, unempathetic in his dealings and rigidly inflexible. The tragedy of Herb Shoenbohm is that this human being of such potential is unaware of his own failings!

> that they'd forge your address?

It happens all the time. When Real audio does a mailing I used to get over 50 copies. There is usually no way to track down these people.

Anyway, the issue is this guy collecting e-mails to spam people. I should not have the burden of doing all this stuff (trying to contact people, filtering my e-mail, etc.). The problem lies with the person who is causing this problem, Mr. Schleck. It is his responsibility because he is the one sending the e-mail.

It is interesting how people on this list are going to great lengths to justify his spam.

Message-ID: <wd1v-2510990644310001@wdonev.ne.mediaone.net>
Source record: 129061

Macnet - is the WWW group of ham radio operators that use Mac computers
to extend their communications capabilities.

We are an informal group of amateur radio operators that use Macintosh
computers called "Macnet" with > 880 members world-wide.

We stay in touch with each other via Internet and we have a HyperCard
stack that tells the story of each of us called "Macnet Roster" that lists

o Amateur Radio CALL SIGN
o EMAIL + HOME PAGE URL
o FULL NAME
o Street ADDRESS
o CITY, STATE, ZIP
o Macs You are using
o Radios You are using
o Software You are using
o PASSIONS you are into
o COMMENTs or QUESTIONs

Macnet members can then communicate with one another directly or use our
Macnet Moderated Mailing List to pose comments or questions to all of us
on the Net.

To join Macnet, put YOUR STATS in an e mailto:wd1v@amsat.org and access

* Macnet Ham Radio Software Listing - as the name implies, its "The List" of
the latest - much of it with FTP links so what you see is what you can
get with just a click. http://people.ne.mediaone.net/wd1v/Page7.html

* Macnet Software Collection

ftp://www.qsl.net/pub/wd1v/mn1.sea.Hqx Collection Disk 1 - Logs + Demos
ftp://www.qsl.net/pub/wd1v/mn2.sea.Hqx Collection Disk 2 - DX + Contest
ftp://www.qsl.net/pub/wd1v/mn3.sea.Hqx Collection Disk 3 - Educ + Rem Ctrl
ftp://www.qsl.net/pub/wd1v/mn4.sea.Hqx Collection Disk 4 - Astro + FAX
ftp://www.qsl.net/pub/wd1v/mn5.sea.Hqx Collection Disk 5 - Pkt Terminals
ftp://www.qsl.net/pub/wd1v/mn6.sea.Hqx Collection Disk 6 - Mac TCP/IP

Macnet Ham HyperCard Tests Are Discontinued. Go to ARRL WWW page to download
new test pool data (questions, answers, and new graphics for EM Safety).

http://www.blackcatsystems.com/software/elmer.html New Shareware Called Elmer

ftp://www.qsl.net/pub/wd1v/mn7.sea.Hqx Collection Disk 7 - Morse/Exam Helper
ftp://www.qsl.net/pub/wd1v/mn8.sea.Hqx Collection Disk 8 - Sats/Dove/GPS
ftp://www.qsl.net/pub/wd1v/mn9.sea.Hqx Collection Disk 9 - C/C++ Programming
ftp://www.qsl.net/pub/wd1v/mn10.sea.Hqx Collection Disk X - Macnet Roster

"Who's Who" of Hams Using Macs! HyperCard stack with more than 880 entries giving the names, addresses, phone numbers, of radio operators all over the world that are using Macs. Check out their projects and their passions and put a design on your Mac Radio future when you see what neat things are being done!

* Macnet Ham Radio.FAQ - compiled on a Mac with a lot of links to great Mac FTP sites for radio, electronic engineering, and similar data. Superb for new hams or folks studying for a license. http://people.ne.mediaone.net/wd1v

I have no problem with the purposes. The point is,
however, that CW is NOT needed to be fully
compliant with and or to fully honour the
purposes. No where in Part 97 dos the purpose
define any need for CW contacts at all.

Cheers,

When did a motorcycle become either an automobile or
a truck? I said above: "I can drive ANY automobile
and the vast majority of trucks up to around 1 ton or so
with only one license.

Cheers,

How convineint for your argument. Can the JA nocode
HF ham make contact with coded hams? Does
the JA nocode HF ham operate in the amateur
segements? If yes, then the restrictions
you claim are meaningless to yoru argument.

Cheers,
Bill K2UNK

Actually, that just feeds it. The best way to *kill* an unwanted thread
is for everyone to ignore it. If people won't ignore it, I'd question
whether it's unwanted.

Kill files help too.

I imagine (or I hope) that Bill is apologizing for carrying on at the mouth about Esperanto to people who have had enough of his one-sided ranting.

I hope that there are some Esperantist Radio-Amatoroj out there making a good impression for Esperanto. As an Esperantist, I'm embarassed to see Bill apologize for being a fanatic, then go and post 4 or 5 new threads about Esperanto armies and the such.

Bill - try this - for 6 months, only post about Esperanto when somebody brings the subject up.

David Smith is full of shit, like most of you fucking Baptists. I understand the Baptists are now trying to convert all Hindus to Christianity, good fucking luck. What ever happened to just minding your own business? I can't wait until December 31, 1999, I bet David Smith is gonna be crapping his undies. Repent, the end is near you evil sinners! You only have about 2 more months because the world is gonna end at midnight on December 31! Give me a fucking break already!

Ku4UV >>

**Please please please Mr.Brown, tone down your adjectives. This is a family board even read by little old ladies sitting before their CRTs, crocheting and needlepointing. I prefer calling them Baptist Boobs who in reality stole a Hebrew custom in order to convert. Cleansing by a ritualistic bath is called a mikvah and predates Christianity by eons. The idea of washing one's hands for purification purposes has been a part of the Passover Seder eons before Christianity. Taking a bath to remove everyday schumtz predated Christianity by eons and it looks like anyone who bet on the Braves in the World Series is going to take a different kind of bath. And now these Baptists think they have a monopoly on "holy" water. Duh? Don't get so wound up over a jerk like David J.Smith and his equally jerky followers like N0VFP. All Smith is after is MOOLAH with his tapes and books and after Dec.31,1999 with nothing unusual happening. he'll go back to being a janitor at the headquarters of World Wide Christian Radio in Nashville.

Trade even up: Viking Valiant 1 for Hallicrafters SR-150 or 400 with power supply/speaker, in like condition.

Freshly tubed, solid state modules in place of 846's. Front panel is exceptionally
nice; nearly mint. A few scratches and minor knicks on the upper lip.
Only draw back, someone widened out the right hand manual/ptt
switch hole. An on/off flange hides the flaw nicely. All knobs and inserts
intact and like new. Crystal knob cover is there. Lettering perfect. VFO
is beautiful.
The maroon cabinet has been painted, not a perfect job, but not bad.
Has a transmit-receive relay built in.

Let me know what you have!

Regards,

Cary Fries
cfries@tic.bisman.com

I am looking for recomendations and to eventually purchase a legal 10m mobile amplifier that will cover the high end (29.000 to 29.700Mhz) of the band. I almost exclusively operate on FM with some AM when conditions are optimal and there's more than New England and a few W9s propagating into NJ. Although I know there is no way to assure anyone that I'm not a CBer looking to modify such a unit to work on 27Mhz other than to state my call and ask anyone who may be suspicious of my intent to compare my e-mail address and callsign through Buckmaster or any other such call sign server. I currently use a 10w Uniden on 10m into a Hustler fold-over and most of the time, I can't even hit the open Caribbean repeaters when they are S9 or better. I'm looking for an output of 100 to 150w that won't kill my 90amp GMC truck alternator. I have no idea of what's available on the market, new or used. Any help/advice is most certainly appreciated.

Thanks,
73 de Tom KB2FIK

Good day all
I wonder if someone can help me somewhat. I just passed my general
and bought an hf rig. After tuning around the bands I realize I need
more knowledge of the logo before I start working some stations. For
instance if I go to 10 meters and someone gives me a ten ten number and
I dont have one what do I say. Also when I want to get on ten meter
do I just start calling cq. See I need to know some more before I am
comfortable. Is there a book out there that explains getting started
with hf or any urls. I am kind of mike shy right now even though I
passed with not much problem. I just dont know when to say qsl or qr
zed at the proper times without making an asshole out of my self
You people have been great so far. My elmer is out of the country for
awhile or I would ask him so any help would be greatly appreciated
Many thanks Doug

Yea, Yea, You should have the benifits but not the burdens,
hear this all the time. Immagine the DIFFICULTY of having to invoke an
E-Mail filter.

OK 3947 is a scheduled frequency for the Virginia Phone net. When
the LIB NET goes to that frequency they interfere with that net.

Doug,
There are many references out there for you. The ARRL handbook is a nice publication. However, you don't need it. No one is going to think less of you if you simply say,"I just got my ticket and have neveer done this before" or "what is a - number"? In general hams are not a bunch of cut throats that are looking for a reason to dis you. Sometimes this NG might make you feel that way, but this is just a small percentage of the operators that are out there. As far as QSL or QRZ...technically they are not even ment for voice operations. You can say "roger", or "ok sloop I got all of that"

Since you seem to know the code at 13wpm, why not use that for a while, listen on the phone portions until you get comfortable. I will be happy to meet you on CW if you like, I'd be happy to meet you on phone too, but my rig only has CW.

Eitherway, just jump in and don't be afraid to ask. We are here to help you.

Demographically more affluent?? What on earth does this mean??? Do
pilots beget more children than hams? If so, is this attributable to
the positive influence of female flight attendants or to the possible
negative influence of electromagnetic radiations? Or is it because
hams tend to stay up all night talking on the radio?

H-m-m-m-m--- Can't disagree w/any of these objectives. Just can't help but wonder, why do Masons need to be a secret society to uphold good objectives, when for 2,000 years Christ's church has upheld love, truth, humility, and service and held up all its rites and doctrines to the light of full public disclosure? And why the name Mason? Isn't Christian good enough?

Yes, I have done this when I was caught without a BFO-equipped rcvr and
you don't even need a wire connection. Just tune in the SSB signal on
the comm rcvr, set the AM rcvr beside it, turn it on and tune the AM
rcvr until you pick up the beat of an osc harmonic in the comm rcvr.
But, I'm surprised you have a Hallicrafters with no BFO, there were
very few made except perhaps the Transoceanic imitator models.

By the way, I expect it will be a very long time before SW will be ALL
SSB!

Hmmm, did that include the era of the Borgia popes? And a number of
others?

> And why the name Mason? Isn't Christian good enough?

The history of christianity is rife with examples of organizations of
good christians that faced the decision of secrecy or persecution. So,
what's your point?

Welcome to ham radio!

Don't let lack of experience worry you--most hams are more than
willing to help a newcomer gain experience, just be honest with them
about the fact that you recently got your license.

As far as a book goes, probably the best overall guide to
operations, versus technology, is the ARRL Operating Manual (available
from the arrl web site or from amazon.com if it isn't available locally
where you live.10-10 numbers, for example, are explained on page 8-13 of
the manual (6th. edition--the current one so far as I know), including
an address to write for more information.

I used a (much) earlier edition of the book when I was new to
ham radio back in the 1970s--and I _still_ find myself referring to the
book (I always buy the new edition when it comes out), despite over 20
years as an Advanced class operator.

A few tips for HF operations:

1. For dx, the best overall band is 20 meters. It's consistently
active both day and night. If you work a station that has a number of
people calling (don't start with one with a major pile-up--work your way
up to that), the correct approach (and you _will_ see a lot of people
doing it wrong) is to send your entire call sign (not just the suffix)
once after the station has cleared with its previous contact and then
allow him/her to reply. If you don't get him/her on the first try (and
if you do, you're VERY lucky), try after each qso ends until you do. Be
sure to pay attention to any special instructions (i.e., s/he may be

transmitting on one frequency & receiving on another--working split--or may be "working by the numbers" which means s/he is only taking calls from a hams with that number in their call sign and working "up" through them numerically). The term, "QRZ," pronounced kew-are-zed, indicates that the station is ready to receive a new call. Not all dx stations use it but many do. Other good dx bands are 15 meters, 80 meters, and 10 meters (primarily during the daytime although with the sunspot cycle where it is anything is possible!).

2. When working cw don't try to show how fast you can send, unless you can receive even faster. Many ops (myself included--and I'm _not_ a regular cw op so someone else may have more advice here) can send at significantly faster speeds then we can receive. The problem is, most people _returning_ your call will send at the speed that you are sending at--and thus you won't be able to copy them. Try to send at a speed you can comfortably receive at in the beginning, then work your way up (if you like the mode) until your speed increases.

3. Explore new modes as far as possible. Most new hams start with phone and tend to "live" there. But a lot of modes are available. For example, I'm an avid sstv fan (my ultimate goal there is a 5-band dxcc in sstv), as well as a qrp (low power--i.e., 5 Watts or less) phone operator. You may find yourself interested in packet, rtty, cw, or any of a dozen other modes if you leave yourself open to experimentation. Incidently, if your computer has a sound card, you can add sstv to your modes very easily--and inexpensively--by connecting it to your rig (several sites including http://www.siliconpixels.com) have instructions and plans for a simple home-brewed computer/transceiver interface that takes about 20 minutes to build using parts available at any radio shack. They also have outstanding software available with fairly full featured demo versions available for download (I'm a registered ChromaPix owner--one of their products). The primary calling frequency for sstv is 14.230, although every major band has one as well.

4. In some ways it's a good idea to treat ham radio as you would treat a new newsgroup--that is, listen to what is going on before jumping in. Ignore the few lids you'll find (mostly around 3950, but it occurs on other bands as well. If you hear a lot of jamming, heterodynes (carriers), rude or crude language, etc., just tune on by--it isn't a regular event but when it happens the best thing to do is just ignore it. Hams, for the most part, are very responsible and polite operators, but like any group of people we have a few members who tend to give the hobby a black eye.

5. Most of all--enjoy the hobby. Don't be afraid to make mistakes--all of us did when we were new on the air. Jump in and answer some CQ calls (or make your own) and get to know people. At first you'll probably find yourself focusing on discussions of equipment, weather, propagation, etc. but try to branch out from that. Ham radio really comes alive when you get to know the people you talk to--not just what they operate or where they live, but what is important to them, what

their lives and cultures are like, how they feel about issues, etc.

Hope it helps--if you have any specific questions, feel free to
write and I'll do my best to answer them.

73 de ke8hh,

Rick

SK is "end of work," while AR is "end of message."

After your *final* message has been sent and farewells exchanged, SK
is then sent. It's the CW equivalent to phone's "out." It tells the
other operator that you will not reply any further.

Lets just say this again Masons do more charitable work accidently
that most high overhead orginazations i.e. United Way... any day every day...
As far as Christians my interputation of the work Christian is:
'' Christ Like'' and the last I heard that the last man to be perfect
was nailed to a wooden cross for his beliefs and teachings. But it is wonderful that man
can renew himself at anytime all he has to do is ask and he shall recieve.
So Mote it Be.....

I don't wish to minimize your angst and concerns, but rather than going step-by-step through the process, the best advice I can offer that will make the task at hand easy and the least confusing would be to suggest that you go to a local auto parts store and go to the accessories aisle and find the antenna shelf. Start reading the packages. They will tell you if the one in hand will fit your car. Keep looking until you find one that will. They will list on the package the makes and models they fit. Know what you are replacing. Does the one you're replacing telescope in sections? Does the entire thing stay in one piece but retract into the fender? They all will have easy instructions somewhere on or in the package. Usually all the tools you will need might be an adjustable wrench and/or a pair of pliers. The job will most likely be very easy. I hope this helps.

hello, i am the general manager for a active new student radio station, WBNC, in the washington, d.c. metro area. there are several things i'd like to get across within this thread...

*please get in touch with me if you are a band interested in getting some airplay. we'd love to get new music!

*we are currently trying to attain a low frequency broadcast signal while we apply for an fcc license. any sort of advice on this would be GREATLY appreciated.

*if there are any other student radio stations out there that would like to form a coalition with WBNC or share some news and insight please get in touch.

*grant information needed

*conference information would be great

*please forward this email to musicians, music educators, other student radio activists or anyone who may be interested in WBNC and the like.

THANK YOU!!! please reply to this message at pnaywahine@hotmail.com .

1438. Duplexer cutoff frequencies?

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-26 00:00:00 UTC
From: Brett - N7OLQ <brett.miller_nospam_@intel.com>
Message-ID: <7v5bu6$b4i@news.or.intel.com>
Source record: 128986
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.misc

I need to buy a duplexer for my Kenwood 732a because it has two antenna outputs and I want to hook it to 1 antenna.

I am confused why all the dual-band duplexers listed in the HRO catalog have frequency ranges of 1.3 MHz - 150 MHz and 400 MHz - 540 MHz. Unless I misunderstand the specs. The 2m band would go though the 1.3 - 150 MHz bandpass etc. So does this mean that if I want to receive signals at 162 MHz, that they will be very attenuated (because rolloff starts at 150MHz)? Is the same true in the UHF band if I want to listen in the 800MHz band which rolls off at 540MHz?

Or do I have it backwards - The UHF side filters 1.3 - 150 MHz etc.

Thanks in advance

Mayday is not a specific language, it is international and a lot easier
to learn than Morse Code, for which Long/Lat positions would also not be
understood by those who don't know more than SOS by code! Hopefully the
radio signal can be tracked, so both Mayday or SOS is good enough if you
are planning to be rescued by another country, In most emergency
situations you want to be rescued by someone in your own country and
they will all understand your voice call for help, but not all will
understand Morse Code.

> P.S it's sounds like the same old bleeps because you can not currently copy
> it.

Nor 99% or more of the population on this planet!

Any experienced CW op would pick an SOS out of the noise like you hear
> your wife calling you to dinner.

Great, most everyone knows SOS, so lets just make the requirement to
know SOS in Morse Code? Any more would be worthless to anyone listening
who doesn't know more than that anyway.

frequency?

Morse Code is no longer USED for maritime, 500Khz, or any other
emergency use.

Only nastalgic and hobby use.

> what I said.

MAYDAY is international. The same word is used and understood as the
international call for help WORLDWIDE.

But on another note, when will someone in the USA be asking for help
from someone in Vietnam or any other country? If I am in a car accident
and need help, I want someone CLOSE to help me, not someone thousands of
miles away! When I call 911, I don't have to know any foreign languages
or Morse Code either!

> This has all been thought about decades before you and I were born.
> CW was chosen as the international mode over voice and all other modes.

All Air Traffic Control Tower operators and airplane pilots are required
to know ENGLISH worldwide, not Morse Code.

Remember, Morse Code was invented and used because there were no such
things as microphones yet! We now have telePHONES in our homes, not
teleGRAPHS!

> >In Morse Code, emotions and cries sound no different
> >than any other type of message, just the same ol beeps.
> ___
> The Auto Alarm and SOS convey as much emotion as any verbal cry for help.

Not to someone listening (perhaps the only person who hears your signal)
who does not UNDERSTAND Morse Code! SOS or HELP sound no different than
HELLO or HAVING FUN, just beeps! It is all monotone, no way to hear
yelling or the urgency sound of a voice when someone calls for help.

> Until you been on the receiving end of a distress call, you have nothing
> to draw upon to make the claim you have made.

OK then, YOU go ahead and use Morse Code the next time you need to call
911 and prove your point. The rest of us know that your "distress" will
sound to the operator as nothing more than some non-emergency prank
phone call.

> >> >Why do people always insist on
> >> >doing things backwards or the hard way? Just open your mouth and TALK!
>
> >> What if the listener doesn't understand English?

Then he wouldn't be able to help you anyway, would he? How would I
convey my symptoms or ailments?

> This thread concerns HF radio communications, so yes, the world's HF
> licensed have taken the time to learn Morse.

How many still REMEMBER it? I had to learn it, so did several of my
friends but we don't remember any of it! It was just something stupid
you had to learn in order to use a microphone on HF frequencies! Only
those Hams that actually LIKED or USED Morse Code remembered it. Not
ALL HF Hams know Morse Code! A lot of us forgot it!

> >Good thing the Air Traffic controll towers around the world
> >all require ENGLISH over Morse Code!

Rick,
I agree with all that you posted, but I must mention that 40 meters is also
a very good DX band for more advance ops.

Actually, a good CW net can handle more traffic faster and
more efficiently than a phone net any time. It just takes a
little effort to learn and use morse.

Even if no one used it, I would retain it simply because it
acts as a filter. In general, people tend to value something
more if they have to put a bit of effort into getting it.

Thank you for addressing the crux of the code-no code argument. I
had been disheartened by much of the discussion to this point because
everyone seems to get caught up with the perception that CW, as a mode,
is superior to all others. The position then follows that CW testing
should continue as-is.
I do not believe it is proper to "filter" people off the bands,
except for cases where rules are broken. I do respect your opinion in
this matter, however. I think the pros and cons of CW testing as a
"filter" should be explored further in this thread.

Federal Communication Commission does not agree. In its 1990 Report and Order, FCC said:

10. The American Radio Relay League, Inc. (ARRL) states that our objectives in this proceeding are basically sound and are consistent with its own rationale for the creation of a codeless class. [15] An ARRL study committee has concluded that the perception of the Morse telegraphy requirement filtered out too many desirable and technically qualified operators who have not recognized the value of manual telegraphy as a means of practical communication. [16]

14. Telegraphy skill has been required for each person who has ever been issued an amateur operator license in the United States, including the current 493,000 licensees. Mastering the Morse Code was an arduous task for many of these licensees, and by developing their telegraphy skills they expressed their intense desire to become amateur operators. It is understandable, therefore, that there are licensees who are reluctant to share the amateur service frequencies with new licensees who have not made a similar effort to master the Morse code. We conclude, however, that telegraphy skill is not so essential to proper operation of a station that transmits exclusively above 30 MHz such as to justify turning away otherwise qualified persons who do not possess the skill. The Notice, furthermore, did not propose to delete the telegraphy skill requirement for a licensee to be the control operator of a station transmitting below 30 MHz where telegraphy communications take place extensively and worldwide communications are possible. The sharing of frequencies between codeless class licensees and other licensees can take place on frequency bands above 30 MHz where telegraphy operation is minimal and where the transmission of the more modern emission types such as data, image, phone, pulse, RTTY, and spread spectrum, predominate. [24]

15. We do not concur with the comments alleging that the passing of a telegraphy examination is an indication of the examinee's good character, high intelligence, cooperative demeanor, or willingness to comply with our

rules. [25] These traits are also found in individuals who have not passed a telegraphy examination rather than being exclusive to those who have passed such a test. For regulatory purposes, passing a telegraphy examination is no more and no less than proof of the examinee's ability to send and receive texts in Morse code at some specified rate. With respect to comments that make claims for the superiority of telegraphy over other types of communications, we do not consider these arguments as germane to this proceeding. The Notice did not propose to discontinue the authorization of telegraphy CW emission types on any amateur service frequency. The amateur service in the future, as it has in the past, can provide to those who personally desire to do so the opportunity to communicate by telegraphy.

Oh boy! Everyone's favorite modern day "Father Coughlin" is back on shortwave radio. David J Smith's Newswatch Magazine radio extravangaza - MONDAY thru FRIDAY on 3.125 AM (WWCR) from 8:00 to 9:00 PM Eastern time. Learn from Rev. Davey how those mean bignosed ashknasi jews (??) run the banking industry and are going to bring about a NWO and the ever popular Iraqi women who smuggle Bio-weapons in their cunnies. (What utter bullshit nonsense - but some people really believe this shit! LOL!) Religious paranoia big time here folks!

When that "show" is over at 9:00 PM, switch over to 6.890 UPPER SIDE BAND (WGTG) for the live Intellegence Report Show with (almost-convicted felon) Mike Kornke of Michigan Militia fame. Listen as you hear about nasty contrails from airplanes, funny UN tags on roadsigns, microchips stuck in babies butt's and nosey black helocopters that go brappp..in the night and are piloted by UFO ailens. (Seriously, this guy and his two co-host radio pals make Pat Buchanan look like Ted Kennedy) 6.890 MhZ. USB Monday-Friday 9:00-10:00 PM EST

If you have a shortwave radio, check out these two looney shows for some comic relief.

I'm looking to acquire one of the 70's era S-100 bus computer systems like the Northstar Horizon or Ithaca InterSystems DPA-1. If you have an S-100 based unit like that please contact me and see what we can work out. Purchase only, I don't have a trade. Also would be interested in an S-100 based modem if you have one. You can contact me a chipsndips@snet.net.

Thanks

What about the majority of subjects students are required to learn in school that have absolutely nothing to do with a persons major? Im still wondering if Ill ever use what I was taught in that "Elizabethan Theater" class I took while majoring in a technical subject. How many people actually still use RTTY radio, it too is a requirement just like code. Ill say one thing for Law school, at least all of the classes were about law or legal history.

When I used a slide rule for the first time I was intrigued because you could actually see the relationship between the numbers on the slide, similar to an abacus. This gave you a mental picture of the proportions of the multipliers and factors that you were trying to calculate.

You cant see whats going on inside of the old Texas Instruments microchip.

Perhaps all of those things. However, what K0SR was reporting on was the quality of the CW being sent, period. Nowhere in that spot can anyone except Mr. Negativity read anything into WHY the fist was lousy. He might just have a lousy fist. It's unimportant, except insofar as how one might help identify the signal amongst the pileup once one tunes to the frequency.

> Maybe K0SR developing MS at 44 and in 5 years I can make fun of HIM.

That sounds about like your style. There sure isn't any evidence that it's K0SR's.

What are these riddles you speak in? "Lloyd's of London style 'names'"? Is this another of your snotty anti-contest remarks? As a matter of fact, your anti-contest, anti-ARRL remarks have as deleterious an effect on ham radio as any you complain about. Your political correctness diatribe above doesn't help much either.

There's another post on the ng today wherein a newly licensed general is concerned that he might get on the air and say something wrong. It's the P-C police like you that have him paranoid. You're one of those "Q-signals were *designed* for CW" pedants, aren't you?

Did your daughter recently win a scholarship?

You've gotten some good advice (except for the Q-signals nonsense). Get on and make contacts. Just think, that's what all of us did before the internet!

In several sources you will read advice on listening. Do a lot of it. Listening is being just as active in the hobby as transmitting. In addition to picking up "the lingo," you will learn a little about propagation, world affairs, technical stuff, even who to avoid.

After I had been DXing a number of years, I took a look at my operating, and realized that I spent about 95% of my time on the radio listening. I learned tons about operating techniques in general, the operating style of a particular DX station I wanted to work, who was he hearing and consequently my prospects of working him, how good his CW or English skills were, and many other things that made my 5% transmit time extremely productive.

For ragchewing or contesting, the percentages are much different, but there is no substitute for a fair amount of listening time in your amateur radio schedule.

By the way, there are 4 QSO Parties sponsored by 1010 International that are a lot of fun. The next one is on CW, and is on this weekend. Check the 1010 website at http://www.ten-ten.org for more information on 1010 and "the numbers."

I agree completely--and I _do_ make use of it at times.

As you point out, however, it _is_ a band better suited to hams
with a bit of experience. The combination of sw broadcast stations and
ham qsos can be confusing and frustrating for new hams--particularly if
their rigs don't have good notch filters to cut out the heterodynes from
the AM stations.

Well, if you're looking for the no-code license, not sure why
you want the morse stuff, but hey. I have a program I got
from the OAK ftp archive (I think) called mpp.exe, which
I have found very useful. You can control the letter speed
as well as the sending speed, and you can specify which letters,
numbers, symbols to test on, or you can give it the name of
a text file to send for longer tests. Let me know if you can't
find it, I'll put it on my website for download and post the
url. It's freeware.

As far as taking the tests, check out the ARRL website,
www.arrl.org. They have contacts in most (all?) states.
There are many resources to study for the tests. Being cheap
I have relied on books from the library (many donated by a
local ham club) and a test-administering program I wrote
myself using the question lists from the ARRL site. There
are testing practice sites on the web.

The FCC's amateur radio site is:
http://www.fcc.gov/wtb/amateur/Welcome.html
This was helpful, because some of those books from
the library are from the 80's and things have
changed since then, the no-code license for one
thing. Oh, and the pizza delivery stuff ... if you
don't understand that joke yet, after you've read
a little on the subject you will.

I suppose I should have said initially that this advice is
theoretical ... I will be taking the exams for the Tech Plus
license on Saturday. We'll see if I know what I'm talking
about ;-)

What's happening this weekend? Another redundant ARRL sponsored and sanctioned clowntest where the bands get filled with yet more "Lloyd's" calling "CQ Clowntest" and exchanging pointless points atop existing QSO's with 5 Kw like two stations in Texas I know of..?

"QRZ your 5 and 9 - QRZ your 5 and 9 - QRZ your 5 and 9 . . . one lug nut - two lug nut - three lug nut......"

Major annoyance is more like it. And the thing is, the dumbass has yet
to learn his lesson. He was on there yesterday complaining about people
qrming him who were doing no such thing.

Mr Wildcat, Altho I agree to a degree with what you are saying, there
are a couple of issues I see. One is that learning code is not really
the issue, it is rethinking the value of having to demonstrate such
knowledge in order to operate HF. Either it is or it isn't. If it is,
then many will do so, if not they wont unless of course they want to and
like the mode.

The second issue is the use of calculators. Using one to gain an answer
to a problem requires one understand the underlying math and in some
cases the ability to operate a very sophisticated piece of gear. My
first day in Military Electronics School I was told to have a given
model or better Slide Rule. The next day for 4 hours we were taught to
use the thing. We still had to know the math but this thing held very
large numbers and gave out very good answers.

Please download the following .wav file for documentation of K5BLB's ongoing behavior, recorded last night:

http://members.xoom.com/kevin_strom/k5blb_n0ked_kk7ho_wb0cxj_VicsDeath_3950_19991026_1102pmcdt.wav

Transcript follows:

---begin transcript---

(3950 kHz LSB, October 26, 1999, 11:02 PM CDT)

N0KED: Vic's gonna die soon.

WB0CXJ: He's gonna die of what?

K5BLB: Anything, I hope.

N0KED: Well, old age...

WB0CXJ: Aw, we know that, just the biological clock's gotta give up somewhere along the line, you can't live forever. We just want the newspaper article when it happens.

K5BLB: Hey, uh, Gene.

WB0CXJ: Roger.

K5BLB: Will you loan me a coupla grand when he dies?

WB0CXJ: I might.

K5BLB: Yeah, I wanna fly up there and look in that box, and if it's really him I'm gonna take a leak in the box and come back.

KK7HO: (laughing) Ha ha, you're cold-hearted, Sid.

K5BLB: Yeah, and don't you forget it.

WB0CXJ: You know, I might do somethin' like that, but I'd rather go to McDonald's for a couple weeks and hold it all....

K5BLB: One time over in Korea, the ground was wet and muddy and it just, I mean it was froze above the ground, everything was froze, a little snow on it. Me and two other guys sat down on a couple of dead Chinks to eat our C rations, to keep from gettin' our butt wet. Hell, I can do anything.

KK7HO: (laughing) Ha ha, Sid you caught me off guard on that one; that was pretty good.

K5BLB: Well, I'm gonna tell you the truth, that was the damn truth. It wasn't no lie to it at all.

WB0CXJ: Knowin' Vic, he'll wind up gettin' cremated.

N0KED: (doubling) You didn't catch me off guard at all. I been in the military and I understand.

WB0CXJ: You won't have much of a little box to pee in, Sid.

K5BLB: Maybe they'll put him in, instead of an urn, a urinal....

N0KED: (doubling) Maybe just stomp on him with our feet. Over.

K5BLB: Do what?

N0KED: Maybe we could just, like, spit on him and stomp on him. Over.

K5BLB: I wouldn't want to get my feet in that. Feet in [unintelligible word].

WB0CXJ: Yeah, and we could kick it like a football. Whoops, I'm not supposed to have said the word "ball."

K5BLB: Don't use the word "football" on here, uh, WGM will come apart at the seams. He doesn't know the difference... in a testicle and a football.

WB0CXJ: Either that, or we could pack his remains in an old 3-500Z.

K5BLB: You could pack his remains in a, uh, uh what is it, a 6DS4 and still have room left over.

N0KED: And then we could just go out to the grave and pee on it. Over.

---end transcript---

These, apparently, are the fighters against "hate," and the upholders of "good amateur practice" that KK7HO keeps telling us about.

With all good wishes,

Kevin, WB4AIO.

1489. Re: Duplexer cutoff frequencies?

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-27 00:00:00 UTC
From: Tom Bruhns <tomb@lsid.hp.com>
Message-ID: <381740BD.67E30CB2@lsid.hp.com>
Source record: 129024
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.misc

Hi Brett,

First, to avoid confusion, you probably should call it a "diplexer" -- I think that's the preferred name for what you describe. "Duplexer" would be used in a repeater installation where the two freqs are in the same band.

For sure, any practical diplexer won't chop everything above 150MHz off suddenly. That's about where a relatively gradual rolloff occurs. I built my own for my 732a, and did some modelling of a design that was in QST (I think that's where I got it), and modified it a bit, but both the initial and final versions pass everything +/- 10 percent of the optimum freq just fine. Mine includes traps on the opposite bands, so that the attenuation between the "band" ports is very high in the band where transmissions occur...so extremely little 440 gets into the 144MHz port when I transmit on 440, and vice versa.

But...you may have some difficulty with the 800MHz band, depending on whether the design is "bandpass" or "highpass" for the 440 port. Can't help with that, since it could be either in a given design. May just have to try it if you can't find specs. The design I started with was simply a lowpass on the 150MHz port and a highpass on the 440MHz port, and if constructed carefully, would have passed from DC to a bit above 150MHz on one side, and 400MHz or so on up to where construction limited the response on the other.

Cheers,
Tom

> > important than pilots who are demographically more affluent.

Opps...I guess that the idea of demographic affluence is a bit too abstract for some...but it is a political's job to seek either large numbers of middle class or a few very wealthy people to support them...IMHO Hams do not exactly fit either category...BUT I might be wrong to so generalize. Do private pilots organizations have more political clout than the good ole ARRL? I dunno...but it would be very easy for me to believe that they do. Anyway perhaps the fact that flying is more risky than hamming is enough to make all pilots seem like brave heros...and hams like cowardly homebodies who hide behind their keys and microphones....I dunno.
>
> Demographically more affluent?? What on earth does this mean??? Do
> pilots beget more children than hams?

If you realize what I said above you would know that although neither pilots or hams are especially prolific the subject of children does not enter into the demography of existing hams and pilots....I think that most people who can use auto pilots and remote controls can also use birth control...but that is an off-topic subject.

Maybe a little of both but please don't knock female flight attendants.
I have a QSL card from a famous HAM YL who was a flight attendent and a
member of the CHC and the flying ham's club...She sure knew how to be
positively radiant. Her name: Avis E. Miracle Her QTH: Three Rivers
Michigan Her Call: W8WUT

1492. PorkButt to Return?

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-27 00:00:00 UTC
From: Tom Davidson <tdavidson@my-deja.com>
Message-ID: <7v7tgq$l8p$1@nnrp1.deja.com>
Source record: 129027

I recently heard that the person who calls himself "PorkButt", currently unlicensed, may be returning to the airwaves. Can this possibly be true? They finally have the nerve to remove the worst (from the loads of information I have received) operator in the history of amateur radio in order to make the world a better place and now they let him back on?

I do believe that "PorkButt" was the guy who talked about himself for 22 hours a day while his needy followers sat cross-legged at his feet with their chins in their hands and big smiles on their faces, and I will have to admit that this was entertaining.

So what is the story on "PorkButt?"

Also, it looks like they are letting several of the bad operators back on after they had been kicked off. What's going on? All this tells the young people of today is that if they just act like "PorkButt", they will be alright, assuming they want to live on the cheap in a rented house in the woods of the deep south, being supported by their wives. (I have heard from dozens of people about this, which has been well documented apparently regardless of "PorkButt"'s protestations to the contrary.)

1493. REQ: Yaesu mw-1 remote control mic manual

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-27 00:00:00 UTC
From: dummybig@hotmail.com
Message-ID: <381749d5.10873024@news-server>
Source record: 129028

I recently received a Yaesu FT-5200 with a MW-1 remote control microphone. I'm missing the user's manual for the remote. I have connectivity between the remote and radio but only the frequency up and down are working. Can someone mail or e-mail me a copy of the MW-1 manual or cheat sheet? Of course I will be pleased to cover any expense.

TIA,

Dan N4WEQ

Hear, Hear. This is one of the few comments that has made any sense wrt this thread. Unfortunately the comments made by many on this thread as to the relevance or not of morse code have been all to often totally irrelevant to the discussion. Funny that - seems to be very similar to the arguement for the retention of morse code. Well that's my opinion - and it seems to be backed up by many diverse groups from government to commercial - how many of them retain morse code. Yes there are not many modes that are more reliable in the passing of information when conditions are poor, however I cannot see why it should be retained as a compulsory condition for HF useage on the Amateur band. Unfortunately the compulsion that some have for the retention of morse is strangling our hobby. Unless we can attract new blood the hobby will shrink even faster - and then we won't have to be concerned about loosing our bands - probably it would have something to do with there being none left to use them. THINK ABOUT IT PEOPLE - and then act. ABOLISH MORSE AS A MANDATORY REQUIREMENT!!! I am not proposing that it be outlawed, far from it, if you enjoy using it then please do so but don't kill ham radio by making it a mandatory requirement.

500 KHz useage going strong?? Let me see, in VK land we killed the monitoring of this in February this year. In Europe (or parts there of) I recall reading that it also ceased sometime this year if not earlier. How long before the official shore stations in the states also close down - and I don't class you as one!! Face it there are many more effective ways to call for assistance. All the arguements have been a what if type scenario that are not all that reasonable, yes they could happen however they are not terribly possible. On board my ship we have a lifeguard alarm (500KHz) and in 5-6 years I have never heard it go off except when it has been tested. I would be very interested to see the stats on how distress messages have been passed in the last couple of years - I would guess that mobile/sat phones, VHF and HF would way out-number 500KHz (and not many by morse by that) as a means for the passage of distress messages. If you have it, I would welcome any info on the stats covering how distress messages have been passed.

Well, I have done the code, and my Swan since 1981 has NEVER
had a microphone plugged into it, straight key only.

And I have sent money to NCI, and I FULLY support dropping the
code as a 'requirement' totally. It's elitist BS. If you like it, work
it,
but shut up and don't try to influence your views on everybody
else.

It's going to go, whether the whiners like it or not.

The question on the code going is a matter of when and how,
not if.

The question for all hams is how long this destructive arguement
is going to continue.

Mike

>20m.

Why not?

I regularly operate ssb qrp on 20 meters and have made a
reasonable number of dx contacts using between 100 mw and 5 W of output.
A few more and I'll have my single band 20 meter qrp dxcc.

If I (and a _lot_ of other qrp ops) can do that on 20 meters,
why couldn't a Japanese ham do the same with _double_ the power?

>Let me check the JA 4th Class written -- that might be worth discussing,
>too.

That would be more interesting, frankly.

They may very well have a serious and tough written (unlike our
"memorize the answers" approach). If so, their no-code licenses arguably
demonstrate more skills than our own code based ones do.

Rick

Hi Jeff,

Yes, I think in either case message traffic has to be passed at a speed at which the message can be reliably copied and written down by the receiving station. My experience, like Dick's I think, is that code can help remove some of the ambiquity and homophonics inherent in speech.

Total non-sequitor, Jeffrey.

> It's still the only common mode among the world's HF
> operators; you don't have to like that fact.

It's not a fact. I know several HF operators who, although
they have properly passed a Morse code receiving test, cannot operate
using that mode, therefor it is not "common" to them.

dit dit

Actually, "CW" encompasses other than Morse-CW as a mode definition. To split a hair, Morse is no more a mode than "voice" is a mode. If you do want to consider Morse code to be a mode, then voice is also a mode, even though it includes SSB, FM, etc. In that case, voice IS the mode that virtually all hams have in common.

I would seriously wait for restructoring of the ham licenses coming any day now...hopefully after the first of the year. Then you won't have to worry taking your 13wpm to get your General. All the tech plus will be automatically upgraded to General.

Good Luck,
KC7GZT

It is ok to call out cq on 10 meters. I work it all the time. You can join the 10-10 international club for 10 dollars if you want to become a member and get your own 10-10 number. Members exchange their number and can accumulate them to get awards and certificates if you would like to get involved in this type of paper chasing. The frequency that is most active for this activity is 28.425. If you are interested in joining the 10-10 organization, I can send you along a form to fill out. You must first work 10 members with numbers in order to qualify for membership. Once you are assigned a number, it is your for lifetime.

Good luck and 73,
KC7GZT

> only had a key plugged in your Swan!

WOW!! You know how to look in a data base!! Yes, that's me,
formerly KA5MJQ.

I've had my Swan 500C since 1981. It was my 'incentive' to get
my license. I've also had since then a 500, a 500CX, and a
700CX. But I always 'pass on' the others and end up keeping
that very first 500C. I have since added a second external
VFO. That's almost necessary since there's no 'RIT' or
equivilent on the Swan. At one point I built an external VFO,
but it didn't work too well. I also built a digital readout for it,
but it eventually failed, and I never bothered to fix it.

I have an AC supply, and an extra 117 brick with the DC-chopper
module attached to use on 12v. Although last time I ran it in
the car (in the 80's) it drew over 40 amps on tune up.

I've never even owned a mic for it. Opps, I take that back. When
I got the 500CX and 700CX, they came with mics, but I never
even plugged it into my 500C. Come to think of it, I don't even
know if the mic jack works.

And why do you say 'of course'? Don't you know the rules? I DO
have voice privlidges on 10M. And at one time I had a transverter
I built that was going to use the Swan as a core for 2M SSB.
But I bought something else, and then eventually bought a
RS HTX-100 for the transverter project.

The Swan has been idle for quite some time. I should dust it off
and burn some power with the thing. Hey, I COULD plug a mic
into it, but I'd have to rig up something to get the multi-volt levels
that input requires.

> >And I have sent money to NCI, and I FULLY support dropping the
> >code as a 'requirement' totally. It's elitist BS.
>
> Of course you've financially supported NCI; that's much easier than

> upgrading to General.

No, it's much more intelligent, since I personally do feel that the
code, as a REQUIREMENT, it total BS. It's right up there in
intelligence that said that you MUST be and 'extra' class to be
space based. That went out the window real quick when the
FCC suddenly was faced with the possibilty of enforcing it!
(And that was probably me... In 1986 I contacted and then
wrote to the FCC asking for how to specifically request
enforcement and protest waiver of the rule for the shuttle flights,
or a removal of the rule. There was a group of CIS following
this, as told them what I was doing. Not everyone agreed with
me. Some felt it was a question that we may not like the answer,
but I felt that rule was assinine then, and reason prevailed.)

And I like being on the winning side.

> >If you like it, work it,
> >but shut up and don't try to influence your views on everybody
> >else.
>
> It's still the only common mode among the world's HF operators; you
> don't have to like that fact.

Well, to be honest, I've never worked CW out of the US. All my
CW contacts have been 40, 15, and 10, and for some reason,
I just never had an international contact with CW. Not even Canada.
QRP SSB on the other hand... I worked Russia and East Germany
in a 3-way with my HTX-100 on low power while mobile commuting
to work.

> >It's going to go, whether the whiners like it or not.
>
> The whiners are the one's calling for the end of Morse testing. They
> began the debate.

Nope, you're flat out wrong in my opinion. And making an assumption
as wrong as your 'of course' in your opening statment. But then, I'm
looking at it that people who are calling for intelligent change are not
the whiners. The whiners are the people who can't discuss this
issue without falling back into:

I did it so should you

CW will keep out the LIDs/CBers/trash

CW is the best and always gets through

What if you went over a cliff, and your mic was busted but you
could still key the transmitter...

You don't want to learn CW so your a whiner.

> >The question for all hams is how long this destructive arguement
> >is going to continue.

Sorry you feel the way you do. You won't be happy at all the way
things are going....

FS: MFJ-1278 MULTI-MODE DATA CONTROLLER

9 modes:
* VHF/HF Packet, RTTY, ASCII, AMTOR, NAVTEX, CW, SSTV, FAX, and
Contest Memory Keyer
* "Easy Mail" personal mailbox
* 20 LED precision tuning indicator
* Multi-Grey Level FAX/SSTV Modem
* Exclusive Built In Printer Port
* Software Selectable Dual Radio Ports
* Expanded Manual with "Fast Start" section
* 32K RAM with Lithium Battery Backup
* KISS....TCP/IP compatible
* AC power supply included

Cables included: TNC to computer, VHF to TNC, HF to TNC.
(you must configure VHF and HF cables to suit your rig,
full instructions included)

Very good condition both functionaly and cosmeticly.
Has 2 hairline scratches on top 3/4" long.

TST Multimode software included (DISK)

Origional Box, all books and cables.

I used this TNC to work the MIR PMS. MIR is out of
commission now and I have no use for the TNC anymore.

PRICE $125.00 shipped UPS GROUND 48 states. Money order
only.COD add $6.00

Indeed! And having established these facts 8 years ago, the only remaining question now to ask is "what's magic about the number 50? As in MHz.) The answer some will give is "well, the 10 meter band has worldwide propagation, and it meshes with S25.5." The S25.5 part is true, but is being ignored by several nations already. Indeed, even we ignore the "sending" part of S25.5. (Is the rest of S25.5 more sacred than the "sending" part.) However, the 6 meter band also has worldwide ionospheric propagation, and no-code techs don't seem to be a problem there. The 2 meter and 70 cm bands are also available for worldwide propagation, using EME, meteor scatter, or man-made satellites. So we see there's really nothing magic about that 50 MHz number except for the S25.5. The bottom line is that there is no real reason to keep the morse test requirement for operation on ANY amateur band. However, for those purists who believe that we need to selectively continue to adhere to part of S25.5, only a minimal cw requirement is required. Actually 1 character per minute would suffice. But since we wish to keep our rules and licenses harmonized with CEPT and the South American group, the 5 wpm test makes the most sense, until S25.5 is either suppressed or deleted. No other option makes any logical sense. Certainly not the emotional pleas of those who want to keep high speed morse testing as a "lid filter". These folks should also realize it's also a "youth filter" at this point in time. Leaving the cw test in place for only a few more years will truncate the entire bottom end of the age spectrum in ham radio, and keep many young people from entering the high-tech electronics field via ham radio as was traditionally done in the past. From that point on, it's just a matter of time until the OT's die, and ham radio along with it as J1 seems to want.

Elmer, version 1.0.0, has been released. Elmer creates sample tests to help you prepare for your ham radio written examination. It contains all FCC question pools for each of the five written exams: Novice, Technician, General, Advanced, and Extra Class.

Elmer will grade your sample test, showing you which questions were answered incorrectly. It will also indicate if you passed the exam.

Elmer requires a Mac with a color display.

Elmer is shareware. A demo copy may be downloaded from:
http://www.blackcatsystems.com/software/elmer.html

Yeesh!

Excuse me fellas, but when exactly did argument-mongering become an
integral part of the ham radio hobby? I'm beginning to think we need
to add questions on screwy argument techniques to the ham exams, so as
to ensure that newcomers become just as self-righteously obnoxious as
the rest of us. Please, guys, try to do a bit less to make me ashamed
I'm a ham, ok?

plonk!

You should listen to the news rather than some moron.

MORSE CODE SIGNS OFF

from the Daily Telegraph
3rd April 1995

The dramatic dot-dot-dot, dash-dash-dash, dot-dot-dot of the SOS
from ships in peril on the sea will no longer
be heard.

After nearly 100 years the United States Coast Guard turned off its
Morse Code equipment at the weekend
because satellites and navigation beacons have superseded the old
system.

Morse is Dead

"It has officially been announced by the Marine Safety Agency (MSA)
that the Morse Distress Watch, in use since 1912, is
to be replaced by more modern means of communication. This
discontinuation of the watch on 500 Khz takes place on December 31 this
year, rather earlier than the full changeover to the Global Maritime
Distress and
Safety System (GMDSS) on February 1, 1999. The MSA believes that
there are sufficient alternative communication facilities"

MORSE CODE SIGNS OFF

from the Daily Telegraph
3rd April 1995

The dramatic dot-dot-dot, dash-dash-dash, dot-dot-dot of the SOS
from ships in peril on the sea will no longer
be heard.

After nearly 100 years the United States Coast Guard turned off its
Morse Code equipment at the weekend
because satellites and navigation beacons have superseded the old
system.
Morse is Dead

"It has officially been announced by the Marine Safety Agency (MSA)
that the Morse Distress Watch, in use since 1912, is
to be replaced by more modern means of communication. This
discontinuation of the watch on 500 Khz takes place on December 31 this
year, rather earlier than the full changeover to the Global Maritime
Distress and
Safety System (GMDSS) on February 1, 1999. The MSA believes that
there are sufficient alternative
communication facilities"

Aha, a Freudian slip. Dick finally admits that the Morse
code requirement is a lot like jail. :-)

Dick wasn't arguing with the entire statement, just with the part
that said, "... no longer used for ... any other emergency use".

Some hams still choose to use CW/Morse during emergencies as
is their right.

I hear that some of these same No-code guys are also the same Coca-Cola executives who urged the company to come out with the new formula Coke a few years ago because they felt threatened by Pepsi's "New Generation" ad campaign, which they thought it was time for a change.....

Golly gee! You know in life you get out about what you put in.
Ham radio over time has changed, but it is composed of folks today who are all over the spectrum in their technical prowess. I used to think that was bad because I got into the hobby with a strong interest in transmitters and especially broadcasting.
I've just past year 40 and find my interest is less and now more directed towards computers and broadcasting. But, so what.
I got out more than I put in and now that in middle age my intersts shift, that's probably to be expected.
Ham radio is still a great hobby. Some guys can get in it for the long haul, which essentially is a life time. Good for them.

If you didn't like the calibre of the folks at the hamfest.. so be it, but don't judge such a diverse body of hobbiests so shallowly.

W1IT
40 years.. a strong supporter of Ham Radio, but no longer an avid operator.

Kevin you are not a judge of "misbehavior" and if transcripts and recordings of profanity and vular issues is what your attempting to exhibit. I have alot of the "So called" net with Vic at the helm leading in the profanities. what was said(by sid) isn't a violation of anything - you crackpot.
After seven years of putting up with Vic and the "So Called" net jamming, heckling and harassing him I expect he would feel that way about the ringleader of the libnet gang, most would. I suggest that you stop trying to "incite" problems here and on the air.
kkkevin spewed

I guess I'm confused I thought Vic's group was supposed to be the racist "hate group" but this recording makes it sound like it's the other way round.

Please explain this away Tim my faith in you is at stake. Listening to this example of "good amateurs" at work I'm shaken to my very core.

Actually I was chatting with one of Sid's old buddies and we figured Tim out. You see Timmie gets on the radio and gets poor Sid all fired up and then Sid does something dumb, then Sid looses his license. Who benefits from all this, Vic thus Timmie is actually a shill for Vic and the Liberty Net. No wonder he sometimes signs "Libnet"

So gentle reader when you hear Tim inciting Sid think about it. Tim working for Vic and the Liberty Net, getting Vic's nemesis disenfranchised. Inquiring minds want to know.

Undoubtedly Tim will launch into a preschooler temper tantrum but that is exactly how you would expect him to react if he were guilty. Yup I'm convinced; Tim and Vic working together to get rid of Sid absolutely beautiful in the most Machiavellian sense.

Have a lovely day

The Dark Avenger

If we are comparing the nets where both sets of
operators are equally "good" at what they do, I
doubt that CW can pass traffic any faster than
voice.

>Even if no one used it, I would retain it simply because it
>acts as a filter.

Sorry, the government has no role in setting up
filters just because you want them to.

> In general, people tend to value something
>more if they have to put a bit of effort into getting it.

Effort is NOT a function of government testing.

Cheers,
Bill K2UNK

Shortwave air time is super el cheapo, thus luring people who are shut out of mainstream media. (I believe that WRMI will sell ANYBODY-you and me included-airtime for $1 a minute!) But one can say that's a good thing-we have freedom of speech in America, and better to have these guys ranting on a radio station than blowing up federal buildings. For others, pirate radio is a bigger kick-try 6.955 or thereabouts any weekend (this Halloween there will be pirates up your kazoo there). There are very few true clandestine radio stations in America, partly because freedom of speech and partly because shortwave radio is so affordable. In other parts of the world where people don't have the rights that we do, there are lots of clandestine stations.

1547. And the End of Ham Radio Came.....

I agree 120% with Mr. MF Luder.

And the End of Ham Radio Came.....

Things that have contributed to it's demise!

The ARRL - Ran by the Illuminati
The FCC - Ran by communists
Riely Hollingsworth's connection with Nextel - working for World Government
WA9KJI - Getting away with his Jamming!
Contests (Worthless wastes of my time)
Not dropping the Code
Jamming of the Great Liberty Net - Inspired by the FCC's inability to enforce the rules!
RF saftey rules - What a joke!
OLD farts and contest jerks who want to keep the code alive!
AF2Y - Endless rantings on 14.313
KK7HO and K5BLB - causing trouble on 3950

There is much more I could put here, we could go on for days.

An ARRL-formatted message passed on phone has to be read
to the listener agonizingly slow; this is one case where
phone is *not* faster than CW.

There is NO RTTY pass/fail separate test element as there
is for morse code.

As for school subjects, we are not talking about what
makes for a "well rounded" student...we are talking
about license requirements.

>How much of the HF spectrum does the no-code licensee in Japan have?

Doesn't matter -- with a 10w limit our CBers have more power.

>No-codeJA/HF Spectrum >>> 5wpmUSA/HF Spectrum

Let 'em move to JA-land if they want more spectrum; but then they'll
have to take a cut in power.

You never told us what bands you worked those "...plenty of no
code JA stations..." with their 10 watts. It certainly wasn't
20m.

I'd go along with a US no-code HF ticket just like the JA 4th Class
license: Limited to 10w and with no 30, 20, and 17 meter privileges.
But just think, right now they can have 12w on 11m.

Let me check the JA 4th Class written -- that might be worth discussing,
too.

I'm in search for detailed plans for building a 10 meter
transmitter capable of SSB and CW modes with a power output
of, say, 2 to 20 watts. A VFO would be preferable.

I see that Far Circuits (http://www.cl.ais.net/farcir)
supplies pcb's for two articles in 73's mag. The first
is Feb '91 for a 10 meter 'SB' transmitter. And the
other is July '92 for a 10 meter DSB transmitter.

As I don't have access to these back issues of 73's mag.,
I can't evaluate these designs.

I'd be most willing to send you a few bucks in return for you
sending me a copy of the plans.

Oh, no license yet, but very soon. I'm also quite experienced
at electronic construction, including R.F. stuff.

I will be using a Drake R8B for the receiver.

You can contact me via. email at: lawrence@javanet.com

But, is this really germane to the testing issue? I would suggest
that it is not. Testing is to determine the basic competence of an
individual to OPERATE a station. If the ability to pass traffic quickly
is an issue, I can think of other modes that are even quicker than CW.
For example, APRS has seen a surge of activity, especially among
some of the ARES/Races folks. A good typist can type at a rate of 100
WPM. Should we use this information to now require a typing test in order
to gain band access?

Thats right! Its just like when a computer science major is forced to learn ASCII or EIA Computer Codes. If one doesnt know the computer codes, one doesnt get the computer science degree......this situation isnt any different from this Morse Code debate.

Sure, there are going to be some computer science students who'll bitch about having to learn computer code, however the bottom line is that they have to master it to get the sheepskin.....So in the end, all their whining ends up being for naught.

What I cant believe, are the measures some guys will go through NOT to learn what takes about 2 weeks to get an understanding of. The problem here is that we now live in a society where people dont believe in being told what to do in order to achieve an immediate end result. They'd rather rationalize the quantity instead of acknowledging any of the potential benefits.....

And if it isn't handled in a closely structured format, the
potential for errors is large in comparison to CW, where
errors are mostly immediately obvious to the operator.(a
burst of static causes him to miss a part of a word, etc).
If he knows the code he K NOWS whenhe missed something. Word
recognition errors are frequently not at all obvious,
frequently not even noticable on voice modes, particularly
in marginal conditions. Thus the requirement for the slow,
careful enunciation and phonetic spelling that destroys
throughput.
I speak from >20 years of experience in daily work at
passing voice traffic in public safety radio communications.
One of the very first things I learned was the everpresent
potential for small errors that can have very serious
effects, and how to avoid and correct them.

A Yankee fan says this to you, "CHOP THIS,LUNKHEADS." Hell, the ONLY thing you were able to chop against our darlings from the Bronx was LIVER! Bobby Soxers would have done better than your Bobby Coxers.
America's Team my FOOT! You think you're hot stuff because you win the Division year after year. Why? Because they took you out of the N.L.West in which there was real competition from the Giants, Dodgers, Rockies etc, and stuck you into the N.L.East wih hardly any competition. Then this year you went into the NLDS against the hapless Astros, an "el foldo" bunch of clowns who have NEVER been to a World Series in their entire 37 years of existence and never will. You beat them-big deal. Then you went up against the Mets in the NLCS who, only by virtue of the WILD CARD concept,got into the playoffs. You beat them three straight,WOW and all of a sudden they beat you in game 4 and then in game 5 and scared the hell out of you in game 6 before losing. And then came the YANKEES who made you and your team look like pathetic Stump Jumpers and BARFies. Bungling inept jerks. Do us Yankee fans a favor in 2000. If you can't stand the idea of getting humiliated again in the World Series, lose either the Division or the Wild Card and save us all a laugh. We have no time for bunglers because we play BASEBALL up here instead of kiddy ball down south. Yes indeed, our Yankees are now World's Champs for the 25th time and in the '99 World Series, it was like taking candy from a baby.

Now, Polly, you shouldn't say anything, as bad as the drawling gibberish
that eminates from your technology-disabled "station".
Doc's right, KBX needs to work on the elimination of the double
negatives in his speech as well. I know you'll have to lok that one up
in order to give one of your prosaic replies.

> Can anyone explain to me how to read a Byte (0....255) so as to know
> which bit is ON (1) and which one is OFF (0) in the corresponding
> binary number ?

When you say "byte" I assume you mean a number in the range you
mentioned expressed in base 10 (0....255). Byte is usually a relative
term and may not always mean exactly the same thing.

In binary terms, numbers are expressed from right to left (just like in
base 10) with each column expressing a value that is valid for that
column. Since in binary (base 2) each column can contain one of 2
values, they will be occupied by either 1 or 0. Okay so far?

Each column from right to left, then, expresses a decimal (base 10)
value of 32,16,8,4,2,1 etc. Therefore, take any number in your requested
range and divide it by the largest binary number that you can. It's
easier with an example. In the range you mentioned, the column to the
left would have a value of 128.

Let's pick a number such as 198. The largest binary integer that will go
into that is 128. Therefore in the 128 column we can put a 1. The
remainder of that division is 70. The next lower binary integer being
64, we can divide 64 into 70 and get 1 with a remainder of 6. So 1 goes
into the 64 column. The next binary integers, 32, 16, and 8 are all
larger than 6, so 0 goes into their columns. divide 4 into 6 and you get
1 remainder 2. So 1 goes in the 4 column. 2 obviously goes in the 2
column, and there is no remainder, so 0 goes in the 1 column.

Thus, 198 in binary is 11000110. 8 bits will cover all numbers from
0-255. The groupings of numbers are frequently broken up into groups of
4, thus 198 would be written as 1100 0110. There are 2 reasons; one is
to make it more readable. The second is because grouping in such a
manner makes converting to hexadecimal extremely easy. The number above
in hex is C6.

Maybe more than you wanted to know, but once you play around with them a
little, particularly if you're going to do any assembly language
programming, you will get quite proficient.

I hope this helps.

Yeah, reminds me of the time you blamed your daughter for sending out a
mass email spam to liberty net members. You remember Tim, the one that
was about homosexuality. When you were cornered on air about it, and there
was no where for you to go, you blamed your daughter for the email.

Now that's dispicable, vile, but not a lie. You said that on the air, and 100's
heard you do it. Why would your daughter have access to the email addresses
of liberty net members? Why would she have access to pornography on your
home computer?

Please stop the jamming KK7HO.

Let's hear the evidence Tim. I've yet to hear W1WCR use profanity on air.

> After seven years of putting up with Vic and the "So Called" net jamming,
> heckling and harassing him I expect he would feel that way about the ringleader
> of the libnet gang, most would. I suggest that you stop trying to "incite"
> problems here and on the air.

The only reason that there is a comfrontation on 3.950 is because you and
kK5BLB, and crew provoke it by heckling and harassing anyone you disagree
with on 3.950. Just move to another frequency if it bothers you.

And please stop the death threats Tim. Your threats won't work.

Further info on KK7HO is at:
http://www.angelfire.com/ky/libertynet/KK7HO.html

Your favorite ploy, played yet one more time. Don't you
think we've seen it often enough to dope it out by now???

You keep prattling "change" as though it was something seen
only rarely or once in a lifetime. BULLSHIT! Change is
always present, everywhere, all the time. So your mission
is simply to repeat it so often that "change" becomes
synonomous with "Dropping the code". So that everyone will
think in those terms every time they hear the word "change".
Sorry, Pal, we're on to you. Won't happen. Most change
turns out to be good.
But then, most 'change' doesn't get you a
get-out-of-Morse-code-free chit.

The high-tech RF field utilizes UHF and above. How's an HF code requirement preventing people from becoming electronic professionals in the future? The no-code Tech license was created especially to attract such people. Are you saying it's not working?

> as was traditionally done in the past.

Traditionally, those folks entered into professional careers after having gained a tremendous amount of skill in building their own ham gear as youngsters. How many of today's young Tech class hams build their own UHF+ gear in order to prepare themselves for a career in RF electronics?

If the Tech class folks were suddenly given HF privileges, how would that help prepare them for a career in wireless electronics? Ragchewing on HF won't do it.

Jeff

Measuring a person's ability to send & recieve Morse Code does nothing to measure the Character of the individual or how he/she is likely to ACT when they get on the air... nothing... never...no how... what frustrates me is how folks keep making this flawed argument... and what frustrates me even more is that I can't keep myself from getting all bent about it! wake up and smell the coffee... please...

Here are a couple recent folks with less than appropriate behavior associated with the HAM hobby:

One gets nailed for numerous complaints regarding profanity, obscenity, deliberate interference with the kJ repeater and failure to properly identify and the other guy is, well, just a thief...

Oh no... but wait... both these guys are General Class Hams... Hmmm... could it be that you can't measure or predict a person's behavior (on or off the air) by his/her ability to speak a particular language...(i.e. Morse code)... Lets require LATIN proficiency and then we can keep all the riff-raff off the air and watch the hobby continue to die the slow death that has already started...

From:
http://www.arrl.com/arrlletter/99/1015/#fraud
K7IJ USER LOSES VHF PRIVILEGES FOR 90 DAYS
The FCC has notified a San Francisco ham that it was modifying his license to prohibit operation above 30 MHz for 90 days. FCC Legal Adviser for Enforcement Riley Hollingsworth wrote General licensee Danny A. Kenwood, WA6CNQ, on October 6, 1999, citing "numerous complaints regarding profanity, obscenity, deliberate interference with the K7IJ repeater and failure to properly identify" during the week of August 29 and on September 6, 1999.

Hollingsworth told Kenwood that the FCC would not initiate license revocation proceedings unless it has evidence of continued violations. Kenwood has 30 days to protest the modification. Otherwise, the modification will expire January 5, 2000.

On July 19, the FCC had requested that Kenwood retake his General class examination elements under the supervision of FCC personnel before August 30, 1999. The FCC has the authority to readminister any examination element previously administered by Volunteer Examiners. Hollingsworth said the FCC subsequently determined that Kenwood originally had been tested through an FCC field office and not by Volunteer Examiners, exempting him from the retesting request.

HAM CONVICTED OF FRAUD IN BOGUS EQUIPMENT OFFERINGS CASE
A Florida ham has been ordered to spend most of the next five years in prison after pleading no contest to fraud charges involving offers to sell amateur and vintage gear. Michael T. Kirby, W5JBV (ex-K4VFY), of Panama City, Florida, had been arrested August 20 for scheming to defraud using the US mails. Kirby has a history of arrests and convictions for allegedly accepting payments for equipment he never delivered.

Panama City Police Detective Robert Luther said that Kirby pled no contest September 30 in Bay County Florida 14th Judicial Court, "which means he puts himself on the mercy of the court," Luther explained. Kirby will get 41 days credit for time served in the Bay County Jail following his arrest.

Luther said Kirby's fraudulent dealings were extensive. He said that while Kirby actually received somewhat less than $20,000 in proceeds from his fraudulent dealings, "the attempted fraud is well greater than that."

The court required Kirby to make restitution "to as many victims as I can identify," Luther said. Some victims already have received refunds. Luther said those defrauded by Kirby who have not already received a refund or been in contact with authorities should send him "original proof" that fraud occurred. He said this means original documentation, letters, correspondence and similar material as well as the amount of money and the dates involved.

Those believing they were victimized by Kirby can e-mail Luther for more information at panamaone@aol.com or call him at 850-872-3129.

No, you should come out here to the Central Pacific and monitor
500 kc or 4, 6, 8, 12, or 16 Mc; ships and shore stations in the
Western and Southern Pacific apparently have not read nor care about
the following:

>MORSE CODE SIGNS OFF from the Daily Telegraph 3rd April 1995
> The dramatic dot-dot-dot, dash-dash-dash, dot-dot-dot of the SOS
>from ships in peril on the sea will no longer be heard.

>year, rather earlier than the full changeover to the Global Maritime
>Distress and Safety System (GMDSS) on February 1, 1999. The MSA believes
>that there are sufficient alternative communication facilities"

Ah, GMDSS -- let's read what a pro has to say about that:

I worry about the future of maritime communications. We have most of our
eggs in one basket: satellite communications and the SITOR stations really
don't have enough traffic to survive financially, in the long run, without
government support. I don't really see Globe Wireless (KPH/WCC/WNU) and
Mobile Marine Radio (WLO/KLS) being around 10 years from now.

On most of my voyages, even though deck officers have the new GMDSS licenses and are now doing much of the communications work, they often don't understand what they are doing.

The GMDSS false alarm rates still exceeds 95% due to transmission errors, improper forwarding of DSS transmissions, etc. Either the deck officers make the mistakes themselves or they get exasperated and turn the equipment off. Thus the reliablility of the GMDSS system for ships that are truly in distress is being compromised.

This has been a subject at internatinal conferences but no one wants to "rock the boat" and admit that the GMDSS system isn't perfect and that a licensed WELL TRAINED operator is still needed. Cost savings are the orders of the day.

It will take a major maritime tragedy before this is truly addressed.

73,

(ex-maritime Radio-Electronics officer
and ex-owner/operator of WKM/West Haven, CT
Radio).

GMDSS to the rescue. Not.

Jeff

Look, Commander, there is not, and never has been,
anything that is near 100% when it comes to predicting human
behavior. After all, not all Naval officers are really
"officers and gentlemen" either, are they? Remember
"Tailhook"??? And how many unreported "Tailhooks" have there
been?

It's just a fact - code tested hams who actually invested
serious effort in their ham licenses WILL value it more
highly and therefore protect it by being more likely to
adhere to rules and conventions which promote harmony on the
bands. Whether or not you like it is not important.

Carry it to its logical extension - do most Extra class
hams prove to follow the rules better than most Freebanders?
If you don't know the correct answer you belong back at sea,
not in this conversation.

I think you don't see what you don't want to see. First off,
your statement that more effort automatically means greater
appreciation and respect for rules is not proven, it's just your
assumption. Spouted by enough people enough times
adamantly enough and it has a ring of truth to it. But it can
also be argued that the greater effort to obtain that license
causes a significant portion of the people to become
possessive of the privlidges granted. That in a very
malignant way they tend to feel they 'own' the privlidges
granted more than in fact they do, and they feel they
have to defend those privlidges with a religious zeal that
speaks volumes about their personality.

You're other statement... " do most Extra class hams prove to
follow the rules better than most Freebanders?" doesn't really
apply. You're asking the eqivilent of do most law abiding
citizens obey the law better than most criminals.

By golly Dick, you are seriously onto something here I think.

In order to really clean up the ham bands we should greatly expand the "serious effort" needed to get a license. Learning Morse Code is far too easy -- look at all the code tested hams that Riley is sending letters to! We need something harder, much harder, to promote harmony in the bands.

Novice: Drop the 5 WPM test, but require a two-year enlistment in the USCGR, polishing the coffee cups of ex-500KC RM's in their retirement home.

Technician: As above, but in the home for retired 121.5/243.0 operators.

General/Advanced: Discard these classes. Entry is far too easy.

Extra: Here we need some serious, industrial grade, effort. First, you must learn the Larry Roll "unique, reliable" mantra in both English and Esparanto, and be able to transmit it at 50WPM in both International and American Morse code. Then you must memorize the entire log of the W3LPL M/M entry in the 1987 CQDXWW CW weekend, dit for dit. You must also be able recite on demand at least 25 quotations by each deceased ex-president of the QCWA, FOC, FISTS, and ARRL.

Ham radio will then flourish and Riley Hollingsworth will be out of work.

73, Hans, K0HB

Not good enough. Add that the examinee must draw the complete schematic
of a DSP-based transceiver, correctly describing the function of each
comonent therein. Software for the processor(s) also must be written by
the examinee -- in COBOL, for tradition's sake.

Hello,

I am looking for a Yaesu FT-900. I have had my eyes on this rig for years and have a collection of items for trade. All items that I have for trade are in perfect working order.

**ICOM 725 HF Rig 10-160 100 watts w/ manual (Ebay end of auction = $400.00)
**ICOM SM-6 Desk Mic w/ Box (Ebay end of auction = $60.00)
**ICOM HM-12 Hand Mic (Ebay end of auction = $20.00)
**ICOM SP-3 external speaker (matches IC-725) (Ebay end of auction = $100.00)
**"Sea" Coupler -- tunes 24 - 160 w/ manual (similar to SGC)(Ebay = ???)
**"Bird" 43 UHF Wattmeter with 3 slugs (Ebay end of auction = $150.00 for wattmeter, 100w=$60, 250w=$60 & 1000w=$70, if all sold separately)

This adds up to about $920.00 total if these items were sold via Ebay. This does not include the "Sea" Coupler as I could find one in the "completed auction" search data base for reference
.
Please e-mail me at: Jhulet@aol.com

Hans and Jon,

You are far too easy on these people. We want Real Hams here,
not some namby-pamby low-voltage practitioners. They must
D E S E R V E their privileges!

That schematic must include indirectly-heated-chathode-hollow-state
devices as emergency substitutes for all silicone-based active
components.

The FCC disagrees with you that it is a fact. They said it
is NOT true.

Neither does a written test.

> what frustrates me is
> how folks keep making this flawed argument... and what frustrates me even
> more is that I can't keep myself from getting all bent about it! wake up
> and smell the coffee... please...

It's the folks who use it, not necessarily who learned it, who are the
gentleman on the air. Listen to the CW portions of the bands -- you
won't find anything on there like you hear on 80 or 20 meter phone.

>Here are a couple recent folks with less than appropriate behavior

Goes to show that even the riff-raff can learn code, especially since
no one has to copy at-speed anymore (we've heard from VEs who've had
to pass Generals who couldn't even copy at 8wpm).

>Lets require LATIN proficiency and then we can keep all the
> riff-raff off the air and watch the hobby continue to die the slow death

No, let's do away with the phone modes, instead.

Rob,
I went to the site that you recommended for the FCC License preparation class. I was a bench tech, working in cellular. My employer required an FCC General Radiotelephone Operator License to get a promotion to management. I saw your post and went to

http://www.ddcommunications.homepage.com

You were right! I was able to get the study manual at a killer price. Then I used their online practice exams. I did good on the online exams so I called the company. They came to my workplace, gave a 1 hour class, then administered the Element 1 test. I PASSED!!!! Then another 1 hour class (Element 3), I PASSED AGAIN. Everyone of us (5) passed the test (some of the guys hadn't even studied before, the class was that good!!!!!!! 3 of us were offered the Radar Endorcement, so what the heck, we did the class and passed it too! BEST OF ALL, THEY WERE THE LOWEST PRICES OF ALL OF THE PREPARATION COURSES, AND ONLY TOOK 1 DAY, NOT 2-6 DAYS!!!!
Im going to take the GMDSS maintainer class next Saturday just to get the license!!!! (It'll look good on my resume).
Anyway, thanks Rob for mentioning your success with them. Now I have my license, and the respect it brings...
Take Care,
Jeanette Robison

I should have known before I posted that having a logical discussion about this was impossible ... but I did think that it could happen without snide remarks and out-of-line (totally off topic) comments about my profession... once again my point is proven... having code under your belt... has no correlation to a person's behavior... on the air or off...

I'm sure that what you do for a living is much better than what I've chosen for the last 21 years... and I don't mind in the least defending the interests and rights of folks like you... and doing it with out disparaging what you do for a living... too bad you couldn't...

more below...

Never took a "officer and gentleman" test have you? or is it code?

> Remember
> "Tailhook"??? And how many unreported "Tailhooks" have there
> been?

sure I remeber it ... gee I don't know how many unreported tailhooks there
have been ... do you?

> It's just a fact - code tested hams who actually invested
> serious effort in their ham licenses WILL value it more
> highly and therefore protect it by being more likely to

Actually I didn't have a problem taking a code test... I took and passed
mine .... hmmm almost a decade ago...
But I if the effort was put into something a lot more relevant...like
operating procedures and regulations...
instead of testing a dying language... there might actually be some
correlation...

> Carry it to its logical extension - do most Extra class
> hams prove to follow the rules better than most Freebanders?

you really have numbers for that??

But that's not the question... extra class hams following rules vs free
banders -- a good one might be what percentage of no-code-techs have been
cited for violations vs the percentage of coded hams... hmmm i'd like to see
that math... if you're so sure about your code argument... show me the
numbers.... FCC % of violaters vs. license class ... and if there are
numbers... there ought to be a BIG... several orders of magnitude
difference... between the two

> If you don't know the correct answer you belong back at sea,
> not in this conversation.

really ... not knowing the answer to an irellevant question is the way to
decide... i'll pass that on to the folks at the naval personnell command...
they've been looking for a better way to decide when to end shore duty and
send folks back to ships...

>
> ex-DL4RQ

I got my first license as a coded/novice.... then I upgraded to tech right
about the time the no code tech thing started... I valued my license a
lot... a real lot... until I remember calling on my local repeater... when I
was back home... to a couple folks that were chatting... to ask for help...
broke down on the side of the road... but the hams heard my new call and
decided I was a "no-coder" and refused to talk with me... by the way one

was a general and one was an extra... I walked to a phone... took about a half hour... real hard after that to have a lot of respect for the virtue of class distinction by Morse proficiency... and don't bother going down the ... don't judge the entire bushel by a few bad apples road ... because that is what a lot of coded hams are doing to the no-coders...

The theory is that the Extra Class can read, therefore is aware that there are rules.

SB DX @ WW $OPDX.433
Ohio/Penn DX Bulletin No. 433

The Ohio/Penn DX PacketCluster
DX Bulletin No. 433
BID: $OPDX.433
November 1, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, K3BU, W3HNK, KF4OOX, N4GN, N5UR, K7BV, K8YSE, W8DO, BA1DU, CX6VM, DJ5AV & DX News Letter, DL7BY, ES1AKM, F6AJA & Les Nouvelles, F1UVN, FK8HC, G3SWH, G0AZT, LA7MFA, LU3FCK, OH1EH, OH2TA, ON6TT, SV1DNW, TA3YJ, TA3J and ZP5AZL for the following DX information.

3W, VIETNAM (XU Also). Members of the Tallinn Youth Radio Club (TYRC) ES1AKM and ES1AX will be active from Saigon starting December 4th, lasting until January 4, 2000. Callsign possibly may be 3W6KM, but it is not final yet. Activity will be all bands and all modes. QSL via ES1AX CBA. Jack, ES1AKM, told OPDX that after their 3W operation they will be active during 2 weeks from Cambodia (XU). Callsign is not sure yet, but possibly XU7AKM.

4U1VIC, VIENNA INTERNATIONAL CENTRE. Remember this station will be participating in the CQ WW SSB contest in Multi-Single cathegory. QSL via OE Bureau or CBA.

5W, SAMOA. Steve, G4EDG, CW operator of "Double Trouble" team, has left Tokelau, and is now in Samoa. He has obtained a license with the callsign 5W0ST. Steve does not have a radio with him, but fortunately he has his CW keyer. He will try to visit Atsuo, 5W1SA, and operate from his QTH. Steve is a CW only operator, and he is very interested in low band operation. He will stay in Samoa probably for one month. QSL via G4EDG.

5X, UGANDA (Last good chance to work Peter!). Peter, ON6TT/5X1T, will be active in the CQWW SSB Contest as Single Op/Single Band (10 meters). However, Peter also mentions that he has been in 5X for almost 4 years, and his time in Uganda comes to an end. During this stay, Peter has made roughly 150,000 QSOs as 5X1T on SSB/CW/SSTV/PACTOR/RTTY from 160-6 meters. He will leave 5X on November 5th, and will go back to Kosovo. From then on, Peter will only be back in 5X twice for one week until the end of January (once middle December, and once middle January). He will keep his station and the setup there until the middle of January, though

activity after this coming CQWW SSB weekend will be very limited. OPDX InterNet Subscribers will receive Peter's complete press release as an additional bulletin.

8S, SWEDEN. Look for John, SM7CRW, to use the callsign 8S7A during the contests in October and November. He is on IOTA EU-037. QSL via W3HNK.

9M6, EAST MALAYSIA. Just a reminder! Phil, G3SWH, will be active as 9M6PWT from Sabah between November 3-15th. He will be on a holiday, so times of activity will be on an "as and when" basis, but he will probably follow his established pattern of early mornings and late afternoons, local time. Operations will be on all bands 40 to 10 meters, CW only. He will be staying in three different hotels, and he has already received permission to put up his antennas. QSLs will be via his home address of: Phil Whitchurch, 21 Dickensons Grove, Congresbury, Bristol, BS49 5HQ, United Kingdom (with SASE and return postage, or via the RSGB bureau).

BY, CHINA. BY1PK, the headquarters station of Chinese Radio Sports Association will participate in the CQWW SSB Contest as a Multi-Single entry. Operators will include Yan/BA1AB, Wang/BA1OK and some students. QSL via BY1PK.

CX, URUGUAY. Jorge, CX6VM, will be operating as CX5X in the CQWW SSB Contest as a Single OP/Single Band (15 meters). QSL Manager is W3HNK.

E4, PALESTINE. Pekka, OH1RY, is reportedly headed back to be active as E44DX or E44/OH1RY from Gaza, now through November 1st. His goal will be to break the Asian record on 80 meters in the CQWW SSB DX Contest. QSL via OH1RY.

EA8BH CQWW SSB OPERATOR CHANGE. Due to some unforeseen factors, Martti, OH2BH, cannot run his EA8BH site, but he has invited a "skilled guest operator" to make a serious effort in the 1999 CQWW SSB contest. Jeff Steinman, N5TJ, 35, will pilot an SOAB effort using the latest contesting technology, including FT-1000MP dual-radio operating. Jeff is remembered for his WRTC-96 victory in San Francisco. Please listen for Jeff--give him a call and earn a special Yaesu certificate and a folded QSL card for your four-band QSO with EA8BH. The team behind Jeff is: EA8ZS, N5NJ, OH1RY, OH2BE, OH2BH, OH2MM and OH3QK. The station will be on all six bands in the single operator category. Contest participants are invited to please take a moment to record the relative signal strength of EA8BH compared to other Zone 33 stations. After the contest, E-mail your reports to Martti at: oh2bh@n4gn.com Stations reporting and/or confirming QSO with EA8BH on at least four bands will receive a direct QSL and a special award. Reports and QSL requests may also be sent via regular mail to OH2BH: Martti J. Laine, Nuottaniementie 3D20, 02230 Espoo, Finland

GU, GUERNSEY. Eddie, G0AZT, informs OPDX that he will be operating as GU0AZT along with Phil, GU0SUP, and possibly other members of the GARS, in a Multi-Single effort for WAE RTTY Contest (0000z November 13th until 2400z November 14th). Direct QSL requests go to: P.O. Box 5194, Richmond, CA 94805 USA with SAE/SASE (W6/G0AZT). Via the Bureau to GU0SUP, CBA

(1998 onwards).

IOTA NEWS.................
EU-039. Look for TM2F to be active from Chausey Island (also MA004,
CF50002) from October 30th through November 6th. Activity
will be on 160/80/40/20/17/15/12/10/6/2 meters.

NA-120. After several years of trying, permission has been granted
to operate from the Louisiana Fish & Wildlife camp on Marsh
Island, November 19-21st. This is the most wanted IOTA group
on the East Coast of the U.S. It is a wildlife refuge and
access is restricted. Five operators, Max/K5PP, Randy/WX5L,
Mike/W5ZPA, Mike/AD5A, and Buzz/N5UR will be making the trip
with a goal of 3000 plus QSOs in their long weekend of
operation. All five are experienced dxpeditioners. They have
a hexbeam for 20-10 meters including the WARC bands, a
Butternut for 80-30 meters, and they will take various wire
antennae for backup. They will concentrate on areas outside
North America (when the bands are open). They will operate
2 stations on 80-10m including the WARC bands on CW/RTTY/SSB.
A generator on the island will provide 110 vac. They will be
using a YAESU FT100 and an FT1000MP. The callsign will be
K5PP/p. QSL via Max E. Maxwell, 1036 Webster St, New Orleans,
LA 70118 USA. All bureau cards will be answered when received.
This is a joint operation of the Delta DX Association and the
Texas DX Society.

OC-032. Franck, FK8HC, will be active October 30-31st, from Ile Verte
(New DIFO FK077). Activity will be on 40-10 meters including
the WARC bands. Because there is a CONTEST going on, Franck
will be working a lot on the WARC Bands, 18/24 MHz with the
possibility to QSY on other bands if there is no QRM on
40/20/15/10 meters. Frequencies on the WARC bands are 18150
and 24950 +/- QRM (Only on SSB). QSL is only via VK4FW:
P.O.Box 929, Gimpie 4570 QLD, AUSTRALIA

LU, ARGENTINA. LU4FM will be active in the CQWW SSB Contest as a Multi/Multi
entry from his antenna farm.

OH0, ALAND ISLANDS (Update). Ville, OH2MM, will sign OH0MM as a Single
Op/All Band entry during the CQWW SSB contest. QSL OH0MM via OH2MM:
Ville Hiilesmaa, Rakuunantie 18 A 14, 00330 Helsinki, Finland

OH0, ALAND ISLANDS. Look for OH2MAM to be active as OH0Z during the CQWW
SSB Contest as a Single Op/All Bands. QSL via OH1EH, Ari Korhonen,
Kreetalank. 9, FIN29200 Harjavalta, Finland.

QSL INFO AND NEWS.............
Paul Hutley, KF4OOX (aka ZD8V), reports to OPDX that he has started
on the stack of QSL cards he needs to reply to (the stack is 3 ft.
tall). Paul just recently got things set up in a room at his parents'
house and with access to the InterNet. He hopes to get many QSL cards

out in the next few weeks.

R1, MALYI VYSOTSKIJ ISLAND. Look for R1MVZ to be active as a Multi/Multi entry in the CQWW SSB Contest. Activity outside the contest will be mainly on 160, 80 and 40 meters CW. QSL via K6VNX.

SPECIAL EVENT. Look for station VC1A to be active from Nova Scotia, Canada between October 29th and November 29, 1999. The "Tesla Radio Club" members will operate this station in commemoration of 50 years of NATO. During the CQWW SSB Contest, Yuri Blanarovich, VE1BY, VE3BMV and K3BU will operate VC1A as a single band 80m category. Special QSL cards will be issued; color cards will be used for direct requests, B/W for cards via bureau. QSL manager is K3BU, Box 282, Pine Brook, NJ 07058 USA

SV, GREECE. "The 59(9) DXReport" reports that members of the SV1AFA contest team will be a Multi-Single entry in the CQ WW SSB Contest. QSL to: P.O. Box 84, Agrinio, GR-30100, GREECE.
Updated from last week's bulletin, look for SV1DKR in the Multi/Multi category in the CQWW SSB Contest to be operated by SV1DKR, SV1/OK1YM and SV1DNW on all bands. QSL info is via QSL bureau via SV1DKR.
Also in the CQWW SSB Contest, look for Stathis/SV1DKL to run in the contest as an All Band Category Low Power. QSL info via QSL bureau via SV1DKL.

T31, KANTON ISLAND. "Good News" reported by Lech, LA7MFA, states, "Last Sunday, Kanton Island was QRV once again. After using the T31K callsign with LA7MFA/MM for a few times, Ueata (resident on the island) has received his own license with the callsign T31UA. He is running FT-747 with 100W into 20m vertical or longwire..... Please be patient with him, and take good care of him if you hear him. I hope his interest in amataur radio will not get spoiled by some DX maniacs, who just want another "59" QSO. I guess he is not able to run big pileups yet! He is very new to Amateur Radio, although he is a professional radio operator, and he even knows CW and the Q-code..... We will try to send him ARRL Handbook, and maybe even a CW keyer for Xmas. The supply boat reaches Kanton only 3-4 times a year, so I guess it is better to send your QSL card via LA7MFA. I will try to get his logs somehow, and print a nice color QSL cards together with my own for KH8/KK6HC operation..... I have told Ueata... about the upcoming CQWW DX Contest on SSB. He should be able to make some QSOs, and he knows his zone number. He will probably only call other stations, and please be patient with him if you receive his call!"

TA, TURKEY. Look for TA3J to be active in the CQWW SSB Contest as a Single Op/Single Band Low Power (3.8 MHz) QSL via Bureau or direct to TA3J: Berkin AYDOGMUS, P.O. Box 987, 35214 Izmir - TURKEY (E-mail: ta3j@yahoo.com)
Also, look for TA3YJ in the contest as a Single Op/Single Band Low Power (28 MHz). QSL via bureau or direct to TA3YJ: Nilay Mine AYDOGMUS, P.O. Box 876, 35214 Izmir - TURKEY (E-mail: ta3yj@yahoo.com)

V3, BELIZE. By the time you read this Joe, K8JP, and his XYL Beverly should be in Dangriga (they were scheduled to arrive October 30th) where he will operate as V31JP. Joe told OPDX that he will be here until the 1st

of April 2000. They are driving to Belize so travel time may vary due to the flooding and mud slides in southeast Mexico. Joe states that he expects to operate in most major contests with varying levels of activity. Outside of contests he will be active on 160 through 6 meters, mostly CW, but with some phone and RTTY. QSL via KA9WON, Lonnie Miller, 12031 Blue Spruce Drive, Roscoe, IL 61073, USA. Any QSLs sent via his home callsign or the bureau will not be touched until they return in the spring of 2000. Check out Joe's WEB site for updates at: http://sites.netscape.net/v31jp/homepage

V4, ST. KITTS. Look for Conny, DL1DA, to sign V47DA from November 2-13th. Activity will be on 160-10 meters, mainly CW, some SSB and PSK31. QSL via DL1DA.

V4 & VP2M, ST. KITTS AND ANTIGUA. Gerd/DL7VOG and Ben/DL7BY will go with their families on a trip to St. Kitts, November 4-18th, and will operate as V47GU and V47BY on all HF bands, mainly CW and RTTY. The equipment will be a IC-704 with HF-6V-vertical-antenna and a FT890 with DX88-vertical-antenna. Other wire antennas will be built up if needed. Their location will be near Basseterre at Frigate Bay. Gerd will take part in the WAE RTTY Contest (November 6-7th). Skeds are welcome. Just send E-mail to: DL7VOG@snafu.de -or- DL7BY@qsl.net (up until November 3rd)
Gerd will continue his trip with a stay at VP2M-land, November 18-29th. His expected callsign is reportedly VP2MGU. The QSL route is via their home callsigns.

VK0M, MACQUARIE ISLAND. The "DX News Letter" reports that Alan, VK0LD, is currently on contract with the Australian Antarctic Research Division and will be active until January 2001 from Macquarie (AN-005) and possibly other Australian Territory locations. There is a possibility for a special callsign (VM0xx) during December 1999/January 2000. This is NOT a DXpedition, but Alan has many years of experience for DXing from different locations and is used to working pile-ups. There is no QSL manager at present. A Web site is under construction at:
http://www.geocities.com/vk0ld/

WP2Z CONTEST STATION (Change of the Guard). Dennis Motschenbacher, K7BV, announced that as of October 24th he is assuming trusteeship of Woodwind, WP2Z, the magnificent station sitting high on the tallest peak overlooking the island of St. Croix. Steve, KU9C, will continue serving as the QSL Manager for the station. Larry, KE2VB, and Dennis will be doing the complete hand over in the next few weeks. Larry has done all the Contesters/DXers a major favor in getting this Caribbean rental station up and running (a job Dennis promises to fulfill with the same commitment and devotion). Millions of points have been scored from this station by contesters from all corners of the earth in recent years and millions more will come in the years to come. The station website will be updated shortly describing the changes. Dennis will make a few other exciting additions which will make the station even more competitive and user friendly...if that is possible. The Web site is: http://www.qth.com/windwood/
In the mean time, please feel free to contact Dennis with any questions you might have regarding this fantastic contester's dream QTH at:

K7bv@aol.com

ZB2, GIBRALTAR (Update from OPDX.431). Dave, ZB2/W8DO, reports to OPDX that he will be active from ZB2 for approximately two more weeks. The best time for contacts is about 2:00 on EST on the FISTS frequency of 14058 and 21058 kHz. He has made over 1,200 contacts (he states, "big pile ups for Gibraltar on CW"). He is working with a Ten Tec Argosy and mobile whip ...aboard the sail yacht "Kiwi". In two weeks, he will depart for Gran Canary and then across the Atlantic to Antigua.

ZP, PARAGUAY. Look for ZP6T to be active in the CQWW SSB Contest. The operators will be Juan/ZP5MAL, Tom/ZP5AZL, Anibal/ZP5VAY, and Luis Alvarez. The will use monobanders for 40 through 10 meters and dipoles on 80 and 160 meters. The team will be a Multi/Multi entry with two stations running at the same time. QSL via ZP5MAL.

1616. Can HAM HT tx/rx CB or FRS frequencies?

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-29 00:00:00 UTC
From: brent@NOSPAMscrc.umanitoba.ca
Message-ID: <381a17eb.23158908@news.cc.umanitoba.ca>
Source record: 128864

Hiya,

I had posted a question a few weeks ago about whether to go HAM or CB or FRS to have communication around my cabin. Thanks to those that responded...

There was a question in there that never got answered... Can any of the HAM HT's transmit & receive frequencies that an unlicensed person could also use? CB is around the 10M band isn't it, so I don't imagine that a HAM HT would be able to do that??

There is some overlap with the FRS frequencies with HAM in either the 2M or 70 cm band isn't there?

I'm still trying to decide whether to bother getting my HAM license or just stick to something that the rest of my family can also use. If a HAM HT could also be used in the bands where my unlicensed family could respond, then I'd still consider it.

Thanks for your input.

Wow...maybe useage has changed. I'd always heard same-band filter sets called "duplexer" and cross-band called "diplexer" but it's quite possible that I'm out of date on that. -- In any event, I doubt you have to worry about 160MHz attenuation ('specially on receive) on the 144-148MHz side with one of the cross-band units, whatever it ends up being called! :-) But I'd be more cautious about what the 440 side does to 800+MHz.

Cheers,
Tom

The reason that profanity is not used with CW is that it is not
at all rewarding. One has to repress one's emotional outrage
in order to send good code. CW is a left-brain function. Profanity
is a right-brain function (for the majority of our species). People
who have had their biological speech centers disabled by an accident
are still able to verbally spout profanity.

Yeah yeah, each and every American has the inherent right to have anything
and everything he or she wants without the necessity of exerting the slightest
effort. It is the politically correct attitude of the times but insupportable
in
the long run.

No one can make blanket statements about a group of individuals. There will
always be bad apples but requiring some effort to get something means that for
most, there is some value in it.

Take a look at the general condition of 11 meters. Take a look at the average
amateur band. Yes, you can find stirling examples of bad behavior on the
amateur bands. No, the amateur bands are not, in general, anything like
11 meters. Why? To get on 11 meters, all you need is a money. No effort
required; no value in what you get...

The slow death of amateur radio really has nothing to do with code or no code.
It has a heck of a lot to do with anti-technology, mommy earth crap from
the boomer generation and computers sucking off young people who
might have entered amateur radio.

The evidence is everywhere you look. How many consumer electronics companies exist in the USA today? How many high schools have science or radio clubs? How many high schools even have competent science teachers? How many of the old electronics construction magazines that used to be so common are still being published?

Even in science fiction, the hard SF of the 60's and earlier is gone. Most of what is published as SF these days is nothing more than fantasy and mystical new-age nonsense.

The problem of declining membership in amateur radio is a symptom of a much deeper problem in the USA.

Yes, there maybe some odd balls in the hobby who like to DX at the swap meet with a 6 element yagi mounted to their hard hat and a car battery on their belt, but..

The hams I hang out with and communicate with are mostly my friends who I convinced to get their licenses. I suggest you recruit your version of 'normal people' into the hobby - you'll have a lot more fun that way. Just like W1IT says, it is what you make of it.

Thanks for the help. I've got enough scanners that cover 800 to just skip the 800MHz band on the 732a. It is a little too slow at scanning to follow much on 800 anyway.

1626. Re: Can HAM HT tx/rx CB or FRS frequencies?

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-29 00:00:00 UTC
From: Mark Robbins <W2MR@worldnet.att.net>
Message-ID: <7vdofb$ns2$1@bgtnsc03.worldnet.att.net>
Source record: 128874

Yes, some of the Ham gear can be modified to transmit above 450 MHz and will cover the FRS 462/467 MHz frequencies. This is not legal, but it is possible. Keep in mind that the FRS gear uses "narrowband" standards, which is 2.5 KHz deviation. Some of the newer Ham equipment will do this as a menu option, I hear. Using one radio on "Wideband" (5 KHz deviation) and the other Narrow will cause problems. The narrow radio will sound low in transmitter audio to the wide receiver and the wide transmitter will sound distorted to the narrow receiver, due to the mismatch in deviation and receiver bandwith. Some of the FRS radios use Digital PL which may not be available in the Ham radio. If it was my choice, I would carry a FRS radio. The are very inexpensive and sometimes sold in pairs.

At any rate, good luck in your communications endevors.
BTW ...you could encourage you family to get their Amateur licenses and have a lot of fun with a new hobby!

Mark/W2MR

> times. Refering to our Senators as "bastards" and "son of bitches".

I was on frequency and didn't hear what you are claiming above. I have
heard much worse from you and Sid. I'd be happy to cite examples if
you like, but I think you know what I'm talking about.

> While I'm
> inclined to agree with him concerning some of them, I find most of what he and

>
> If I'm on frequency first - no way will I move for the likes of Vic, unless he
> comes on and asks like a gentleman, and maybe not even then.

If this was the way it is, I'd agree with you. But it's another lie.
It is -YOU- that's on the attack. It's -YOU- moving in on
3.950 to cause trouble. Until you and Sid started all the trouble
on 3.950, it was peaceful there. It's -YOU- that's cause of most
of the trouble on 3.950.

In a hobby where ALL choice of daily operation is strictly optional, there are a great many hams who will not have other modes than SSB and CW available. Should those of us who do have many modes to choose from then choose to just ignore emergency use of CW since we just don't believe that anyone should ever be without better modes to use?

In Arnie's situation in the recent hurricane only SSB and CW were available to handle "long haul" traffic. When the "better" SSB mode failed to make the grade, the only other option, CW was tried and worked. Would you advocate that they just give up and ignore the emergency traffic, and leave it unsent? Or handle it by CW? The world wants to know.

1635. AF2Y: Hams in an uproar, maybe.

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-30 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991029225739.11820.00000241@ng-fe1.aol.com>
Source record: 128587

I got a call today from a well intentioned ham op who said that I was making things tough for Jews on 14.313 and the Internet. POPPYCOCK.
He claimed that my Christian friends were turning against me for my "hostility" toward their faith. POPPYCOCK. I guess it's time to explain a few things to the thin skinned Crusaders. First off, I like Catholics better than Protestants because as I mentioned, I enjoy Mother Angelica on TV and radio EWTN. Despite the fact that her face looks like it was worked over by a cockeyed plastic surgeon, she's sweet, unoffensive and enlightening. One does not have to be Catholic to enjoy her programs; she's that good. Now for the Protestants-you need more Billy Grahams and Pastor Robert Schullers from the Crystal Cathedral in Garden Grove, CAL. They're very honorable and sincere but then again, where the hell did all that gelt come from to build that Crystal Cathedral? At any rate, from what I hear on ham radio, the shortwaves and read on this NG, there are too many Protestant schmucks running loose like N0VFP and that neo-Nazi s.o.b Kevin "Stromitler," and white trash like "Polly" Ashley,W4FQF who now wants to be called George, by George(suddenly the idiot decides to be classy) and the rest who toss around anti-Semitic remarks verbally and otherwise.
However the question remains: are these creeps really Christian? How can they be when any Christian will tell you that his faith was built upon love, understanding, compassion and all the rest of that good stuff which, according to what I hear and read, is hazerei. For example, I can think of just two Christians, both Catholic,who have taken a stance against anti-Semitism. Bill Irwin, K3CQR and Tom Steckbauer, KE9RY with the former being much more vociferous. And so I ask this: you offended Christians, where is your sense of understanding, brotherhood, love and so forth and so on? Why don't you speak up against the type of crap you hear on the air and read on this board? To my way of thinking, silence equates to APPROVAL. Where were the genuine Christians and their leaders when Adolf set up his regime on the basis of anti-Semitism? Had no church leaders read "Mein Kampf" in which he spells out the fate of Jews, Gypsies, homosexuals, Jehovah's Witnesses and retarded or crippled children? You see the analogy? REAL CHRISTIANS SPEAK LOVE. Phony Christians DON'T!
Therefore you who hear and read in silence are PHONIES! And I loathe phonies because I'm not one. There seems to be some misunderstanding about my apparently insulting communion when I told some bigoted Christian brats that I hoped they choke on their cookie and their wine turn to pee. Now how did that come about? Around 1992 when Herbie and his beasts like KA4MUJ, WB4GDP, WA2EXQ, K3QAM and other assorted goosestepping finks were trying to destroy Intercon and the reputation of my friend Ruth Hoffman, they were making sport of the Holocaust, trivializing it and so forth and so on, Herbie Swinebohm alluded to the fact that the term was coined after the war to make money for Israel and I have it on tape. I don't know about you readers but I lost family in those catastrophic years in which murdering the Jews of Europe was of paramount importance to not only the German Nazis but to their collaborators as well. I took exception to KV4FZ's Jew baiting statements and therefore insulted his

and his friends' communion and I WOULD DO IT AGAIN. That wafer, to them, represents the body of Christ and the wine, his blood. That's sacred, right? Is that any less sacred than the sanctity of life? The right for a person to live? Or is it okay to allow murder, to sanction wholesale SLAUGHTER under the sign of the TWISTED CROSS. Get it? CROSS. The swastika was exactly that and don't tell me Hitler got it from the American Indian either. The Indians swastika had the horizontal and vertical bars in the opposite directions of the Nazi one. And American Indians, at the time the swastika came to light, were NOT Christian. Hitler's on the other hand represented a crucifix with extensions east, west, north and south. It clearly was a CHRISTIAN SYMBOL and that of hate! To a Jew, life, CHAIM, is of paramount importance, more important than any symbol and so I attacked the sacraments not in a general sense but rather applicable to those pigs like Schoenbohm and his ilk. They call themselves Christians! What a joke. I called and still call them dirty rotten anti-Semitic s.o.bs who should choke on their "cookie" and have their wine turn to pee! And if that insults a Christian who really practices it, then go talk to KV4FZ and others associated with him on the air and this NG and ask why AF2Y would say such a thing. It was retaliation and nothing more and it hurt which is exactly what I wanted. Furthermore after hearing KV4FZ ridicule the Holocaust, I came out with a prayer that shook up a lot of people. I asked Jehovah in one way or another to punish the perpetrators of such hatred on ham radio. And what happened? KA4MUJ died. That alone was the crowning achievement! Billy Gasell, WB4GDP, according to what I heard, had the hell beaten out of him while living in Ocala Florida and he hasn't been on the air in five years. And look at the deline and fall of the Fuehrer from the Virgin Islands! Little by little the man disintegrated in his community, work place and on ham radio. t won't be too long before the scum is taken out of amateur radio for good, as was his callsign 5 years ago. His appeals are over and he's done. Goodbye Herbie-you asked for it-you got it and it's not a Toyota! Walter Miller, W2YEE, an obvious anti-Semite went down the tubes for 6 months. Herbie's buddy Norm, died. You don't hear the infamous Miles Myers or Charlie Canning anymore and so on and so forth. You see folks, whether or not a person is Jewish or Gentile, it's pride that counts and I'm proud of being Jewish because the genius of my people has given to this world concepts in every field of endeavor which have impacted and bettered Western Civilization. God almighty didn't give the Ten Commandments to fools. Actually I consider Christianity as anthropormorphic Judaism. We are brothers and brothers are supposed to love one another. What has happened is that too many Christians have allowed rotten apples in their barrel to go unpunished on ham radio and on this board. I say clean up your own backyard before you tell me to mow my grass. If you call yourselves Christian, act it. Stand up for brotherhood instead of lying down for hatred.

1636. bruit d'allumage dodge Caravan

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-30 00:00:00 UTC
From: ddufault_ve2bap <ddufault@dsuper.net>
Message-ID: <7vdq9v$sh8$1@nnrp1.deja.com>
Source record: 128588

Bonjour,

J'ai r&#65533;cemment install&#65533; un &#65533;metteur-r&#65533;cepteur radio-amateur dans mon v&#65533;hicule neuf. J'ai alors constat&#65533; que j'avais un gros probl&#65533;me de &#65533; bruit d'allumage &#65533; (ignition noise), c'est &#65533; dire que le moteur du v&#65533;hicule g&#65533;n&#65533;re une interf&#65533;rence radio qui brouille la r&#65533;ception de mon &#65533;metteur-r&#65533;cepteur. &#65533;tant technicien en &#65533;lectronique de m&#65533;tier, sp&#65533;cialis&#65533; en t&#65533;l&#65533;-communications, je me suis d'abord livr&#65533; &#65533; ma propre investigation. Apr&#65533;s avoir fait quelques essais (dont vous trouverez les d&#65533;tails ci-bas), j'en suis venu &#65533; la conclusion que mon &#65533;metteur-r&#65533;cepteur ainsi que la radio AM-FM d'origine ne sont pas en faute, et que l'interf&#65533;rence &#65533;tait g&#65533;n&#65533;r&#65533;e par le moteur, probablement par l'allumage, l'alternateur, la pompe &#65533; essence ou l'ordinateur qui contr&#65533;le le moteur.

Voici les d&#65533;tails de mon installation et du probl&#65533;me :

- Le v&#65533;hicule est un Chrysler Dodge Caravan 1999, moteur 3.0 litres, 6 cylindres, achet&#65533; neuf en juin 1999. Kilom&#65533;trage actuel : 15 000 km.

- L'&#65533;metteur-r&#65533;cepteur est un ICOM IC-706 MK2G; il peut recevoir les fr&#65533;quences comprises entre 30 KHz et 450 MHz, et ce, dans tous les modes de d&#65533;modulation : AM, FM, SSB (Single Side Band).

- Le bruit d'allumage g&#65533;n&#65533;r&#65533; par le moteur est audible avec un fort signal sur tout le spectre couvert par le r&#65533;cepteur, et le bruit d'allumage d&#65533;modul&#65533; &#65533; sortant &#65533; du haut-parleur varie avec la vitesse (RPM) du moteur.

- Soup&#65533;onnant d'abord un probl&#65533;me de bruit sur l'alimentation 12 volts DC, j'ai branch&#65533; temporairement le r&#65533;cepteur sur une batterie &#65533; ind&#65533;pendante &#65533;, de type &#65533; gel-cel &#65533;, ce qui isolait le r&#65533;cepteur du circuit &#65533;lectrique du v&#65533;hicule. Le bruit &#65533;tait toujours pr&#65533;sent, et de m&#65533;me intensit&#65533;.

- Le m&#65533;me probl&#65533;me est pr&#65533;sent sur le r&#65533;cepteur AM-FM cassette du v&#65533;hicule (radio d'origine Chrysler); En AM, on entend tr&#65533;s clairement le bruit du moteur et en FM, on perd la r&#65533;ception des stations faibles lorsque le moteur tourne.

Voici les lectures du niveau de bruit prises &#65533; diff&#65533;rentes fr&#65533;quences; on constate que le niveau de bruit d'allumage est encore tr&#65533;s &#65533;lev&#65533; &#65533; une fr&#65533;quence radio aussi &#65533;lev&#65533;e que 446 MHz :

fr&#65533;quence mode antenne radio lecture

31.000 MHz AM fouet onde Icom IC-706 8 (sur 60)
144.100 MHz AM fouet onde Icom IC-706 7 (sur 60)
446.100 MHz AM fouet onde Icom IC-706 5 (sur 60)

640 KHz AM fouet AM-FM AM-FM Chrysler bruit tr s lev
92.9 MHz FM fouet AM-FM AM-FM Chrysler perte de sensibilit

Conditions de tests :

- R cepteur Icom IC-706 branch sur une alimentation 12 Volts isol e : batterie gel-cel .

- Dans tous les cas, le bruit disparaissait lorsque le moteur tait teint.

- Dans tous les cas, le bruit disparaissant lorsque l'antenne tait retir e de sa base.

- Dans tous les cas, la fr quence et l'intensit du bruit dans le r cepteur AM variait selon la vitesse du moteur.

- Conclusion : l'interf rence est irradi e (radiated).

J'ai soumis le probl me au service apr s-vente Chrysler, qui ont fait quelques tests : Le technicien a d branch l'alternateur, en laissant le moteur tourner : probl me encore pr sent. Il a v r fi les bougies et leur c blage : ils sont r sistifs, donc d j pr vus pour liminer ce type de probl me. Il a effectu quelques lectures avec son syst me DRB , et n'a rien trouv . Le technicien et le chef du service apr s-vente semblent tr s r ticents travailler sur mon probl me, qu'ils ne prennent pas au s rieux. Ils pr tendent qu'ils devront me facturer les travaix s'ils ne trouvent pas la source du probl me, qui est r el selon moi.

 la lumi re de ces informations, est-ce que vous auriez une d marche me proposer? quel(s) type(s) de probl me(s) ai-je affaire votre avis? Existe t'il des filtres ou accessoires quelconques permettant d' limiter ou de r duire ces interf rences? Devrait-on soup onner un mauvais fonctionnenent du moteur? Le fabricant automobile doit-il respecter certaines lois ou normes minimales en rapport avec l'interf rence g n r e par le moteur? Dans ce cas, suis-je en droit d'exiger de la part de mon concessionnaire une r paration sous garantie, pr textant un d faut de fabrication ?

Vous remerciant l'avance,

--

>Can anyone explain to me how to read a Byte (0....255) so as to know which
>bit is ON (1) and which one is OFF (0) in the corresponding binary number ?
>

I assume you are trying to do this on a PC. All I can tell you is that on an
IBM mainframe, you can test individual bits, or a specific combination of bits,
by using the "test under mask" (TM) assembler instruction. You can also use
boolean instructions such as "and", "or", "exclusive or", to test and/or set
bits.
I assume there are similar instructions you can use in PC assembler languages.
Maybe someone else knows?

>If that were true (which it isn't),

It is. Every HF-licensed amateur (excluding the JA 10W operators) has had
to pass a code test.

>why would it be important
>that there be a "common mode" among all the world's HF operators?

You need to step back so as to get a global view of why the code require-
ment exists for HF privileges. RF at HF respects no boundaries, and as
communicators first and foremost, hams the world over should have at
least one mode in common. At present, there is only one mode all the
world's HF-licensed amateurs hold in common: CW. Whether one chooses to
use it or not does not matter; if the need arises he has it available to
him (maybe at a slower speed than when he was first licensed!). The phone
modes won't work as an international mode due to differences in languages,
but there are sufficient code pro-signs so that a meaningful QSO can
extend across language barriers. A digital mode could become the
international standard, but until such time that every ham worldwide is so
equipped and/or has the ability to build and self-maintain such
equipment, CW will remain the common mode. The ITU has this global view
while many individuals have only an insular nearsightedness - their own
personal goals out-weigh those of the global amateur community.

(Daily worldwide comms don't normally take place above 50 MHz, so a common
mode in that region can be chosen on a national level; for us it's of
course FM phone.)

Only if you actually have a biconditional statement there, which you
don't. A truth table will immediately show that your "if and only if"
compound statement is false: Morse code <=/=> Jail. For example,
one is voluntary, one is not.

Wrong again, Blake.

Plus, I have sent you the Officer's name & PART of his number (of the officer
who took the complaint of your harassment of my elderly father) & you
have NOT responded with a confirmation.

Once again you, Blake Bowers, are proven a liar and a
stalker who picks on those who he believes are easy prey.

B.F. wrote in message <381a17eb.23158908@news.cc.umanitoba.ca>...
|
|I had posted a question a few weeks ago about whether to go HAM
or CB
|or FRS to have communication around my cabin. Thanks to those
that
|responded...
|
|There was a question in there that never got answered... Can any
of
|the HAM HT's transmit & receive frequencies that an unlicensed
person
|could also use? CB is around the 10M band isn't it, so I don't
imagine
|that a HAM HT would be able to do that??
|
Most amateur HTs can be opened up to tx/rx in the itinerate or GMRS radio frequencies. These are the 2 watt UHF and 2-5 watt VHF radios that you see at SAM'S CLUB, Wal-Mart, and in sporting good's magazines like CABELLA'S.

Because I don't know the distance you want to tx to your cabin, I am going to assume that you are either on a lake or far enough from the road that phones don't reach and there is no cell phone coverage. Here are a bunch of suggestions.

1. If on a lake and calling from a boat, buy Marine band HT's AND STAY OFF 16 unless are calling someone other than your family or the police or USCG or CG Auxiliary. The person in the cabin also has to go down to the water to use the radio to follow the letter of the law. ;-)

2. Buy a VHF or UHF set of GMRS or itinerate radios and PAY THE LICENSE FEE to the FCC. ($35.00 for 10 years, not a bad price). Radios like the Motorola "Spirit" or Radius "P-10". You can attach an external antenna for long range tx (like 10+ miles depending on height). This is what I do for hunting with friends and family that don't have a Ham license.

3. STAY AWAY FROM FSR unless your comms are less than a mile. At the low output power of these radios, they are designed for "Mall Talking" and ski trips and from the house to the back yard tree house. They are play radios, and are not reliable enough for communication that your life depends on. Every on I have picked up and used (no I don't own any but I wouldn't waste my

money on them) feels like a toy, creaks when you squeeze it like a toy, and sounds like a toy.

My experience with groups of people who do not normally use radios (civil events, hunting, volunteer emergency service groups) has shown that unless you spend some time explaining what you want the radios to do to your family, they are not going to "get it" and all will be lost anyway. They will not listen when you need them to, they will try to talk over the top of you like a phone, and they will leave it in the cabin because "it's just to much hassle" to carry it around.

Take your time explaining what you want the radios for, what you want to do with them, WHAT THEY WILL GET OUT OF IT (like the wife will be able to call you to kill the big bug in the cabin, or the kids can stay out later because they can reach you if needed).

Don't fall into the "trucker lingo, 10-4 good buddy, secret squirrel code" talk on the radio. I walked away from one of the biggest deer I have ever seen because my pregnant wife wouldn't answer the radio, and I knew she was supposed to be on her hunting stand. Her reason..... she didn't want to say she was "going potty" over the air! Use plain talk, but no profanity, please.

Hopes this helps you, if you have any questions, drop me a line

If anyone is interested, I've got a pretty good universal product detector circuit that I use in my own designs, based on an NE602. If there are enough interested parties, I will do a board layout, and make the design available.

: Dunno. I don't read contest results. But basing a commonality argument
: on them is weak, Cec.

: Jeff KH6O

The worlds ham population is ~3.5 Meg. The number of people on Earth who
talk is certainly more than 2.5M. The number of people who speak
English is certainly >3.5M. The number of hams who speak English and
aren't in the "rarely or never" may easily outnumber the group who
"regularly" use CW. Since most of the "rarely or never" do use SSB.....

Since English is one of the official "universal" languages (ask any
airline pilot). Which mode is more "commonly" used in English?

Hi Gents,

I need a circuit or method of connecting my TNC to the AUX connector of my IC-746 HF rig, and at the same time allow me to connect my mic to the front, without incurring signal loss. A friend tells me that there was a Hints and Kinks article in QST in the first 6 months of 1999 that talked about that very thing. Does anyone happen to know what month that article was published?

Thanks!

Please respond to W5HQ@NOSPAMhome.com - minus the "NOSPAM"

Message-ID: <MPG.1284e70cf7c7ef5598968d@news.mindspring.com>
Source record: 128615

I am getting back into the hobby after a brief hiatus. I have seen much talk about APRS and I am wondering what exactly it is and how exactly you make it work.

The sites I have gone to are a bit on the technical side. Before I can understand them, I need some BASICS. Can you recommend a site with some vary basic info on APRS?

I would like to find out what one needs to operate, how it works, and what are some of its applications. I need laymen's terms. It is all very confusing.

Thanks in advance!!

Scott - ku4ig

1664. AF2Y salutes a great ham!

Source record: 128616

I remember the days when ND8V ragged on him, calling him "Donnie Dumb Ass" which unfortunately was picked up on by many hams ops. Don made a mistake with the law and paid for it. Never once did he try to escape responsibility for his actions as does the German Vermin, Herbert Lucifer Schoenbohm. Donald took a hell of a lot of flack but still stuck to his guns; I saw something positive in him then and supported him wholeheartedly. Then came the episodes with the Vero Beach snake KT4TR and supported by his crowd of reptiles who used to call Donald's probation officer trying to get him tossed off amateur radio. Unbeknownst to the snakes,I too was calling the probo to explain the deceit and malevolence of the Youngblood crowd and I, not them, was believed. By perseverance fueled by honesty, decency and fine operating procedures, Donald Edward Anderson , W4JYZ, began earning the same respect from his detractors which I saw in the latent stages of development and now the man stands as a shining example of good amateur radio personified. Born in Alabama, raised in Savannah Georgia as well as England and a veteran of Viet Nam, his levelheadedness , diplomacy and liberalness are lessons to us all. Never once have I heard him utter an intolerant expression which is a quantum leap from the mindset of the southern white redneck bigoted trash surrounding him. Indeed I salute Donald Anderson, W4JYZ, and wish him continued success in both ham radio and his private life.

WRONG again , Blake!!!

You initially asked for the officers name (who took the report). Now
you want MORE data! We're not going to play that game, Blake!
You call Portland Police Bureau & figure it out yourself. IF you
come up with the CORRECT officer number, we'll all know you
atleast contacted him. Wether or not you tell the truth of your
findings is another matter.

Before the
Federal Communications Commission
Washington, D. C. 20554

PR Docket No. 90-55

In the Matter of

Amendment of Part 97 of the RM-6984 RM-6985
Commission's Rules Concerning RM-6986 RM-6987
the Establishment of a RM-6988 RM-6989
Codeless Class of Amateur RM-6990 RM-6991
Operator License RM-6992 RM-6993
RM-6994
RM-6995

REPORT AND ORDER

Adopted: December 13, 1990; Released: December 27, 1990

15. We do not concur with the comments alleging that the passing of a telegraphy examination is an indication of the examinee's good character, high intelligence, cooperative demeanor, or willingness to comply with our rules. [25] These traits are also found in individuals who have not passed a telegraphy examination rather than being exclusive to those who have passed such a test. For regulatory purposes, passing a telegraphy examination is no more and no less than proof of the examinee's ability to send and receive texts in Morse code at some specified rate. With respect to comments that make claims for the superiority of telegraphy over other types of communications, we do not consider these arguments as germane to this proceeding. The Notice did not propose to discontinue the authorization of telegraphy CW emission types on any amateur service frequency. The amateur service in the future, as it has in the past, can

provide to those who personally desire to do so the opportunity to communicate by telegraphy.

October 20 passes.
No action seen.

This could be the first major enforcement failure in the newly "reorganized" FCC.

In the interest of fairness, those of us who have been jammed, slandered and lied about by Mr. Mahan for the last seven years must demand copies of his response to the FCC. This is the only way I know of to check the veracity of his response. "Congress has made punishable by fine or imprisonment a willful misrepresentation in response to an inquiry of this type." I urge all aggrieved parties to send the request to Riley Hollingsworth by clicking HERE. This includes all witnesses who have found Mahan's jamming and filthy speech repulsive. The call letters of Mr. Mahan's accomplices should be included in your e-mail, since they were instrumental in promoting and abetting Mahan's activities. If you have tape recordings pertinent to the case, please offer copies to Mr. Hollingsworth and let me know if you have them so that they can be used before the Administrative Law Judge who will conduct Mahan's license hearing.

You might do an Internet search on "mods Icom". I use
www.searchspaniel.com and select AltaVista, Excite and
DejaNews to search all at the same time. The others tend to
duplicate or always come up empty.

The same issue came up with the IC-735 and I *used* to know
the solution from several years ago when I had one ... but you know
how that is ... use it or lose it, I've forgotten the simple fix!

Also, you might E-mail IcomAmerica. I received wonderful tech
support from them via E-mail in the past.

October 20 passes.
No action seen.

This could be the first major enforcement failure in the newly "reorganized" FCC.

In the interest of fairness, those of us who have been jammed, slandered and lied about by Mr. Mahan for the last seven years must demand copies of his response to the FCC. This is the only way I know of to check the veracity of his response. "Congress has made punishable by fine or imprisonment a willful misrepresentation in response to an inquiry of this type." I urge all aggrieved parties to send the request to Riley Hollingsworth by clicking HERE. This includes all witnesses who have found Mahan's jamming and filthy speech repulsive. The call letters of Mr. Mahan's accomplices should be included in your e-mail, since they were instrumental in promoting and abetting Mahan's activities. If you have tape recordings pertinent to the case, please offer copies to Mr. Hollingsworth and let me know if you have them so that they can be used before the Administrative Law Judge who will conduct Mahan's license hearing.

Riley Hollingsworth spoke here at Hamfest Minnesota today.

He confirms that exposure to RF may damage your brain, but says that in his studies the danger seems limited only to those who transmit on two specific frequencies, 3.950MHz and 14.313MHz.

John, I have participated very little in this newsgroup for over the last year and 1/2 but I have been
watching you.
You are always at the center of fights, controversy and scandals.
Looks like you would rather have negative attention drawn to yourself than no attention at all.
All I know is that wherever John Mackey is there is a fight and trouble and people are getting hurt. Maybe you are on a mission
for good against evil or something but from the outsider's view, you are the bringer of war and chaos.

How odd! Since N0VFP is not allowed to transmit below 50 MHz, Riley's "theory"
does not explain why the crap Lloyd posts about 3950 in this NG is so deranged.

Now there's a man who knows what's REALLY going on.
Perhaps we should call him "Dr. Riley"? The man who
tosses a dose of RF Maalox on the bile-frequencies of ham radio!

So every ham radio operator uses SSB even though none has
ever been required to? Shows what you know.

There you go again, Dick, trying to falsify what someone said. It
certainly doesn't take "every" HF ham radio operator for SSB to
be considered a common mode. I'll let you answer your own question.

Give us an estimate of the percentage of active HF hams who are
equipped for SSB. Unless you are an absolute fool, you will be
forced to admit that any realistic number you present proves that
SSB is a common HF mode.

The fact that you find a site "funny" which features an animated
cartoon man exposing himself and urinating on other amateurs'
callsigns speaks volumes about your character, to say nothing of
your taste.

I assume that the grotesque distortion of my name above is meant as
a reference to me. As to your assertion, I can only say that you are
wildly misinformed. I'd be happy and honored to live in one of the
wings of my mother's spacious and elegant home in the foothills of
the Blue Ridge mountains, but, alas, I live half a continent away.

With all good wishes,

Kevin, WB4AIO.

The negation of "everyone has..." is "at least one does not have..."
So to prove that the statement "SSB is a common mode" is false, all
one needs to do is show the existance of one HF-licensed ham that does
not have SSB ability. Very easy to do.

Damn, Hans...you're sounding more and more like the Mensa
Meister from the deep south of Tejas. Nobody's talking about
the worlds population in general, just hams or hams-to-be.

Do you read CQ Magazine? if so, take a look in the new
issue at the article by the German ham who just visited Laos
and Vietnam. One of his hosts, a government employee who
makes the equivalent of $50 per month, notes that one reason
ham radio is almost nonexistant in his country is that
equipment is so expensive. (That is, except basic CW
equipment.) He is the only licensed ham in the country. It's
a common story in the third world.
So you then join the group of No Code supporters who would
just abandon all the third world's populations? You REALLY
believe that conforms to ham radio's basis and purpose?

Check some of the larger TV stations. There was a weather computer by Color Graphics that was S-100 based. Since TV people throw nothing away, there may be some of them hidding somewhere.

From Websters: "common - belonging to or shared by two or more individuals"
Technically, all one needs to show is that *two* HF hams use SSB for it to
be a common mode. You've got the definition of "common" exactly backwards.

> equipment.) He is the only licensed ham in the country. It's
> a common story in the third world.

So whats the problem? Why aren't there 10,000 Laotians on CW then? The problem with this story is, "A government worker said..." The real common story is that these 3rd world governments don't want anyone except the government talking to anyone else. You say you spent time in the military? Intel, maybe?

> So you then join the group of No Code supporters who would
> just abandon all the third world's populations? You REALLY
> believe that conforms to ham radio's basis and purpose?
>
> W0EX

So when the one and only Loatian ham gets on HF (even if -only- CW), he is set upon by the dx chasers, and his signal report is entirely irrelevant to international goodwill. When their ministry of communication sees that his average contact time is 20.7 seconds, they are relieved that no state secrets or coup planning can occur in that short period of time (on CW anyway).

Why is it that when one of your own country men want to spin a big yarn about ham radio you lambast them with bile and spittle, but when a "Laotian government employee says..." then you buy into it so easily? Perhaps you're another "citizen of the world" in Rolls image?

You need REAL social and psychological help Davies,. Your tone is showing more and more hate and contempt everytime you post.
Your jealous Davies, and maybe rightfully so, Jews, Christians and Catholics aren't lazy whiners like yourself and the others. We work hard to enjoy some of the finer things in life.
Hopping on here and blaming everyone else for YOUR problems, failures and shortcomings is indicative of a sociopath, or psychopath. Either way, you and the others are always searching, banning together to find a scapegoat, someone ELSE you can blame for all of YOUR faults and percieved ills of society.
I suggest you get some help from a good shrink and stop blaming others.

PD1AJE
The Netherlands, Europ >>
***Martin, you are interested in ham gear while in Las Vegas? Are you mad? The last thing anyone should be interested in while visiting that city is ham radio. It's a magnificent place, Martin-a world within a world. The landscape itself, surrounded by the Sierra Nevada mountains, is spectacular. And the hotels? Oh my God! Talk a walk down Las Vegas Boulevard South and see for yourself-one miraculous edifice after the other. I wonder where you're staying-we stopped for 6 days at the Mirage and it was unbelievable. The nightly shows are wonderful; the restaurants are super and not expensive at all since just about every major hotel offers a dinner buffet that's mind boggling. You walk to Bally's and take the monorail in the back of it to the MGM Grand, New York,New York,Excalibur and the Luxor. When night falls and you look up and down L.V.Blvd, you'll see the dazzling display of lights as you've never witnessed before. One show you have to take in is Danny Gans at the Rio-it's a 2.5 hour one man show that's incredible. If you can see Paul Anka's and Wayne Newton's shows, don't miss them. The MGM offers a show called FX that's breathtaking. The Mirage presents Sigfried and Roy, the tiger tamers. The Treasure Island offers the Cirque d'Soleil, another must. In the afternoon if you want to get away from the hotels and gambling and pool parties, take a tour of Hoover Dam and go out on Lake Mead. When in Vegas, forget your ham radio, your daily cares and everything that might ordinarily occupy your mind. YOU ARE IN FOR A HELL OF A RIDE!

I did hear you on 3950 a few weeks ago, Hans. Good signal in
Rochester, Minnesota.

73 and good luck in the contest,

Kevin, WB4AIO. >>

You need REAL social and psychological help Davies,. Your tone is showing more and more hate and contempt everytime you post.
Your jealous Davies, and maybe rightfully so, Jews, Christians and Catholics aren't lazy whiners like yourself and the others. We work hard to enjoy some of the finer things in life.
Hopping on here and blaming everyone else for YOUR problems, failures and shortcomings is indicative of a sociopath, or psychopath. Either way, you and the others are always searching, banning together to find a scapegoat, someone ELSE you can blame for all of YOUR faults and percieved ills of society.
I suggest you get some help from a good shrink and stop blaming others.

kkkevin i wouldn't expect YOU to find it funny when it is expressing the
outrage and sentiment created by YOU and the "So Called" net. It's an
indication of what many think about the net (hate group).
As for you staying with mama, all I can go on at this time is what I was told
by one of you neighbors. LOL.
Ps. kkkevin would you mind telling everyone where (what NG) you were first
tagged with the niockname kkkevin, it certainly wasn't this one was it?? While
your at it, how about letting everyone know about the individual (who he is)
that put that name on you. Along with the reason he called you an Internet Liar
and Forgery artist. LOL

1762. How can they call it jamming??

Newsgroup: rec.radio.amateur.misc
Date: 1999-10-31 00:00:00 UTC
From: kk7ho@aol.communicate
Message-ID: <19991031142955.27585.00000593@ng-cj1.aol.com>
Source record: 128577

You know, one thing that this "So called" net does at every occasion is to call anyone making a statement that disagrees with them or their comments, a jammer. We all have a right to express ourselves, our opinions, our thoughts, and for them to make inflammatory remarks, especially those made "about" another operator, and then to expect that operator to sit there and not make a rebutal is both arrogant and ridiculous. This occurs on a nightly basis. Whenever they get on they have to "incite" others. They do this by ridicule, slander, defamation or out and out lying about someone. It's not just me, or Sid, hell they've done it many others.
The frequency of 3950 is not "reserved" for their (the libnet) comments and their comments ONLY. It's an open part of the Amateur Radio Service and as such is available for any licensed operator to use. Granted they get jammed, they get interference, but from the group out west here they've had none but continue to lie and claim otherwise. They seem to be getting the majority of their interfence from people in the east.
In closing, I any others have as much right to speak on 3950 as anyone else. For them to try and "exclude" someone from making a statement or comment is in essence creating a "private" frequency exclusively for their use. It is also the very thing that they've been bitching about for years, a violation of someone's First Amendment Rights (lol) and it's their form of "censorship". Honest true statements, both sides of the story, corrections and clarifications, dissenting opinions, it'll never happen on the "So Called" net, they'll call you a jammer if you don't agree and speak out. Or, speak out to correct or clarify something. Don't you dare interupt their "broadcast" with facts or an opposing view. You'll be a jammer, and, they've done it for years, and last night was another good example. Hell just look at all the whining and lies on this NG today claiming that there was "jamming" going on by this person and that person. When, in all reality it, was just a few operators making statements (and very few) and politely taking exception to some things that were said about them (the operators) directly.
Is it possible to have a "closed" frequency where access is determined by your opinion, associations or content of your comments?? Boy, what do we have here?
'3-7's from Las Vegas

Has it been sufficiently answered?
Notice the section where Riley states that *** that Congress has authorized the FCC to seek information to enable it to determine the qualifications of a licensee or applicant. "We are so far unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service,***

HUDSON, NH:
The FCC has asked a net control station of the Liberty Net on 3950 kHz to justify the net's use of Amateur Radio frequencies. Via Certified Mail May 7 to Extra class licensee Victor A. Misek, W1WCR, FCC Legal Adviser for Enforcement Riley Hollingsworth said monitoring on May 1 indicated that Misek's station and members of the group for which he was acting as net control "began transmitting on top of existing Amateur communications that were already in progress." Hollingsworth said that such operation "is considered deliberate interference and cannot be tolerated on the Amateur frequencies." Hollingsworth pointed out that Congress has authorized the FCC to seek information to enable it to determine the qualifications of a licensee or applicant. "We are so far unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service," Hollingsworth wrote. He suggested The Liberty Net explore operation on the Internet or seek a low-power FM broadcast grant if that service is authorized. Hollingsworth reminded Misek that Part 97 "prohibits communications on the Amateur frequencies that, on a regular basis, 'could reasonably be furnished alternatively through other services.'" He also pointed out that Part 97 prohibits broadcasting .

Nope. General population is well satisfied to surf the 'net.
Hams have a special interest in radio, their interest in the
'net notwithstanding.

Nope. Gotta have a couple resistors to make a voltage
divider to charge the varicap.

> A CW receiver is more complicated than an AM receiver.

Nope. Superregens work very well on CW. Not bad on AM too,
properly adjusted.

>
If CW
> is so inexpensive, why is there only one ham in the entire

I have repeatedly asked Blake to stop & offered a "truce" to hims several
times. EVERY time he starts up again after a few weeks.

I ignored him for a long time & then he started harassing my elderly
father
at his place of work.

Perhaps YOU caould talk to him & broker an agreement wher Blake stops
harassing myself & my elderly father.

Lloyd i have offered many many times to stop this if they would. You KNOW THAT. They have not. The same defamatory libelous statements are being made. LIES nothing but lies. YOU KNOW. But i don't hear you speak out against any of that. are you brainwashed or what? do you know right from wrong?
Hell you called me a jammer in this post and know damn good and well that's a lie. You and the "So called" net let the lies and defamation fly too easily - it's not right.
I've tried to make peace, it hasn't worked. They don't want piece. They (the libnet gang) want 3950, and anyone who has another philosophy, idea, opinion, or dissenting comment to them is a jammer. To them (9the "So called" net) anyone who wants to use 3950 for "normal" amateur operations is a miscreant. When they want peace - they now can ask for it.I'm open to it, always have been, it's they that have no interest in problem resolution. they'd rather lie, libel, slander, defame and harass. Until then I'll be here, and there. - just watch.
Ps. lloyd stop with the low level grade school name calling. it doesn't show any intelligence or integrity.

Killfiles are your friend. You got 'em, use 'em. You'll be surprised how peaceful this NG is with just a few folks deep-sixed. And if you don't see 'em, you don't respond, so that cuts back the clutter even more!

> So you then join the group of No Code supporters who would
>just abandon all the third world's populations?

Bull. No one is saying abandon anyone. If you and 100,000
other hams want to learn and use CW to communicate with
others then we support you in that effort. What we oppose is
any mandated testing of CW which is being relied on to
recruit new CW users. Believe me, if there is only one
ham in a country and that ham is only on CW, there will
be plenty of CW converts just to get the DX contact.
Having said that, nothing in Part 97 mandates anyone
to be prepared to contact anyone using any individual
mode.

>You REALLY
>believe that conforms to ham radio's basis and purpose?

Your expectation that hams MUST be ready to contact all other
hams is where you over reach as to the basis and purpose
of ham radio.

Cheers,
Bill K2UNK

1779. High Temp Radio transmitter

Hello,
I'd like to know if anyone knows where i can get some information on radio transmitters designed to handle high temperatures. I am doing a project and part of it will require a low power radio transmitter in a high heat environment, like 300 degrees Farenheit. Does anyone know where i can look for this info, or does anyone have info on such a device? I appreciate any assistance. Please reply to cfleva1@tigger.uic.edu.
Thank you,
Constantine Flevaris

While I do not agree with alot of the viewpoints I hear
on the Liberty Net, they do have a Constitutional right
of free speech, to gather and discuss via an on-the-air
meeting. It makes NO difference if they discuss their
viewpoints in a public meeting hall, or on the public owned
airwaves. I find in the above statement "..meet the standards
of, or contribute to the purposes of" to be very disturbing.
Does this mean that when you accept a ham operator licence that
you have unknowingly surrendered your rights and protection
under the First Amendment of the United States Constitution?
You may want to think about this for a while. This sounds like
a great case for the ACLU to ponder if you ask me.

It seems illogical to me for someone to think that amateur radio was put in
place to enhance the First Amendment. Yes, when you sign the ticket to operate
your ristricted to the FCC rules. are you trying to say that there are no
restrictions on the First Amendment by the Amateur ardio Service? What about
the obsenity, profanity etc. etc. those are restrictions aren't they.
Besides that, who said anything about speech the wording was
>"We are so far unable to determine how the transmissions
>>of this group meet the standards of, or contribute to the purposes of, the
>>allocation of frequencies for the Amateur Radio Service,***
It seems that there is a question as to proper "use", "the meeting of
standards", and the "contribution to the purpose of the of the Amateur Radio
Service".
Transmissions are restricted in every aspect just by the very nature of the
service. For you to suggest that >It makes NO difference if they discuss their
>viewpoints in a public meeting hall, or on the public owned
>airwaves
and to suggest that they don't have a "responsibility" to "meet the standards
and purpose" of the Service is ridiculous. Anyway, It's the FCC's
determination that counts and they must have a "concern" about what's taking
place otherwise they wouldn't have asked the question or suggested that they
(the Liberty front) look into a "low power FM "Broadcast" station.

My first FM transmitter was an oscillator modulated by a
carbon mike. No amp required.

> Evidently you missed it...this was LAOS, where a big bad
> war ate the place and many of its people alive not that long
> ago.

Nope, you missed the point. You want to maintain the present
Morse code requirement so the third-world countries can have
someone to talk to on CW. It has been that way for 75 years.
Where are all those CW operators? One to a country?

Therefore, there is no need for a code requirement to be able
to talk to Laotian hams.

> confusing "common" with "in common."

You didn't say "in common", Jeff. You said "common". Above is Webster's definition. If you want to be correct in your usage you must add an adjective such as "all", e.g. "CW is a common mode shared by *all* HF hams". Otherwise, it only takes two hams to make it a common mode.

However, your statement is false anyway. For HF hams to share a common mode they must possess the electronics to satisfy that mode. Many, many coded hams do not possess an HF rig. Therefore, your statement, given the definition of "common" that you want to use, is false unless you can convince us that there is such a thing as ESP-CW (no electronics required).

>20m privileges.

The reference was to the comment "with their 10 watts..." I took
the implication (erroneously, apparently, to refer to 10 watts not being
adequate to work 20m--which is, of course, one of the busiest bands.

>> If I (and a _lot_ of other qrp ops) can do that on 20 meters,
>>why couldn't a Japanese ham do the same with _double_ the power?

>Because the 4th Class ("Telephone Class") JA operator does not have
>20m privileges.

Again, an implied reference to the power (note my mention of
qrp).

>If you're going sign with an ARRL address, you should at least know
>the facts behind the discussion.

1. An arrl.net address is an email forwarding address available
free to any arrl member--it does not imply employment by the arrl--that
would be an arrl.ORG address. If you're going to criticize the use of an
address, perhaps _YOU_ should know the facts behind the usage!

2. To the best of my knowledge, US hams aren't required to know
the license limitations of foreign amateurs, thus even if my focus HAD
been on Japanese hams, it would not be unreasonable for me not to know
their specific band limitations. Do YOU know the band limitations for
all nations listed in the dxcc list? Or when you discuss the activities
of dx stations are you being less-than-informed yourself?

On _precisely_ the same basis Dick, it could be argued that a No-Code Technician Class ham with a low paying job who had to save and do without other things (or put in overtime) for months to buy his 2m FM transceiver had significantly more invested in the hobby than an affluent retired Engineer with a long term First Class Radiotelegraphy license who could write a check for an FT-1000D based station and who spent less than four hours "boning up" for the tests for his Extra Class license. In that case, it would be reasonable to expect the Technician to be far more likely to adhere to the rules and conventions than the Extra! And since many more Technicians are young (and therefore have lower earnings) than Extras (who are often retired or electronics professionals, and therefore have more disposable income), that comparison isn't particularly inappropriate.

So much for your "code testing makes better ops" arguments. The "poverty makes better ops" argument is just as strong.

> Carry it to its logical extension - do most Extra class
>hams prove to follow the rules better than most Freebanders?

Apart from illegal frequency operations, I'm not sure they do.

I've seen a lot more jamming, multi-KW operations, interference, etc. from contesting or dx chasing Extras than I've seen in the 11m band from freebanders.

I suspect that if some of those freebanders decided they wanted ham tickets (and many of them don't), they would be _at least_ as good of ops as the Extras currently on the bands.

>If you don't know the correct answer you belong back at sea,
>not in this conversation.

You mean if he doesn't know YOUR answer . . .

Dick, your mind is made up. Isn't it annoying when people confuse you with the facts?

Blake, what SPECIFICALLY is a lie that I did?

> I called and hung up on his voice mail. Tell me, John, have
> you ever done that to someones answering machine?

Blake, you did it several times. Then when confronted about it by
a representative of the government, you denied & claimed your teenage son
probably did it. You are a liar who would rather shift blame to your
underage son & you should be ashamed of yourself.

> I simply don't like to talk to voice mail. What is the criminal
> charge there?

You forgot to mention the simultanously e-mail you sent tomy elderly father's
work account.

Blake, it clearly all adds up to harassment.

A duplexer would NOT do what you need & would take up the entire trunk of your vehicle. You want a "DIPLEXER", NOT a "DUPLEXER".

> common. At present, there is only one mode all the
> world's HF-licensed amateurs hold in common: CW.

Pure fantasy, Jeffrey.

I suspect that all the world's HF-licensed amateurs also know how to speak. Except for a very few unfortunate individuals, human speach is a communications mode shared universally not only by amateurs, but the population at large. Only a modest fraction of the population understands Morse code.

There are more Hams that don't know Morse Code than Hams that know Morse Code. Therefore, people who don't use Morse Code are more into Ham radio than anyone else and would most likely value it more also.

What if everyone in the Fishing Hobby continued to argue about requiring all people who fish to use worms, even though some find other lures to be more effective or desireable? That would be retarded wouldn't it?

No Fisherman yells at another because he won't use worms, or vice versa.

What kind of retarded hobby is Ham Radio when people in it can't just let people use whatever mode they prefer? If a Ham wants to talk on HF with a microphone and not ever use Morse Code, why does it bother some so much??? You never see anyone say that no one should be allowed to USE Morse Code, and EVERYONE should ONLY use Microphones! Why do some want to FORCE people to learn Morse Code who don't want to? If Morse Code is so great, then be glad that not so many are cluttering up the Morse Code segments of the bands and those frequencies will be more available for you and your friends to use!

When I got home today, I found the following anonymous fax sitting on my fax machine.

Written by Guy Matzinger, W1GUY, it clearly demonstrates how NCI is not about eliminating the code, it is about being anti-ARRL. I have placed by own comments on formatting in [brackets] (e.g. when something was italicized, I put [italics]). A copy of the document that was faxed to me is available, upon request, via fax or photocopy.

Discussions redirected to "rec.radio.amateur.policy".

Reprinted from "The Code-5 Review, October 1999, Page 1 of 1"

written by:
Guy A. Matzinger, W1GUY, 503 Dubois St., Cheney, WA 99004-1235
(509) 235-5707 email: guym@on-ramp.oir.com

Commentary

"For several years I have done my best to comment, in as objective a manner as possible, on the organization that calls itself -- [italicized] the voice of the Amateur Radio community, [/I] The American Radio Relay League (ARRL). An association that is a textbook example of what a relatively small number of skilled and committed organizers can accomplish when, with singlemindedness, they subvert the core principles of our democratic system."

"I have watched with growing apprehension their political influence on the bureaucracy of our government, an ideology that encourages deep hostility from their members towards those who disagree with their agenda. And I for one am not prepared to stand by and permit the political operatives of the League to continue hardball politics and promulgate their Machiavellian views and restrictive practices under the banner of [Italics] protecting the Amateur Radio Spectrum. [/I]"

"It is important to understand how the ARRL became a political power-broker and the "de facto" administrator of all Amateur Radio activities. Covetously the League debiliated the democratic process when, in 1936, they stepped over the line of ethical conduct and moved to limit participation in the hobby, as outlined in the attached W5YI Report. With the help of Bureau friends, who I understand were League members, the code testing speed was arbitrarily increased from ten words per minute (wpm) to thirteen, knowing that this [underline] discriminating [/U] tactic would deter the majority of people from becoming Amateur Radio operators, thereby [italics] protecting the amateur spectrum [/I] for a select few -- [underline] their members [/U] They again expanded

control of the hobby after WWII when with the help of pandering bureaucrats, who were League members, they created with devastating results [italics]Incentive[/i] licensing that never achieved intended objectives...however, it did raise the code test speed to 20 wpm.

"I have another real problem with the ARRL ... with a declining membership (now about 20% of the total US licensed amateurs I am absolutely certain that they do not speak for the great majority of men and women who are Amateur Radio operators and I am not convinced, repeat [underline] not [/U] convinced, that they are or ever have been mandated to represent the community of Amateur Radio operators ... either in this country or the world. For decades the League has lavishly funded legal and lobbying activities to ensure their dominence of the hobby, both here and abroad. "

"This is a grave problem with omninous import...participatory democracy, for the majority of amateurs, has all but disappeared beneath the weight of this federally-sanctioned organization...with questionable public policies. Playing godfather, the ARRL insists that the hobby live in the pathos of antiquity and morse code tests. Society no longer needs telegraphers, does the hobby still need the League and their self-serving interests ... or is it time for a new organization .. that will represent the majority?"

"In a recent magazine article, FCC Chairman William Kennard paraphrased social critic H.L. Mencken who said "For every complex problem there is a simple solution..." There is nothing complicated about removing regulatory regulations for Morse code tests from all Amateur Radio licensing requirements and it would not be legally wrong to do so. Perhaps reviewing 5 USC 706 would help the decision to eliminate code testing? Embracing this change would provide [bold]all[/B] Americans the opportunity to participate in and contribute to amateur communications technology, including [italics]public service[/I] around the world."

"The pending Report & Order, resulting from NPRM 98-143, allows Chairman Kennard the occasion to embalm the discriminating code ploys of the ARRL .. in the [italics] public interest [/I]. It would also be in the [italics] world's image [/I] to abolish the ITU Article S25.5 -- the "Treaty" obligation used as the basis for code tests, that forces discrimination on government administrators."

"We are no entering the final, critical state of this effort...so please, take the time right now, to let Chairman Kennard, your Congressional Representative and US Senators know that you would like their support to [underline] remove all [/U] Morse code testing for US Amateur Radio operators and the [underline] removal [/u] of Article S 25.5 (or any similar requirement) from any ITU "treaty" agreement".

"Thank you for your help, together we will prevail."

"Remember 1936"

Conditions were the same for Television/Radio Broadcast and for Ham radio. None of the News broadcasts came to us in Morse Code! If any Hams used Morse, it was because they CHOSE to, not had to because of conditions. None of the Police, Fire, or Paramedics there used Morse Code either.

How is it 'lies' when the evidence is so clear? You are a criminal jammer. You deny
it in the face of irrefutable proof, like this recent recording of your criminal radio activity:
http://members.xoom.com/_XOOM/sixisone/k5blb_kk7ho_obscenejamming_19990509_0254cdt.wav

>
> are you brainwashed or what? do you know right from wrong?

No, he tells the truth, something you wouldn't know anything about.
Your brazen lying just serves to infuriate people that attempt to use
3.950 for normal communications.

>
> Hell you called me a jammer in this post and know damn good and well that's a
> lie. You and the "So called" net let the lies and defamation fly too easily -
> it's not right.

What you call "lies" is the truth. The recordings above and below, show this.

>
> I've tried to make peace, it hasn't worked. They don't want piece.

Bullshit. You continue to Jam on the air, and spin and lie here.

> They (the
> libnet gang) want 3950, and anyone who has another philosophy, idea, opinion,
> or dissenting comment to them is a jammer.

No a jammer like yourself, (1) talks on top of existing QSOs, (2) Threatens to kill other
amateur radio operators, (3) attempts to belittle net participant, and (4) chants repetitive
nonsence over and over again. Anything to block normal and lawfull communications.

All of these things you have been recorded doing in the URL's below.

> To them (9the "So called" net)
> anyone who wants to use 3950 for "normal" amateur operations is a miscreant.
> When they want peace - they now can ask for it.I'm open to it, always have
> been, it's they that have no interest in problem resolution.

More BS. You are trying your role reversal tactic here. You have no intention
of stopping your campaign of harrassment.

> they'd rather lie,
> libel, slander, defame and harass. Until then I'll be here, and there. - just
> watch.

And your final dose of arrogance for the readers. Of this I have no doubt.
So you can expect the same.

Please stop the jamming KK7HO.

Then why use SSB?? CNN didn't use SSB (thank god!) Neither do the
Police and other public saftey organizations.

> Side observation: Clearly you are some sort of anonymous
> Freebander; Yer sure as hell not a ham. No breathing human
> with *any* ham radio license could possibly be that stupid.

Just goes to show you that you are wrong all around! I am indeed a
license holder in both Ham and Commercial radio, am not stupid to
realize that if other radio services could get through without Morse
Code that the same should be possible with Ham operators, and there are
plenty of stupid people that have ham licenses! Anyone who thinks that
learning Morse Code should be a REQUIREMENT before one can talk into a
Microphone on a certain frequency does not have any common sense or
abilty to reason with logic.

Money has nothing to do with it. It is all about using common sense and logic.

> Also, one of our specialties is utilizing HF propagation to conduct
> point-to-point communications without dependence upon third-party
> equipment. If the satellites CNN use go out, they're QRT.

The same if your HF radios go out. The point was about using voice and microphones to communicate during this event when some here are making the claim that ONLY Morse Code could be used, which is always a humorous and idiotic statement.

> Let's have a contest: You build a station from scratch using the
> technology that CNN uses, and I'll build a CW station; let's see
> who finishes first and can acquire the most contacts one month
> from now.

It's already done! Who is able to communicate to more people, you or CNN? Even if you were both able to reach the same audience, how many would understand your Morse Code message and how many would understand CNN's voice broadcasts? CNN (or any radio or TV station) will always make more contacts than anyone using Morse Code. If it were the other way around, all the commercials would be in Morse Code! (They want to reach as many people as possible with their ads!)

Since there are Fewer Hams that know and use Morse Code than Hams that use Microphones, I should HOPE that statistics would show this!

Just like more people die from guns in the United States than any other country. (HINT: The United States is much larger and has more people)

More people die from falling in the shower and choking on gum in the US that other countries too, because there are more people for this to happen to.

More Hams that don't use Morse Code most likely commit more crimes, and do more other terrible things than Hams that use morse code. Also more Hams that don't use code abide by the law and are more intelligent than those Hams that use code. Anytime you have a group of people that greatly outnumber another group, there will be more of every statistic in the larger group because it is LARGER!

So whose fault is it that hams are so ill equipped? Seems we
should mandate PACTOR to solve the problem. Seems ridiculous
to be in the emergency communication "business" equipped *only*
with 75 and 50 year old mode technology?

Beats me. But there are scads of fully qualified people who
have no -zero- interest in ham radio, so something is
different.

A CW receiver *is* an AM receiver! (An outboard BFO can be
thrown together in a matter of minutes, or just use a second
receiver to create the beat frequency.)

>If CW is so inexpensive, why is there only one ham in the entire
>country? Huuuummmmmmmm?

Maybe the Laotian government doesn't permit home-built radios
on the air?

THnx for your sightsiging report, I am also going to look around of course
but the reason for me checking the ham shops while I am in the US is that
the ham stuff is a lot cheaper then in europe.
The thing I want to buy is A IC706MKIIG which will save me about 400
dollars.

any other shops ?

Thnx
Martin

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!
.....

>From the Editor's Desk:

Due to a computer crash, EMCOMM Bulletin #208 got sent out last week instead of #207. I will be sending you #207 under separate cover. Some ACS files have been lost, mainly those of you who have recently signed up; I've lost your biographies for the las t 10 days. If you've just subscribed and haven't seen your name in the 'Please Welcome' box, drop me a line and I'll include you. The ACS Web Page also fell behind due to the same crash. I have a new laptop that is substituting for the crippled desktop ; the Web Page is now current.

And...no I don't know what caused the crash... I was uploading FTP files for the Home Page and I got the Giant Blue Screen of Death. It got worse after that.

With the new laptop, I should be able to keep up until I can get the desktop's memory transferred to a new desktop.

Stay safe everybody -- see you next week! Dave Larton, Editor
.....

Please Welcome:

Allan D. Handforth KC6VJL <handall@ix.netcom.com>
Capitola, CA
Been involved in emergency operations since the Loma Preita EQ with the Red Cross (locally and nationally), the County of Santa Cruz and ARES/RACES mostly with emergency communications (however the Red Cross cover most of their emergency functions)

I have extensive training in emergency preparedness, mitigation, and response from Red Cross, State of CA, and Federal Home Study.

These groups are well known so explaination is not needed.

Murray Craig VE7COY <mscraig@home.com>
Emerald Bay (Laguna Beach) CA
I have asked to develop a HAM based communication plan for Emerald Bay, which has it's own service district. This group of 500 home is north of Laguna Beach. I am the only HAM in the community, so I am looking to find out any info that you might have to assist in the Emergency Preparedness Plan.(currently based on the ICS model)

Dave Mushinskie KF6ZCM <kf6zcm@hotmail.com>
Pasadena, CA
Just recently received my amateur radio license and am interested in disaster communications. I will be coordinating disaster communications at the hospital where I work.
.....

Current Events:

From: Homingin@aol.com

HDSCS Hams Help Hospitals Handle Hector

The Hector Mine earthquake seemed like a non-event to most hams in the Los Angeles area, because few were activated by authorities to provide emergency communications support. But to one hospital, the temblor brought on a crisis that was made less stressful because hams were prepared and acted quickly.

Following established procedures, the Hospital Disaster Support Communications System (HDSCS) activated, as it does any time the ground shakes in Orange County. Because minutes count when hospitals need help, this ARES group doesn't wait for calls from health care facilities or governmental agencies. Instead, HDSCS immediately checks on the hospitals, gathers status, and provides it to Orange County Emergency Medical Service Agency. If hospital phones or other communications links fail or are overloaded, ham responders discover it and are in position to provide immediate backup.

Net control was on the air within five minutes of the quake. Thirty-eight members quickly began to assess the condition of

the county's 33 hospitals. In addition, one went to the radio room at the county Emergency Operations Center. (Because RACES usually does not activate immediately in these situations, HDSCS provides its own operator to the EOC, in accordance with established procedures.)

Members provided the first status reports within ten minutes. Status of all 33 medical centers was determined within 75 minutes. At Los Alamitos Hospital, the responding hams (Dennis Kidder WA6NIA and Phil Glumm KD6TJT) discovered that commercial power had failed. The hospital was using its generator, but that didn't power some important diagnostic equipment, such as X-Ray and CT-Scan. HDSCS members remained at the hospital for six hours to provide backup communications as the facility was forced to close its Emergency Department to incoming patients.

Hospital officials were unsuccessful in contacting Edison Company by telephone, so WA6NIA contacted Rosie Falcon N3IVO at the EOC for assistance. N3IVO relayed the request to county officials, who were able to make tie-line contact with Edison and initiate a high-priority response.

This event was reminiscent of the Landers earthquake of 1994. During the immediate HDSCS response to that temblor, Gary Holoubek WB6GCT was first to arrive at Buena Park Hospital, where both commercial and generator power had failed, plunging the entire facility into darkness. The problem of overloaded Edison phone lines was overcome in that case when another ham spotted an Edison truck and gave the message to its driver, who called it in on his mobile radio.

"Portability, flexibility and speed are the keys to successful response to hospital emergencies," says April Moell WA6OPS, Coordinator of HDSCS. "If we had not checked on our supported hospitals within the first hour, we would not have been aware of problems and been able to help. In disaster and potential disaster situations, hospitals must be a first thought of hams, not just an afterthought."

The Hector Mine earthquake marks the 67th incident since 1980 in which HDSCS hams have provided emergency backup communications to Orange County hospitals.

This week's EMCOMM Bulletin:

EMC208 Answer the Phone? 2/3
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC208 Answer the Phone? 2/3 For release 11/1/99

When the RO arrived at the agency office, the requesting manager was quite surprised to discover WHO had actually responded to his need, but was pleased to have competent assistance.

Assigned a desk, the RO set about taking incoming telephone calls. He followed the agency standard process of handling incoming reports (messages) (wrote time/date, who called, and summary on a tablet.) In addition to responding to phone calls he became familiar with each of the various office machines the agency had in use (copier, FAX, printer, etc.)

One out-of-the-ordinary call was from a very upset woman who had lost her home in the flood and wanted to know "where is the money I've been promised from FEMA". When she was advised that "This isn't FEMA", she cried "but you are the Office of Emergency Services and this is an Emergency!"

Mentally, the RO had a chuckle at her reasoning, and proceeded to ask questions and listen. Essentially she'd been going around in circles trying to get an answer, but that office was not the one able to help. However, he explained WHY it couldn't help, and who could and how to reach them. When she hung up she felt better and knew where to go because a person sensitive to her tone of voice was able to calm her and point her in the right direction. Perhaps that was the most important event of the day for both of them. It certainly wasn't the typical "radio operations" that the EMCOMM unit participant expects from unit activity.

That RO was what some could call a "problem solver" and an "opportunist". By midday, he'd formulated an idea for improving on the data capture process, and asked permission to look at the programs on the computer of the person at whose desk he'd been assigned. Receiving that, he found a relatively unused program in which to create a new INCOMING MESSAGES form. The remainder of the day he tested it to ascertain how well it might work in place of the then-in-use handwritten form.

At the end of the day, the RO handed that Manager a computer generated printout of incoming message activity in the format to which the Manager was accustomed. Since it was a Laser print, and many times easier to read due to the way it was setup, his eyes went wide with surprise and delight at the ease with

which he could scan the detail. That, and a slightly different summary than what he'd previously had received, lead to a hearty response, "This is Great. Thank You!"

(For what happened to the General, see bulletin 209).

Hello,

I Have been involved in ARES and Races , since My 1st 2 meter Rig. But My interests, were more in the Digital packet area,so thats where, I have spent most my time. I guess I came into the Tail-end of a once great packet net-work. Because, I watched as many of the users put up the Tnc,s and opted for the wiles of the Internet. In so doing, the amateur digital modes suffered to the point of abandoment. A Number of Sysops have caught the Vision of what the Digital modes can offer as a redundant of the Redundant, Here, in Va. We have seen a recent activation in Franklin,Va.and Digital communications was provided for 10 days. Visit ARESVA.ORG for some of the details.

We really learned a lot from the real thing...Im very interested in how others have met the challenge to accomodate the needs of the agencies they serve.

Thank-you

ARES/RACES DDC D7 area A

>From the Mailbag:

From: "Kenneth S. Dueker, J.D. (KB6BPM)" <kdueker@cspeed.com>

Dave:

I wanted to let you know I'm enjoying the ACS Newsletter.

The latest issue mentioned the RIMS system ... It seems to me
that the ACS could provide a wireless back-up infrastructure
using packet radio.

The challenges are 1) writing a decent front-end to handle this
and 2) the middleware to handle message passing. I imagine that
we have some talented software engineers out there who might
like to ponder this challenge.

Packet (esp. AX.25) is just not pretty or efficient for
emergency communications. Integrating RIMS on an amateur radio
TCP/IP network with more "user friendliness" would seem to be a
practical solution.

I would love to help more, but I'm genuinely swamped with my day
job now.

So, I am just planting an idea - which I hope you can bird dog.

73 de KB6BPM
ARES/RACES Emergency Coordinator, Atherton, Menlo Park, and Stanford
University
Reserve Police Officer, Palo Alto P.D.

From: jimprice@sonic.net

David -

I am a member of the Sonoma County ACS and CDF-VIP organizations
and read your note about RIMS in the last newsletter. I
couldn't agree more. Hand copying of verbal messages is slow,
tedious and prone to errors. My experience trying to use packet
radio for digital transmission of data has been dismal.

Questions:
1. What does RIMS stand for?
2. How is it used?
3. What are the technical aspects?
4. How can I learn more about it.

5. How could we link to and use the system from a mobile communications unit while in the field?

Jim Price

(Thanks for the excellent RIMS questions! I'm forwarding them onto Cary Mangum, State ACS Officer, for his specific response on these issues. It's great to see your interest! As Cary replies, we'll post them here so everyone can benefit. -ED)

This week's EMCOMM Bulletin:

EMC207 Answer the Phone? 1/3
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the California Governor's Office of Emergency Services

EMC207 Answer the Phone? 1/3 For release 10/25/99

This bulletin might be titled Opportunity 1a, in that it describes what may be distasteful to some unit participants. Yet, it was a real-world opportunity, quite disguised, but still an an opportunity that is sometimes seldom offered in the life of an Emcomm unit.

A retired Brigadier General and a retired President of a Financial Firm were members of a government EMCOMM unit. The General was a unit Assistant Radio Officer and the President was

the Radio Officer for that agency at the time. Both were accustomed to going into the agency to the communications center at least one day a week. While there they usually did EMCOMM unit work of one kind or another, possibly handling a weekly net, checking other equipment, planning unit activities, writing educational bulletins somewhat like these, etc.

While at a government agency Communications Center doing routine EMCOMM unit work, the Radio Officer (RO) received a telephone request from a key Administrative Manager that said: "All my staff are out with the flu except myself and one other person. We need someone to answer the telephone and take the messages updating us on local emergency conditions. Is there a way your people can provide help today?"

As you can imagine, the idea of sitting in an office answering a telephone from people and agencies and writing the phone message is not what EMCOMM unit personnel may consider normal emergency operational procedures. It would have been easy to turn down the request.

What had occasioned the request was a recommendation from a field coordinator who knew the RO and his views on service. He had a hunch that the RO might fill the Managers need, having learned of it earlier, hence his recommendation to the Manager to call the RO.

The RO, still on the telephone with the agency manager, thought "no one in the unit is going to be able to take that on today." Then he realized that the work he was doing in his office at his desk, could just as easily be done at a desk in another agency and he could answer the telephone as well. His thoughts were now "Maybe I could go and provide the assistance. Hmmmn, should I? What might be the long range benefits from that action?" Acting on a hunch, he responded, "Okay, I'll get you someone for today."

(continues next week, bulletin 208)

EMC207 Answer the Phone? 1/3
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC207 Answer the Phone? 1/3 For release 10/25/99

This bulletin might be titled Opportunity 1a, in that it describes what may be distasteful to some unit participants. Yet, it was a real-world opportunity, quite disguised, but still an an opportunity that is sometimes seldom offered in the life of an Emcomm unit.

A retired Brigadier General and a retired President of a Financial Firm were members of a government EMCOMM unit. The General was a unit Assistant Radio Officer and the President was the Radio Officer for that agency at the time. Both were accustomed to going into the agency to the communications center at least one day a week. While there they usually did EMCOMM unit work of one kind or another, possibly handling a weekly net, checking other equipment, planning unit activities, writing educational bulletins somewhat like these, etc.

While at a government agency Communications Center doing routine EMCOMM unit work, the Radio Officer (RO) received a telephone request from a key Administrative Manager that said: "All my staff are out with the flu except myself and one other person. We need someone to answer the telephone and take the messages updating us on local emergency conditions. Is there a way your people can provide help today?"

As you can imagine, the idea of sitting in an office answering a telephone from people and agencies and writing the phone message is not what EMCOMM unit personnel may consider normal emergency operational procedures. It would have been easy to turn down the request.

What had occasioned the request was a recommendation from a field coordinator who knew the RO and his views on service. He had a hunch that the RO might fill the Managers need, having learned of it earlier, hence his recommendation to the Manager to call the RO.

The RO, still on the telephone with the agency manager, thought "no one in the unit is going to be able to take that on today." Then he realized that the work he was doing in his office at his desk, could just as easily be done at a desk in another agency and he could answer the telephone as well. His thoughts were now "Maybe I could go and provide the assistance. Hmmmn, should I? What might be the long range benefits from that action?" Acting on a hunch, he responded, "Okay, I'll get you someone for today."

(continues next week, bulletin 208)

>

That special part of the population who are very intrigued
by radio technology and propagation. The generalpopulation
includes very many techies who could easily become hams if
they wanted, many are alredy qualified but have no interest
whatever in radio as a hobby.

> > > Give us an ever-loving break, Dick. There is one varicap's

If you plan on anyone hearing your FMing you might want to
add some adjustment circuitry to set deviation levels...you
might also need to amplify the weak signal from that
microphone you didn't mention so as to get enough voltage
swing to drive the varicap.... Hey, this FM rig is not so
simple after all!

> > > If CW

> Say what? The third-world has had 75 years of the exact conditions
> you want for the purpose of setting up CW rigs - where are they?

Evidently you missed it...this was LAOS, where a big bad
war ate the place and many of its people alive not that long
ago. There are many other examples... Some group was, not
long ago, getting together some QRP kits to send to a
country in Africa not too long ago so they could learnsome
radio technology and have some ham radio communications. Of
course it's much easier and works better with the No Code
Agenda when you just ignore all the third world as you-all
like to do.

Which band?

Come on, Brian, tell me tell me. Please scan their QSL cards on a
web page, too! =:o

BTW, I wouldn't mind the creation of a US HF no-code license similar to
the JA Fourth ("Telephone") Class license (10W, no privileges between 8
and 20 MHz, comprehensive written exam) if it would end the debate. (See?
I *can* compromise.)

Mike,
A fellow named Bob Parness, I believe, offers a neat service: If you provide a geographic location, he'll print up a map showing every FCC-licensed transmitter within a certain radius of the location you specified. He runs mapping software tapped into the FCC's data base. I see his periodic ad on rec.radio.swap.

>> not have SSB ability. Very easy to do.

>From Websters: "common - belonging to or shared by two or more individuals"

Out of how many? Two out of two? Or two out of two million? You're
confusing "common" with "in common." Two operators with SSB ability
certain have the mode "in common," but consider the last two operators
in the world who utilized spark -- that there were two would not imply
that spark was a common mode among the world's hams.

I could build a spark transmitter in a few hours; so could another
amateur historian. By your misinterpretation of Webster's definition,
that would make spark a common mode among the world's hams. Wonderful.

>Technically, all one needs to show is that *two* HF hams use SSB for it to
>be a common mode. You've got the definition of "common" exactly backwards.

"Common mode among the world's hams," is the key phrase which I've been
using in many of my posts; above I abbreviated to "common mode." Never
have I said "in common."

Nice try,
Jeff

>

The "statements", as you call them, that
you and K5BLB tried to make during last night's Liberty Net were made while Net participants were transmitting. You did not observe common Net protocol and courtesy, you and Sid just started transmitting "over" (actually "under") the Net. Sounds like willful interference to me.

>We all have a right to express ourselves, our opinions, our thoughts,
>

In this case, you only have that "right" if you have been INVITED or ACCEPTED into SOMEONE ELSE'S QSO or Net.
You and Sid were neither invited or accepted into the Net. And who can blame the Net?

>and for
>them to make inflammatory remarks, especially those made "about" another
>operator, and then to expect that operator to sit there and not make a
>rebutal
>is both arrogant and ridiculous.
>

Bullshit. You sound just like that maniac
WA9KJI who thinks he has the right to jam anyone who talks about him. Either you sit there and take it, or attempt to be accepted into the QSO. If the QSO doesn't accept you, tough shit.

>This occurs on a nightly basis. Whenever they
>get on they have to "incite" others. They do this by ridicule, slander,
>defamation or out and out lying about someone.
>

That sounds like you and Sid talking about the Liberty Net every damn time you get on the air ... hypocrite!!!

Your twisted Logic is something to study. I suggest you check in with Davies and the others for some "Group Therapy"!

the only reason that "anyone" has to key the mic whenever, "IS" because the Liberty Front think they have a private frequency. Take a Hike Monkey. Just as they claim that "jamming" denies them their 1st Amendment right, their "exclusion" or attempted exclusion of others does also.When did they lease or get the deed to 3950?
HYPOCRITE. LOL Your a real piece of work! Did you hear me breaking? LOL

You know, one thing that this "So called" net does at every occasion is to call anyone making a statement that disagrees with them or their comments, a jammer. We all have a right to express ourselves, our opinions, our thoughts, and for them to make inflammatory remarks, especially those made "about" another operator, and then to expect that operator to sit there and not make a rebutal is both arrogant and ridiculous. This occurs on a nightly basis. Whenever they get on they have to "incite" others. They do this by ridicule, slander, defamation or out and out lying about someone. It's not just me, or Sid, hell they've done it many others.
The frequency of 3950 is not "reserved" for their (the libnet) comments and their comments ONLY. It's an open part of the Amateur Radio Service and as such is available for any licensed operator to use. Granted they get jammed, they get interference, but from the group out west here they've had none but continue to lie and claim otherwise. They seem to be getting the majority of their interfence from people in the east.
In closing, I any others have as much right to speak on 3950 as anyone else. For them to try and "exclude" someone from making a statement or comment is in essence creating a "private" frequency exclusively for their use. It is also the very thing that they've been bitching about for years, a violation of someone's First Amendment Rights (lol) and it's their form of "censorship". Honest true statements, both sides of the story, corrections and clarifications, dissenting opinions, it'll never happen on the "So Called" net, they'll call you a jammer if you don't agree and speak out. Or, speak out to correct or clarify something. Don't you dare interupt their "broadcast" with facts or an opposing view. You'll be a jammer, and, they've done it for years, and last night was another good example. Hell just look at all the whining and lies on this NG today claiming that there was "jamming" going on by this person and that person. When, in all reality it, was just a few operators making statements (and very few) and politely taking exception to some things that were said about them (the operators) directly.
Is it possible to have a "closed" frequency where access is determined by your opinion, associations or content of your comments?? Boy, what do we have here?

Not so fast, there LRod. Cut Mr. Davies some slack. The Bible does instruct us to hate. I believe the quote relates to "hate what is evil and love what is good".

I can't think of any exhortation to hate other people, though. Is this where Mr. Davies' theology goes uh-oh?

Then there was the passage where God said "Jacob have I loved but Esau have I hated" (or words to that effect). As you know, our Independent Fundamental Premillineal Baptist friends have a convenient Arminian side-step for that one.

So I guess we're back to square one .. it is not in keeping with Bible teaching to hate anyone. Just my conclusion .. I could be wrong. Let me know.

You're right Tim. I recall many times when I used to get on 3.950 during the weeknights to dissent peacefully and was greeted with catcalls of "Communist" or "Communist Jew" or sometimes when they felt good, they'd lower it a notch or two to Socialist. You hit the nail on the head by more or less stating that the "Swastika Net" is there for the sole purpose of baiting and creating dissension whereby they can go crying to Riley H. The creeps run to their word processors if one intelligent person happens to disagree with their stinking philosophy. Any discourse astray from their words of hate is designated "jamming." But the one good thing about the mess is that Riley isn't fooled by the meatheads and that sooner or later, it's going down and out like Herbie Swinebohm. "Ham operators unite-the only things you have to lose are your losers." (Mordechai Lenin, UA6KVETCH, 1925)

Here is stuff from Westboro Baptist Church

What do you think of Jews?

"For he is not a Jew, which is one outwardly; neither is that circumcision, which is outward in the flesh: But he is a Jew, which is one inwardly; and circumcision is that of the heart, in the spirit, and not in the letter; whose praise is not of men, but of God." Romans 2:28,29.

The only true Jews are Christians. The rest of the people who claim to be Jews aren't, and they are nothing more than typical, impenitent sinners, who have no Lamb. As evidence of their apostacy, the vast majority of Jews support fags. Of course, there are Jews who still believe God's law, but most of them have even departed from that.

"The Jews: who both killed the Lord Jesus, and their own prophets, and have persecuted us; and they please not God, and are contrary to all men" I Thessalonians 2:14,15.

About the Bible Teaching hate:

Why do you preach hate?

Because the Bible preaches hate. For every one verse about God's mercy, love, compassion, etc., there are two verses about His vengeance, hatred, wrath, etc. The maudlin, kissy-pooh, feel-good, touchy-feely preachers of today's society are damning this nation and this world to hell. They are telling you what you want to hear rather than what you need to hear, just like what happened in the days of Isaiah and Jeremiah: "That this [is] a rebellious people, lying children, children [that] will not hear the law of the LORD: Which say to the seers, See not; and to the prophets, Prophesy not unto us right things, speak unto us smooth things, prophesy deceits: Get you out of the way, turn aside out of the path, cause the Holy One of Israel to cease from before us." Isaiah 30:9-11; "Then the LORD said unto me, The prophets prophesy lies in my name: I sent them not, neither have I commanded them, neither spake unto them: they prophesy unto you a false vision and divination, and a thing of nought, and the deceit of their heart." Jeremiah 14:14; "They have healed also the hurt [of the daughter] of my people slightly, saying, Peace, peace; when [there is] no peace. Were they ashamed when they had committed abomination? nay, they were not at all ashamed, neither could they blush: therefore they shall fall among them that fall: at the time [that] I visit them they shall be cast down, saith the LORD." Jeremiah 6:14-15. And also in the New Testament we are warned: "For there are many unruly and vain talkers and deceivers, specially they of the circumcision: Whose mouths must be stopped, who subvert whole houses, teaching things which they ought not, for filthy lucre's sake. One of themselves, [even] a prophet of their own, said, The Cretians [are] alway liars, evil beasts, slow

bellies. This witness is true. Wherefore rebuke them sharply, that they may be sound in the faith." I Timothy 1:11-13; "But there were false prophets also among the people, even as there shall be false teachers among you, who privily shall bring in damnable heresies, even denying the Lord that bought them, and bring upon themselves swift destruction. And many shall follow their pernicious ways; by reason of whom the way of truth shall be evil spoken of." II Peter 2:1,2. What you need to hear is that God hates people, and that your chances of going to heaven are nonexistent, unless you repent. What you need to hear is a little fire and brimstone preaching, like Jesus preached. What you don't need to hear is that you're okay just the way you are, and God accepts everyone without exception. Don't listen to the money-grubbing heretic who stands at the front of your church. Listen to God. If you are one of His elect, you'll hear.

It was interesting to see the lack of self-control exhibited yesterday by the Estancia Embarrassment, Nit-net-Timmy, and confrères.

On probably dozens of occasions last evening, they inserted their "comments," some of them grossly obscene, on top of an ongoing net in which they know they are not welcome, and without even a pretense of checking in legally. They also, most of the time, made no attempt to wait for a break in transmissions and brazenly talked on top of stations who were in the middle of making transmissions.

It's doubly odd, since earlier in the evening K5BLB (to his credit) acknowledged that the Liberty Net participants had clearly obtained the frequency from the Florida Phone Net, and called off his jammer allies to another frequency in order to, as he said, save their licenses. Perhaps, as the evening wore on, the ingestion, or failure to ingest, some substance impaired his judgement to the extent that he could no longer restrain himself.

At any rate, it would be hard to imagine a more obvious example of intentional interference than that provided by KK7HO, K5BLB, and friends last night.

With all good wishes,

Kevin, WB4AIO.

N0VFP goes in over his head with:
>Why do you preach hate?
>
>Because the Bible preaches hate. For every one verse about God's mercy, love,
>compassion, etc., there are two verses about His vengeance, hatred, wrath,
>etc.

Neato references to the wrath of God, etc., although the 2:1 ratio is suspect. And I still fail to see where this exhorts us to hate anyone. The phrase "Wary as serpents and harmless as doves" comes to mind. But, again, no instruction to hate. Just a clue to use one's head. (Which we don't. And, hence, we earned the name "goyim".)

Davies, you're living out a prodigal complex. You're not a peace with God, and you're not at peace with yourself. Given that, there's no way you'll ever be at peace with your fellow man. You'll always need someone to blame for what's wrong, and you'll always have an axe to grind.

Sure, there's a lot wrong in the world. Wars, disease, hunger, Clinton, etc., etc. History proves that axe grinding, moaning and name calling have solved none of this.
And the future will reveal that Fred Phelps did very little to stem the tide of "faggotry" with his web pages and funeral marches. And "The Liberty Net", with their good wishes, did not remove Clinton from office.

I'm open to constructive suggestions, as I, too, would like to see the world made a better place, free from Clinton and international bankers and blown-up buildings, etc., etc.

I don't think we're going to get there by mis-quoting Bible verses and blaming the Jews for what ails us. Sorry to disappoint.

Like new JPS NIR 10 DSP unit, works with ANY radio. Very good noise
reduction and many modes of filtering.
I have too much stuff, trying to clear out a few things!
A remarkable unit, this works great, you'll be amazed at the
difference! this Model is like new in the Box and Manual
Price is 125.00 Shipped via Priorty Mail email me thanks

1875. 100's of projects

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-01 00:00:00 UTC

100's of winter projects at Harry's Homebrew Homepage http://sm0vpo.8m.com.

I have done a lot of updating recently and included a 4-watt AF amplifier as well as coil-winding using PCBs so that anyone can wind the same coil! Not an easy task, remember Harry's laws?:

1 - No two people can wind the same inductor with the same instructions and materials.
2 - Coil winding data is a constant that varies from person to person.

Of course, the article is illustrated with photographs of a 20uH inductor (+150pf = 4MHz).

There are loads of antenna projects, transmitters, receivers and even a little booze, if you think "homebrew" has another meaning.

I have my own message board which is in daily use by home constructors with problems or suggestions. If you could help to answer some of the questions there I would be eternally gratefull.

best regards from Harry - SM0VPO

Jeff, it should be obvious that since I am a Technician, I talked to them on 10 meters (28mhz). Throw in our medium wave band on 160 meters and it would be a more rounded allocation.

73,
Brian

Yea man, it's like the bands are loaded, there are stations EVERYWHERE, hmmm perhaps it's because contesting is fun and obviously pretty popular eh? During the PA QSO party I was on 7240 for about a half hour when a station broke in and said " Hey don't you realize your contesting on a very important frequency?" Important I asked? Yea he said, there are several Nets that use this frequency. Unreal....&#65533; Ooops let me QSY right now. I wonder which net he was talking about? Could it have been one of these.

The old farts who never contest net.
Just me and my fishing buddies but NOT YOU net.
The "Move on down the band boy" net.
This is a PRIVATE frequency now go away net.
Were not talking to anyone with less than 40db over 9 net
If we don't know you don't bother net.

or possibly the

We've been here for years every Saturday night and have the right not to have any interference from anystation anywhere anytime net. Wake up Bob it's your turn to broadcast, Bob, hey Bob wake up your monolog is next.

That was right on the mark Tim.....even though I do not contest per say I found your 'net remarks' very funny and true at the same time.

1892. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-01 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7vki5p$p2h$1@news.hawaii.edu>
Source record: 128767
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate audience, below is a list of the rec.radio newsgroups. In most cases, a group's name will explain its purpose. Cross-posting should rarely be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and its content drifts further and further away from being "on-topic" in the various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

Jeffrey Herman, KH6O
(rec.radio.amateur working-group)

*It's been sadly reported that the moderator was lost to us in an automobile accident; the future of this newsgroup is not known. 73 Bill...

Consider this stolen for my future use.

I never understood how some of these clowns will piss and moan for 5&#65533;
years about lousy band conditions and then piss and moan for another 5&#65533;
years about the crowded bands. It seems to repeat itself every 11 years.

Davies learns slow with:
>You'll have to get through me in
>order to so that

Come now - how will anyone have to get through you to silence Kevin? And what makes you think anyone wants Kevin silenced?

>Why don't we Liberty Net members do the same

"We Liberty Net members"? Checking in to the Liberty Net lately, are you? Congratulations on passing your code test. Sounds like the tapes "Timmy the Turd" gave you worked after all - ?? Or not.

Then there's the viewpoint expressed by some that the Liberty Net doesn't have members - only check-ins. Sort of at odds with your "We Liberty Net members" comment.

>Two can play the same game, Timmy the Turd!

There are parts of the game you don't play well and still other parts you can't play at all. Shall I go into detail?

>USCGR, polishing the coffee cups of ex-500KC RM's in their retirement
>home.

But those retirees didn't just "sit" the 500 kc net; they'd switch off
and work the 4, 6, 8, 12, 16, and 22 MHz CW bands, too. It was really
something to have 4, 6, and 8 MHz scanning in one earphone, and
12, 16, and 22 MHz in the other. Ever try to copy message traffic
from two ships at once? =:o

>Technician: As above, but in the home for retired 121.5/243.0 operators.

The voice operator monitored those two channels, along with 2, 4, 6, 8,
12, 16, and 22 MHz SSB; HF air-to-ground; VHF marine band channels 06, 12,
16, 22, 23.

The third operator worked LL-TTY and HF RTTY.

Those 12-hour shifts flew by!

My college wants me to run a ham radio class this summer. I want to get a maximum number of students so that I can justify running this class every year, perhaps even during the "regular" school year.

Considering that it is an 8 week class, three hours per week, what day of the week has generally been best for you who have taught (or taken) such a class.

TIA for your help.

Message-ID: <MPG.1287bda55f4f9787989744@news.richmond.edu>
Source record: 128775

I have a friend who's automobile keyless entry system no longer works when the vehicle is parked near her house. Also, the wireless remote to her ceiling fans will not work either. Both of these devices use RF transmitters. I have to assume that something nearby is causing interference. We called the FCC field office and they told us that it was not their problem and to contact the manufacturer. Yeah, right.

Does anyone know the frequency that these devices use? I'd like to plug them into my scanner to see if we can isolate the source of the interference. Also, I thought that was one of the FCC's responsibilities.

Any help would be appreciated.

> vast majority of people.

Your logic holds no water at all, for a couple of reasons.

The most valuable things in my life (family, religion, air, etc.,
etc.) are virtually and absolutely free. So much for "free things have
no value".

Your logic is sort of like the old example of quarter-inch drills.
People don't buy a Black and Decker 1/4" drill because they want a 1/4"
drill.
They buy it because they want a 1/4" *hole*. And they don't value a hole
more because it was hard to drill, or less because it was easy to drill.
They attach value to the hole based on the reason they needed/wanted the
hole.

Similarly, an amateur license has no value to anyone based on how they
acquired it. The value is based on what benefit/pleasure derives from
using it.

Looking from yet another angle, an item or service is not more valuable
just because you paid more for it. Take an automobile for example. Suppose
you and I both buy two identical new automobiles. I pay $20,000 and you
pay $25,000. By your logic, your car is more valuable simply because you
paid more. In fact, you got ripped off, and when you find out about the
price I paid, you will not value your car *more*, but *less* (by about
$5,000).

Are you kidding? Family, religion, *clean* air etc all
FREE???

Hans, I know you've gotta be a lot smarter than that. The
valuables you mentioned require MUCH more committment and
effort to support, to say nothing of $$$, than any ham radio
license ever could. Cheezzz.....
Just WAIT till we start REALLY paying for that clean air....

>
> Your logic is sort of like the old example of quarter-inch drills.
> People don't buy a Black and Decker 1/4" drill because they want a 1/4"
> drill.
> They buy it because they want a 1/4" *hole*.

Welp, guess I'm different here, too. *I* bought my drill(s)
so that I could use them for a variety of things including
making 1/16" holes and driving those neat new woodscrews
that have replaced nails for so many applications....Do I
value the DRILL itself?? If not, why wouldn't I just throw
it away after I get my single 1/4" hole drilled?????

> And they don't value a hole
> more because it was hard to drill, or less because it was easy to >drill.

Evidently you've not drilled many holes. And clearly NONE
with a dull bit.

> They attach value to the hole based on the reason they needed/wanted the
> hole.

Nope. They value that which -technology advances definitely
included- which add quality to and expedite their activities
and life. Just like a ham radio license does for radio
hobbyists. Thats why I have several drills. One is variable
speed and reversable. Much more flexible. Just like my Extra
class ham license.

> Similarly, an amateur license has no value to anyone based on how they
> acquired it. The value is based on what benefit/pleasure derives from
> *using* it.

And to anyone who derives any serious benefit/pleasure
from the use of that license, it *has* value. Just like your
drivers license as used for vacation/pleasure, or in fact
the investment in your boat. Same priciple.

>
> Looking from yet another angle, an item or service is not more valuable

Well, Hans, if you paid $20K and I bought one too, I'd have
it for $18k or not at all. More likely I wouldn't buy a new
car at all. THAT is very poor return on investment when
near-new, low mileage "program" cars, well maintained,
proven in service and in full warranty can be had at
substantial discounts.

Hans' Score=Null

Thanks for playing. Please come again.

My daughter values her Ford pickup very much *because* it was free.
If she had to pay for it, she wouldn't value it at all because she
wouldn't have it.

>it needs to use amateur radiotelegraph code to handle
>emergency traffic with conditions are too poor for SSB?

I have a hard time believeing that local
conditions are ever that poor to warrant
use of CW for communications with the
local EOC. If the proper procedures are
followed, the only one that should be in contact with
a local EOC are the local hams in that community
and the next higher EOC (i.e. the county EOC).

Cheers,
Bill K2UNK

The reality then is that the ham himself was NOT
prepared for emergency work. Without VHF capability,
the ham is of little use. Every emergency operation
that invloves hams has shifted to a primary usage
of VHF/UHF. HF isn't needed locally by the individual
ham, although it might come into play between some EOCs.
Given that the EOCs should be better equiped, I do see
a need to standardize some use of a digital mode
among those EOCs. Such usage needs to be
established before any emergency.

Why did the ham not have VHF?

Dick Carroll said:

> And to anyone who derives any serious benefit/pleasure
>from the use of that license, it *has* value. Just like your
>drivers license as used for vacation/pleasure, or in fact
>the investment in your boat. Same priciple.

Of *course* it has value! But that value has nothing to do
with how *hard* you worked for the license. The value is
based on the benefit/pleasure you gain from *using* it. Similarly
my boat -- whether I paid a lot of money, or got it free, it is
valuable for the pleasure it gives me, not the acquisition cost.
"Hard to get" and "valuable" are unrelated except in collectable
items like precious gems and antiques. Since there is no known
numerical limit on the number of available amateur radio licenses,
the concept of "hard to get" has no effect on the value.

What part of that is hard for you to understand?

Dicks score=Null.
Come back and play when you are properly equipped.

Exactly! And just why didn't the FCC agree? Because
the statement was wrong. They went on at length as
to what they didn't concur/agree with. The FCC
didn't say they would take no position on the issue,
they elaborated as to what they disagreed with which had
been submitted as comments by those opposed
to a nocode license.

-- Before you continue on your foolish explination of Donnie and his actions there are several facts that you have chosen to omit. It was Donnie Anderson who brought his problems to ham radio and it was ham radio that Donnie used as his sounding board. Obviously you choose not to explain how Donnie ended up being disliked by most all of the amateurs on the band. It was for his actions on ham radio, yes you remember when he was sent the letter of warning from the FCC for HIS actions and not the actions of others. Donnie would come on the frequency and discuss his use of drugs and lets not forget the rude and repulsive sexual remarks that he made about the length if his "DONG". You possibly were impressed by his remarks and find him worthy of being your mentor, but we all know the truth and please do not try to be the Oliver Stone of amateur radio and change history, some of us have a better memory than you and hold the truth as a worthy virtue.
Donnie was busted for drugs and I do not mean a ounce, but rather pounds, yes, pounds. He has shown little or no apology for what he infected ham radio with. Know your facts!!!!!

Exactly. Passing my drivers license at age 16 was
a piece of cake for me. The value I place on that
license has nothing to do with the effort it took to
get the license and everything to do with the benefits,
pleasure and utility I derive from that driver's license.

> > They buy it because they want a 1/4" *hole*.
>

Consider this. Last summer, visiting relatives out West, I
got involved in assisting in building a deck on their house.
The first step was to drill anchor holes in the concrete
foundation to hang the ledger board. A little investigation
revealed that the concrete aggregate in that area was
crushed granite from nearby mountains, and not the
limestone as usual. HARD stuff.

What to use to drill the 3/4" holes in that HARD concrete?
- A hammer and handheld star drill??? Don't think so. We
didn't want the job to last all summer. A fast trip to Home
Depot turned up a medium duty 1/2 inch electric hammer drill
and an industrial grade 3/4 inch masonary bit. Prices were
even reasonable. The dozen holes were drilled, but still
not without lots of HARD work in that extremely hard
concrete. But the DRILL and BIT survived intact, as did the
drillers, and it was done in reasonable time.

Did/Do I value that hammerdrill, with it's industrial
strength bit??? If not for it we'd have worn out a couple
smaller ones and several more standard bits, and the job
would have taken LOTS more time.

The holes are the end product, but how you get them is of
primary importance.

You keep reinforcing my case for me!

You bought the hammerdrill because you wanted holes, not
because you wanted a hammerdrill. The holes are the
product you value.

The hammerdrill would have no more or less value if you
had rented it, borrowed it from a neighbor, or paid money
for it. It is simply the tool you use to get what you
really value, just as the amateur license is something
you must have to obtain the pleasure/benefit of operating.
No-one (rational) ever valued an amateur license. They
value the activities that it makes possible.

You are putting WAY toomuch pressure on yourself. If you are only waiting to pass the test to buy a rig, BUY IT NOW!! The experience you gain by copying code off the air will be invaluable.

Trust me - if I passed, you will pass. Took me two tries, but it was well worth it. One summer, I just made up my mind to upgrade and went from No-Code Tech to Advanced in one month.

In short - buy the rig - you'll pass eventually. And when you do, you'll be able to get on the air as soon as you get home!

Your responses remind me of our dear President, Bill Clinton, who deftly responded to a question by stating, "It depends on what the defintion of 'is' is". This is obfuscation at its best. I think reasonable people would accept the FCC's comment to be a polite way of saying precisely what you don't want to believe.
You originally made a statement claiming that it was a FACT that code tested hams were more likely to adhere to the FCC rules. Unfortunately, you did not include any data to back up this claim, so we are left to decide who is more likely to have access to valid data to support these two divergent views, you or the FCC. For now, I lean towards the FCC's position as being supportable with verifiable data. I would gladly entertain any VERIFIABLE data that you may have.
For purposes of this discussion, I would like to refer you to the November 1999 issue of QST Magazine. Specifically, I refer you to pages 78 and 79 in the "Happenings" section. There are two articles that report FCC action against three hams. Two of the three are Amateur Extra licensees. The remaining ham is a Technician licensee.
The mere fact that recent FCC action has been directed primarily

at Amateur Extra licensees would tend to discredit your initial statement
and buttress the FCC's position.

YOUR just andother NEW NO NAME
ET1121@hotlinks.net
One of the many that you liberty nits seem to keep morphing into. I have never denied the recording, What I am denying is that it was jamming. You stupid SOB Vic W1WCR moved in on our qso's that night I, and others, were the legitimate holders of the frequency when Vic and his croanies came on and tried to take it over. Your damn right I was pissed. But tell me something why do you keep putting out a two year old recording. I'll tell ya why, you have nothing else - I don't jam the net and you are a LIAR with NO name and NO CREDIBILITY. You iif and when "I" call someone a liar or anything, "I" want them to know who it came from. You members of the Liberty front have no integrity, except for two, who do identify themselves, even they ywist and distort the truth though. The rest of you should act like a man and identify who you are when making B.S. claims of name calling. Stop lying little one.

Hey Harry,

You ever hear anything more from that lunatic who was threatening to report you to the "internet authorities" {sic} for refusing to design and furnish him with a schematic and construction plans for the multi-KW RF generator for drying firewood? You sure attract some odd ones, he he. Keep up the good work, I love your site, and soon will build the complete Cigar Box RX/TX pair (have the RX done).

Boy are you ever wrong on that! It pisses me off that I can't find the
ARRL statement for the exact percent at the moment, but it was well into
the majority! Perhaps you weren't aware why we ran out of call signs
when the no-code tech license came out and now all technician class have
to use novice call signs!

Nice try making up that "30" number, is that your birhtday or something?

Or would he value the tool you drilled them with, or the piece that had the holes drilled in it (some folks see the donuts, some see the holes), or would he value your friendship for having drilled them for him?

I have several black powder guns. I value the ones I built more than the ones I bought.

As of the end of 1998:

Novice 10.2%, Tech 26.5%, Tech+ 20.3%, General 16.9%, Advanced 15.4%, and
Extra 10.7%.

Slow (5wpm) & No Code 57%, Faster Code 43.0%.

Nope, Bill is correct. Perhaps you read that techs+techpluses+novices
are a majority of all hams. That one is true at about 55%.
Nocode + slowcode = the majority.

Following this thread, I came up with the same solution.

Why can't a 'reliable' digital mode replace cw in the itcu treaties.
And why can't all new rigs come so equiped.

As for CNN, they are not an emergency broadcast system. If the local
equipment isn't working, they have to fly stuff in. How were they
transmitting their signal? Via Satalite? Ergo every amature should
be set up to do satalite communication.

Makes perfect sense to me :-)

We've been away for a while, but intend to re-start our (almost) daily "Due on Air" message on the reflectors and newsgroups.

Also, the http://www.dxbands.com site has been updated and made faster and easier to use. An on-going project, so not everything is finished as yet, but we are working on it !!

OK, here goes for today:

KC4/WA1O - McMurdo base (AN-011)
TM2F - Chausey island (EU-039)
V47DA - St. Nevis (NA-104)

More details on these operations can be found at
http://www.dxbands.com/dxep1199.htm

First of all Davies, you are irrelevant, insignificant, miniscule. Got it.
Secondly you jump to ASSumptions to quickly. I do want to thank whomever had
kkkevin booted from his ISP for puting up the crap he has there but alas it
wasn't I. Thirdly, I may now be interested in seeing that come about,
especially after your mouth overflowed the capability of your brain, and last,
I am interested in seeing kkkevin either 1, get booted, 2, take down his
mis-representations, since on one he claims I was using foul language but
anyone with 1 ear can hear it isn't so. or 3, I'll leave this one for someone
else to fill in, perhaps Doc.

Here is stuff from Westboro Baptist Church

What do you think of Jews?

"For he is not a Jew, which is one outwardly; neither is that circumcision, which is outward in the flesh: But he is a Jew, which is one inwardly; and circumcision is that of the heart, in the spirit, and not in the letter; whose praise is not of men, but of God." Romans 2:28,29. >>

They ought to call it the Westboro Bapist Boob Church of the Hatemongers. Church my behind! -It's a teetotalling watering hole of insipid bigoted fools who become energized even more, by treacherous preachers,to hate. The most laughable thing about this Westboro philosphy is how they try to christianize Judaism when Christianity was born of Hebraic roots. These proselytizing arrogant pompous numbskulls are more dangerous to America than any outside enemy because they foment internal problems and then declare themselves righteous.They are parasites on society and should be exposed for being exactly that. And N0VFP is equally parasitic and counter productive to the character and viability of this news group and therefore deserves to be kicked off. All who agree say aye.

aye ! hear! hear!
The bigots use whatever means that they can to instill fervor in their followers. what better way to do this than to abuse Scriptures and hide behind religion.This is partly what makes them dangerous to us, themselves and society.

Gee. You're right. There isn't a PD, FD or paramedic
outfit in existance that uses Morse code. Only ham radio, at
least in this country
And more often than you'd ever guess, hams ARE called upon
to use it.
Yeah, they "chose" to use it. It was either that or give
up, since voice SSB couldn't make the grade, and those were
the choices available.

Side observation: Clearly you are some sort of anonymous
Freebander; Yer sure as hell not a ham. No breathing human
with *any* ham radio license could possibly be that stupid.

They have quite a bit more money for equipment than each of us has.
Also, one of our specialties is utilizing HF propagation to conduct
point-to-point communications without dependence upon third-party
equipment. If the satellites CNN use go out, they're QRT.

Let's have a contest: You build a station from scratch using the
technology that CNN uses, and I'll build a CW station; let's see
who finishes first and can acquire the most contacts one month
from now.

Yet if they compared the number of phone operators who've received
NALs against the number of CW operators who've been NAL'ed, that
ratio will be quite large. (I can't recall reading about any CW
operator cited for any rule infraction in the last 25 years.)

Considering that you're obviously a humorous idiot, that's
not too surprising. The man said that he had two modes
available. HF SSB and HF CW. Storm static conditions became
so bad that SSB souldn't be copied. So they switched to the
only remaining mode available which was CW, and was able to
pass the message traffic. Do you think you can understand
that, Brilliance?

Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.misc,triangle.radio

I have come into posession of a very odd JPS NIR-10 DSP unit. It had no volume control knob, and no shaft - so I opened it up to see what else the previous owner had ripped out. To my surprise, I found that there had never actually been an external volume control installed - the pads on the board were untouched, and in the large pot R14's place is a small trimmer pot, accessible only with the cover off. The two chips U9 and U10, which on my other NIR-10 are marked "NIR-10 REV 3.0," on this unit are marked "NIR-10 SQUELCH." Resistor R5 is installed with only one lead connected (it's not been disconnected; it was never connected).

Upon firing it up, I found that indeed this unit does function as a squelch. In all modes including "bypass", if the bandwidth switch is set to "WIDE/NF", it takes an S8 or S9 signal to break the squelch. Switching to medium or narrow disables the squelch. The unit seems to function as a normal NIR-10 apart from this squelch feature.

A couple of questions for anyone out there who may know:

1) Was this "squelch" model of the JPS-10 a production model, or have I got a prototype? The serial number is 011467.

2) Is there any way to adjust the squelch threshold? Adjusting R14 only affects the volume.

Please send replies to joencREMOVETHISTOREPLY@mindspring.com, after removing the anti-spam "REMOVETHISTOREPLY" from the address.

Any information will be appreciated - thanks in advance!

Hello
I hope some of you might have some suggestions. I
have taken the 13wpm code test 3 times and bombed
out. I seem to think I am going to pass or feel I am
prepared for the exam and then panic when it starts
coming at me and start missing some of the characters
which ultimately means a failing grade. I am really
getting frustrated as I want to buy a new hf rig but
cant or wont allow myself to do it until I pass this
test. I failed the 5pm but passed the second time
I have been using the Gordon West tapes for the code practice. What do
u do if you get nervous or what other sites or tapes or HELP can I get

I really want this and am willing to put in the time but if I panic
on exams I dont know what the answer is . Can someone please offer
some assistance as I am getting frustrated as hell
Thanks

1960. How Anti-ARRL Is No-Code International? You Decide.

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-02 00:00:00 UTC
From: "Michael P. Deignan" <mpd@ideamation.com>
Message-ID: <8XzT3.30423$YB4.512725@typ12.nn.bcandid.com>
Source record: 128518
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

From the No-Code International home page:

"...No-Code International is not an anti-ARRL group. Instead it is
one dedicated to getting ARRL's members and leaders, as well
as regulatory officials world-wide, to change their minds on the
manual code issue...."

Yet, we see time and time again, anti-ARRL comments, anti-
ARRL filings,

Let's look at the Board of Directors:

James A. Carson (Jim) WK2K No data available
Herwig Feichtinger DC1YB Foreign Ham, he's excused
Larry Klose KC8EPO Posts anti-ARRL comments
Frederick O. Maia (Fred) W5YI Well known for anti-ARRL
Duane P. Mantick WB9OMC No data available
Guy Matzinger W1GUY Very anti-ARRL
Bruce J. Perens K6BP No data available
William H. Sohl (Bill) K2UNK ARRL volunteer
Carl R. Stevenson WA6VSE Very anti-ARRL
Richard L. Tannehill (Rick) W7RT No data available
Robert Vernall (Bob) ZL2CA Foreign Ham, he's excused

So, we have a total of 11 NCI BOD members, 2 of which are foreign
hams so we can excuse. That leaves 9 US-based Board members,
4 of which -- or 44% -- have previously either directly posted anti-
ARRL comments to RRAP, or have been quoted as making anti-
ARRL comments in other avenues. Another 44% are "undetermined"
(could be anti-ARRL, just have never made a public anti-ARRL
statement that I am aware of....), while only 11% -- Bill Sohl, can really
be attributed as being NOT anti-ARRL, since he is an ARRL
field services volunteer, he at least supports the League in some
manner (nobody has ever said that anyone has to support the League
100% of the time.)

So, with a clear 4 to 1 anti-to-pro ARRL stance, and 4 undetermined,
it is very clear to even the casual observer that despite No-Code
International's home page claims that they are not an "anti-ARRL"
organization, being anti-ARRL is very much what they are all about.

I have long been a proponent of what I call the brute-force method, but I think has otherwise been called the Koch method. Find a computer program (there are several around) that you can use to generate random characters or text files. Set the speed to around 18 wpm. Listen to nothing less than 18. If it helps, set the character speed at 25.

There are several benefits to this method. You will learn to hear, discriminate, and copy characters at a fairly high speed, which will stand you in good stead for the test, on-the-air copy, and for future tests. You will learn to copy easily at a speed that is sufficiently beyond the test speed so as to render the test almost easy. It will certainly be fast enough to account for the test jitters. You can use the ARRL bulletins as copy practice since they are sent at 18 wpm.

Everyone needs positive reinforcement, so cheat occassionally and copy a little 13 to see how you're doing, but basically don't listen to anything less than 18.

It'll be frustrating at first because you will miss quite a bit, but keep doing it and you will notice that the 95% you used to miss will quickly become 80% and then 60% and so on. The point to keep in mind through all of this is that you are making progress. That is your goal; to progress.

Don't try to get to 100% copy at 18 to take your test. Part of the test is looking over your copy afterward (before grading) and filling in missed characters. Unless they are sending random characters, you will be able to fill in a lot from context.

Copy every number you hear. It's amazing how many test questions are based on signal reports (numbers), age (numbers), temperature (numbers), rig (model number), power (numbers), antenna height or length (numbers), and so on. Numbers are easier to copy at a given speed because they are longer which has the dual benefit of more time to recognize, and easily recognized as numbers or punctuation.

Good luck. It's not as hard as it seems or as some people try to make it.

Let's be very simple here. The nature of phone and
the ability to use phone in a psedo broadcast fashion
is why there are no similar rules violations via CW.
Sending profanity in CW means only those that understand
CW will here it. Sending profanity via phone means
anyone can understand it.

At this time, that statement is false. The nocode tech today
constitutes about 30% of all hams. The other 70% are all
"code tested" at least. How well those that once took
a test on code now are still knowledgeable is a complete
unknown.

NO, Slick. You're soundind just like that other Slick Willie
we've grown so fond of. He also likes to revise
dictionaries.

From Funk and Wagnall's (really):

concur(def): "To agree or approve, as in opinion or action."
That's the ONLY definition that even remotely applies.

So FCC didn't agree that learning Morse code makes hams
more likely to follow rules and regulations. Suppose the
question was worded such that *investment of time, resources
and effort* was the question, instead. It is generally
accepted that things which are free and require little or no
expense, of time effort nor resources, are almost
universally found to be viewed as *less valuable* to the
vast majority of people. The things you must work to pay for
you are much more likely to value and protect.
Ham radio licenses are no exception, at least in my
generation. Other examples abound in history.
So if the FCC was to view the effort, time, the committment
of valued resources, consciously given by the aspiring ham,
as payment for the value received of code skill learned, it
would -MUST- alter the official viewpoint. Actualy, they
were just attempting to be nice to the no-codes.

You should consult the other Slick Willie for more
information on how to do a better job of revising Funk and
Wagnall's. I'm sure he can help.

Ok Dick, we will all hold our breath until you convince the
FCC that they -MUST- alter their official viewpoint. I'm
sure you know what the definition of 'delusionary thinking'
is.

Try to "copy behind," that way, if you miss a letter, you won't get
upset and miss even more letters. Just copy behind a letter or so, and
eventually, you'll get it. Just keep trying. GUD LUCK

> had rented it, borrowed it from a neighbor, or paid money
> for it. It is simply the tool you use to get what you
> really value

Total Nonsense! The value is NOT in the hole but rather in the expenditure of energy and time necessary to create the hole. The efficient tool vastly conserves resources that would otherwise be demanded to get the job done-whatever the job is. You are *gonna* get a hole, however it is done, the same hole whether it is a cheap hole or an expensive hole. The value *IS* in the tool that makes it so easy and fast to complete the job. Why else would we bother improving and inventing new more efficient tools????

HIRE the job done. Pay a workman $15 per hour to use a 5 lb hammer and a 3/4 inch star drill. Be ready for a LARGE tab.

Or hire the same workman using a hammer drill and an industrial bit. Pay him $50 per hour. You'll still save a bundle. Where's the value?

If you don't think a hammerdrill or an airhammer or an jackhammer or a earthmover has value, just try doing the job without one. If you can even get it done the expense will skyrocket. Your education is clearly incomplete.

Hans that ice yer skating on is getting thinner and thinner...

Not any more than if it took you much longer. A hole is a
hole is a hole. They'd just be more expensive if it took
longer.
I'd sure be interested in that pocketsized drilling tool,
though. There's nothing more intriguing and interesting to
those who DO things than the tools to get the things done.

We don't necessarily have access to the expensive equipment they
get to use (e.g., satellites). They don't mind communicating
utilizing third-party-owned gear -- they have the money to pay
for such use. (Wonder what the dollar per minute rate is to use
a television satellite?).

> If any
> Hams used Morse, it was because they CHOSE to, not had to because of
> conditions.

We're not always in the footprint of some amateur satellite which means
we have blackout periods. Not so with the commercial folks. Additionally,
if the distance is too great for V/UHF repeaters, then the only choice is
HF. Whether to utilize SSB, CW, or digital is dependent upon conditions
and what's available to all operators on that particular comm circuit.

> None of the Police, Fire, or Paramedics there used Morse Code either.

You mention them so often -- you must idolize them. Become one.

One of our specialties is utilizing atmospheric propagation for long-
haul HF comms. Morse does REAL well in that area. FM-phone, used by
the above mentioned services, works quite well for local V/UHF comms.
So PD, FD, and EMS utilize that mode.

Distance and atmospheric conditions determine what mode and frequency
to utilize at any given time.

>> technology that CNN uses, and I'll build a CW station; let's see
>> who finishes first and can acquire the most contacts one month
>> from now.

>It's already done!

Wrong answer. As an amateur, you should have the self-training needed to
build your own equipment if necessary.

> Who is able to communicate to more people, you or CNN?

We as hams do not have the same mission as CNN, and besides, we're not
permitted to broadcast to the general public, so your question is moot.

>Even if you were both able to reach the same audience, how many
>would understand your Morse Code message and how many would understand
>CNN's voice broadcasts?

Become a broadcaster if you want to be heard by the general public.
Amateurs communicate only among other amateurs.

> CNN (or any radio or TV station) will always
>make more contacts than anyone using Morse Code. If it were the other
>way around, all the commercials would be in Morse Code! (They want to

>use Microphones, I should HOPE that statistics would show this!

Not on HF. If you listen, you'll hear that roughly there are about the
same number of CW QSOs as phone QSOs.

If you wish, we could do the calculation on a per capita basis. The
ratio will still be huge.

>Just like more people die from guns in the United States than any other
>country. (HINT: The United States is much larger and has more people)

Again, do such a calculation on a per capita basis to balance out a
large sample population.

>More Hams that don't use Morse Code most likely commit more crimes, and
>do more other terrible things than Hams that use morse code. Also more
>Hams that don't use code abide by the law and are more intelligent than

Modulated continuous waves. But it's the folks utilizing on-off keyed
CW which seem to fall into the best-behaved catagory of operators.

Ah, but this is a very imperfect world, and politics make
it worse not better! Do you place all faith in planning and
on technology? Better get the latest issue of US News and
World Report, the news magazine, and read up on the threat
to the sattelites. You may not think its serious but
Washington does.
You think hams WILL plan and equip themselves for most
efficient emergency operation, when much of government does
not because its not cost effective to do so? Why? The vast
majority will use what they happento have available when the
hammer falls. So it has always been, planning or no.
Ans what is "proper procedures", anyway? Are they always
the same? How do they vary, and who decides?

Comeon, the world wants to know.

I have a vs-2 board wich makes the radio talk to you and tell you what frequency you are on. It will work in most of your newer moddle kenwood radios like the 450 850 950 870 570 and probably a few more if interested email racerjm3@aol.com

>You didn't say "in common", Jeff.

You bet I didn't. I've been saying "...common mode among the world's
HF operators..." Two amateurs running spark does not make spark a
common mode among the world's hams, but your misinterpretation of
Webster would make it so.

>However, your statement is false anyway. For HF hams to share a
>common mode they must possess the electronics to satisfy that
>mode.

If a ham doesn't have HF gear available to him, then he's not an HF
operator (nothing to operate).

Jeff

Hi Will,

No, he has been remarkably quite. No doubt he tried to use his "wasta" to do something but failled. I should have copied him the Heathkit linear and HF TX and charged him for it!

Interesting that I have had yet another request from a different source, the guy wanted electronic info to build an induction fornace. He said it would be of benefit to us "hams" since we could then make custom aloys. In all my years in hamradio I have always tried to avoid melting metals in my shack - success rate approaching 99%! You can read this yourself if you look at the message board.

Yeah, Cecil believes that if just two hams have spark capability, then
spark is a common mode among the world's hams.

(I still find it difficult to believe that spark was prohibited as late
as 1966.)

Hello to all:

I'm planning to visit Seattle/Tacoma in the next few days and am looking for active repeaters in both areas (2m and 70cm).

Also, if you can provide frequencies/callsigns for local FM broadcast stations, too, it would be appreciated.

Thanks.

Dick, do you have a year's supply of storage food and water
for you and your family? Do you have emergency power available?
Do you have emergency heating available? Are you equipped with
gas masks? Do you have antibiotics in storage? If not, you are
not practicing what you are preaching. You are not living your
life based on a worst case scenario. Why do you want hams to
live their lives based on a worst case scenario? What is wrong
with live and let live?

More Cecilian BS! We're talking about ham radio operators
being prepared to fulfill their mandate to provide, on a
minimal level, some viable radio communications in relief of
disaster! Nothing more.

No more of your 'live and let live' nonsense. If you want
to live like that you don't deserve an amateur radio
license. You clearly don't intend to conform to the basis
and purpose of the ARS.

You are not living your

[SNIP]
The Rev. Dr. Martin Schramm, dean of humanities at Concordia University and an amateur radio buff, has struggled recently with whether to place a radio antenna in the college's bell tower, upon which rests a cross.
[SNIP]
Source:
http://www.latimes.com/editions/orange/ocnews/19991102/t000099378.html >>

<<An interesting article and thanks for bringing it to our attention. Through the years one of the main points of the Christian Right Wing is to tell everone how pure they are because Jesus threw the moneychangers out of the temple as if this is supposed to mean that money was being handled INSIDE the temples. This is blatantly false. Yet, look at the hypocrisy of it all today. Poor plates are passed to collect money INSIDE churches. BINGO is played inside churches. And now cellular telephone companies are paying plenty a month to churches get permission to install their antennas atop steeple and within bell tower crosses.
Jesus, when will all this stuff end?

So, that's pretty much the story. I got the unit (along with a
"normal" one) from an e-bay auction last week.

2012. KK7HO continues HF criminal activities

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-03 00:00:00 UTC
From: Earl Paulson <epaulson@onramp.net>
Message-ID: <38206EE2.25383309@onramp.net>
Source record: 128320
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

KK7HO spun:

> ET1121@hotlinks.net This character sure is repetitious. same ol shit from the
> NIT NET. find some recordings newer than two years old OK??

That recording isn't even one year old. It was make last November as you
were jamming the liberty net. It's the real you, mean spirited harrasment of
Harvey and the others that were discussing baud rates on VHF.
So quit lying tim.

If it's a more recent example of your criminal activities, just listen to:
http://members.xoom.com/_XOOM/sixisone/k5blb_kk7ho_obscenejamming_19990509_0254cdt.wav

> hell you don't
> even mention the fact that w1wcr Victor Misek moved the net onto an occupied
> frequency that night. that's why he got what he did

Another lie from KK7HO. If you listen to the 6 minute recording,
you will hear a normal QSO in progress, and then you come along canting
and jamming the conversation. It's just another shamefull example of your
lawless tactics to distrupt normal amateur radio operations. Just listen to
the recording at: http://members.xoom.com/_XOOM/sixisone/volz.wav
to hear the truth.

And even if it were true, who are you to meat out punishment by breaking
the law? Get a grip, tim. You're way over the line here.

> and yes I was a little angry - most would be.

At least I'll give you credit for finally admitting that you
-WERE JAMMING- the liberty net, but then I guess
you don't have any choice, since the recording makes it
so clear that you are the criminal here.

Please stop the jamming KK7HO.

More lies from KK7HO. The recording is less than one year old, and it's
Volz that moved in on the frequency. Not the other way around. To confirm
this, just listen to:
http://members.xoom.com/_XOOM/sixisone/volz.wav

> I have tons of tapes, hundreds of hours of Vic and the Liberty Front moving onto
> an occupied frequency hell let's break out all of the OLD tapes

Please produce them, Tim. We'd love to hear them. Or is this another
of your lies?

Please stop the jamming KK7HO.

2018. New System & Receiver Design Video Workshop

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-03 00:00:00 UTC
From: Kathy Goerg <kgoerg@webblabs.com>
Message-ID: <38207C0E.2EEF01EA@webblabs.com>
Source record: 128326
Cross-posted to: rec.radio.amateur.misc,alt.ham-radio.marketplace,rec.ham-radio.misc

Richard Webb's acclaimed System and Receiver Design Workshop is now
available on video tape. This eight hour presentation dramatically
clarifies and quantifies the process of moving a signal from a
transmitter through space and through the receiver. The effects of noise
are related at each system location. The System and Receiver Design
Workshop video set includes accompanying printed support materials which
may be copied without restriction for distribution within your
department or organization.

EIGHT HOUR COURSE OUTLINE

Introduction
The Definition of Noise
Phase Noise
Amplitude Noise
System Noise Contributions
Antenna Noise
Background Contribution
Ohmic (Antenna) Contribution
Feedline Noise
Intrinsic Receiver Noise
Noise Temperature
Equivalent Receiver with Noise Translated to Input
Realization of Desired C/No
The T/R Free-Space Link
The Radar Free-Space Link
Signal Types - Modulation & Demodulation
CW
Pulsed CW
AM
SSB
MFSK
MPSK
The Generic Receiver
Sensitivity
Dynamic Range
Single Tone
Two Tone
Overload
Single Tone Compression
Two-Tone Intermodulation
The Sensitivity/Dynamic Range/Bandwidth Tradeoff
Receiver Types - Relative Merits and Applications
Crystal Video

Homodyne
Superheterodyne
Downconversion
Single/Double/Triple Conversion
Upconversion
Single/Double/Triple Conversion
Instantaneous Frequency Measurement (IFM)
Compressive (Microscan)
Channelized
Angle-of-Arrival (AOA) Receiving Systems
Amplitude Comparison
Phase Comparison
Spread Spectrum
Time Hopping
Frequency Hopping
Direct Sequence (Pseudo Noise)
Chirp
Other Included Topics
Transmitter Linearization - Envelope Feedback
The Non-Zero IF vs. Quadrature Detection

$675

That an out and out lie, Dick, one of many. Here it is again:
"common - belonging to or shared by two or more individuals
or by all members of a group."

Note that any number between "two" and "all" qualifies to be
defined as "common". Jeff's mistake was not adding "all" to
his statement. Don't blame me that you guys don't know proper
English.

Aha, I thought so. Either you are for preparing for emergencies
or you are not. By your response, it is clear that you are not.
It therefore follows that all you want is the power and control
that you feel comes with the elite extra class ham license.
Sorry to disappoint you, Dick, but absolutely nothing except
privileges come with the extra class ham license.

Which is more important during a disaster, Dick. Food and water
or Morse code skill? I rest my case.

My rational REAL response was to post the definition of "common"
from the dictionary. It was dismissed. Therefore the copout.

Nope, I didn't say that. I consider all licensed hams to be
ham radio operators. If I ask you if you are a ham radio
operator over this newgroup, wouldn't you say you were even
though you cannot operate and type a netnews response at
the same time?

Just more BS coming from "Onramp" huh.
You know, NO ONE has to move, which is what the "broadcast" net expects. On that instance The idiot LID operators moved in and tried to take the frequency. Oh well, Vic has recieved notice TWICE from Riley for doing this. Oh course you'll find some way to LIE about it. LOL

YOU want to Hear CRIMINAL activity on the ham bands??? LISTEN TO THIS

So you are a ham radio operator only when you operate? Your student
asks you if you are a ham radio operator. You reply, "Of course not!
I'm a teacher."

There's a goldmine here. Even homebrewing brews! :)
I never thought about it before, but I've done almost all
homebuilt projects during winter. Something about those
short days, and cold outside, that makes you want to cuddle
up nice and close to a hot soldering iron. :)

Jeff, you say you implied "all" the world's HF operators. For your
statement to be false all I have to do is find one HF operator who
doesn't own a CW key or keyboard. I know one in Arizona. I'm sure
there are many others.

HUDSON, NH:
The FCC has asked a net control station of the Liberty Net on 3950 kHz to justify the net's use of Amateur Radio frequencies. Via Certified Mail May 7 to Extra class licensee Victor A. Misek, W1WCR, FCC Legal Adviser for Enforcement Riley Hollingsworth said monitoring on May 1 indicated that Misek's station and members of the group for which he was acting as net control "began transmitting on top of existing Amateur communications that were already in progress." Hollingsworth said that such operation "is considered deliberate interference and cannot be tolerated on the Amateur frequencies." Hollingsworth pointed out that Congress has authorized the FCC to seek information to enable it to determine the qualifications of a licensee or applicant. "We are so far unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service," Hollingsworth wrote. He suggested The Liberty Net explore operation on the Internet or seek a low-power FM broadcast grant if that service is authorized. Hollingsworth reminded Misek that Part 97 "prohibits communications on the Amateur frequencies that, on a regular basis, 'could reasonably be furnished alternatively through other services.'" He also pointed out that Part 97 prohibits broadcasting .

For Sale ICOM 720A HF 160-10 meters 100 watts

Excellent condition, works electronically and physically on a scale of 1-10
it is a 9. Has only one little problem, the push button power switch is
locked in on position.
Comes with hand mic and instruction manual.

Want $350.00 plus shipping UPS to your door.
If interested contact ka0nno@6mt.com

Thank you Lisa

I can answer my own question here; according to a newspaper
article in today's Honolulu Advertiser, "...CBS rented 13 hours
of satellite time, at $50 for five minutes, to beam reports..."

$50 for 5 minutes. =:o

>useful tidbit out of this prolonged (and somewhat pointless) thread.

From the FCC database as reported in the 10/15/99
issue of the W5YI report:

Amateur licenses as of the end of Sept 1999

Extra = 75,165
Advanced = 103,544
General = 110,544
Tech + = 133,534
Tech = 199,363
Novice = 53,576

Total 675,739

From the above, the nocode tech (199,363)
is exactly 29.5% of all hams (675,739)

Hope that answers your question.

> Either you are for preparing for emergencies
> or you are not. By your response, it is clear that you are not.

The vast majority of hams do little or nothing in the way
of actively 'preparing' for emergency communications. Thats
all the more reason to 'build in' a minimal amount of
preparation for them. THAT is the point.

> It therefore follows that all you want is the power and control
> that you feel comes with the elite extra class ham license.

More of your seat-of-the-pants logic? Stuff it back,
please.
It's very clear that your dissppointment in the fact that
YOU can't control everyone here --me especially-- with your
alleged 'superior' intellect. So you troll onward, bashing
everything and everyone in your path, jealousy exuding with
each and every post. You are truly pathetic.
The tragedy of it is that your influence here could be very
positive. Instead your inability to gain the extra class
drives your every sub-thought. And really, it isn't a true
inability. You just can't force yourself to to the
selfdiscipline it takes to gain sufficient skill in code
over a short period of time. So you take it out on those who
have.
Cecil, you're a pretty dispicible sub-person.

> Sorry to disappoint you, Dick, but absolutely nothing except
> privileges come with the extra class ham license.

Sorry to disappoint you, but that's the only reason I got
the extra class license in the first place. If not for
Incentive licensing I's till have my Conditional. Whats your
excuse?

> Which is more important during a disaster, Dick. Food and water
> or Morse code skill? I rest my case.

2049. THE 14.313 SCHMUCKS!

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-04 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991103212950.04205.00001749@ng-fs1.aol.com>
Source record: 128347

I gotta admit that the Herbie tuchus-tailing parasites are hilarious. I'm at a desk doing paperwork listening to 14.313 and the imps are screaming that they're writing Riley because I'm supposed to be jamming. Then I get e-mails from darn nice folks who tell me that the warts are blaming me and I tell them that they will do anything and everything to get me removed. Yes, even lie as they've been taught to do by the felon from Saint Crotch. I ask you-does a man of my intelligence, charm, good looks, Extra Class prowess and modesty really care about what these amateur proctologists do? If Riley H. believes the garbage coming from the likes of KT4TR "Badblood" who patches up holes in his walls with warning letters from the FCC, from Queenie the Weenie, K3QAM, the belle of the ball out of McQueensport,PA., from Hemorrhoid Lloyd, WA2EXQ, the Liberty Net lover and anti-Semite out of Highanus,MA who, standing 6'7" served in the submarine service as a human torpedo, from Wesley the Wimp who probably sends Riley "Fuddograms" since he never was able to catch "dat cwazy wabbit," and a few other assorted nuts and bolts, then Mr. H is gullible beyond belief. And today my bosom buddy Donald Anderson, W4JYZ, told me that he was asked to boycott talking to me since that's become the prevailing trend but refuses to be a sheep. Allow me to tell you goofballs something. You who lie about me-you who boycott me on the air-you snivelling crotch smelling meatheads- I wouldn't give any one of you the right time of day in my day to day life. You're worth SPIT! Not one of you can come up to any of my levels, from intellectualism to jocularity. You have no sense of fair play and justice and tolerance. I consider you as insignificant miniscule zits and nothing more. The ones I respect and vice versa will always talk to me and I shall worry only when those DECENT hams refuse. To think that I am concerned by YOUR boycotting me tells me that you think you're important enough for me to care. What a joke, you flaming idiots. If you caught fire I wouldn't pee on you.
AF2Y, Doc

Then check your Webster dictionary (again) only this time study
the definition of "operator."

If one has no equipment with which to operate, and thus, does
not operate, he should not be considered an "operator."
(But you consider spark to be a common mode among the world's
hams if just two hams have spark capability, so I'm sure you'll
bend the definition to suit your argument.)

Jeff

I agree, they totally messed up on the HTML, and using the background tag is not good HTML. They need to read up on HTML before trying to destroy the language.

So that person who can only "operate" by using
a friend's station or a club station isn't a ham
operator? Or is that person only a ham operator when
actually operating? And if Yes to that, does
that make me not a ham operator when I am in my
office and have no access to any station at
all...even though my mobile rig is in my car
and I have a station at home? :-)

Cheers,

I must concur with Ms. Volz as long as KK7HO and K5BLB are on the air there has been no meaningful enforcement.

I have never met or even seen Ms. Volz but I did see a two year old being lead out of the toy department by his Mom, he was screaming and crying and flailing away with his little fists, so I think I have a good idea what Volz might look like.

Before you launch in to your usual pre-schooler tantrum Volz, I don't give a rats ass about the Liberty Net or Front or whatever. I don't support any particular group I am simply disgusted with your on air and on net behavior. You, Sid and the rest represent the very worst amateur radio has to offer. It is a real shame that the good decent amateurs have to be tainted by your behavior. Even if your antagonists did all that you accuse them of--and they certainly do not--they would still be light years better amateurs than you and your jammer buddies.

2056. REPOST: This Week on SPECTRUM - 6 Nov 1999

Source record: 128354

Well, you've convinced us to keep doing the show, so we figured we'd jump right into the fire...

Call us crazy, but this week we bring the code/no-code debate to shortwave. Hams talk about it on the air. Wannabe hams talk about it in lots of other places. Here's a chance to hear both sides from both groups!

There'll be a bit of structure, but we won't be suppressing any opinions. Is CW a proficiency filter, or a roadblock to entry into the hobby? Proud tradition, or archaic communications mode that should just go away? Does it matter what other countries, the military, and maritime services do about CW, or are the purposes of the Amateur Radio Service better served by a more independent view?

Make your case for or against maintaining CW as a part of amateur radio. It just might be interesting...

2058. A message to W2ISX(he loves Herbie)

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-04 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991104065455.02649.00001004@ng-cl1.aol.com>
Source record: 128356

Bob, what would have happened had Herbie not taken the rap for Monika? And why did he take the rap. Here's the reason.
I have before me the Interim Report of Investigation by the fraud investigator for the Caribbean Automated Long Lines Service. It starts out with LOCATION OF OCCURENCE meaning location of phone fraud. It states:"Residence of the Schoenbohm's corresponding to P.O.Box 2570, Christiansted,St.Croix,USVI; OFFICE OF PAN AMERICAN AIRLINES,St.Croix Airport, St.Croix,USVI; other unknown locations. I ask you-who was working for PAN AM? Big Bird? Howdy Doody? No, Monika Schoenbohm. It seems it was much cheaper calling her family in Deutschland at someone else's expense at St.Croix airport than paying for the call at home. Right?
What else does the interim report state about Mrs. Schoenbohm. Let me quote: "SCHOENBOHM, Monika L. (NFI); Civilian; SSN Unknown; D.O.B.Unknown; Mailing Address-P.O.Box 2570, Christiansted,St.Croix,USVI 00820; Street Address-Unknown; FRAUD AND RELATED ACTIVITY IN CONNECTION WITH ACCESS DEVICES (Title 18,USC,Section 1029) CONSPIRACY TO COMMIT FRAUD AND RELATED ACTIVITY IN CONNECTION WITH ACCESS DEVICES."
What say about that, Bob? A mistake? Bad judgment on the part of Mrs. Schoenbohm? What kind of excuse are you going to come up with? I'm curious. But wait, there's more.
The Synopsis of that Interim Report states as follows:
"Investigation revealed that Herbert Schoenbohm, using a computer program and/or related methods designed to infiltrate telephone systems, knowingly and with intent to defraud, produced, possessed, used and trafficked in one or more counterfeit access devices(codes) and generated, through personal use, fraudulent telephone calls vakued at.....Continued investigation revealed that Monika Schoenbohm used one counterfeit access device(code) which was also used by Herbert Schoenbohm, to generate at least one fraudulent telephone call, therefore verifying that Herbert and Monika Schoenbohm CONSPIRED to defraud CALLS and legitimate customers of long distance service. Investigation continues."
Monika is still innocent, Bob? It's all bull, right? Do you see now why Herbie had to act extremely quick when confronted by Secret Service Special Agent Ott? Herbie's willingness to take the rap was NO SPUR OF THE MOMENT decision but calculated because of the evidence against his beloved. I therefore suggest you do not pull the same apologist for the crooked Schoenbohms routine here as you have done on the radio for years. It won't fly. Had Herbie not taken the rap,Monika too would have been convicted at trial, sentenced to jail as was her husband and probably been given in lieu of jailtime the same puny punishment rendered Herbert. But then again had Judge Thompson not been so tender and understanding, she could have locked them up together in the same cell to erase the guidelines of conjugal visits which would have resulted in more children and of course, in more jailbirds. Case closed.

I agree Mr Avenger...I'm not for any "group". I think they all are losers and a disgrace to ham radio. I'm so sick and tired of the crap posted on this newsgroup day after day...the same people putting out the same hateful posts. I wish we could get them all together and hand out shotguns (so no one would miss) and let them have at it. Maybe the rest of us (99.9999%) can have some peace and quiet and operate ham radio with good standards and mutual respect.

Wow, what an emotive response to what was a reasonable observation. Just goes to show how pathetic this thread has been. Hmm are you feeling so inadequate that you have to sink to personal attacks due to your inability to swing others to your viewpoint??

That's an example of a person who *does* have equipment to operate,
so yes, he's an "operator."

Cecil's example was where a ham was HF-licensed but didn't have
HF equipment to operate; as you've pointed out, there is always
going to be equipment to operate *somewhere*. Thanks for showing
that Cecil's statement was an impossibility.

Oh yeah? What about an HF ham who lives all alone in the middle of
nowhere, has no ham friends, and doesn't own a key or keyboard?

Seriously, I know of at least one HF ham who chooses not to be
a part of your common mode CW group. He got a technician license
40 years ago and promptly forgot Morse code. He was grandfathered
into tech+ and spends all his HF time on 10m SSB. He wouldn't and
couldn't use CW if his life depended on it. That one HF ham who
is incapable of CW is all it takes to prove your "common mode for
all HF operators" premise invalid.

Actually, you didn't limit your statement to hams so you are
forced to prove that the HF CB operators have CW mode capability.

Hi everybody,

I intend to buy such a transceiver but would like to know if and how I
can extend the RX frequency range ?
What will then be the frequency coverage in the full open version ?
Do you have any other good or bad experiences with this transceiver ?

Many tnx in advance
Helmut

Hi Gil,

Take a look at the summary of the ARRL lab test reports available from ARRL. You want a radio with a very high blocking dynamic range etc. I prefer the IC775 in this regard. The receiver is possibly the best out there right now. And, run in analog mode the transmitter sounds great too.

Good luck,

Dick, K0DK

Your logic is very good. It is also be copied by high schools everywhere.
If students don't want to learn, why should we make them.

2076. 10 meter Frequencies

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-04 00:00:00 UTC
From: Frank <ve6cb@cadvision.com>
Message-ID: <382223e9@news.cadvision.com>
Source record: 128374

The following frequencies seem to be in regular use by CB operators:

28.055
28.065
28.085 truckers
28.105
28.115
28.125
28.135
28.195
28.225
28.265
28.305
28.745

I am sure there are many other frequencies that I have not noticed.

Most of the time the signals are fairly weak, but if those nut cases with up to 85 Kw on the regular CB band ever make their mind (what little there is) to move up to 10 we are doomed. I suggest using these frequencies as much as possible to keep them clear. Fortunately in Canada we can operate on voice in the CW band (something I don't like doing, but the lesser of two evils if it helps clean up the band). I notice a few hams running high power RTTY especially on '085, but people that live near I95 and other heavily traveled highways could help in this area.

Attempting to communicate with these individuals is pointless, since they seem to have a mental age of about 7. I have heard hams hurling profanities at them, but that simply lowers them to the CB level.

73,

Frank

Actually, I had pretty good luck on Saturday Mornings -- the place we held the classes at the time was otherwise "closed" at that time, so we didn't conflict with anything else and could have a run of 3 months straight at a time.

Thursdays and Tuesdays was also pretty good. Mondays were fair. Fridays were the worst. Never tried Sunday, Wednesday.

there's always someone who can't make it..

LOL! Lloyd repeatedly expresses his hatred of others with anti-semitic or racist comments, and a link to a "godhatesfags" site, and yet actually wonders why someone might DISLIKE him!

73. Leigh Marrin/KM6JE
http://www.god_loves_doofuses_and_unintentional_irony.com >>
***Leigh, we have here a man in his middle to late '20s who apparently has no job, no male friends, no female companionship, lives with mommy and daddy and has nothing else to do but to attack anyone not white, this government, Jews and immigrants. Furthermore he passes himself off as a college graduate who neither can spell nor possesses any knowledge of grammar or sentence structure. His claim to fame is that he belonged to a miltant right wing extremist church in Topeka before being exiled to Alabama. And this piece of garbage wants notoriety on the Internet? Yet Martin "Bullchittum, W9XV this month, classifies him as Chief of Communications of the BARF(Bigoted Aamateur Radio Fascists). Lloyd obviously is a failure at "young manhood" and will progressively go downward to the gates of hell or Tupelo Mississippi which are one and the same. The man's a worthless, vile bigoted rat and deserves to be censured at every turn. What I just posted about the guy are compliments. I'll be back later to list his faults.

Very nice radio -- have had it for a year 1/2 -- love it and its little
brother, tm G707A --

Mods are at http://qrz.com/files/modfiles/mod.cgi?tmv7a.txt

I have performed the mods and they work fine -- both RX and TX.
makes it a nice scanner with the RX extend. can work marine bands,
commercial, etc with the tx band extend.

cheers

Isn't that the truth.

I learned from years of coordinating club events that you just have to pick a day/time and go with it. For a long time I had certain friends that I wanted to attend whatever function I was organizing and I would consult with them to get the time when they would be available. It eventually turned out that every possible combination was bad for someone. And even then, sometimes the party I did the work around for didn't show up. I finally said, "the hell with it," picked a time/date convenient for mois and let them work their schedule around it.

You could be giving away free dinners and someone would complain that there was no decaf. I have a much better analogy not suited for public display.

You let him off too easy. Here's what my suggestion would have been:

> 1. what happened to you[r] (sic) dental practice?
Not your concern (he used this response to your query about updating his
address with the FCC in June or July)

> 2. What went on between you and Doris the SWL?
Not your concern

> 3 . What about your tax avasion (sic) [evasion]?
Not your concern

> 4. [What about the] DUI charges against you?
Not your concern

> 5. You were cited for interference by the Kingsville FCC office. Tell
> us about what it was for (sic). It was for playing tapes of Adolf
> Hitler on 14.313.
Answered in June or July

> 6. Why did you choose to become a Jew?
Not your concern

> 6a I heard [that] you were kicked out of [the] Jewish Church?
Jewish Church? Is that like a synogogue or temple? But, not your
concern, nonetheless

> 7. Why do you countinally (sic) post hate against me, KV4FZ, Frank
> Tood (sic) and W9XN[?]
This is so self evident as to not require a response

> I hope you answer these questions [to] the best of your honesty.
> These are questions that have [been] posed to you on the air and on
> this newsgroup.
So what? They are still none of your business.

I know you don't need any help, but this was so ludicrous I had to do
something with it. There's no wonder that this character
is #1 on the BGO idjit list as voted by ng participants.

I had to add a lot of stuff (in brackets) to make this readable.
Apparently a college education isn't what it used to be.

Try one of the various "screwdriver" designs. They're fairly small
and have the added advantage of "tune-on-the-go" if you want to
switch bands without stopping.

Why not go for the ATAS100 that is the companion to the FT100. It is a small screwdriver that is about 5 feet tall when fully extended. I have one mounted on my Explorer and have not had any problems with it.

You can auto tune it using the FT100 with just the push of one button. No having to get out and adjust a tap or change a coil.

could anybody tell me if i would be able to get something to receive the
GMSK telemetry using an AR5000+3 receiver ?.
this project sounds quite interesting !.

Why is it that you refuse to put forth the effort to obtain a higher class amateur radio license so you can join your "friends" on the liberty net ? This would relieve me and the other users of this PUBLIC news group of your constant childish postings of a personal nature.

Profanity is only one aspect of rule-violation. Yet, as far as I know,
no one using CW has ever been cited for *any* rule infraction in the
last 25 years.

Have a great weekend, Bill.

According to you, anyone licensed is an "operator." You're playing
your own devil's advocate. Stop it or you'll give yourself an ulcer.

> Seriously, I know of at least one HF ham who chooses not to be
> a part of your common mode CW group.

He passed a code test so he *is* part of that group. Like typing
or bike riding, he might be a little rusty, but it would come back
to him.

> Actually, you didn't limit your statement to hams so you are
> forced to prove that the HF CB operators have CW mode capability.

For years I've been prefacing such remarks with "...the world's
HF-licensed hams.." so "hams" was certainly implied this time.
Unlike someone else in this discussion, =:o, I *am* consistent.

Can anybody help me identify this Palomar Linear Amplifier that I just picked up. I was told that it was a Skipper but that is all. It is a six tube linear that seems to have two tubes driving four more. It has a chrome top and a single edge mount meter. It has a band select that indicates that it tunes from 10 to 40 meters. I would like to find out what the power output is and see if I could locate a manual or schematic. Will gladly pay for copying/postage costs etc. Thanks Don KB6GQA

Very sneaky lawyer talk! As far as I know, no one using voice has ever
been cited for any rule infraction either!

Just because YOU aren't aware of the many violations from code-freaks,
does not make them not exist.

Are Your Tax Dollars Going to Bilderberg?

Will your tax dollars help subsidize a meeting of super-rich globalist power brokers at a public facility on Capitol Hill in Washington? That’s just one question raised by Bilderberg watchers.

Exclusive to The SPOTLIGHT

By James P. Tucker

The steering committee of the deep cover international Bilderberg group will meet at the Library of Congress in Washington, Nov. 4th and 5th, sources within the shadowy organization have confirmed.

Bilderberg, financed jointly by the Rockefeller and Rothschild families, is composed of roughly 120 high-level elite policy makers, financiers, media controllers, corporate officials and others from NATO countries. They gather an nually, behind locked doors, surrounded by armed guards, to chart the course of future world affairs.

Certain to attend are David Rockefeller (A JEW) and Henry Kissinger (A JEW), who are powers
in both Bilderberg and its more public brother group, the Trilateral Com mission.
Festivities begin Thursday night, Nov. 4, with a dinner in the huge, ornate Great Hall of the Jefferson Building - the oldest and grandest of the three federal library buildings. Work will take place all day on Friday, Nov. 5, in room 119÷also known as the “Members’ Room” of the Jefferson Building. (“Members” refers to congressmen.)

A major agenda item will be control of the White House. Bilderberg owns almost every horse in the White House derby - but not Pat Buchanan. It owns Vice President Al Gore because his boss, Bill Clinton, is a Bilderberg man and a top aide, Thomas Labreque, is chairman of Rockefeller's Chase Manhattan Bank.
Bilderberg also owns Texas Gov. George W. Bush Jr. because his father, the former president, was a long-time Trilateral member. As a senator from New Jersey, Bill Bradley attended a Bilderberg meeting in Gleneagles, Scotland. Similarly, the other candidates÷except Buchanan÷are sur rounded by Trilaterals and Bilderbergs.

Pat Buchanan is the subject of much nervous discussion among Bilderberg leaders. Buchanan has for years denounced international control of American foreign policy. His opposition to world government, which he loudly proclaims, his “America-First” position, his opposition to sending Americans
to fight wars in which there is no national interest and opposition to such

economy-gutting treaties as NAFTA and the World Trade Organization anger Bilderberg.

If nominated by the Reform Party, which he has now joined, Buchanan could be on the ballot in all 50 states. It would be hard to deny Buchanan the right to debate the two major party nominees. In such debates, the fiery Buchanan would blow out his fastidious opponents. It is a scenario that strikes fear in Bilderberg hearts.

Having Buchanan educate millions of Americans in TV debates on its secret agenda for achieving world government, with America and all nations surrendering their sovereignty to the United Nations, is a prospect Bilderberg dreads. For 45 years, Bilderberg has employed immense measures to maintain its secrecy.

Among routine business, the committee will decide where to meet next spring. One site being considered, ac cording to a Bilderberg source, is the Schloss Hotel about 30 miles outside Frankfurt, Germany. It is a typical site: a former castle and now a luxury resort easily sealed off by Bilderberg's private security and the German military and police.

Also to be decided is what "fringe" participants to invite. Every year, a few non-regulars are invited, some discarded and a few brought back. If someone is invited for the first time, it's important to follow their careers. Clinton, a long-time Trilateralist, was invited to Bilderberg at Baden Baden, Germany in 1991 and was elected president in 1992.

An Internet report claimed Gore and Republican presidential contender Sen. John McCain (R-Ariz.) along with Sen. Chuck Hagel (R-Neb.) would be attending. However:

McCain's office said he would be out of town.

The White House said the vice president is not scheduled for the Library of Congress on those dates; and

Hagel's office told The SPOTLIGHT that the senator's schedule did not include attendance at the Bilderberg confab. (Hagel did, however, at tend the Bilderberg meeting in Portugal this past June.)

Last spring, after The SPOTLIGHT reported factual data about the planned Bilderberg meeting in Portugal, the same Internet site reported (falsely) that Pope John Paul II was scheduled to attend the Portugal meeting. In fact, the pope was in Poland when Bilderberg met at Sintra, Portugal, June 3-6.

All of this suggests that there is a great deal of misinformation - perhaps deliberate disinformation - being circulated. The SPOTLIGHT will report just the facts.

Don't know how you can say that, Jeff. CW is the preferred method
of jamming in the SSB band. And the jammers are coded hams.

International Telecommunications Union (ITU) is the organization that
administers the international treaty and radio regulations. Section S25.5
of the present ITU regulation provides:

"Any person seeking a license to operate of an amateur station shall prove
that he is able to send correctly by hand and to receive correctly by ear
texts in Morse code signals. The administration concerned may, however,
waive this requirement in the case of stations making use exclusively of
frequencies above 30mhz."

also
> would not have access to the HF bands (similar to the Technician license,
> which I passed the test for last night by the way 8>).

Correct, however a ITU member country can exempt itself from the rule by
following a certain procedure. To date the procedure has been keep a
secret or is not well known.

> Unless the treaty is changed, which I wouldn't think likely, the code
> requirement will remain. Perhaps what should really be debated here is
not
> the elimination of code, but instead a radical change to licensing
> structure?

The general consensus is that rule S25.5 will be deleted at the next WRC
that deals with amateur radio regulations.

> I seem to recall reading somewhere that while the treaty calls for a code
> requirement, it does not specify the speed, so it could be possible for
the
> FCC to only have one test (5 wpm) and drop the other two.

Correct. It appears that some ITU member countries have some interesting
interpretations of the S25.5 rule,

> Regardless, the code looks like fun to me, and I plan to buckle down and
> study to try and pass the 5wpm test in a few weeks.

Good luck.

> lot of countries, opens up and CBers start cluttering up the bands with
> skip chasing.

Yeah, that's right....The FCC *DID* violate international
radio treaty in spinning off the 11 meter ham band, a
worldwide amateur allocation, to crete "CB".
Though it was not much used by US hams of the day it WAS a
worldwide amateur allocation by international treaty, set by
the Atlantic City radio conferences of 1947. So the FCC,
acting quite out of character, deliberately violated
international treaty to create CB at the outset. It was an
act they would later regret. One wonders who was the driving
force behind that move.
Its all the more curious that they would set such a
'service' in that part of the spectrum, given the knowledge
of propagation cycles which much of the time make it quite
unsuitable for the usage originally intended, which was ONLY
local, shortrange individual and business use. Radio
hobbyists were expected to obtain an amateur radio license.
Had this new CB service been placed somewhere above HF
where 'skip' is much more rare, the history of HF
communicatisons would have been drastically different.
Enforcement would never have been abandoned for so long, as
it was for all ham radio as well as CB/illegal/freebanding,
and we would have an entirely different history as well as a
totally different outlook on the entire situation. We'd not
be concerned what or who will land on ham HF frequencies,
and from where they came. Nor what distructive attributes
they will insist on bringing with them.
Shows what far ranging effects come from someone pushing an
Agenda that is ill conceived and poorly implemented. Shall
we see more of the same in the future?

ahhh ha ha ha ha LOL LOL ROFLMAO
ha ha ha ha
"We" LOL "YOU" can't even pass the code test davies, or theory.
LOL LOL LOL Capture the frequency early. That's been the Liberty Front's
"intention" all along to have 3950 for a "Broadcast frequency" Why else
"Advertise to SWL's" Davies??
That previous "commercial" was brought to you by DAVIES, N0VFP, in order to
"advertise" the Liberty Front(net) on amateur radio frequency 3950 kHz. Hmmmm?
ahhh ha ha ha ha ha ha ah hahaha

Source record: 128187

HUDSON, NH:
The FCC has asked a net control station of the *Liberty Net* on 3950 kHz to justify the net's use of Amateur Radio frequencies. Via Certified Mail May 7 to Extra class licensee Victor A. Misek, W1WCR, FCC Legal Adviser for Enforcement Riley Hollingsworth said monitoring on May 1 indicated that Misek's station and members of the group for which he was acting as net control "began transmitting on top of existing Amateur communications that were already in progress." Hollingsworth said that such operation "is considered deliberate interference and cannot be tolerated on the Amateur frequencies." Hollingsworth pointed out that Congress has authorized the FCC to seek information to enable it to determine the qualifications of a licensee or applicant. "We are so far unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service," Hollingsworth wrote. He suggested The Liberty Net explore operation on the Internet or seek a low-power FM broadcast grant if that service is authorized. Hollingsworth reminded Misek that Part 97 "prohibits communications on the Amateur frequencies that, on a regular basis, 'could reasonably be furnished alternatively through other services.'" He also pointed out that Part 97 prohibits broadcasting .

KK7HO harrassed:

> ahhh ha ha ha ha LOL LOL ROFLMAO
> ha ha ha ha
> "We" LOL "YOU" can't even pass the code test davies, or theory.

Another example of Volz's personal attacks on other amateur radio
operators. He always fails to address the issues that he disagrees with.
But prefers to personally attack other amateur radio operators.

KK7HO was recently recorded harrassing Harvey, and attempting to
belittle and mock him for his speaking ability. Hear Volz engaging in
a very mean spirited 'school yard' style attack at:
http://members.xoom.com/_XOOM/sixisone/volz.wav

Volz's many posts and recordings (below) illustrate the mind and
character of this obsessed, hatefull and angry man.

Please stop the jamming KK7HO.

Latest example of KK7HO's criminal jamming operation:
http://members.xoom.com/_XOOM/sixisone/k5blb_kk7ho_obscenejamming_19990509_0254cdt.wav

Volz's "mean spirited badgering" of Harvey:
http://members.xoom.com/_XOOM/sixisone/volz.wav

KK7HO shopping for the murder of W1WCR at:
http://members.xoom.com/frg9600/500.wav

Further info on KK7HO is at:

KK7HO lied:

> Davies your a sick minded individual. Why do you post CRAP from other webpages
> here. Isn't just giving the link sufficient.

Here's Volz, again attacking another amateur radio operator. He diverts
the topic to an irrelevant subject about posting style, when it is Volz that
repeatedly violates the candor of this newsgroup.

Volz is becoming more and more hostile and violent in his posting, and
on the air. Listen to any of the URLs below, and do the right thing.

Thanks, Zack.

Please stop the jamming KK7HO.

Well he's sure a hater: You got that right. Let's look at the record. He
is the one that threatens to have other amateurs killed, He is the one that
harasses other amateur operators by mocking their speach. Yeah, that
Tim's a real prize. Just listen to the evidence below.

This is the guy that blamed his daughter for a pornographic mass-emailing
to the Liberty Net members about homosexuality. What a role model for
young amateurs worldwide.

> The man is indeed a patriot and what America SHOULD represent
> instead of what you offer, you sterile lying Pequot.

Volz is a lying hypocrite, that's so full of hate that he is loosing touch
with reality.

You have a good point here. The jewish stuff is off topic, but as they say,
two wrongs don't make a right. Is continual harassment an appropriate
response to this? How about threatening to have other amateur radio
operators killed? Is that called for in this case? I think not.

> It's starting to look like you LibNet supporters hypocritically believe the

> in this case, gets busted by Riley?

Not at all, First amendment rights apply to everyone, but disagreeing with what
is said by someone you disagree with does not grant a license to break laws,
such as jamming, threatening death, or continual harassment, both here and on
the HF bands.

>

A new article, "CXJ, Lies, and Audiotape," releasing publicly for the first time the affidavit and audio recording used by David Castle, WA9KJI, and Gene Blaisdell, WB0CXJ, to have Castle's two-year HF suspension rescinded is now available at:

http://www.3950.net/

by clicking on the appropriate link.

Also at 3950.net are:

- Updates to the main article on the events of May Day, 1999 on 3950, "Strange Days on 3950: Post-Riley Jamming Continues"

- The 3950 Audio Archive, illustrating the character of the illegal operators who oppose the legitimate QSOs on that frequency, with a new recording of N0KED joining K5BLB, WB0CXJ, and KK7HO in openly wishing for the death of a fellow amateur and describing in scatological detail how they will desecrate his remains (racial slurs by K5BLB for an added fillip of hypocrisy).

- K5BLB's Astonishing Hypocrisy: the transmission he must explain

- What's So Great About 3950? -- a personal view

With all good wishes,

Kevin, WB4AIO.

Check with the FCC on this. I am sure they could offer some insight on
this. Try http://www.fcc.gov and look around from there.

> My question: Just what fees are considered to be "right"? If you don't

It usually costs about $5 or $6 (perhaps a dollar or so more now)to
take a test for a ham license.

Quit so, but the FCC totally ignored the effects of skip and then bowed
to the wishes of manufacturers. The whole wretched episode is a series
of miscalculations, misinformation, and who knows, graft. It harmed the
bands more than it helped. Had part of 6 meters or one meg of 2 two
meters been cooped, we all would have been better off, CBers included.

Absolutely unbelieveable!!!!!!! The dumbing of America firsthand!!

I hope someone here can point me in the right direction, because I would like to get my ham license, and I am told that it is now easier than ever (I operate CB right now).

The local hams here in Metarie tell me that there will be no code required by next year and that I can get the highest class of ham license (the Extra?) by paying the right fees to a volunteer examiner.

My question: Just what fees are considered to be "right"? If you don't mind talking about it, just how much did each of you pay your examiners to get your current licenses?

Thanks in advance,
Janet (WNKH995)

Hi Janet, a couple of years ago in California an EXTRA class ticket went for $1000, ADVANCED was about $750, GENERAL about $500, and a NO CODE TECH was about $250. If someone is too stupid to pass ANY of the written exams, then they deserve to pay every penny. Of course my tongue is firmly planted in cheek. I cannot always tell a real honest question from a troll.

If your question is real, then you can purchase a study guide from radio shack which contains all of the questions, and answers of each exam. You don't even have to understand what it is you are memorizing. This is evidenced by tuning-in to any 2-meter repeater, or choice spots on the hf bands (mostly 20M and 75M SSB).

Don't sweat the code test either. If your IQ is at least normal room temperature, and you have the physical ability to walk and chew gum without needing a trip to the hospital, then you CAN pass the 5 word per minute code test.(sorry about the comma splices). After you pass the 5wpm, go find a physician who will sign the code waiver on the back of the 605 form. Most docs will sign the form for you if you have terrible physical problems like in-grown toenails, asthma, occasional headaches(even bunions). If you have EVER had the need to seek medical advice then, chances are you qualify.

After you get the Doctor's sig, memorize all those questions, and answers CONGRATULATIONS! you'll be an EXTRA! Heck, you could now be a volunteer examiner, and rake-in ALL THAT MONEY!

Good luck in amateur radio!

As you know, there is no CW portion of the HF bands. CW is allowed
anywhere and everywhere on the HF amateur bands.

not true, no 'fee' paid to an examiner will get you a license you didnt deserve. While no system is perfect, and this does happen, they always get caught, just recently a bunch got caught, the fcc requested the tests, and an explanation of the strange marks, everyone got in big trouble, lost licenses, priveledges, paid fines, etc.
Amateur Radio is a self policing activity, and does quite well at minimizing abuses. Also, if one is tested by the volunteer corps, one can be re-tested at any time by a request from the fcc, and this does happen.

: 3 . What about your tax avasion?

My Webster's dictionary does not have a listing for the word "avasion", so your question is meaningless.

Speaking of dictionaries, as the holder of ARS callsign N0VFP, I thought you'd be interested to know that in the Dictionary of Archaic Norwegian there is a listing for a word nearly identical to your callsign:
"Novfp: noun. 1. hog offal; esp. the entrails of a butchered pig.
2. [slang] a person both vicious and stupid."

If I'm understanding the odd pronounciation rules for archaic Norwegian correctly, "novfp" is pronunced with a retching, expectorating emphasis on the second syllable.

>the other side before making bad judgements my freind.
>
I am not commenting on "them" (liberty net) or making a bad judgement I am commenting on you posting the same BS over and over to this news group which is supposed to be for misc. amateur radio discussions, not attacking individuals on a personal level, this NG is not rec.radio.amateur.libertynet.n0vfp.personal attacks. I don't believe your are being mean to me, just expressing your opinion, and I am expressing mine. I don't consider myself an outsider because I have been reading the posts here for quite a while. As you expressed your opinion that Ham radio is dying because of one representative of a goverment agency and the ARRL I can't make the connection. I believe ham radio is dying off because individuals do not want to put any effort to obtain something that I find worthwhile, if they can't buy their ham license with cash they figure why bother . You openly profess your admiration for the liberty net and the hams that take part in their forum but you won't put forth the same effort that these individuals did to obtain their privilege to use that portion of the HF spectrum. Do you really think that if the code requirements were to go away and all non-coded hams were granted full HF privileges that these individuals would accept you as an equal; just like John Q. Public who works for a company for 20 years, finally someone retires and he sees an oppourtunity to get a promotion. Then out of the blue here comes the bosses son fresh out of college and they slide him right into the vacancy, now John is really pissed off but he has no choice, he has to except the bosses son in the job, but in the back of his mind he wil never respect this guy because he feels he didn't "pay his dues". Now some people may come on here and comment that they are coded hams and they would accept all the hams under this scenario, and they probably would and never say anything about it, but in the back of their minds there will always be that little feeling that "he didn't pay his dues".

I'm glad you're reading my posts. When I write something it has the weight of knowledge, experience, and general consensus behind it. If you could apply any one of those attributes to a single post of your own, you would have taken the first step in your long and difficult road to mediocrity. But, then, you'd have to abandon every tenet you hold dear.

> The questions were posed to a one Chalres (Charles) Scharztbarg

Unfortunately a few screwball Protestant rightwing milita minded A-holes, the kind of which N0VFP and Kevin Stomitler adhere to, are planning a lot of trouble to ring in the new year. Yet, I don't see this threat being issued by any Catholic group. Why is that? Think about it. I wonder why mainstream Protestants don't do something about these nuts who are giving the entire movement a black eye?
Doc,AF2Y

FBI Warns Of Millennial Violence Risk

Police Vigilance Urged As New Year Approaches

By David A. Vise and Lorraine Adams

Washington Post Staff Writers

Sunday, October 31, 1999; Page A01

The FBI is warning police chiefs across the country that it has discovered evidence of religious extremists, racists, cults and other groups preparing for violence as New Year's Eve approaches and is urging law enforcement agencies to view the dawn of the next millennium as a catalyst for criminal activities.

The FBI says those most likely to perpetrate violence are motivated either by religious beliefs relating to the Apocalypse, or are New World Order conspiracists convinced the United Nations has a secret plan to conquer the world.

In a 34-page report prepared by the bureau's domestic terrorism unit, the FBI says some members of militias and racist groups, including one called "Christian Identity" and another called "Odinism," are acquiring weapons and surveying targets in anticipation of the millennium.

FBI officials plan to brief law enforcement officials about the millennial threat at a closed-door meeting of the International Association of Chiefs of Police in North Carolina on Tuesday.

The report, a copy of which was obtained by The Washington Post, says that local law enforcement officials need to monitor radical groups for behavior such as stockpiling weapons and food that may indicate they are preparing for violence.

Neil Gallagher, head of the FBI's national security division, said in an interview that the bureau is not predicting that terrorism or violence will occur on or around Jan. 1. Instead, he said the report is aimed at making local law enforcement officials "more sensitive" to the heightened security risks posed by the year 2000. He also said the public needs to be "aware but not scared" of such threats. The report says the risks will increase as Jan. 1

approaches.

"If a cult sells its property and personal effects and purchases guns and explosives, we need to be more concerned about what that cult will do on January 1," Gallagher said.

Computer problems brought on by Y2K glitches could be a triggering event for some groups, the FBI believes. While most people understand that power outages or other problems resulting from Y2K problems can be explained rationally, the report notes that some radical groups or individual extremists may view these events either as signs that the end of the world is near or as part of a larger conspiracy that they must violently oppose, the report says.

"The threat posed by extremists as a result of perceived events associated with the Year 2000 (Y2K) is very real," the FBI report says. "The volatile mix of apocalyptic religious and [New World Order] conspiracy theories may produce violent acts aimed at precipitating the end of the world as prophesied in the Bible."

The report is the result of a nine-month intelligence-gathering effort called "Project Megiddo" by the bureau's domestic terrorism unit, which also relied on information gathered by agents in FBI field offices. The effort is intended to serve as a "strategic assessment" of the potential for domestic terrorism linked directly to the coming millennium, rather than a general assessment of the terrorist environment.

The agents have discovered that in preparation for the new millennium, certain individuals tied to these groups have been acquiring weapons, storing food and clothing, raising funds, procuring safe houses, preparing compounds, surveying potential targets, and recruiting converts to their cause.

In its report, the FBI describes several groups that it says have some members that pose a violent threat. "Christian Identity" followers, comprising loosely knit groups throughout the country, are "ardently opposed to race mixing" and believe that the "white Aryan race is God's chosen race." Christian Identity provides the "unifying theology" for a number of "right-wing" groups that pose a threat, the report says. "Odinists" also adhere to a white supremacist ideology and can be dangerous because many members believe in becoming "martyrs for the cause," the report says.

Fringe members of the Aryan Nations white supremacist group may pose a threat because extremist members will not necessarily adhere to their leader Richard Butler's public renunciation of violence, according to the FBI. In addition, radical U.S. members of a group called the "Black Hebrew Israelites," who are proponents of "an extreme form of black supremacy," also pose a threat.

"Current intelligence from a variety of sources indicates that extreme factions of [Black Hebrew Israelites] groups are preparing for a race war to close the millennium," the FBI report says.

While most of the report focuses on domestic threats, an entire portion is devoted to Jerusalem, where the FBI says an influx of tourists making pilgrimages and millennial cults will add to the danger. The study also says

violence in Jerusalem, a holy city for Christians, Jews and Muslims, could lead to problems in the United States and around the world. The FBI report--"Project Megiddo"--is named after a hill in northern Israel that has been the site of many battles. The Hebrew word "Armageddon" means "hill of Megiddo," the study says.

"Israeli officials are extremely concerned that the Temple Mount, an area already seething with tension and distrust among Muslims and Jews, will be the stage for violent encounters between religious zealots," the study says. "Additionally, several religious cults have already made inroads into Israel, apparently in preparation for what they believe to be the endtimes."

The FBI report said potential targets of domestic violence include military facilities; United Nations buildings and personnel; institutions associated with the African American and Jewish communities and other racial and religious minorities; gay men and lesbians; and foreign military units residing on U.S. bases.

"Armed with the urgency of the millennium as a motivating factor, new clandestine groups may conceivably form to engage in violence toward the U.S. government or its citizens," the FBI report warns.

The FBI's Gallagher, who declined to release a copy of the report, said the bureau is in the process of distributing the study to police chiefs and is considering making public a redacted version on its Web site.

Gallagher said it is extremely difficult to make accurate predictions about terrorism. "Acts of violence in commemoration of the millennium are just as likely to occur as not," the FBI report says.

While much of the focus related to the millennium has been linked to the prospect of computer failures, Gallagher intends to advise the police chiefs this week that it is important to prepare now for the unusually wide range of interpretations people may bring to random events occurring on or near Jan. 1, 2000, and the role that the Internet may play in spreading information--or misinformation--rapidly.

"The name 'Megiddo,' " the FBI report begins, "is an apt title for a project that analyzes those who believe the year 2000 will usher in the end of the world and who are willing to perpetrate acts of violence to bring that end about."

Gentlemen, N0VFP is an insult to all of Christendom especially Protestantism. I suggest that you dissuade him from posting any more anti-Semitic stuff on this board because if he does, what you've seen from me thus far is just mild. You see I hate bigots but I'm not content to let it pass by uncontested. I counterattack with ferocity and as I said, if you don't get that ignoramus to change his ways, all HELL will break loose here.

yeah Davies is one who constantly has his nose in HF business i.e, Liberty nit net, hoibie shoenbohm, 14.313, b.a.r.f., stumphumpers, and stirs up trouble. Davies is an instigator. He "listens" as that's all he can do, to HF and then gets on his computer and spouts all types of BS. Antagonize, name call, race bait, he'll do whatever he can to create trouble so that he can run back to his "receiver" and "listen" to more, thus keeping him from being bored. He's looking for something to join, to "belong" and apparently has found the ones that will accept his type. the problem is Davies is not intelligent enough to realize that these "groups" take advantage of his nedd, his desire, to be a part of whatever. Thus he's being used. Kind of a useful idiot.
He doesn't have the ability to learn the code so now the code is a bad thing. Him and the "others" ban together to find a scapegoat on which they can blame their shortcomings and all of societies ills. In reality it's their failures, shortcomings, lack of ambition and achievements that drives them to hate. To resent. To blame anyone and everyone but themselves for their troubles. He'll never change, he's found his place in the sand. He belongs, but doesn't fit in. LOL

2185. KK7HO: Hatemonger

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-06 00:00:00 UTC
From: Zachary Pequot <zpequot@ssi.net>
Message-ID: <3823AC65.9EA683F5@ssi.net>
Source record: 128248
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

KK7HO continues to spin further and further into hatred of
fellow hams on 3.950. Recently he has been increasing his
attacks and harrasment of fellow amateur radio operators
both here and on the air. His most recent target is LLoyd
Davies, N0VFP. Lloyd like those that Volz has targeted
before him must now endure Volz's repeated lies harrasment,
and lies. The mean spirited, and personal nature of Volz's
attacks are apparent both on this newsgroup, and on the air.

Listen to the URL below to hear Volz ridicule the speaking
ability of a fellow amateur radio operator. A shamefull display
and mean spirited attack on an innocent ham. Please listen
to Volz in action, and judge him accordingly.

But in the end, Volz will loose. His jamming pals are falling
one by one, with K5BLB about to loose his license. So get
another hobby and stop your campaign of HATE - Tim Volz.

Volz's "mean spirited badgering" of Harvey:
http://members.xoom.com/_XOOM/sixisone/volz.wav

Latest example of KK7HO's criminal jamming operation:
http://members.xoom.com/_XOOM/sixisone/k5blb_kk7ho_obscenejamming_19990509_0254cdt.wav

KK7HO shopping for the murder of W1WCR at:
http://members.xoom.com/frg9600/500.wav

Further info on KK7HO is at:

Go Gil ! ! ! You tell 'em.
Well, regarding the antenna type, I have to agree with you. I alternate between the Hi Sierra and Joe Floyd screwdrivers. The better RF tuning aid for the Icom 706 series radios makes tune-up a one-handed operation. Definitely worth the $$ for the Icom 706x owners.
Now, regarding what to tell his wife .. hmmm .. yeah .. hmm .. well .. let us not go there just now.

About a century or two ago, the Pope decided that all the Jews had to leave Rome. Naturally there was a big uproar from the Jewish community. So the Pope made a deal. He would have a religious debate with a member of the Jewish community. If the Jew won, the Jews could stay. If the Pope won, the Jews would leave.

The Jews realized that they had no choice. So they picked a middle aged man named Moishe to represent them. Moishe asked for one addition to the debate. To make it more interesting, neither side would be allowed to talk. The Pope agreed.

The day of the great debate came. Moishe and the Pope sat opposite each other for a full minute before the Pope raised his hand and showed three fingers. Moishe looked back at him and raised one finger. The Pope waved his fingers in a circle around his head. Moishe pointed to the ground where he sat. The Pope pulled out a wafer and a glass of wine. Moishe pulled out an apple. The Pope stood up and said, "I give up. This man is too good. The Jews can stay."

An hour later, the cardinals were all around the Pope asking him what had happened. The Pope said, "First I held up three fingers to represent the Trinity. He responded by holding up one finger to remind me that there was still one God common to both our religions. Then I waved my finger around me to show him that God was all around us. He responded by pointing to the ground and showing that God was also right here with us. I pulled out the wine and wafer to show that God absolves us from our sins. He pulled out an apple to remind me of original sin. He had an answer for everything. What could I do?"

Meanwhile, the Jewish community had crowded around Moishe. "What happened?" they asked. "Well," said Moishe, "First he said to me that the Jews had three days to get out of here. I told him that not one of us was leaving. Then he told me that this whole city would be cleared of Jews. I let him know that we were staying right here."

"Yes, yes,.. and then???" asked the crowd.

"I don't know," said Moishe,
"He took out his lunch, and I took out mine."

I am wanting to buy a crank up or self supporting tower near NC. Must be at least 40' and no more than 100'. Must be able to support a tri or quad element 10 meter yagi antenna. I can pick up at your location.
Please email blueglow@mindspring.com directly if you have any information.

Thanks,
Mark

Diana,

I'm not so sure about this. While studying for my exams, I ran across this quote:

"Amateur Radio operators must know the international Morse code if their license permits them to transmit on frequencies below 30 MHz. An international treaty sets this rule, and the United States follows the treaty. Because of this, the Federal Communications Commission requires you to pass a code test to earn your novice license."
--- p.11-2, "Now You're Talking", Third Edition

It would seem, then, that in order to access the HF bands you must pass the code test. If a country does not have any code requirements, then they also would not have access to the HF bands (similar to the Technician license, which I passed the test for last night by the way 8>).

Unless the treaty is changed, which I wouldn't think likely, the code requirement will remain. Perhaps what should really be debated here is not the elimination of code, but instead a radical change to licensing structure?

I seem to recall reading somewhere that while the treaty calls for a code requirement, it does not specify the speed, so it could be possible for the FCC to only have one test (5 wpm) and drop the other two.

Regardless, the code looks like fun to me, and I plan to buckle down and study to try and pass the 5wpm test in a few weeks.

Don't want to pile more flames onto something that already burnt my fanny a long time ago... however, we (U.S.A.) already have a code free HF band for amateur (not for hire) radio operation. It's called the Citizens Band, and is a pure example of treaty breaking. Period. The FCC decided to split off an HF band that did not require an exam of any sort, but did require a -REAL- license from the FCC. As I recall there was some Hell raised internationally when that happened, and still some grumbling from the rest of the world when 11 meters, still amateur in a lot of countries, opens up and CBers start cluttering up the bands with skip chasing.

Just my $.02 and worth almost that.

2210. K5BLB and Hypocrisy

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-06 00:00:00 UTC
From: n0vfp@aol.comnospam
Message-ID: <19991106080232.07027.00002626@ng-cg1.aol.com>
Source record: 128273

Here is something from Kevin's new Liberty Net webpage

http://www.3950.net

K5BLB and Hypocrisy
Here Is the Recording He Must Answer For:

K5BLB, self-described fighter against "hate," speaks his mind on racial matters (8/12/99, 306 kb)

The above recording resulted in a certified warning letter to K5BLB, Sid Mahan, from Riley Hollingsworth. Some writers see this letter as an important shift in FCC policy.

There are some odd things about Riley's BLB letter.

My reading is that if the Blob behaves himself and produces an "acceptable" response to the tapes from 8/13 (8/12 Central Time), he'll get to keep his license (which he richly deserves to lose).

On 8/13, the Lid was in QSO with K5ZU. He was not jamming. All he did was use the word that one is not supposed to use when referring to those of African descent, and make an analogy between basketballs and testicles (no QSO of Sid's would be complete without some reference to male genitalia). He was crude, he was not a gentleman (he never is, of course), and he revealed the astonishing hypocrisy of one who claims to be fighting "racism" -- but, as far as I could tell, in that particular instance he was little more than indecent, unless the use of the word "balls" in that sense is to be considered obscene.

So, out of hundreds of instances in which K5BLB could have been called on the carpet, Riley Hollingsworth has chosen to pursue one of the very mildest.

It is curious to me that, after over seven years of almost daily malicious interference and gross obscenities from K5BLB, often in the early evening hours (where the "indecency window" couldn't possibly apply), that the Commission chose to ask the creature to justify a late evening transmission which is arguably indecent, but which didn't involve intentional interference.

It is as if they purposely chose to prosecute the weakest possible case against the Estancia embarrassment.

It's also interesting to note that the Blob himself predicted that he would lose his license this year, indicating that he does have some conception of the gravity of his acts; but he then went on to threaten to cross the Mexican border, where he claimed to have a 35,000 Watt transmitter at his disposal, and begin transmitting as "XE2BLB."

Of course, truthfulness has never been Mahan's strong suit; so probably that threat can be discounted. — KAS

Yes... And no...

While CB is on 11 meters, the restrictions on power, modes, and contact
restrictions (something like no more than 50 miles away) effectively make
it a domestic band (yes, I know many CB operators work "skip".) But, since
the *intent* is that the band is for domestic, local-contact use, it can be
successfully argued (obviously, given the band exists) that the
international
treaty requirement is not applicable.

Hello
I recently upgraded to a tech plus and have been enjoying the 10 meter band very much. Something tells me that the 13wpm is going to be hard for me. Should I be content with 10 meters and wait for the fcc to change the license structure or is that likely not to happen. Is there more action on 20 m 40 meters and 75 or am I copping out on the general upgrade. In short what am I missing by not being able to use these bands. Also what methods are the best for upgrading if I am going to consider the tapes or some computer sites that you can practice Also can someone tell me what the ten ten club is all about. I would like to buy an hf mobile rig for my vehicle but is that kind of crazy since I only have the 10 meter hf priveleges
Many thanks

You let him off too easy. Here's what my suggestion would have been:

> 1. what happened to you[r] (sic) dental practice?
Not your concern (he used this response to your query about updating his address with the FCC in June or July)

> 2. What went on between you and Doris the SWL?
Not your concern

> 3 . What about your tax avasion (sic) [evasion]?
Not your concern

> 4. [What about the] DUI charges against you?
Not your concern

> 5. You were cited for interference by the Kingsville FCC office. Tell
> us about what it was for (sic). It was for playing tapes of Adolf
> Hitler on 14.313.
Answered in June or July

> 6. Why did you choose to become a Jew?
Not your concern

> 6a I heard [that] you were kicked out of [the] Jewish Church?
Jewish Church? Is that like a synogogue or temple? But, not your concern, nonetheless

> 7. Why do you countinally (sic) post hate against me, KV4FZ, Frank
> Tood (sic) and W9XN[?]

This is so self evident as to not require a response

> I hope you answer these questions [to] the best of your honesty.
> These are questions that have [been] posed to you on the air and on
> this newsgroup.
So what? They are still none of your business.

I know you don't need any help, but this was so ludicrous I had to do
something with it. There's no wonder that this character
is #1 on the BGO idjit list as voted by ng participants.

I had to add a lot of stuff (in brackets) to make this readable.
Apparently a college education isn't what it used to be.

Got any proof or are you just fantasizing?

I can't come up with one single ham who's been cited for a
violation while operating any mode. I have no idea where to
look. However, I'm surprised that the coded ham who uses
CW/Morse to jam the Liberty Net hasn't be cited.

Jeff, I ran PACTOR for four months while N5AQM was on sabbatical. We were regularly interferred with by CW operators in the portion of the 40m band normally used by PACTOR. All it did was slow PACTOR down a bit and show the dark side of some CW operators. They didn't seem to care that there was a pre-existing QSO.

We don't have to, Jeff. The FCC has already spoken on that subject.
Effort has no correlation to behavior.

Not obscure at all, just absolutely FALSE according to the FCC.
If you wanna fight the FCC over that one, Dick, be my guest.

The blind eye they turned to the 11 meter band resulted in lack of
enforcement which is the whole problem there. There are many, many
radio services that do not require testing. The ones that are
properly policed are well behaved. The ones that are not properly
policed are not well behaved. It's just human nature. Effort has
nothing to do with it.

The two extras who just got NALs probably put out a reasonable
amount of effort. But if they had known that they were going to
get NALs, they probably would not have done what they did to
get them. Enforcement of rules is the key to a well-behaved
ARS.

Nope, it's the best reason yet for the FCC to do their job,
i.e. enforcement.

But where do you hear CW (on-off keying) QSOs? Always in what's
referred to as the "CW portion" of a band, or what's now officially
called the "CW, RTTY, data" subband. Your phone operators using CW
to jam a SSB net are not carrying on CW QSOs.

You still can't come up with one single ham who's been cited for
a violation while operating CW.

2226. Need HELP with Sinclair Duplexer

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-07 00:00:00 UTC
From: radiotek@pacbell.net
Message-ID: <382516cd.54343812@news.pacbell.net>
Source record: 128131

Hello All,

We were in the process of tuning a Sinclair duplexer to our frequency pair on the 2m (144 MHz) Ham Band. The big passband cavities works just fine, but the notch filters will not notch out the frequency that we want. It seems that the 4 notch filters are weathered, so we may need to replace them.

Here is a brief discription of the notch filters:

There are 2 notch filters, a pair, on each bay of cavities.
Our duplexer consists of 4 cavities, two on receive and 2 on transmit.
There is a total of 4 notch filters. The notch filters, on there right now, do not seem to be the usual ones that came with this duplexer.
It consists of a brass tube, about 1/2 inch dia., that slides up and down a thin rod and makes contact with a larger rod 1/2 inch towards the base of each notch filter.

The notch filter's tube on the receive side is about twice that then on the transmit side. This cavity was supposedly on 146.700 Mhz.
If anyone out there has plans for a notch filter that would work with this duplexer, or if someone has one to sell, PLEASE let me know.

Any help is appreciated. The model number is: F-150-4E

Please E-mail me: radiotek@pacbell.net

Thank You & 73,

Mike KQ6MU

>And here I thought it was OK to use CW anywhere.

It still is, but rarely do CW QSOs wonder outside of the "CW, RTTY,
Data" subband. Those SSB folks doing the jamming are not carrying
on CW QSOs.

Yet, you still can't come up with one single CW operator who has
ever been cited for rules violation.

Minister resists pressure to slaughter R.S.G.B. members

In a surprising move last week, The Radio Society of Great Britain Limited, officially acknowledged the existence of the so called "MAD CUNT DISEASE" Bovine Spongiform Encephalopathy, which is now scientifically linked to it's human equivalent Creutzfeldt-Jackob-Bodwen disease.

Veterinary experts from across Europe have called for stricter curbs on the election of R.S.G.B.Ltd. committee members "I accept there may be some hazard, but I believe the risk can be reduced to a minimum by selecting candidates no older than 45 years of age" biologist Dr.Graham Medley of Warwick University assured amateurs, "I urge those in the hobby not to panic, and await the findings of the 13 independent scientists appointed by the government" he added.

The Trade and Industry secretary rejected claims that a selected slaughter of Radio Amateurs was the answer, "I accept that members of the public are becoming increasingly concerned, but at present we have no scientific facts to link "MAD CUNT DISEASE" to the more senior bitter and twisted members of the amateur radio fraternity"

Fear of "MAD CUNT DISEASE" spread like wildfire when it became widely known that the more socially inadequate and deranged amateurs went out of their way to 'associate' with children. Schoolteachers across the country, and especially in Warwickshire, have unknowingly assisted elderly carriers of "MAD CUNT DISEASE" to indoctrinate youngsters and expose them to potentially dangerous amounts of the Creutzfeldt-Jackob-Bodwen spores whilst assuming their charges were receiving harmless instruction in novice radio operation!
"Nobody knows for sure the actual rate of infection, but to be on the safe side it is recommended that no contact is made with any "A" class licensee or more importantly any R.S.G.B.Ltd. member until more is known about the epidemic" a DTI spokesperson read from an official statement, "International contacts are known to be disease free, so there is no fear of infection from DX-ing, but we believe that due to the slow incubation, many U.K. amateurs may already be carrying the disease. No evidence exists that data transmissions can transfer the pathogen, but until more details of this outbreak are known, we strongly advise that no contact is made at all with any R.S.G.B.Ltd. member at all".

Efforts to reassure amateurs in Germany, France, Finland, Greece, and Italy have been fruitless as panic has spread, and fear of contracting what has become known as the R.S.G.B. disease have almost isolated an already dwindling number of spineless and ineffectual hermits that

characteristically inhabit potting sheds and radio "shacks". Carriers of "MAD CUNT DISEASE" can be identified by the prominent bald spot, large stomach, and food stained home knitted cardigan or jumper with the badly embroidered call sign that has become almost a uniform for this aged and lamentable decreasing minority that has seen its numbers decimated in recent years by their almost fanatical attempts to keep their hobby shrouded in mystique, and to maintain archaic forms of communication originally intended for use by Wells Fargo in the 1800s.

In London's Tottenham Court Road this week, shops were deserted following the announcement that scientists had linked "MAD BODWEN DISEASE" to humans. Retailers reported an almost 90% drop in amateur radio equipment sales and feared that the collapsed market for may never recover.
"I blame Hestletine for the cover-up" said disgraced ex-police Segeant 3116 William Malcolm Bodwen when interviewed at his Manor Lane, Halesowen, hideout, "flim-flam-flob-a-dob - I'm a teapot" he added, "I'm just glad not to be infected myself!" he then turned away and, standing on one leg, continued eating his bicycle. William Malcolm Bodwen (G0MAL) is 64.

Why not learn and practice the code? We don't know when the
restructuring is going to take place, might not be for a long while
yet. I'm a Tech plus as well, took my General tests this past April.
Passed the written but failed the code. So it's back to practicing.

> In short what am I missing by not being able to use these
>bands.

Quite a bit from what I can hear.

>Also what methods are the best for upgrading if I am going to

>I only have the 10 meter hf priveleges
>Many thanks

The best way is to get on the air and DO cw. As a Tech Plus you
have portions of 80, 40, 15 and 10 meters to work cw with. If your
just learning the code there are many good computer programs out there
on the net like Supermorse. Learn the charactures at 18-20wpm though
and space them out further than usual. If you learn charactures at
5wpm you'll have a HARD time getting your speed up.

Hello,

I originally purchased the equipment below for an amateur radio project, but I lost interest in pursuing the project. If anyone else would like to try their hand, or whatever, please be my guest. Phones are in good working condition far as I can tell. Would like to sell everything as a package. Serious offers considered.
TERMS: Prepayment by postal money order, prices include UPS ground shipping or USPS Insured where applicable. I will also consider trades for Motorola Star-Tac accessories such as a Motorola Star-Tac Desktop Charger(s), high capacity Lithium-Ion batteries (black), etc.

(1) Motorola "Flip Fone" Gold Series, dark gray, in excellent condition with leather case, tabletop phone/spare battery charger, Standard NiMh and slim batteries ..... $ 40.00

(1) DiamondTel Mesa 90X, in very good condition, with tabletop phone/spare battery charger, two standard NiMh batteries, car adapter, and instruction manual ..... $ 40.00

(1) Motorola "Flip Fone", lt. gray. This phone is in good condition with standard battery and tabletop phone/spare battery charger ..... $ 25.00

The DiamondTel Mesa 90X and the Lt. Gray Motorola Flip Fone were purchased at a local Amateur Radio show from an individual who I believe was a tinkerer. It wouldn't surprise me if the two were cloned, but I have never actually used the phones. I purchased them for a Amateur Radio microwave project but never actually used them for the project.

I also have the following accessories:

(2) used antennas, one "back of the set" antenna and a "window" portable, both rubber ducks ..... $ 5.00

(1) used battery eliminator for the DiamondTel 90X ..... $ 5.00

(1) Brand New in the package battery eliminator for the DiamondTel Mesa 90X ..... $ 10.00

(1) Brand New in the package 6V NiMh Lt. Gray battery for Motorola "Flip Fones", Micro-Tac, etc. ..... $ 10.00

(5) Brand New in the package 6V NiMh Black batteries for Motorola "Flip Fones", Micro-Tac, Flare, Elite, etc. .....(EACH)$ 10.00

(3) Brand New in the package NiMh batteries for DiamondTel (EACH)$ 10.00

If interested, please e-mail directly n3fvg@worldlynx.net Thank You

2240. Ford Explorer hf noise

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-07 00:00:00 UTC
From: Carl Solomon <cdsol@swbell.net>
Message-ID: <38259B38.6B83@swbell.net>

HELP!

I'm at my wits' end trying to tackle severe QRN from '91 Ford Explorer while working hf mobile. This trash approaches S9 on 40 and obliterates any signals weaker than that.

Rig is IC-706 getting 12V from heavy leads directly to battery, and antenna is Hustler mounted to a well-grounded bracket bolted to the frame near the left rear bumper.

I know the noise comes from antenna and not power leads...it goes away when I disconnect the coax or antenna, and it remains if coax and antenna are plugged in while powering the radio from a marine battery on the car seat while engine runs. It stays there if I move the antenna to the right side of the bumper. It's NOT there if I try a mag-mount antenna whose shield isn't DC-grounded to the car. But if I connect my coax shield to ground thru a capacitor, the noise is back.

Some comes from electric in-tank fuel pump - I know this 'cause it does it for only a moment when I turn on the ignition but reappears when the engine starts. It didn't respond to L-C filter wired into harness a foot from gas tank with by-pass cap to ground. (would it REALLY make a difference if the factory part in-tank filter were used?) But there's also other trashy and ignition stuff that the noise blanker doesn't kill. I've grounded the tail pipe and everything else in sight using heavy braid.

I've probed all around the car using a portable AM radio and the noise is everywhere...can't isolate it to any specific wiring harness or component - ya' get the radio near anything metal and it picks it up.

I've gone hf mobile on many occasions in the past but haven't experienced anything this stubborn. Is it just a matter of all the digital computer crap, or something unique to Ford Explorers.

Any help would be appreciated.

Thanks/'73...Carl (W5SU)

Dickels the Clown is suffering from short term memory loss. I passed the General exam on my way to Technician, as I've posted here many times. And passed them all again through Extra just to "impress" our local know it all VE Extra, as I've posted here before. He walked out of the session so that he wouldn't have to sign my CSCE for Extra.

Hahahahahahahahahahahahahahahahahahahahahahaha.

Dickels, don't think that you are so unique in Ham Radio. There's jerks like you in every ham community. Go soak your hemorrhoids in kerosene.

That evidently you're too stoopid to understand that any
nocode dip$shit like you can throw a shorting bar. Sure
don't need to know how to send CW.

Carl, I don't have an answer, but if you find one, please let me know. I have had precisely the same experience in my 93 Explorer with an FT-757. I haven't done the analyses that you have, and I am grateful to read some of the experiments and results you posted here.

It's an otherwise great vehicle (150K miles and doesn't burn a drop of oil), but I envy people I hear operating while driving. Essentially, I can't.

When this thread began, the pro-coders on this NG were claiming
that the studying for, and passing of, a code test assured discretion on
the part of the licensee. Obviously, even someone taking a CW test with
multiple choice answers must have studied CW and gained at least some
proficiency with the mode. Even someone who can barely pass 20 WPM had to
put considerable effort into studying the code. Dick Carroll stated that
it was a FACT (I emphasize the word because he emphasized the word) that
anyone who put forth the effort to study the code was more likely to
adhere to the rules. Two out of three recent FCC actions are against
Amateur Extra class hams. Are you now proposing that Dick was incorrect?
Are hams that can do 30 WPM better hams that are more likely to abide by
the rules versus 20 WPM hams?

> that, makes your answers so idiotic.

The actual answer is obvious, Dick. Not wanting to trash their
regular CW frequencies, the troublemaking CW operators come up
to the SSB portion of the band to do their jamming. :-)

Uhhhh Dick, they are not allowed on those HF frequencies
unless they know how to send CW. All you have to ask
yourself is who gets the biggest kick out of trashing
the SSB sub-bands, SSB operators or CW operators? The
answer is obvious. :-)

On a percentage basis, the NCTs have fewer NALs than the extras.
Do you think that maybe Morse code skill *causes* the problems?

I have indeed admitted that I was wrong on many technical issues.
However, there is no objective right and wrong with political issues -
there are only opinions.

However, there is presently a coded ham using Morse/CW to jam the
Liberty Net. He certainly should get a NAL for his troublemaking.

Hi Guys.
I am building an antenna for six meters.
It Is three wave lenghts long , Here are the dimensions.
Its uses a 4 to 1 balun
One leg is 4 feet 8 inches long.
The other is 83 feet 7 inches long
This is tuned for 50.200 on this band .

My question is this , Has anyone ever used this type of antenna &
If so how did you like it ???.
Tnx & 73s de Ted n3zrx

Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, ARRL Letter, AI2Q, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, K8YSE, W8DO, KE9KD & DX Central, DJ5AV & DX News Letter, DL3LAR, EB3GCP, G4UOL, HK6DOS, HP1AC, IK4AUY, JA4RED, JI3DST, LU7DIR, OH1KAG, OZ5AAH, PR7AR, PS7ZZ, VK4AAR and Bob Treacher for the following DX information.

3A, MONACO. Look for Mike/W0YR, John/N9NA and Ilyes/HA5JI to be active as 3A/W0YR as a Multi/Single entry in the CQWW CW Contest.

3F, PANAMA (Update, please refer to OPDX.430). Cam, HP1AC, reports that he and his special operation as 3F1AC to commemorate the turnover of the Panama Canal to the Republic of Panama, has a new QSL address. This 3F1AC operation will take place starting December 1st, lasting through January 5th (2000). Effective immediately, all cards going to HP1AC have to go to: Camilo A. Castillo, P.O. Box 0860-00144, Villa Lucre, Panama, Panama. Please note that his drop mail address in Miami, Florida is no longer good for QSL's and QSL's arriving at his old Box number in El Dorado will be forwarded to his new Box in VILLA LUCRE.

9M6OO DXPEDITION. Just a quick reminder that the Layang-Layang Island (Spratly Island) operation will take place this week, November 11-17th. Please refer to OPDX.432 or checkout the Web page: http://www.qsl.net/n2oo By the time you read this, the team should be active from the Hillview Gardens (Borneo) Resort as 9M6AAC.

A5, BHUTAN. There have been a few sources reporting that Jim Smith, VK9NS, is now in Bhutan. He may be there until the end of next week, and we are all sure Jim will try his best to obtain a A5 license. Jim has worked very hard over the last several years to obtain a license in hopes to operate from here again like he did back in 1990 and 1994. Best of luck to him on his efforts.

CO, CUBA. It has been reported that Raul, CO8ZZ, will be active in the CQWW CW Contest as Single Operator/Single Band entry (10 meters). His QSL Manager is AD4Z.

GD, ISLE OF MAN. Steve, G4UOL, will be active as GD4UOL from 2000z Friday, November 19th through 1600z Friday, December 3rd. He expects to concentrate this year, again, on 18 and 24 MHz as long as the bands produce QSOs. In the CQWW CW Contest he will be Single Op/Low Power, unassisted, not as active as previous years but trying for plenty of QSOs rather than a big score! Skeds are welcome outside the contest via E-mail address: steve@g4uol.demon.co.uk
QSLs should go to the GD buro rather than his home callsign as this speeds up the process. QSLs direct are via his home callsign of G4UOL: Steven Muster, Flat 4, 60 Genesta Road, Westcliff on Sea, England, SS0 8DB, UK
More information about his previous trips, 1988 to 1998, can be found on his Web pages at: http://www.g4uol.demon.co.uk

HS, THAILAND. "The 59(9) DXReport" reports that Bruce, AA4XR, will be active from November 20th through December 7th as HS0ZCY. Actiivity will be on 40-10 meters CW and RTTY.

IOTA NEWS.....
AS-032. Takeshi, JI3DST (7N3UXO), will be active from Oosumi Archi-pelago (Tanega-Shima). His QTH will be Nishinoomote-City, Kagoshima and activity will be from November 20th (0800z) through November 22nd (2400z). Operations will be on 40/17/15/12/10 meters SSB. Callsigns to be used are: JI3DST/6 and 7N3UXO/6. QSL via the JARL Bureau (the BEST) or direct:
Takeshi Funaki, 2-18-26 Hannan-Cho Abeno-Ku, Osaka-City
Osaka 545-0021, Japan

KH4, MIDWAY ISLAND. Mert/W0UFO, Thor/W0QIK, and Ed/N0OKW are expected to be active from Midway now through November 13th. Their primary task is to work with the Oceanic Society as part of the Elderhostel program, but they will also be operating Ham Radio in their spare time. If conditions are good, they will pay particular attention to the QRP frequencies on 20, 15 and 10 meters and operate QRP. Otherwise, they will increase power to up to 100 watts and do what they must to make some contacts. Mert mentions that Midway is -11 hours from UTC or -5 from CST. They would guess that they will get some operating time in the early morning (1100 CST) and in the evening (2200 to 2300 CST). They will use two callsign KH4/W0UFO and KH4/W0QIK.
Meanwhile, Dick, KH4/W4ZYV, has been active this past weekend on 10 meters on or around 28480 kHz between 2200 and 0300z. This station will be here until January 10th (2000). QSL via home callsign.

KH0, MARIANA ISLANDS. Kazumasa/JA4CZM, Hiroyasu/JA4RED and Yasuo/JH4RLY will be active from Saipan, November 19-22nd, using the callsigns AA1NY/KH0, KH0/JA4RED, and KH0/JH4RLY. Activity will be on 160-6 meters CW/SSB/PSK31 and SSTV. QSL via home callsign. AA1NY/KH0 via JA4CZM.

LU, ARGENTINA. Jose, LU7DIR, reports that he will be active in the CQWW CW Contest as LU7DIR from Zone 13 as a Single Op on all bands.

MU, GUERNSEY. Asko/OH3GI and Juha/OH1KAG/OH9MM will be active from Guernsey Island (EU-114) as MU/OH3GI and MU/OH9MM in the CQWW CW Contest (November 27-28th). They will be active from the Guernsey Amateur Radio Society premises. QSL MU/OH3GI via bureau to OH3GI. QSL MU/OH9MM via bureau to OH3LQK. By the way, Juha informs OPDX that his birthday is on the 28th of November, so QSOs are welcome as a birthday gift ;-)

NEW EDITORS FOR THE BPDX. Jose, CT1EEB, reports that he will no longer be able to publish the Portuguese DX Bulletin (BPDX) because he will be "heading out of the country for work reasons and cannot take in hands the responsabilities of publication anymore." The BPDX will continue and the new DX Publishers are:
CT1UD, Roger, (well known DXer and IOTA chaser)
CT1END, Carlos, (a DX Editor himself).

NEW LIGHTHOUSE. Look for PV7ZZ to be active from the lighthouse "Ponta do Mel" (Lat 04 58 06 S, Long 036 54 01 W, Grid SQ HI15NA) from December 3-6th. Activity will be on all bands CW/SSB/RTTY/PSK31. QSL via PS7ZZ: Francisco Edvaldo Preira de Freitas, Av Sao Miguel dos caribes 31, 59086-500, Natal - Rio Grande do Norte - Brazil.

OA, PERU. The "DX News Letter" reports that Yves/F5TYY, Alan/F6BFH, and Bernard/F9IE are to be active from several places in Peru (perhaps also IOTA) now through November 20th. QSLs via bureau.

PIRATE. Lars, OZ1HPS, informs us that there is no callsign 4L80. Any operations by this station is a pirate. There are only 4L8A and 4L8T in the 8 area. Lars is also QSL Manager for 4L8A.

QSL INFO AND NEWS.....
FO0EEN QSLS. Many have been waiting for these cards. ONLY a few have received their cards. It has been reported on the QSL Reflector that QSL Manager LA1EE is only sending a few cards out each week. The reason was not given. We hope LA1EE will contact OPDX and give the readers a update on the status of QSLs. The operation took place in December, 1998.

8S7IPA (in Sweden) was operated by Ben, OZ5AAH, between November 5-8th (which will include the IPARC Contest on both CW and SSB). QSL direct ONLY to OZ5AAH: Ben Jakobsen, 9 Knoldager, 2670 Greve, Denmark. Also, checkout the Web page: http://www.iparc.com

Alan, VK4AAR, states/reports the following: "AGAIN I must advise DXers to keep up to date with call book changes. More than 50% of QSL requests come to me via my old address in Dalveen. It has been more than a year since I moved but still people insist on using out of date info. The Dalveen post office will soon cease to forward mail to me. I am also astounded that many are still using the address in Arana Hills which was PRIOR TO AUGUST 1993....yes, 1993. The person at that address is becoming impatient at the amount of mail going to him. Come on people.. ...GET WITH IT !!!!! On behalf of ALL QSL managers may I remind the "new comers" that we get a great deal of mail and therefore NEED reply postage. There are many expenses for us to cover besides postage...so do the right thing, PLEASE. My correct address is: Alan Roocroft,

PO Box 421, Gatton 4343, Australia

QSL SW2A, who was active in the CQWW SSB Contest (10M ONLY SO/LP), via SV2AEL: Savas Pavlidis, PO Box 22013, Thessaloniki-55310, Greece.

9H3RS INFO. Rolf, DL3LAR, visited Gozo Island (EU-023) from October 21-27th. He operated as 9H3RS mainly on CW. Please QSL via DL3LAR (bureau or CBA).

QSL S79AU via IK4AUY, Sergio Cartoceti, Via di, Corticella 241, I-40128, Bologna, Italy. Sergio was active from Seychelles Island and its IOTAs which include Mahe Is. (Barbarons) from October 21-27th, and then moved to Praslin Island, Anse Boise de Rose, (both have same IOTA ref. AF-024) through November 3rd. He states Dave/S79JDC is still active there (while on business) for about two or three weeks. QSL via G3TBK. They were the only two stations active during the CQWW SSB Contest last weekend.

Please QSL ZZ7Z via PR7AR.

Snooky, KA1DE, reports that he is the QSL Manager for James, ZD9CR, on the Island of Tristan Da Cunha as of September 10, 1995. There was a previous operater with the same call prior to James Glass and the QSL Manager was a W5. Snooky states that he has the up-to-date logs and keeps in touch with James via E-mail.

NEED A QSL MANAGER? Rich, KK7PL, is interested in becoming someone's QSL Manager and if interested, send a E-mail to: KK7PL@WANfear.com -or- Rich@WANfear.com

SPECIAL EVENT STATION. The Catalonian Ham Radio Union, Television of Catalonia and YAESU will be active on the air December 11-12th, from TVC studios using the very special callsign EG3TVC. This callsign is used to promote the "8th Edition of The Marathon of TV3" dedicated to collect funds for non-cure diseases/transplantments. They will operate on HF, VHF, UHF, Meteor Scatter and Satellites. For more information, check out the Web pages: http://www.urc.es and http://www.urc.es/eg3tvc.htm

SPECIAL MILLENNIUM STATION. Look for M2000A to be active on all bands (HF, 6m and 2m) with 5 stations from December 31, 1999, to February 29, 2000, by Cray Valley Radio Society (CVRS) to celebrate the Millennium from the Greenwich Meridian in South East London, England. Skeds with other groups planning special Millennium activity are invited. Any licensed amateur who plans to visit G-land early in 2000 can operate M2000A if they become a temporary member of CVRS for 4 (USD). Special awards will be available. QSL via G4DFI <owen.g4dfi@virgin.net>. For further information, contact Bob Treacher (Chairman) via E-mail at: brs32525@compuserve.com
Also, visit their Web site at: http://www.qsl.net/m2000a

WELL-KNOWN DXER HOSPITALIZED. The ARRL Letter reports: "Chod Harris, WB2CHO/VP2ML, hospitalized: Former ARRL HQ staffer and well-known DXer and CQ magazine DX columnist Charles J. "Chod" Harris reportedly suffered

a massive heart attack and has been hospitalized in Santa Rosa, California. Bob Locher, W9KNI, reported November 4 that Harris, 50, was gaining ground but remained in intensive care. "While Chod is not out of the woods, things are definitely looking better," Locher said. Flowers are not permitted in the intensive care unit, but friends may write Chod Harris, 3201 Franz Valley Rd, Santa Rosa, CA 95404. While he was at ARRL HQ, Harris and ARRL Educational Activities Manager Rosalie White, WA1STO, started the Club and Training Department in the mid-1970s." OPDX and its readers hope for Chod's quick recover. Get well soon Chod.

ZB2, GILBRALTAR. A message (on Monday) from Dave, W8DO, states he is still active as ZB2/W8DO and continues to be active on 15 and 20 meter C.W. and was helpful giving many a new multiplier during the the past weekend's CQWW DX Contest. His operation continues through November 15th, during the evening. Look for Dave on the FISTS frequencies of 14058 and 21058 kHz. As of November 1st, he has made over 2,000 contacts using the small 25 watt Argosy. His antenna is a Hustler Whip on the stern of a 50' Oyster sailboat.

ZF, CAYMAN ISLANDS. The "DX News Letter" reports that Bruce, N6NT, will be active again as ZF2NT now through at least May 2000. He was spotted on 12 meters this past week on or around 24900 kHz after 2300z. QSL via G3SWH (See OPDX.429).

Hi Janet.
Please belive only what you think is real.
no one pays for a ham license, except for a 6.35 fee for processing
the test that was given to you.

If you would like to take an exam e-mail me at n3zrx@arrl.org
I will try to pass you along to some one in your area {ie a local ham
radio club } that would be glad to test you at your convenience.

What you have been told though is some what true , You should go and
purchase a Book from Radio Shack.
It is called the No Code Tech Manual.

It consists of, Elements 2 & 3a these are questions to the exam that
are valid until June 30 2001.

If you require futher help call the ARRL @ 860-594-0200
They will be glad to help you in any way.

I passed the one-minute of solid copy. I'll be the first to admit
that the written certainly was easy. Make it tougher and I'll be happy
to be re-tested. If fact, I'd like to see the FCC resume all testing.

(Brian, congratulations on stagnating at Tech.)

Those are SSB operators who've placed their xmtrs in "tune" or "cw";
they're not CW operators.

You still can't come up with one single ham who's been cited for a
a violation while operating CW (i.e., on-off keying).

You probably weren't even licensed when this thread began! An entirely new newsgroup was created for this thread, but even then, the discussion had been going on prior to the creation of internet.

>the pro-coders on this NG were claiming
>that the studying for, and passing of, a code test assured discretion on
>the part of the licensee.

I contend that those who *use* code as their main mode are the gentlemen of the service/hobby. Try to name just one ham who has ever been cited for rules violation while operating CW (on-off keying).

Obviously, even someone taking a CW test with
>multiple choice answers must have studied CW and gained at least some
>proficiency with the mode. Even someone who can barely pass 20 WPM had to
>put considerable effort into studying the code.

We've had VEs come on here stating folks are passing the 13 wpm test who can't even copy 8 wpm. Apparently not much effort is required these days.

>Dick Carroll stated that
>it was a FACT (I emphasize the word because he emphasized the word) that
>anyone who put forth the effort to study the code was more likely to
>adhere to the rules. Two out of three recent FCC actions are against
>Amateur Extra class hams. Are you now proposing that Dick was incorrect?
>Are hams that can do 30 WPM better hams that are more likely to abide by
>the rules versus 20 WPM hams?

Let's conduct a test -- let's do away with all exams and see if we get better or worse hams infiltrating the bands. That should help us determine if effort is any indication of behavior.

2268. Liberty net webpages don't include.....

THESE and OTHERS soon to come. from the Libnet gang you get half the truth and the half you do get is spin doctored and distorted.
~~~~~~
HUDSON, NH:
The FCC has asked a net control station of the Liberty Net on 3950 kHz to justify the net's use of Amateur Radio frequencies. Via Certified Mail May 7 to Extra class licensee Victor A. Misek, W1WCR, FCC Legal Adviser for Enforcement Riley Hollingsworth said monitoring on May 1 indicated that Misek's station and members of the group for which he was acting as net control "began transmitting on top of existing Amateur communications that were already in progress." Hollingsworth said that such operation "is considered deliberate interference and cannot be tolerated on the Amateur frequencies." Hollingsworth pointed out that Congress has authorized the FCC to seek information to enable it to determine the qualifications of a licensee or applicant. "We are so far unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service," Hollingsworth wrote. He suggested The Liberty Net explore operation on the Internet or seek a low-power FM broadcast grant if that service is authorized. Hollingsworth reminded Misek that Part 97 "prohibits communications on the Amateur frequencies that, on a regular basis, 'could reasonably be furnished alternatively through other services.'" He also pointed out that Part 97 prohibits broadcasting .
~~~~~~
FCC Amateur Radio Enforcement Log included the following:
HUDSON, NH [UPDATE]: Extra licensee Victor A. Misek, W1WCR, has replied to a May 7 letter from the FCC that had expressed FCC concerns about the operation of the Liberty Net on 3950 kHz Saturday evenings. FCC attorney Riley Hollingsworth, K4ZDH, had written Misek to report that monitoring on May 1 indicated that Misek's station and members of the group for which he was acting as net control "began transmitting on top of existing Amateur communications that were already in progress." In his response, supplied upon request to the FCC, Misek told the FCC that other stations had yielded the frequency to the net on May 1 and that he's been "diligent in avoiding starting the net 'on top' of ongoing communications" and often moves the net to another frequency where "the jammers stalk us." Misek also has requested a copy of a tape recording supplied to the FCC that Hollingsworth used in deciding to rescind a license modification that would have kept David Castle, WA9KJI, off the HF bands for two years (see "FCC Withdraws License Modification" elsewhere on the AWE news page). Hollingsworth also had asked Misek to justify the Liberty Net's use of Amateur Radio frequencies and said the FCC "cannot tolerate deliberate jamming among licensees, including retaliatory jamming." Misek declined to justify the net's existence, citing no legal requirement in Part 97 to do so. Misek said the net was a forum "to discuss current events and other subjects," and he asked the FCC to "review perceived problems of which I am not aware, so that

the net can be brought into compliance should there be a problem."

You know, Al, it's no wonder nobody at the FCC has wanted to do Amateur =
enforcement in the last ten years. I have a net here of whiners that want =
to be an International Broadcast Station on 3950, one of the most =
congested areas, and have it all to themselves, all the time, provoke =
everyone and use the frequency for anything in the world EXCEPT the basis =
and purpose of Amateur Radio and its allocated frequencies, and have the =
government run interference for them and provide a clear channel for them, =
ignoring the fact that frequencies are shared. I get mail from you all =
every day, and handling the "Liberty Net's (excuse me, "Great Liberty =
Net") problems would be a full time job. You rail every night about how =
bad the government is, but run to it every single day complaining, then =
constantly criticize and second guess everything we do. You remind me of =
the football cartoon, where the coach, finally tired of armchair advice =
and criticism, turn to the spectators and yells "You, in the brown jacket, =
go in for Number 42". All of you are starting to lose credibility with me. =
I have limited time, no staff, no secretary, about 45 calls a day and =
about 125 e mails every day, and I need to move on to real problems of =
Amateur Radio being experienced by people who understand what it is for in =
the first place. Please do not contact me again.
>>> 07/10 4:00 PM >>>
~~~~~~

from: Alfred Parker (N2SAG)
to:Riley Hollingsworth
Mr. Hollingsworth,

By your recent actions in reversing the fortunes of WA9KJI and W1WCR =
you=20
have, in effect, labeled the many honest witnesses to the May 1st incident =
on=20
3.950 MHz as "LIARS". The ARRL report only mentions an affidavit. The=20
identity of the author of that false affidavit has been discussed openly =
on=20
the air. Considering the past co-violating activities of WA9KJI and =
your=20
witness we might have figured it out anyway. It now seems clear that you =
are=20
relying on the untruthful affidavit of a notorious violator to destroy =

a=20
truly decent Ham radio operator and institution.=20

Did you know that:

K5MVK has likely been jamming the "Liberty Net" with Morse code for =
several=20
years with a repetitious, "REPENT, REPENT, REPENT"?

K5MVK has openly and regularly maliciously interfered with the "Liberty =
Net"=20
and others on 3.950 MHz in concert with K5BLB in voice mode for at least =
one=20
year?

K5MVK wrote a letter to you condemning the music playing and jamming of =
K5BLB=20
and subsequently declared him a paragon of decency when he decided that =
he=20
was angry at BLB's antagonists?

K5MVK engages in nightly, illegal CW broadcasting on our about 3.950?

K5MVK has been WA9KJI's co-jammer on countless occasions, usually =
pretending=20
not to be able to hear preexisting QSO's?

Mr. Hollingsworth, the character of your witnesses matters. My sworn=20
affidavit will be an honest account of what happened on May 1st. I =
have=20
offered to appear in any court in any venue to testify that WA9KJI was=20
calling CQ over an ongoing QSO when control of 3.950 was legally transferre=
d=20
from W3KE and AA8DP to W1WCR and the net. I have never jammed, and =
never=20
knowingly involved myself with anyone engaging in such behavior. =20

Forgetting for a moment about May 1st., both you and Mr. Hickman know =
very=20
well that WA9KJI has been a notorious violator. His self-identified =
tape=20
playing, noise making, obscenity and slander are well known to the =
entire=20
amateur community. What does it say about the character of K5MVK that =
he=20
would be prone to associate with and defend such a notorious miscreant?=20

Ironically all that K5MVK has really done is admit that he momentarily =
joined=20
WA9KJI in jamming N3GVA and KR4LY (now N2BUB) earlier that evening. =
His=20
affidavit is in reality a confession of his own serious violation. His=20
testimony on behalf of David Castle is analogous to a criminal testifying=

=20
that his partner couldn't have been guilty of jaywalking because at the =
time=20
they were both engaged in robbing a bank!

A truly neutral party has come forward to clarify the events earlier in =
the=20
evening of May 1st. when K5MVK apparently joined WA9KJI in talking over =
an=20
established East Coast QSO for a period of time. This witness took=20
contemporaneous notes and heard WA9KJI verbally attack N3GVA and N2BUB =
when=20
he called CQ over them and was informed that the frequency was in use. =20
Shortly after that K5MVK engaged in his usual tactic of acknowledging =
Mr.=20
Castle in order to assist him in talking over an ongoing QSO between =
people=20
he dislikes.=20

Mr. Hollingsworth, if you are still really interested in hearing the truth =
in=20
more detail from a centrally located vantage point, please call: =

A couple of coments, Vic, and you can post this although I doubt you will.
First, you folks haven't had ANY Amateur enforcement in 10 to 15 years, and yet
all you do is whine and complain about it now. Did you really like it better

when there was none ? In the same breath that you criticize me about no 3950 enforcement, you say you want to make sure everyone gets Mahan's response because he may not tell me the truth. As I understand it, Mahan was one of your main jammers on 3950. Now, are you criticizing me for going after him ? Finally, you are making a fool of your self on the Hammer Award thing. It has NOTHING to do with Armand Hammer, nothing whatsoever; but was named from a government contract Gore criticized, and rightfully so, for hammers actually. As usual, you never let facts stand in your way of making a statement.

Ahem, it eventually goes from on to off, typically when Riley and his US Marshall escort are pounding on the front door of their offshore PO Box.

There's that "I got more time in the chow-hall than you've got in the service"
elitism again. Your PO Box buddy tried that one a while back. I guess he and
Algore have something in common - they both invented the internet. Didn't fly
then, doesn't fly now.

Hey!

While mobiling around, and working those rare DX stations, I have found it rather frustrating to scramble for paper and pen. I don't have an easy way to install a laptop in the car, either.

So, I thought, "I can use my Palm Pilot" and create a memo. But that was a bit of a pain. What to do?

Create a log program! That's what I did. It is now version 0.1 -- and works ok.

You have a Palm Pilot? Wanna use this logger? Come download the free Application at:

http://hfradio.org/softdown.html#hflog

I have been using it during my jaunts. Helps. It is very simple, and very basic.

Send comments to: hflog AT hfradio DOT org (you can figure out the address)

In other news: The NW ARRL (Northwest Section of the ARRL) website is now hosted at http://hfradio.org/nwarrl/ - and I have been appointed as new Webmaster. If you are in the NW, and have updates, etc., please let me know. If you are interested in the NW Activity, etc., come check it out.

Also, I am still offering free websites for HAM and SWL sites. Want to make your own page? Come and fill out the form.

Don't forget: http://hfradio.org, a non-commercial site offering:

+ Azimuth Map / Equidistant Map Creation (choose any QTH as center, many options

+ Propagational Resources (live, real-time reports, eAlert service (sign up for automatic email solar/geo reports, complete with Aurora index))

+ News, and DX information and reports

+ QSL Manager and Callsign Lookup center

+ Swap and Shop

+ FREE HOME PAGES THAT YOU CAN USE TO POST YOUR OWN HAM OR SWL SITE

+ Bookstore - SWL and Ham related books. Over a 1000 titles so far.

+ Plus more (Directories, etc.)

This is my offering to the community, all funded by me. I am working hard to bring excellent content to the site. I have need for others who might wish to assist. I need a

Software editor -- someone who can review and post software links, etc. Let me know if you are interested. (See the site on how to email me).

If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

73!

In your case.. you may not have to pay the fee... (in money)... Most hams are perverted old men that would love a few minutes of fun in their lives. Just find out what radio related activities you can help them with in the OLE HAM SHACK. This will work for any class liscense you want...

I suggest you become an Extra Class that uses their ham radio on CB. Nothing like a $1,500 dollar CB radio curse out truckers.

Hickory Man

PS.. I hope no one takes the original message seriously.... if you wanna be funny... hey I'll be funny

Source record: 128034

You legally CANNOT use any radio except a FRS type accepted one on
FRS channels...A FRS radio MUST have:
1) NON detachable antenna
2) less than 1watt output
3) 2.5 kHz deviation MAXIMUM (not 5 kHz!)

NO ham HT etc meets this...

Solar cells will always (mostly) put out the same current. Their voltage will change though. To get better performance you can do put mirrors around it to focus the light. And lastly have the cells rotate with the sun.

I Have Tried Several Logging Programs And Have Found Short Comings In Them.
No Need To Name Them Here. And I Do Not Want To Get Into Programing Disputes
Over Which One Is Better Than The Other.

What I Would Like To Here Is What Program You Like Better And Why. And Which
Ones You Have Tried.
I Am (((Not))) Looking For A Contesting Software But A Logging Program For
Logging Normal QSO With The Ability To Quickly Recall Duplicate QSO's With
The Notes About The Previous Contact.
Also One That Interfaces With My KW 950 For Frequency & Mode Logging Along
With The Correct UTC Time.

All Comments Will Be Appreciated
I Prefer A Windows 98 Based Program But Dos Can Be Used.

Source record: 128039

Stick With The Tapes Only Listen When You Can Write It Down.
If You Get On The Air Most QSO's Run Around 13-15 WPM Thats The Best Practice. Always Listen At Something A Little Faster Than You Can Copy At 100 Percent. If You Can Copy 8 Wpm 100 Percent Then Listen to 10 WPM And Soforth.
Again Only Get On The Air And Listen When You Can Write It Down.

I Prefer The ARRL CD"s Along With The Tapes .
They Got Me To 25 So Far. Best Of Luck.

No Dick, the response you made subsequently to the NG, where you
capitalized "FACT". Well, two out of three NALs reported in QST this
month went to Extra class licensees. You can put all the spin you want on
it, but the fact remains that these are code tested hams.

Hi Dave, welcome back. Are you rested from the big contest? As far as my comment above goes, its little enough I could do to keep Dickels the Clown in check. As far as the cans go, I haven't had them on in a while. I think I'll do something in the ARRL 10M test on fone this year. I'm just trying to remember which color adapter my Heil set uses with the Kenwood. I hope I haven't outgrown them.

73,
Brian

I have a free QSL card printer that uses MS Word 97 and probably StarOffice 5.1. It uses the mail merge function to allow you to keep track of the cards you send out. Just download it and change the data in MS Word to your call and personal data.

Check it out at http://www.netcom.com/~ckuter/kb9rtm.htm

But Dick, you cannot truthfully say that about extras because
they have passed the *highest* speed code exam and it's extras
who are getting most of the NALs per capita. A strong
correlation argument can be made that high speed Morse code
skill and troublemaking go hand in hand.

Talk about living in the past. Reminds me of the Patent
Office manager who said everything had already been
invented. Can't you do any better than 78 years ago,
Jeff? That was even before the FCC was created. What
does the FCC have to say as we enter the 21st century?

Airplanes couldn't be controlled way back then either.
Might as well disolve the FAA.

A ham was walking along a beach on a "rare" island in the Pacific when he spotted a contester with no arms and no legs crying at his radio.

He said to the contester, "what's wrong", to which the contester replied, I'm 56, I have no arms, no legs and I've never been kissed. So the ham's wife walked up to the contester and kissed him. The couple started to walk away when they heard the contester crying again.

The ham went back to the contester and said, "what's wrong now ?"

The contester replied, I have no arms, no legs, I'm 56 and I've never been screwed. So the ham went over to the contester's tower, disconnected the coax and said "you're screwed now, buddy."

Really??? Could I interest you in going back to read it
again? Oh well, I'll just repeat it here. What was said was
that--

*Hams who invest a lot of serious effort and time have a
real investment in their license and thus are much more
likely to hold it in some esteem and consider it to be a
thing of value which they will protect. One way they do this
is by following rules and regulations**.

What part of that is so obscure?

BTW, Hans, are you taking good care of that valuable 1/4
inch hole???

You know, Al, it's no wonder nobody at the FCC has wanted to do Amateur =
enforcement in the last ten years. I have a net here of whiners that want =
to be an International Broadcast Station on 3950, one of the most =
congested areas, and have it all to themselves, all the time, provoke =
everyone and use the frequency for anything in the world EXCEPT the basis =
and purpose of Amateur Radio and its allocated frequencies, and have the =
government run interference for them and provide a clear channel for them, =
ignoring the fact that frequencies are shared. I get mail from you all =
every day, and handling the "Liberty Net's (excuse me, "Great Liberty =
Net") problems would be a full time job. You rail every night about how =
bad the government is, but run to it every single day complaining, then =
constantly criticize and second guess everything we do. You remind me of =
the football cartoon, where the coach, finally tired of armchair advice =
and criticism, turn to the spectators and yells "You, in the brown jacket, =
go in for Number 42". All of you are starting to lose credibility with me. =
I have limited time, no staff, no secretary, about 45 calls a day and =
about 125 e mails every day, and I need to move on to real problems of =
Amateur Radio being experienced by people who understand what it is for in =
the first place. Please do not contact me again.

I'll bet they DON'T turn a blind eye to the 11 meter band.
If they do then it means that newbie knownothings are in
charge. It's the best reason yet for FCC to keep a code test
in ham radio.

This board and amateur radio just ain't the same without seeing and hearing the wonderful wit and wisdom of the great one from South Carolina. Gee, I wish he and Riley could straighten things out once and for all; all of us would benefit from it. The latest heard is that Rich must mop the mens' room floor in the FCC building to be reinstated which is a far cry from the last one picked up i.e.that he must act as Riley's personal chauffeur back and forth from Hamventions. The problem is that it's tough to separate the wheat from the chaff due to the plethora of adept stinking liars around here. The ones who concoct tales about imaginary jamming and slander and everything else imaginable and then like little old biddies, get together on their phones or computers to arrange letters to be sent to Riley. I must admit it's tough to ever believe that Riley would take the brats seriously especially the ones who have been recipients of FCC notices telling them how to make peach cobbler and chicken florentine. Heck by this time, KT4TR must rank as a top chef. I wonder, in light of all this BARF and Stumpy cloak and dagger stuff, if Riley appreciates what these skunks pulled on innocent persons for years-such as attacking families, religious groups, writing to employers, illegally filling out magazine subscription bingo cards,making death threats over the telephone, jamming emergency medical traffic, lying over mean statements allegedly made about deceased family members, telling an individual to have sex with his dead mother etc. Oh yes, that last one is gospel folks, as hard as it is to imagine. W4FQF, that hunk of illiterate white trash, the slimebucket known as "Polly" a.k.a George Ashley said it to Bill Irwin, K3CQR, soon after Bill's mom passed away. I heard it and too bad Dumbo Ears wasn't in Bill's face at the time because if he had been, the world would be missing a Polly. Yes, he would have been buried in a landfill where he belongs. I'm finding out at this age that sometimes the nicer you are to a person the bigger kick in the behind you get. I refer to KE9RY who, being influenced by the lowest element in amateur radio, has turned against me viciously. I distinctly remember when he and Barbara came east after the tragic loss of their daughter and wanting to help them in one way or the other, invited them to my home. Nicer people you'd never want to meet. We hit it off excellently even when we lunched together in the company of K2IVX whom I could have done without. I mean the louse invited himself and rather than insult Tom and Barb, I lowered my values by sitting at the table with him. My hero WB2OTK has a great nickname for Lenny, "The Cattle Car Door Opener" which might have something to do with the Chicago stockyards but can't be sure. I'll have to consult with Rich on the exact meaning of that one. While sitting at that table, Tom showed me his digital camera and asked if I wanted to see a picture of the funeral. The date was May 1st. I told him no for two reasons: I was trying my best to lift that black cloud and my own mother was buried on that day in '96. Losing a child or a mother is pure hell and I wish it on no one-not even the garbage who lie to Riley Hollingsworth. And I still feel for Tom and Barbara today because that loss could have ripped the hearts out of them had they not been courageous but they've coped just fine. And

obviously my efforts have been lied about and fed to Tom in such a way as to make him believe I insulted the memory of his beloved child. I'll cease talking about it because it's astonishing that KE9RY would believe such trash yet, he does. In the movie "Casablanca," Bogie says, "I stick my neck out for no man." That's rather selfish and cynical but maybe he had a point? Honestly it's a shame that people don't think for themselves but instead prefer to be manipulated by those having evil intentions. The thing about the BARFies and Stumpies is that they underestimate AF2Y; cannot control or manipulate him thusly do all they can to undermine. Give up fools-you'll lose. That's a guarantee.

They said "we do not concur". They DIDN'T say that they
wouldn't consider that when making rules. If you don't see
the difference you don't want to.

> >
> > Then they're turning a blind eye to the 11 meter band.
>
> The blind eye they turned to the 11 meter band resulted in lack of

That's exactly 180 degrees wrong. The FCCmade a valiant
effort to exert some control over the mob n 27 mhz but
finally was overwhelmed, at which time they just backed off
entirely. I wonder where that order originated?

> There are many, many
> radio services that do not require testing.

Cecil! ***NO*** 'radio service' requires testing! Only ham
radio *OPERATORS*! Not too many years ago, all commercial
operators were similiarly tested. Today, FCC rules say that
only (commercial) operators who function within systems
which are subject to international treaty which requires
them to be licensed will be tested. No other testing nor
personnel licensing exists.

> The ones that are
> properly policed are well behaved. The ones that are not properly
> policed are not well behaved. It's just human nature. Effort has
> nothing to do with it.

Some call it dedication to the preservation of a service
that they value and wish to protect. Some consider it to be
a byproduct of the invested effort and the resulting
personal value attached. "Nothing ventured nothing gained".
We see that since you ventured little you place little value
on the ARS. You have made it clear.

Enforcement has absolutely nothing to do with voluntarily behavior *in the vast majority of cases*.
THE PROOF: for the past 20+ years, FCC enforcement on the HF spectrum has been non-existant, (prior to the arrival of Riley and Co.) Yet, the vast majority of hams have been very well behaved-- VOLANTARILY, and have posed no behavioral problem whatever. The smallish minority who have done otherwise have caused all the problems. Many hams have just abandoned the hobby, while retaining their licenses in many cases, because of he embarassing and extreme misbehavior of the few. Some hav not bothered to renew, considering the ARS a lost cause. Largely because of the influx of "easy license" people who mostly come from 27mc.

So its *only* correct to say that among only the small minority who cause 99% of the problems on ham radio, enforcement is a large factor in keeping them in line, or was. Today, many seem to just not care, and continue on despite he threat of sanctions. A curious artifact of modern life.

> The two extras who just got NALs probably put out a reasonable
> amount of effort.

And what is known about these Extras??? Who are they? How did they get their licenses? What is their backgrounds? Did they migrate down from Freeband and just decide to continue that sort of activity??

As I've said before--- today no license is proof of much of anything beyond the fact that you have the ability to memorize word associations and put forth a minimal effort to learn enough code to guesstimate correctly 7 of 10 multiple choice questions covering a short CW transmission where the answers mostly may be derived from copying bits and pieces of words. And tests can be easily and cheaply repeated until the determined if unqualified applicant 'scores'.

> But if they had known that they were going to
> get NALs, they probably would not have done what they did to
> get them. Enforcement of rules is the key to a well-behaved
> ARS.

WAS is the correct term, not IS. Today many of them just don't seem to care. They know that nothing involving ham radio is of high priority, and the exerience many have had above 27 mc clearly shows that no one anywhere is going to get all that excited, whatever the violation as long as it doesn't include violence. So they just do as they wish and often just ignore enforcement efforts, that so often amount to a swat with a folded newspaper. Even Riley's effort has rather strict limitations on its extent and effectiveness. They know that most of his "victims" won't suffer much, if

any, for their transgressions and they're accustomed to
gambling on this sort of thing anyway.

>
> Nope, it's the best reason yet for the FCC to do their job,
> i.e. enforcement.

There's always been ONE best reason for lack of enforcement
by FCC -
Lack of resources, read $$$$$. Given sufficient amounts of
that, enforcement would be no problem, as it used to be when
enforcement problems were much more rare anyway.

Given the shortage of enforcement funding, the next best
method is to strictly limit access to legally licensed HF
operation to those who show by their invested efforts that
they will value their access and privileges conveyed by
their licenses enough that they will be self-policing, as
ham radio has always had a reputation for doing. Those who
can't or won't cut the mustard will remain on 27mc doing
what they have done for so long.

Remember the pre-FCC Government edict to hams in the 20's

"You must be controlled, and we can't control you.
Therefore you must
control yourselves, or cease to exist".

That edict is every bit as valid today as ever, and even
more so.

You let him off too easy. Here's what my suggestion would have been:

> 1. what happened to you[r] (sic) dental practice?
Not your concern (he used this response to your query about updating his
address with the FCC in June or July)

> 2. What went on between you and Doris the SWL?
Not your concern

> 3 . What about your tax avasion (sic) [evasion]?
Not your concern

> 4. [What about the] DUI charges against you?
Not your concern

> 5. You were cited for interference by the Kingsville FCC office. Tell
> us about what it was for (sic). It was for playing tapes of Adolf
> Hitler on 14.313.
Answered in June or July

> 6. Why did you choose to become a Jew?
Not your concern

> 6a I heard [that] you were kicked out of [the] Jewish Church?
Jewish Church? Is that like a synogogue or temple? But, not your
concern, nonetheless

> 7. Why do you countinally (sic) post hate against me, KV4FZ, Frank
> Tood (sic) and W9XN[?]
This is so self evident as to not require a response

> I hope you answer these questions [to] the best of your honesty.
> These are questions that have [been] posed to you on the air and on
> this newsgroup.
So what? They are still none of your business.

I know you don't need any help, but this was so ludicrous I had to do
something with it. There's no wonder that this character
is #1 on the BGO idjit list as voted by ng participants.

I had to add a lot of stuff (in brackets) to make this readable.
Apparently a college education isn't what it used to be.

Here Dr. Hate's claim that his ancestors were doing the Passover Seder in the Temple of Solomon for about 5,000 years demonstrates Dr. Hate's ignorance of the facts and the history of Judaism.

First of all Solomon was a 10th Century King in a part of the world now known as Israel. Dr. Hate was adopted from an Iranian mother by an Polish Ashkenazy Jew by the name of Swartzbard. Accordingly he has no clue of his ethnic origin. If he has been able to trace a Sephadic Jewish lineage back to King Solomon, I can assure you it is only in his mind. He could claim that his Iranian ancestor may have been sheep herders but I challange him to demonstrate a direct line to Solomon, he just can't do it.

The US federal superpower was overwhelmed by a bunch of CBers?
Dang, next thing they will be taking over the world.

> > There are many, many
> > radio services that do not require testing.
>
> Cecil! ***NO*** 'radio service' requires testing! Only ham
> radio *OPERATORS*!

That's exactly what I said, Dick, and it shoots your argument
down but you didn't even realize it. How many of those untested
radio services misbehave on the air? DUUUHHHHHHHH!

> We see that since you ventured little you place little value
> on the ARS. You have made it clear.

Nope, I ventured very little and I value the ARS immensely.
That proves that your argument is invalid. I ventured very
little for my driver's license yet I value it immensely. The
privileges granted by the license is what is valuable, Dick,
not how much effort it took to obtain it.

> Enforcement has absolutely nothing to do with voluntarily
> behavior *in the vast majority of cases*.

True, but only the troublemakers are a problem and enforcement
has everything to do with the behavior of troublemakers. Witness
the 3950 mess involving some extra class hams.

> THE PROOF:

Your proof is irrelevant to the discussion. The people who
obey the rules are irrelevant to the problem. The problem
lies with the troublemakers.

> So its *only* correct to say that among only the small
> minority who cause 99% of the problems on ham radio,
> enforcement is a large factor in keeping them in line, or
> was.

All true but irrelevant. Nice try at diverting the issue.

> And what is known about these Extras??? Who are they? How
> did they get their licenses? What is their backgrounds? Did
> they migrate down from Freeband and just decide to continue
> that sort of activity??

They came into the ARS exactly the same way you did, Dick.
They met the existing requirements. They act on the air
like you do on this newsgroup so you guys are kindred
spirits.

I have no radio experience, but am considering getting a no-code tech license & a hand held radio. One specific purpose is to be able to communicate in the event of a major earthquake in the LA basin that could disrupt land line communications. Can you give me some feedback on this plan? Would this license & a handheld unit be enough to insure reliable comm? Is the power output of the unit a key? etc.

Thanks

From: Charlie Vaughn <cvaughn3@bellsouth.net>
Message-ID: <53FV3.694$I23.3092@news1.atl>
Source record: 128124

Several years ago I had an excellent HRO-60 which I sold along with the original manual to a ham in California. In cleaning up the shack recently I came across a very good copy of that manual. Its about 50 pages, includes the schematic, section 6, the XCU-50-2 Crystal Calibrator, the NFM-83-50 Narrow Band F.M. Adaptor and type 650S Vibrator Power Supply material. The accessory section has schematics too.

I will ship it to the first person responding for $10.

This a very good copy of the manual, front and back copied, but it is a copy, NOT THE ORIGINAL.

E-mail me @ cvaughn3@bellsouth.net

73,

Charlie

Can anybody supply CAT information on the Yaesu FT-727R 144/440 Dualband
Handheld?

I have one, but no user's manual, just the technical manual supplement.

Can someone point to a site or supply the information?

It depends on who you want to talk to. If it's other hams in your local area you're OK. With a 5 watt hand held working simplex you would not have a very big range, but if you could hit a local repeater then you would have greatly enhanced range (unless the repeaters went down in the quake...)

If you are looking to use it like a telephone, you will probably be disappointed. Without access to a local repeater which will allow a phone patch, you're out of luck. In this case you will be better off with a non-wireline based cell phone.

>on this issue. Can someone please advise. I am finding the general code
>test difficult

When 10 meters goes away in a few years, that band will be a local
only band like 6 and 2 meters. The only other privaledges are CW
only.

I recommend the tape course CodeQuick
http://www.cq2k.com
Just the tapes, not the computer stuff. (Its buggy but works ok)
The tapes are fantastic.

It took me from nocode to extra in a year.

Also. If you can copy 8wpm solid, take the 13wpm test. Presently
ARRL VEC's give multiple choice tests. This makes it easier. 10
questions and you need 7 out of 10. If you can fill in between what
you have, then you win :-)

Good luck. It really isn't that hard with these tapes. Others might
work, but many people around here have been successful with codequick.

Just a happy customer.

Carl

I think it means you police you, and I police me. We're required to know the rules, and we're required to follow the rules. Anymore, police don't prevent crimes, they simply try to catch perpetrators. In the ARS the FCC does that with our help, and they also act as prosecutor.

"Yourselves" is plural, Dick, or don't you know the difference?
Exactly how is self-policing working on 3950? What good is your
so-called "self-policing" policy when dealing with troublemakers?
Who has the power to stop the troublemaking?

I now understand your attitude. "Don't let any new hams into the
ARS. They might be troublemakers."

>We cannot be a self-policing service, Jeff, because we do not
>have police powers.

As Gary Coffman is quick to point out, self-policing means *SELF*
policing, i.e., abiding by the federal regulations ourselves, not
necessarily looking after the other fellow.

>Responsibility without the power to do anything about it is a joke.

If you're unable to police yourself on the ham bands, please turn
in your license. =:o

>Have you done anything about the troublemakers on 20m?

Located where I'm at, I don't hear the same things on 20m that you
do, and most days, I'm away from my home from 0700 to 1800. So
whom ever you're referring to on 20m, if they're not policing
themselves, then collect as much info on them as possible and
turn it over to an OO and the FCC. (We have our hands full with
the Philippino taxi cab drivers on 10m. Not much can be done at
the individual level with foreign ham-band invaders; all I can
do is operate CW on the low end of 10m when time permits.)

> Would you care to explain then why the letter said "This
> is not a citation"?

Of course. Did the letter say they were not citing you with an
Advisory Notice? Obviously not. That would defeat the entire
purpose. "cite" is a common verb. Notice that I used that common
verb in my posting. In this context, "Citation" is a defined legal
term which you mentioned first. It is obviously your attempt at
obfuscation. I did NOT bring up "citation" - you did. Just another
one of your strawmen. You were *cited* with an Advisory Notice
from the FCC. An infraction "was called to your attention",
was it not?

In addition to trying to prohibit anyone except extras from
presenting an opinion on the Morse code testing issue, you
attempt to take away the English language from anyone who
is not procode-testing. I really think you would be happier
in Cuba where you might manage to achieve the political
power to which you seem to be addicted.

I read it a little different way, Jim, i.e. We, as members of
the ARS, are responsible for policing not just ourselves, but
each other. Troublemakers are not going to police themselves.
How is a self-policing policy going to handle rule-breakers
when peer pressure doesn't work?

I didn't mention "citation", Jim. "Citation" is a noun. Dick used
the noun and you used the noun. I didn't use the noun, I used the
verb, "to cite", i.e. "to make aware of". The officer can either
cite me with a speeding ticket or a warning. Either way, I have,
by Webster's definition, been cited even if it was only verbal.

Fine. But if either a police officer or other government agent cites
you in law enforcement venacular, you may be assured that you are not
being issued a warning.

I suppose you're entitled to make a citizens arrest if you like.
Somehow I can't picture that though. Maybe you could even print-up your
own little W6RCA "citations" to hand out. Would they be warnings, or
Notices of Apparent Liability? :-)

A typical ham reply, hopelessly bereft of creativity.

I bet in your version of the "real" world, a callsign equates with a
life.

Perhaps on your wall hangs your DXCC certificates in lieu of a degree ?

Or perhaps you just have a swastika, since that country is heading back
that direction anyway, infringing on free speech, assaulting foreigners,
while your companies experiment on the unwitting public ?

As I returned once again the the ARRL Members; Only site (don't we feel special), I noted that another ham has died.

In true romanesque fashion, ARRL has bestowed upon VE3HC the laurel wreaths of Newington.

My word, QST and the site are becoming depressing, what with all the death, strokes, police reports and such.

It was my belief that I had joined an amateur radio organization, not a microcosm of society, not a community.

I can pick up Newsweek and find lighter reading material. I can pick up the New York times and read about civil wars in Africa and find less graphic descriptions of causes of death.

And they get on the air and go into print pontificating on why ham radio is dying ?

It is. Literally. And the fact that you can pick up PC World or MacWorld and not read the daily death notices is only helping to chip the headstone, letter by letter.

You're sentencing the poor fellow to a life of written-copy speed. That's no good if he wants to get up to a conversational speed some day; to achieve that he'll have to practice "head-copy" -- actually reading the Morse in his head rather than writing it down.

There are lots of folks running mobile CW on long stretches of the highway; the only way to partake in such an activity is to get good at head-copy.

The time proven Rx: Get on the air at every opportunity, copy behind, put down the pencil.

Which only shows that even the riff-raff can learn enough of the
code to pass 7 of 10 multiple-choice questions. But you still
can't come up with one single ham who has ever been cited for
any rule violation while operating Morse.

No Novice has ever been cited for operating CW out of his band?
No General has ever been cited for operating CW out of his band?
No Advanced has ever been cited for operating CW out of his band?

What you are saying is the FCC doesn't care if I operate on
14.010. Do you guarantee that I won't get into trouble, Jeff?

So speaks one of the premiere jammers not only of the net in question
but of the newsgroups as well. This KK7HO Bozo seems to spend all
of his waking hours conducting his hate campaign. The Net ain't much
but I have to concur with the first poster they look pretty good in
comparison with the mental giants who jam them.

With the help of the internet this KK7HO asshole can embarrass all the
good decent hams in the hobby. Nice work Volz.

Given that the Newsgroups/Usenet/Netnews (or whatever we call this now)
is not the Amateur Radio Service, you shouldn't judge one's comments
on here by how they behave on the air.

(Okay, who created the new group titled alabama.birmingham.radio.amateur?)

That statement is as true today as then. The FCC and its predecessor,
the FRC, have always contended that we be a self-policing service
("control yourselves"). If we refuse to comply, we could very well
be legislated out of existence ("or cease to exist").

>Reminds me of the Patent
>Office manager who said everything had already been
>invented. Can't you do any better than 78 years ago,
>Jeff? That was even before the FCC was created.

Many things are as true today as when they were first penned. I
can reference mathematics research papers written a century ago
which are still as startling (and of course, true) today as back
then.

And who could disagree with Albert Einstein's comment he made
long ago, "The most amazing formula I know of is that of compound
interest."

I dis -agree.

There are many Tech-less Extras, who need to elmered just as much as a
code-less Tech.
The hobby is for ALL skill levels. It is perfectly possible to master the
code and have no
clue about the other requirements other than to memorize the right answers.
I may agree if your intention is to promote a better test or a demonstrated
mastery of a
Ham Radio skill as a qualifier for the Extra.

But the fact is we have to work with what actually exists, and so I prefer
to teach, nurture,
and enjoy the results as the "students" achieve a better understanding of
Ham Radio.
As I have been doing this for the last 25+ years, Monday nights at my house.

I am pleased to note in this community an ever expanding Ham Radio "family"
where the usual problems in Ham Radio are non-existant!

We cannot be a self-policing service, Jeff, because we do not
have police powers. Responsibility without the power to do
anything about it is a joke. Have you done anything about
the troublemakers on 20m? If so, please enlighten us. If
not, why not?

Aha, so you are admitting that CW has nothing to do with being a
gentleman. The CW/Morse mode simply does not lend itself to the
vagaries of voice modes.

That simply PROVES my point. Those folks are licensed and
have real callsigns. They're not subject to many sanctions
by other hams. Freebanders with no callsigns don't hang out
her because they have no standing, no callsign to use, don't
fit any amateur group. Once they get the ticket in hand,
they become much more difficult to deal with, whatever their
motivation.

Cecil is stretching again, must be worried about his
bottom-of-the barrel supply of "facts". They're all gone. He
knows what we are saying is true.

The "point" is that your assertion is easily
provenincorrect by the fact that I very willingly
administered tests to many ex-CBers who are now good hams.

That's right. Those are not CITATIONS. They are "Advisory
notices". I know because I received one when I was only a
month into my Novice experience in early '57. The FCC
Monioring Station at Brownsville, TX heard my second
harmonic on the 20 meter band, where Novices were not
allowed. The letter included exact test of my transmission.
I was not required to answer the 'Notice". But you can
believe it got my attention.
As a cure for possible excessive harmonics, my Elmer
suggested that I remove one turn from my final tank link
coupling to reduce the possibility of capacitive coupling of
harmonics to the antenna, and that I tune the transmitter
very carefully. I never got another 'Notice".

Dick, exactly where do you get your powers to police the ARS?
And why don't you do something about 3950?

Just because that was true of you, Dick, doesn't mean everyone
shares that unfortunate personality flaw.

> The "point" is that your assertion is easily
> provenincorrect by the fact that I very willingly
> administered tests to many ex-CBers who are now good hams.

The point is that you have stated that you would rather turn
the ARS bands over to commercial interests than drop the
Morse code requirement thus allowing CBers into the ARS.

I said, if we assume that any ham is half, then it naturally
follows from what you said that:

YOU'RE a WHOLE one. Nothing half-vast about you, pal!

Want me to sketch you a drawing so that you might be able to
understand?

Truth hurts, eh, Dick? We could get rid of the most NAL's per
class by kicking the extras out of the ARS. If you act on the
air like you act on this newsgroup, you must have a stack of
NALs. (Apologies to all the extras who don't consider themselves
to be a member of the exhaulted elite.)

From Webster's: "cite - to call to another's attention"

You were *cited* with an Advisory notice from the FCC, Dick.
They called it to your attention. Is there no end to the
obfuscation that you will produce to try to prove that
coded hams are better than other people? It's a losing
cause, Dick, given the example of coded hams that you
yourself have presented.

Cecil, you are lying again. You do that a lot when it seems
necessary to "prove a point" that can't be made otherwise.

It can be shown that I said that I'd rather see amateur
spectrum turned over to commercial users than to see it
become like the 27 mc region since at least it would serve
some public benefit. Vast difference in that and what you
quoted me as "saying".

"I never lie".--W6RCA. Yeah, right.

Unlike you and the dingalings on 3950, I am able to do a
good job of policing myself. THAT is what the FCC requires
if ham radio is to survive in its past and present form.
Otherwise many more restrictions are certain to come.

Would you care to explain then why the letter said "This
is not a citation"?

If you were really much of a technical person you'd know
that Websters will only take you so far.

NO, Cecil. Self policing *IS* done by, and almost wholly
by, individual hams. What do you think the FRC/FCC meant by
"control yourselves"???

But with your eagerness to bring your Freebanding buddies
into ham radio I can see why you'd want to ignore that in
favor of some other unworkable plan.

Got that, all you Radio Amateurs out there??? Cecil says
that insisting that ham radio operators be self policing is
a crock of crap. He says that strong FCC enforcement is the
only way. No surprise.

But it *will* be a surprise if the FCC buys into it. So far
they have insisted that ham radio be largely self-policing,
going all the way back to 1922 when the predecessor to the
FCC said to hams:

"You must be controlled, but we can't control you. So
control yourself, or cease to exist".

Looks pretty plain to me, as it always has.

I doubt that's the case Tim, unless of course your part of the "So called"
liberty net.
Don't get me wrong, i don't condone the jamming but can certainly understand
the outrage being directed at the "So called" net. They've done anything and
everything that they can to run others of of that frequency. Everything from
moving in on existing qso's to personal attacks, invasion of privacy,
harassment, libel, lies, etc. So, in the end, they have created their own mess.
Then they run to the very government that they bitch about every week for help.

He was run off of this newsgroup for advocating illegal activities, like freebanding and operating on 10 meters without a license. Also, I would venture a guess that AOL received numerous complaints about Drew "CBRAMBO" Durigan's spamming of the radio-related newsgroups with hundreds of off topic posts.

>I miss his wisdom, his wit and the
>ability to make things work on this NG.

Boy, talk about stretching the truth!

Lloyd, if you really miss your buddy Drew Durigan, here's his email address: MNMANIAC@aol.com. Send him an email and ask him how he's doing. No one gives a hoot about your mentor but you. Get a life, you useless dork.

MY GOD MY GOD MY GOD wipe your nose off john you got liley
crap on your face john's new name is BROWN NOSE JOHN
whats next nee pads? >>
<<First off you moron, the word is spelled KNEE not NEE which automatically reduces your credibility to ZERO. I had the extreme pleasure of listening to KC3AU discuss meeting and talking to Riley and the info he imparted on frequency was quite valuable. John brown- nosed no one and I'm not talking about the abolitionist John Brown who lies smouldering in his grave but instead John Occhipinti who has more hair than God should allow and this goes for both his Jesus and my Jehovah. I am positive that Riley gave him the time of day because of that Afro. John, not John Brown, was at my home a few summers back and the first thing I wanted to do was to yank at that cerebral bush in which no bird would ever lay an egg because the feathered fink, after dropping her white load, could never find it. Now I've seen pix of Riley and he's balding so my best guess is that they privately discussed hair restoration rather than ham radio disintegration but John, not John Brown, is far too much a gentleman to go into such delicate details.
I'm telling you that if any guy out there who's losing you know what would ever see this KC3AU character who must be close to 60, you'd drool with jealousy. The best way to describe the top of his dome is "an ocean of curls." Remember in the '60s and '70s when our black brothers were sporting that look? None could match that of the expatriate from Scranton. And where he gets the nerve to get on the air and say, after this year's glorious Yankee victory over the Atlanta Clowns that he lived next door to Yankee Stadium is a blatant lie and a man of the cloth should be above that unless his cloth is the apron his wife makes him wear when wiping the dishes. Well getting back to John's encounter with Mr.Hollingsworth, if you knock it, you're just plain jealous. The man is well respected, I mean John,KC3AU, not John Brown who still lies smouldering in his grave while the other gent is well feared. However I must be candid which always escaped Herbie Schoenbohm as attested to by his continuous lying before Judge Edward Luton. I think Riley is being influenced by ham radio garbage such as KT4TR, Queenie the Weenie Mort; K2IVX the Yiddish Shill whom to all Jews is a bitter pill; Dumbo Ashley and a few other assorted geeks and creeps. And now you know why I have composed this masterpiece; I admit it, for self-serving aims. I flattered wonderful, intelligent and hairy John, not John Brown you fools, because I know that he has an "in" with Mr.Hollingsworth and being that since John and I hit it off nicely at my home, I figure maybe he'll put a good word in for me. And if not Brother John, because I'm thinning and you own the rights to all the hair in the world, the next time I see you you're going to be

worked over until you spill the formula.

And you can spin it any way you wish, but you just lied!
What you quoted was nothing near what was said.

OF COURSE there are going to be coded hams in violation. So
many who have passed some modern code test are essentially
no-coders, in actions as well as ability to actually use
code on the air. I've seen hams pass code tests who wouldn't
be able to evenbeginto use it in actual practice. No news
there, its an artifact of the modern testing system.
And lame is it is, all the limp lame and lazy want it even
easier!

Mr. Munsil, your nickname is BILL not BIL. The correct Latin is AD HOMINUM, not ad hominem. Who's kidding whom? Esperanto was the Lone Ranger's Indian sidekick as I told you earlier today. I don't get this obsession you have with this deceased language? Ain't well English good enuff for ya? I think you owe the posters on this fine forum an explanation before we run you off. Would you kindly tell us why Esperanto is so dear to you and give valid reasons why we should study or even bother with it? Does any permanent delegate to the United Nations from any nation in the entire world use it to address the General Assembly? My feeling is that if someone tried it, he'd get hit by rotten tomatoes which of course is very bad for peace. I mean can you imagine some guy wearing a thousand dollar suit getting up there for an address and being pounded by rotten tomatoes from the floor and gallery? Sir, you have some nerve coming on this board to sell a language so disdained that it could lead to a world war. Do you realize the implications of your presence here? You might turn brother against brother thanks to that lousy lingo.
You owe us an explanation and we'll be anxious to hear it.

Won't get a chance unless FCC allows the freebanders to get
legal freebe HF hamlicenses. Hams can do a good job of
chasing the illegals out of the hambands-so long as the
illegals don't have codefree, testfree legal ham licenses to
hide behind...theres a lot of that going on right now. If
FCC makes it easy for many or most of them to do likewise
the ARS is finished.

Make at least one CW contact per day. Be consistant about it and you will get there. Sometimes it just takes a little while. It took me almost a year to be able to copy 5 wpm without writing dots and dashes and getting nervous. That was 23 years ago and now I do over 20 wpm in my head. YOU CAN DO IT!!!!! REALLY!!!!

I never have claimed to be a whiz when it comes to theory. But I am a good op and I can copy CW better than the average bear. When people start screaming about the code requirements being too difficult I have to point out that the theory was equally difficult for me. So I will have to disagree with you.

Should hear 10M band openings in Australia. It is a constant noise of FM carriers from 28 through to 36MHz. I heard very strong Japanese CB type signals last weekend on 34 and 35MHz (usual stuff, singing, music, general cb stuff) and while that was going on the whole 28Mhz section had Indonesian or Taiwanese or whatever FM signals going.

By the very nature of FM, we aren't ever going to jam them from this distance!

Like the rest of us, you'll have to earn it, Lloyd. Get off Usenet, hit the books, study your brains out day and night, get as much experience as is possibly, make a good showing on your interviews*, work at your job as if you own the company, save and invest every possible penny you earn, start your own business on the side. Only then will you get what's "owed" to you.

*As a business owner conducting interviews, it might be beneficial for me to conduct, among other things, a Deja News "background" check on each prospective employee; I could learn quite a bit about the person's personality, ability to clearly pen his thoughts and communicate with others, and what he "stands" for. I know very well I would never hire you, Lloyd.

"Just a Common Soldier"

He was getting old and paunchy and
His hair was falling fast;
And he sat around the Legion, telling
Stories of the past.
Of the war that he had fought in and
The deeds that he done,
In the exploits with his buddies, they
Were heroes everyone.
And tho' sometimes to his neighbors,
His tales became a joke,
All his Legion buddies listened, for
They knew whereof he spoke.
But we'll hear his tales no longer,
For old Bill has passed away;
And the world's a little poorer, for a
Soldier died today.
He'll not be mourned by many,
Just his children and his wife,
For he lived an ordinary and quiet,
Uneventful life.
He held a job and raised a family,
Quietly going his own way.
And the world won't note his passing,
Though a soldier died today.
When the politicians leave this earth,
Their bodies lie in state,
And thousands note their passing
And proclaim that they were great.
Newspapers tell their life stories,
From the time that they young,
But the passing of a simple soldier
Goes unnoticed and unsung.

Is the greatest contribution to the
Welfare of our land,
A person who breaks promises and
Cons his fellow man;
Or the ordinary fellow who in times
Of war and strife,
Goes off to serve his country an
Offers up his life?
It's so crazy to forget them,

For it was not so long ago,
That the "Old Bills" of our country
Went to battle, but we know,
It was not the politicians with their
Compromises and ploys,
Who won for us the freedom that
Out country now enjoys.
He was just a "Common Soldier"
And his ranks are growing thin,
But his presence should remind us,
We may need his like again.
For when countries are in conflict,
Then we find the soldier's part,
Is to clean up all the troubles that
Others often start.
If we cannot give him honor, while
He's here to hear the praise,
Then at least, let's give him homage,
At the ending of his days.
Perhaps a simple notice
In the paper that would say,
"Our country is in mourning,
Cause a soldier passed away."

Unknown

At at the National Memorial Cemetary of the Pacific ("The Arlington of the Pacific") we'll have our annual Massing of the Colors which includes an Army 21-cannon salute and an Air Force Missing-Man flyover. I hope you all will also take time out at "... the 11th hour of the 11th day of the 11th month..." to salute and give thanks to those who've kept us and continue to keep us safe. We owe them so much.

2498. Stereotyping "Schoenbohm Cronies" is Specious

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-10 00:00:00 UTC
From: Trebb@webtv.net
Message-ID: <4653-3829329D-1@storefull-245.iap.bryant.webtv.net>
Source record: 127888

Doc, surely you have more intellect than to stereotype all "Shoenbohm cronies." Had it occurred to you that some of us discriminate, legitimately occupying different ground on different issues?

There is no question that Herb Schoenbohm misbehaved, also that the government produced key evidence against him in his criminal trial that was fabricated.

The evidence issue shouldn't be taken lightly. As life isn't wholly black or white, good or bad, there are bonafide shades of grey which men of good conscience champion. If the ACLU, for example, had standing in defending neo-Nazis' right to march through Skokie years ago, those of us who care about government misuse of evidence have every right and reason to support Schoenbohm in that regard and to that extent.

Notwithstanding my raw deal with him on his corroded amplifier, your nemesis needn't be mine!! Seems to me, Doc, that you are driven by malice, a no-no in our society!!!

2499. AF2Y, FINAL WARNING ISSUED !!!!!

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-10 00:00:00 UTC
From: brewheadbud@my-deja.com
Message-ID: <80bq66omq1@nnrp1.deja.com>
Source record: 127889

During the past few days we have heard AF2Y speakout in the most vile attacks ever conducted on amateur radio. He can be heard jamming daily on 14313. I can only hope that Mr. Hollingsworth has heard enough and is ready to pull the lisence of his amateur radio station. Everyone needs to continue to pour the e-mail to Riley Hollingsworth and report this "Clifton idiot" every time he pulls his attacks on individuals. A tape recording of the "Worst of amateur radio" is being complied at this very moment and will contain remarks from KE4TEW and AF2Y, along with "CRAZY BUTCHIE" and the host of misfits and perverts. AF2Y will be heard doing his daily antics that have led to his problem with MR. Hollingsworth. Sources of the ARRL say that action is about to be taken!!!! It's about time the antics of TEW and AF2Y were acted upon.

Hi Janet:

I paid $2300 for my Novice ticket back in 1978, I worked for three summers
mowing grass to make the money. The hard part came when I wanted to upgrade
to HF, there were no volunteer examiners at the time and I had to take the
test at an FCC examining site. Of course I would not want anyone to think
about trying to buying off a Government official but let me put it this way,
I left for the examining site with $8000 dollars in my pocket and my
girlfriend went with me, I didn't see her for 2 days after we got there and
I&#65533; had to use my credit card to buy gas to get home. She never forgave me,
and ended up leaving me for a Freebander with a 1000 watt mobile amp. Well
that's the way it goes I guess, but it was worth it to get my HF phone
privileges. I am trying to get my Extra, but after discussing it in detail
with my wife I might have to settle for General for a while.

Getting a ham license is very serious business, you had better think long
and hard about how much you want to "give" before you decide to join the
hobby. If your a good looking woman with a hot body you might not need as
much cash as I did.

Good Luck,

Tim ka8ddz
&#65533;
&#65533;

It's a really bizzarre way to increase code speed but it worked for me, no tapes,
no computer, no special gimmicks.

I got on the air and made contacts at 5 wpm!! It's amazing, and it works.

There he goes, lying again. He just makes up this stuff as
he goes along.
Jeff said "no one has ever gotten a NAL while operating CW".
NOT an advisory letter. They are VERY MUCH different.
Letters were fairly common.

"Brewhead":

I could not agree with you more. These radio "monsters" such as AF2Y,
KE4TEW, "Crazy Butchie" K4RUB, WB8FIH, W4NTI, K2JW and their minions,
should be reported to Mr Riley Hollingsworth each and every time they
come on the frequency with their diliberate intefering comments and tape
playing, sick QRM act.

The StumpJumpers, Barf and all decent hams will send out a protest to
remove these "Crazys" from amateur radio. Their kind can not be
tolerated on the "new" amateur bands.

So Mr High Road of 3950 on Long Island is critical of hams who refer to others by "code names!" It seems he has conveniently forgotten about "Paul Winchell and Jerry Mahoney" from 1995. Remember, imitation is the sincerest form of flattery!

He also was heard (8 Nov) talking to an alleged ex-jammer after having castigated others for talking to the same person. Consistency, thou art a jewel!

Well Done Jeff
Reminded me of the bugle call TAPS.
According to legend (not sure if it is true):

A Memorial Day Tribute
The origin of "TAPS"
Author unknown - received via e-mail from Mac McClendon

In case you ever wondered where "Taps" came from and the words
to it. We have all heard it many times but few know it's origin or
the
words. In 1862 during the Civil War, Union Army Capt. Robert
Ellicombe was with his men near Harrison's Landing, VA. The
Confederate Army was on the other side of this narrow strip of
land.
During the night, Capt. Ellicombe heard the moan of a soldier who
lay wounded on the field.

Crawling on his stomach through the gun fire, the captain reached
the stricken soldier and began pulling him toward his encampment.
When he finally reached his own lines he discovered it was actually

a Confederate soldier - but the soldier had died.

Suddenly, the captain went numb with shock. In the dim light he
saw the face of the soldier - his own son. The boy had been
studying
music in the South when the war broke out and, without telling his
father, enlisted in the Confederate Army.

The heartbroken father asked if he could have a group of Army band
members play a funeral dirge for his son at the funeral. That
request
was turned down because the soldier was a Confederate.

Out of respect for the father, however, they said they would give
him
one musician. He chose a bugler, whom he asked to play a series of
musical notes he had found on a piece of paper in the pocket of the

dead youth's uniform. That music was the haunting bugle melody we
now know as "Taps".

Day is done. Gone the sun,
from the lake, from the hill, from the sky.
All is well. Safely rest,
God is nigh.

Thanks and praise, for our days,
'neath the sun,'neath the stars, 'neath the sky.
As we go, this we know.
God is nigh.

I have had ancestors in every war since 1861 several KIA, so yes we do and
will remember.

You're memory is approaching that of a 90-year-old, Cecil. Go back farther and you'll see me repeatedly mentioning "NAL" in the above statement. The instant I leave it out, you make a big deal out of it.

"You still can't come up with one single ham who has ever been given a NAL for any rule violation while operating CW."

That's was my original statement.

Hey, wow. I was issued a citation for sending 15wpm in a 20 zone. What
a small world

But that wasn't the statement I was responding to, Jeff. You have tried to change the rules in midstream. Old trick, didn't work. Are you trying to retract the statement to which I *did* respond or are you admitting that you were wrong?

Did you or did you not say, "But you still can't come up with one single ham who has ever been cited for any rule violation while operating Morse."? Dick admits that he was cited for a rule violation while operating Morse. Your statement was false!

Hans, you gotta' tell us more about this one!

Was it a citation, or a letter from the FCC asking you to explain why
you were sending so fast?

Hi nospamham :)

In the long term, I think the Free Internet Service
Providers are going to face some pretty tough times
ahead.

There is an excellent overview of why Free Internet may
be in trouble here at ZDnet:
http://www.zdnet.com/anchordesk/story/story_3548.html
It's called:
"Why Americans Won't Get (Truly) Free Net Access"

My take on it?

Why settle for free when a new company lets you
build a growing income on top of virtually free access?

See my in-depth article on it here:
http://www.cebn.com/vfi.htm

Good luck!

Ted

Good post Jones. With the FCC handling the other 5%, the Service would
be in even better shape.

True story!

97.119(b)(1) refers.

Pissed off (because the club barred him from our repeater) K0GVS
called the local office and reported my IDer speed at 24WPM. I
have the citation ("speeding ticket") framed.

I get a real laugh out of Jeff's silly chant about CW ops don't get cited,
so I had to poke a hole in his baseless argument. I love Morse code
operation as much as anyone, but but there is nothing special about Morse
operators above phone, digital, SSTV, or whatever other favorite mode is
out there.

We're all hams, and the modes we use are nothing more than personal
preference.

> Anyone with a report on any of these...PLEASE POST...!!!!!!!

Hello NoSpamHam, I have used NetZero exclusively since February 20th of this year and it works great for me! You do have to click the ad every 30 minutes to stay online, but you get 3 megs of email space and 56kb connections, currently I connect at 52,000bps just about every time (or 49,333bps about every 10th call). If you don't click the ad, a RESUME button pops up and you need to click it in 60 seconds or it logs you off; I find that if you don't click the ad at least once every hour the RESUME connection seems to slow down. NetZero does not give you a web page but you can get plenty of free ones, check out http://www.angelfire.com for free 5 megs of web space, you can upload your own HTML code there! www.XOOM.com gives you unlimited web space, as long as you don't put up copyrighted items on the page or link to sexual material. Netzero does not give you newgroups either, but check out free ones listed at www.wsindex.com for posting and non-posting free newsgroup servers.

I know of Alta Vista Free Access at http://www.microav.com/ but you need Internet Explorer 4.0 or higher to use it (you can use Netscape to browse). It does not give you any email or newsgroups either, and you need to click the ad every 30 minutes. Since I have Windows 95, I don't want to muck up my operating system by installing Bill's folly IE5, so I will stick with NetZero for now.

Tritium, Worldspy, I have not heard of yet, I would like to find other free ISP's available in the USA for alternatives (which DON'T require IE 4.0+) when my NetZero goes down for the day (up 85%+ of the time, rarely get a busy signal). The only reason you should pay for an ISP is if you need 3+ hours connection time for business or large downloads, but with Godzilla and other resume internet download programs now, I guess you should only pay for business purposes. Alot of the "bonus" content such as stockmarket access, airline tickets, etc. can all be done by signing up with other private servers for free or fee and give you greater choice than AOL or other such "bonus" content server. In fact, you can get alot of AOL content just by going to the www.aol.com web site for FREE! 8-)

Happy free ISP hunting! John :)

Now listen up all of you 14313 "groupies", AF2Y sealed his fate today as he continued his barrage of untimely attacks today on 14313. No sooner had the Clifton idiot fired a volley against Riley Hollingsworth for ruining the so-called fun freq, when Hollingsworth broke in on the freq and started a qso with KE9RY. Prior to Riley checking in there was AF2Y talking to Capt. SOD, the notorious unidentified quarmer from somewhere in the south. Doc, or Charlie as I will refer to him from here on out was really making a fool of himself by stating that WB2OTK was "COMING BACK SOON" and that "Riley ruined a good thing". I stated earlier today that AF2Y had his final warning yesterday via fax, so take this as the best tip ever, Charlie is on the way OUT.
A few questions that Riley will pose to the demented dentist. Why were you engaging into conversation with a known bootlegger ? Why were you blaming me for the problem on 14313, seems like AF2Y and the likes of KE4TEW have been the problem for a long time. Why would that station identified as K4RUB be using that type of language on amateur radio ?

Uh, Yes, Old Chop, there was more than one ham. FCC/FRC was
talking to ALL hams so they said 'yourselves'. Plural, yes.
I DO know the difference. Don't you? FCC knew there was more
than just one ham, dummy!

> Exactly how is self-policing working on 3950?

Since I don't listen there, my information is necessarily
third hand. But evidently it isn't working too well there,
true. I'd imagine that's why it keeps Riley's attention, NO?

What good is your
> so-called "self-policing" policy when dealing with troublemakers?

Uh, Cecil note that it's not MY selfpolcing policy-- It's
the *FCC's*

> Who has the power to stop the troublemaking?

Ah do believe that's Riley's domain, when individuals lose
control over themselves.....

> I now understand your attitude. "Don't let any new hams into the
> ARS. They might be troublemakers."

Dang, can't you ever get ANYTHING right??? You're on the
right track, just the wrong train. But I'll straighten it
out for you--

"Don't let all those perpetual rules violators have easy
access to HF ham radio. They are PROVEN to be trouble
makers". All 40 million of them (well, maybe only 30 million
out of the 40).

Now, that's about the size of it. And I'd bet that FCC sees
it exactly that way, too.

Hi,

I need a part for an old DRAKE TR-4C transceiver
made in the sixties. I know some companies still
produce this part today but I couldn't find out
who and where to purchase from. Could anybody
point me to the right contact?

It's R10E1-Y4-V2.5K 48V DC AMF for TR-4C DRAKE.

Please reply to kaijiang@stanford.edu

Thanks a lot.

Regards,

Kai

Well here goes our resident Semanticist, out of the
compound on another jousting foray.
Sorry, I'm not armed with a lanceproof copy of Websters.
But I do have a three-inch-thick copy of Funk and
Wagnall's...so don't get to jab-happy, it'll be a tough one
to pierce!

Hi,

Does anyone know of Kenwood or another company ever made a module for putting the TS-120S (HF) on 2 Meter FM? Thanks in advance and please email if possible.

2549. KV4FZ

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-11 00:00:00 UTC
From: frg9600 <frg9600@mindspring.com>
Message-ID: <80g11soub1@nntp4.atl.mindspring.net>
Source record: 127732

Date: Monday, October 27, 1997 1:10 PM

Here is some background information that you might find useful.

KV4FZ has been an active amateur radio operator since 1954 when first licensed in the Midwest as W0VXO. While working his way through college (1960-64), he spent summers teaching at several camps for the physically handicapped. He was highly successful in teaching seriously disabled campers about the potential of amateur radio. Many of these campers went on to fully qualify for their amateur radio licenses.

His father, W.B. Schoenbohm, was the founder of Courage Center in Minneapolis. Herb was a major force in pushing for the initiation of the Handi-Ham program, which is now widely recognized as the premier service organization for disabled radio amateurs. After college, Herb worked as a international sales representative for Gates Radio, Harris Corp, and Collins Radio. He sold and distributed broadcast equipment to the international market, primarily Latin America. In 1968, he moved to the U.S. Virgin Islands with the intent of better serving his customers. His wife Monika was, at that time. a service representative for Pan American Airways.

KV4FZ was very active in DX work and, as a frequent traveler, put many new countries on 160 meters. He was instrumental in getting Stew Perry, W1BB, the necessary countries to be the first ham ever to get DXCC on 160 meters. He also gave G3IOR the last country he need (VP2EFZ, Anguilla) for the first ever DXCC via satellite (Oscar 7)

During the 1970's, KV4FZ was able to set CQ World Wide records 160 -10 in almost ever category except 40 meters. He was also very active in supporting the IARU Intruder Watch after encountering frequent yachts in the area that had acquired licenses of convenience for a fee. At that time, FCC Commissioner Margita White appointed KV4FZ as the Virgin Islands SECC. The SECC has responsibility to plan and manage the operation of radio communications resources during island emergencies. Herb fulfilled that role magnificently and was named a Virgin Island "Hero" after Hurricane Hugo destroyed most of St. Croix in 1989. Herb received this award for keeping vital communications circuits open during the crisis.)

Herb also took a detailed interest how most of these "pirates" has a close association with the so- called "service nets" on the top end of 20 meters. He joined the net and attended several of the hamfest functions. Only then did he learn how deliberate and sordid was the manner in which net members misused the amateur spectrum as a means to provide an international telephone toll by-pass service. One of the most flagrant of all these operations was the "INTERCON" network operating, for the most part, on 14.313 MHz. Herb began detailed monitoring of their operation and

intercepted many communications that were appalling to say the least.

In 1979, KV4FZ listening to what appeared to be a "business connection" between WB6MID/8R1 in Jonestown, Guyana and WB6MID in Ukia, California. Herb broke in and informed the net personnel that this type of operation on an amateur frequency was illegal. Furthermore, Herb stated that their communication constituted international business communications related to funds transfers and the procurement of equipment and supplies. The net hierarchy reacted by excoriating him for his "embarrassing comments" and ignoring the violations. The net bluntly told him that the Jonestown Operation was a missionary group and that they had special permission from the Carter administration to use ham radio to further their "worthy cause". Herb persisted with his concern and was quickly declared 'PERSONNA NON GRATA" by Robert Sternberg, AA4EE, a tax attorney who claimed to be the nets legal advisor. Herb expressed his concerns to other net operators participating in the companion "Maritime Mobile Net" such as Dick Eastman, N5FX and Mike Galego, KA4MUJ. Several Maritime Net members agreed that some of the more criminal practices, such as one ringers and "maintenance charges" for providing long distance toll free connections practically anywhere in the world, must be curtailed.

Some of the net cabal hierarchy rebuffed all attempts to institute reform and a nasty power struggle ensued. Eastman and Galego where "ex-communicated" by Ruth Hoffman N4LMC, Eddie Ricca K4PT and Art Candell N4PCK. The latter began a propaganda campaign, replete with false stories and personal attacks, that promised to destroy any net opposition that sought reform. The net members objected to the lively participation of KV4FZ, KA4MUJ, and N5FX (a former net director) who frequently brought to the attention of net participants certain stations whose conduct violated the FCC and International Rules.

During the 1980's, net members began a campaign of coordinated complaints to the FCC claiming that the aforementioned three were causing willful and malicious interference to the net. N5FX and KV4FZ both received prefabricated FCC citations at the behest of the net command. Both were able to get the FCC to nullify their actions based on the fact that their constructive comments did not constitute "malicious interference" and that certain members of the net themselves were engaged in a premeditated campaign of harassment and interference.

Several members of the net were subsequently caught interfering with the communications of KV4FZ and KA4MUJ. They include K2BFI and AA5LY. AA5LY later gave the FCC, and supporters of KV4FZ and KA4MUJ, a complete and accurate accounting of the plot by disgruntled net members to "settle the score". That plan included a vigorous campaign of letter writing to politicians in Washington in an attempt to pressure them into punishing the net detractors.

N4PCK had his own reason to get even. He had known Herb while he was operating in Haiti as HH2A and was very active on the INTERCON net. Herb had learned, through his contacts in Haiti, that Candell had a serious problem. He would solicit young pre-teen boys and pay them a quarter to perform sex

acts on him. A prominent Haitian administrator was told, by his son, that the young boy had been abused and sodemized by Candell. There was no arrest or trial. But the arrival of the outraged local citizenry at Candell's hillside villa dictated that Candell receive an armed escort to the airport. Candell then appeared in the Orlando, Fl area, illegally using the call HH2A/W4 and actively engaging in net activities. The net watchdogs, now known as the B.A.R.F. (The Better Amateur Radio Federation), pointed out that Candell was not eligible to use a Haitian call sign in the United States unless he was a Haitian citizen and had been granted a proper permit from the FCC.

Again the net members supported Candell and sought to silence Herb. However, the FCC ruled that Candell could no longer operate from Florida unless he obtained a valid U.S. amateur radio license. Candell later paid off a VEC in Silver Springs, Fl to fraudulently give him a passing grade on a General Class license examination. The VEC was later sanctioned but Candell was neither removed from the air nor required to be re-examined. In 1989 Candell was finally arrested and convicted of multiple incidents of child molestation. He was given a suspended sentence that was partially based upon INTERCON's assertion that he had been rehabilitated by amateur radio service in their net. (Candell was arrested and convicted again in 1994 for carnal assault on several boys between 8 and 10 years of age whom he had invited into home under the pretense of showing them his ham station. He has been institutionalized for several years but his ham license was, nonetheless, renewed in 1996 for another ten years.)

In 1990, Candell continued with his plot to destroy and discredit KV4FZ in retaliation for Herb's alleged "interference" with the net's "business". Candell actively leagued with other enemies of KV4FZ such as Pat Miller, KP2J in St. Thomas, and Richard Whiten, WB2OTK. Miller supplied Whiten the so-called "proof" of a crime by playing a recorded tape on both 20 and 75 meters. Miller introduced Candell to the operator of a long distance resale service that KV4FZ briefly subscribed to in 1987. Some of the users of the CALLS (Caribbean Automated Long Line Service) system (a six digit access code system on which half the possible combinations of digits gained the caller access to a WATTS line) had been illegally abusing the CALLS scheme. Malcolm Ford had claimed losses to the tune of $200,000 and needed a scapegoat. Thereupon, it was decided that a criminal case should be manufactured against Herb, KV4FZ.

Ford needed this falsification to support his ludicrous claim that the impending bankruptcy of CALLS was not due to his inept management. Instead, it proffered that somehow Herb had caused his business to fail. This was vital to Ford because he was still salaried as the GM of CALLS even though they were in receivership. Ford's efforts failed and he was physically removed from the operation after the Federal Bankruptcy judge found him raiding the treasury and assets of CALLS.

However, all during this time, Ford was fabricating evidence in an attempt to establish a connection between CALLS financial failure and KV4FZ. Yet the Department of Justice continually refused to prosecute Herb. This resulted

in even more acrimonious letters to officials and politicians in a further attempt to implicate Herb as the culprit.

Malcolm Ford, the previous owner of CALLS, was then under investigation for bankruptcy fraud. In an attempt to escape indictment, Ford hired John Ackley, KP2A, to fabricate various reports that would designate Vitelco(a local phone service), STSJ Long Lines, ITT and Herb as coconspirators who were attempting run him out of business. While this was going on, Ackley was attempting to buy the nearly defunct company for ten cents on the dollar. (Ackley failed but STSJ was able to get the company back on its feet.)

Miller, Hoffman, Candell and others intensified their letter writing campaign to hundreds of politicians in Washington urging them to investigate. They even began writing letters to newspapers, claiming that politicians were shielding KV4FZ from prosecution. In these hate letters to public officials, Herb was equated with organized crime, drug trafficking, and high level political corruption. In 1991, KV4FZ was writing a hard-hitting column for the St. Croix Avis newspaper. Herb frequently attacked political corruption so it stood to reason that he might have some enemies in government. Herb had articles published about the check kiting and House Banking fraud perpetrated by the Virgin Island Delegate to Congress, Ron Delugo. Outraged and distraught, Delugo (who had designs upon becoming the next governor of the Virgin Islands) assigned a full time staff attorney (Sylvester Julian) to explore methods of pressuring the FCC, the Secret Service, and the Department of Justice into investigating Herb and "putting a 'severe hurting' on him".

However an obstacle remained in the path of their plan to annihilate KV4FZ. Some at the FCC supported Herbs activities on behalf of the amateur radio service. Additionally he was elected as Vice Chairman of the Virgin Islands Republican Committee, which made him a frequent delegate to the GOP Conventions. Furthermore, Herb was personally acquainted with President Bush. Herb's father had served on the President's Commission for the Handicapped.

Initially, each and every involved agency claimed there was not enough evidence to support a charge against Herb. Subsequent to this, John Ackley, KP2A, manufactured a list of 660 telephone calls that were prearranged to add up to $1,047 in value. This was exactly forty-seven dollars over the amount needed to achieve the threshold of prosecution. Delugo wrote threatening letters to various government agencies threatening that he would see to it that their funding was severely curtailed if he did not receive figuratively receive Herb's head on a silver platter.

Ruth Hoffman constantly badgered the acting U.S. Attorney for the Virgin Islands, Terri Halpern. This continued to the point that Hoffman was finally ordered to stop harassing Halpern. However, as a Congressman to the VI, Delugo was in a position convince colleagues not to block Halpern's confirmation. Delugo reportedly told Halpirn that, unless she prosecuted Herb Schoenbohm, she would never become U.S. Attorney. (Halprin was fired in 1992 by the DOJ for ethical lapses after the Office of Professional Responsibility investigated the severe criticism, from the 3rd Circuit Court

of Appeals, that Halpern received for the "knowing use of false evidence" to secure a conviction. Nevertheless, the trial prosecutor was cleared by OPR because they were unable to prove that the prosecutor actually knew the evidence used was false.)

Herb's trial took place in April 1991 (four months past the five-year statute of limitations). Both Ackley and Miller testified, under oath, as to the veracity and accuracy of the incriminating evidence they had assisted in concocting. (Miller offered his so-called "caught in the act" tape of Herb dialing "illegal access codes". Ackley presented his list of random numbers that he verified, as a government expert witness, were all telephone numbers dialed by defendant Schoenbohm.

The puzzled and confused jury convicted Herb on all three counts of Title 18, SS 1029(a): 1,2 and 3, which is, in reality, an illegal credit card statute. This statute has been used infrequently to curb the illegal use of cloned cellular telephones. After trial, Schoenbohm with the help of Bob Sheron, W4ASX, closely scrutinized the evidence and began tracking down the parties that Ackley had claimed, under oath, that Herb had illegally called. A most amazing discovery unfolded: most of the persons contacted did not know Herb Schoenbohm or had never had a telephone conversation with him. Amazingly, they had already given statements confirming this fact to the Secret Service investigators. Most had even identified persons, other than Schoenbohm, whom had called them from the Virgin Islands during the timeframe in question (1987). Interestingly, the court refused to allow Schoenbohm to verify the numbers before trial. The court incredibly claimed that it needed to protect the potential witnesses from pre-trial disclosure!

After trial, armed with affidavits from the persons alleged to have received Herb's "illegal" calls, Herb moved for a Judgement of Acquittal not withstanding the jury verdict. The court granted the motion on all counts but one (Possession or Use of a Counterfeit Access Device). The court maintained that the Miller tape proved that something was amiss and the jury could correctly deduce from this that the law had been broken. This court decision differs from the previous decision in that the device is similar to, but not exactly the same as, a valid device and does not require the threshold of over $1000 in use. (The irony in this entire matter is that Herb freely admitted to using the service briefly in 1987. He was a bona fide customer and the total actual use amounted to $106. CALLS finally was required by the court to produce Herb's check for $104 that they had received in1987. They admitted that they did not cash the check but, instead, held it as aid in the plot to entrap KV4FZ.)

When the court vacated the judgement requiring two months prison time, Herb's detractors were enraged and, once again, began the political letter writing campaign. Now the claim was that Herb had used amateur radio in the commission of a crime and should be taken off the air. They sent the highly doctored Miller Tapes to the FCC in an attempt to prove their incredible theory. Their letters were full of outrage over the fact that Herb had once more cheated Madam Guillotine and he still on the air making waves. Some were furious due to the fact that they had given financial support to

certain political candidates and nothing permanent had been done to rid the airwaves of this "pest", KV4FZ. (Ruth Hoffman even conveyed gifts to officials at the FCC in attempt to bribe public servants. One such official, William Cross, was investigated for leaking internal information to Ruth Hoffman in the KV4FZ matter. Hoffman then disseminated this information for use in the hate campaign against Herb.)

KV4FZ then was subsequently forced to embark upon a long and costly struggle for justice. He has had to fight the refusal to renew his amateur license by demanding a hearing before the FCC. (The refusal to renew is rarely used as a procedure and has been given the title: "The FCC Death Penalty" because the entire burden of proof is placed upon the licensee.)

At the first FCC hearing, Administrative Law Judge Luton ruled against KV4FZ. However, upon higher review, the FCC General Counsel refused to accept Judge Luton's findings and remanded the matter for reconsideration. The principle issue is whether or not KV4FZ had used amateur radio in the furtherance of the commission of a crime. This time the ALJ ruled that there was nothing in the evidence (The Miller Tape) that was illegal in any way. The concluded that Schoenbohm actually was dialing ordinary and valid Virgin Islands telephone numbers. He was not entering illicit access codes to make long distance calls.

The ALJ did, however, agree with the Wireless Telecommunications Bureau (WTB) assertion that, by giving out the telephone number, in 1994, of Herb's future boss, Congressman Frazer (whom, incidentally ran Delugo out of office), Herb was violating a solicitation restriction of ex-parte rules. This was despite the fact that WTB had conceded that no actual ex-parte violation had taken place. The ALJ ruled that, by attempting to explain his conviction as a De Minimus violation rather than a crime of major impact, he was trying to mislead the trial of fact. (In administrative law, the assertion of innocence is a crime even if the accused is actually innocent! It is akin to Hobson's Choice or the Salem witch trials whereupon, if the tied woman is thrown into the pond, and she does not drown, then she must surely be a witch and, thus, must be burned to death.

Herb had been fighting the remaining count through the Federal Courts and has even succeeded in convincing the courts to severely criticize the DOJ for their handling of the case. Nevertheless, they refused to reverse the remaining conviction because of the nearly impossible to define "standard of harmless error". The appellate court ruled that the motion for Judgement of Acquittal had been filed too late even though the trial judge had granted an extension based on the emergence of irrefutable proof that the prosecution had used false evidence. As a result they were barred from considering the sufficiency of evidence matter at this late date under the rigorous standards of Habeas Corpus review. However, a positive revelation in the latest FCC decision is that it clearly vindicates Herb on the original charge of using ham radio in the commission of a crime. It also conclusively proves that his detractors engaged in perjury before a Federal Grand Jury and Petit Jury trial.

Many on the local scene recognized the truth. The Trial Judge, The Honorable Ann Thompson, wrote a letter of support and praise on Herb's behalf. The Governor of the Virgin Islands did not simply restore Herb's government career. He elevated Herb to a position of higher authority with more responsibility to the island and a significantly higher salary. He was also employed, as a part-time field representative, on the congressional staff of newly elected Congressman Frazer.

(The FCC WTB attorneys characterized these as "political jobs", unworthy of consideration as a mitigating factor in Herb's "rehabilitation"!)

Although Herb had a Congressional Floor Pass, granting him direct access to the ears of the politicians, there is no evidence that he ever abused his position to lobby House members against the FCC. This is in spite of the fact that the bureaucrats inside the FCC are very much afraid that Herb might just whisper in the ear of someone who controls their finances. Because of this, Herb is not allowed to take his case to the very people who would be horrified to learn the truth about how he has been treated. These are the people who could finally put a stop to this travesty of justice. Yet, Herb's detractors are on the phone daily, pushing those in power to get him off the air, one way or another. When will the voice of reason and justice be heard?

Some of us do not like the odds and are willing to help end this fiasco. Herb's legal bills are soaring but he continues the fight. His attorney, Larry Colby (a licensed ham), has stated that when this issue gets into the proper arena, Herb will be totally vindicated. But this can only happen if Herb is allowed to fight on and get his case into the proper arena. Right now, it is still in a forum where all the rules are stacked against the licensee. When the matter gets out of the FCC, and into the D.C. Circuit Court, then the playing field is closer to being balanced. There, the Feds don't have the automatic upper hand that allows them to do what their political puppet-masters demand.

A small donation of $25, $50 or $100 will go a long way in continuing the fight for justice. There is an underlying principle that must be preserved. It is not keeping Herb on the air that drives his supporters. It is the realization that if they can deprive KV4FZ of justice then they can deprive any of us of justice. Today they are persecuting KV4FZ. Tomorrow it could be you. You could be railroaded just because somebody doesn't agree with your position on the nets, phone patching, or apple pie.

Herb is working vigorously to get the funds together for his appeal. If you can help in anyway, please contact Herb at herbs@islands.vi or mail your contribution to:

Schoenbohm Defense Fund

There's "half a hog's ass" Dick jumping to conclusions about No Code Techs again. Who'se going to know if you can only hear one side of the QSO? If I hear an Extra sending code, and I don't hear another station reply, am I supposed to jump up and down and suspect him (or her) of making an illegal broadcast?

Dick, for the sake of brevity, can I use an old Morse Man's trick and abbreviate "half a hog's ass" down to just "half-assed?"

Thanks, Brian

Jeff, would you stop that? I already explained that IMO it means
a "self-policing service" but you deleted it. Why?

> -- that you're to
> police others rather than just yourself. But as you've pointed out,

Nope, I think the FCC has weaved themselves a contradiction. The ARS
is a "self-policing service". Individual hams may or may not be self-
policing as witnessed by 3950. I think the FCC wants peer pressure
to work better than it seems to.

How does he know how to send it on one hand, and doesn't know how to copy it on the other? By the way, do you copy your own transmissions on the air?

Give it up Brakob. You're dead in the water and sinking
fast. Toss out your EPIRB and hope like hell it works, and
all the others don't ignore it because of the 75% false
alarm rate.
This stretch goes even farther than anything the
limpnoodled lamebrained Genius from Southern Texas has
tried.

> The station operated by K0HB and
> signing that call got a citation from the FCC for sending
> Morse at a speed in excess of the regulations.

Gee, thats novel. Jeff said NOTHING about a 'station'.
Stations in the Amateur Radio Service don't receive NAL's.
Operators receive NAL's. Which is exactly what Jeff said.
"No CW OPERATOR has received a NAL". As the responsible
licensee, you were the recipient. But a CW operator, you
were NOT. Strike three. Glub, glub, glub.

> Therefor
> (contrary to Jeff Hermans' repetitive chant) stations which were

> But one way transmissions are illegal!

Some are, some aren't. A NCT may or may not know Morse code; he or she has not been tested on it. A NCT could send and receive Morse code (on VHF) using keyboard and a Morse code reader -- perfectly legal. A NCT could use a keyboard to send Morse code and be in contact with a ham who is responding using another mode. Why, an NCT could even operate a Morse-code bulletin transmitter on VHF.

On the air, just for sending practice, with no intended
recipient, and no intent to communicate--that is precisely
correct. They are not legal.

Anyone who needs to do so can look it up. Sure, there are a
few specifically allowed one way transmissions in the regs.
Sending oneself code practice on the air is not one of them.

Dick

Poor debating tactic. Rather than address the issue you
split hairs. I got a citation for a Morse related infraction.
That's the crux of the discussion, and you are trying to save
some face by retreating to picking fly shit out of the pepper
pot.

Jeffrey figured out his statement was unsupported with facts,
but you continue to grasp at idiomatic straws. Bye.

Nobody other than you even contemplates that someone would be sending to themselves, Dick. Sending code practice to others is legal. One need not have a specific "intended recipient" in mind. And one need not have passed a code test to be legally entitled to send it.

Why would I have wasted 34 dollars on the 2 meter CB review of the month magazine generated by the Antiquated Retirees Radio League if I wasn't a licensee ?

I thought for a moment they might have made their "official journal" more well-rounded and I was sadly mistaken.

Contest results, ads, 2 meter CB reviews and ads. And did I mention ads ?

And don't shoot back all mags are half ads. That's a lie. I get computer magazines that are at most a fifth.

QST wouldn't be so "expensive" to mail, like K1ZZ whines at least twice a year, if it wasn't for 50 pages of ink laden ADS.

OK, Carroll, I looked it up:

Just like W1AW sends HF Morse one-way practice, any licensee,
included a non-code-tested Technician licensee can do the same
thing on VHF/UHF.

" (b) In addition to one-way transmissions specifically
authorized elsewhere in this Part, an amateur station
may transmit the following types of one-way communications:
.
.
.
.
(5) Transmissions necessary to assisting persons learning,
or improving proficiency in, the international Morse
code;"

2566. Hi Hi Rate of Attrition (ARRL)

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-11 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <80ethj$2ft$1@nnrp1.deja.com>
Source record: 127789

Well, it seems ARRL's long-time employee K1CE and not so long-timer KB1HY have opted to put their livelihoods ahead of their hobby and jump ship.

Smart.

However, K1CE can claim he's headed north to "semi-retirement", but do you really think he doesn't have some under the table cottage industry lined up, now that he has his Social Security quarters all set ? Perhaps a nice column or two in QST ?

And did you notice the job postings at ARRL just linger and linger ? If they had any more requirements for those "high teen" positions, I would have thought they would have been seeking a Deputy Undersecretary of State.

Actually when I first glanced at it I thought it said that was the age requirement.

Besides, if such a candidate already existed at ARRL, he/she would be working there already.

It's so sad that this organization has been trapped in 70's by its Korean War era officers and Brady Bunch era employees.

K2IVX >>

<<If anyone out there believes that this Herbie loving Jewish nincompoop is a disgrace to his people and to me it's unarguable, send me a letter or e-mail which I will forward to his pious Lubavitcher Rabbi to prove what a betraying snivelling rat holds some kind of office at the shul. Here we have a felow who, years ago, demanded proof of KV4FZ's anti-Semitism. I sent him a lengthy tape of many of Herbie's Hitlerlite speeches to his idiotic jackbooters like KA4MUJ, WA2EXQ, KB4MXL,WD4GDP, N4IIA, W2OOQ et al. I demonstrated beyond a shadow of a doubt how worthless was KV4FZ and Schaier, being the proud Jew he pretends to be, turns around and kisses him while bad mouthing a guy who had been fighting anti-Semitism on ham radio for years, WB2OTK and then adds insult to injury by bad mouthing AF2Y who liked and still likes Rich and who supports him every step of the way. Schaier hates Rich because OTK told him off but good. He classified him a "Cattle Car Lenny," meaning a Jewish s.o.b who, in order to save his own life which finally also ended in W.W.II., loaded and unloaded innocent persons headed for extermination. As I said; I'd sooner have a cup of coffee with KV4FZ than K2IVX because Schoenbohm has always been a stauch foe but NOT A GODDAMNED SNEAK. Herbie's not been two faced in the least to me, ever. He doesn't like me and the feeling is mutual and we make no bones about it. But K2IVX is in a class by himself and as far as I'm concerned, I don't know how the Schoenbohm crowd tolerates him. Lastly, K2IVX thinks he can have me taken off the air thanks to stupid doctored tapes. That'll be the day. Lenny, you want to have it out in a public forum? We can't do it on ham radio because of obvious reasons but this Internet is wide open and anytime you want to pit your "brainpower" against mine in something other than your chosen field

of work, give it a whirl. I'll mow you down like the crabgrass you are.

This is the statement from Jeff that we are objecting to - not
any other statement. Hans was the control *operator* for that
repeater and he was cited for a Morse code infraction.

Yep, the ARRL does it often.

Dick admitted he was cited for a rule violation while operating Morse.
He won't admit that he admitted it - he says he didn't admit it - he
just stated it for a fact. :-)

But wait a minute, Hans. Did the FCC think they were citing a CW
operator? That would be even funnier! :-)

Not even on the CW-only frequencies, Dick?

Someone needs to inform the ARRL if no one is listening
to their CW practice sessions, according to DICK, they
are "not legal".

Wonder how the ARRL avoids breaking "DICK's Law" by proving someone
is listening to each and every CW practice session during each and
every second that it is occurring? Jon, you better notify the ARRL
that they might be in violation of "DICK's Law" if no one happens
to be listening at any one particular time.

Heard about 1/2 hr broadcast on channel 31
here in the PDX area (Oregon) two nights ago.
Had spoofs of President Clinton and old Saturday
Night live skits. Signal was ok, but occasional
skip stepped on the signal.

The tred in growing! I can see why some pirates
are turning to the CB band for their broadcasts. With
the increased enforcement of the FCC, it makes more
sense to move to a band that is not full of commercial
stations whining about the micro-power pirates.

Wanna bet? On May 1st, 1999, Riley Hollingsworth was on 3950 khz, and W9ART cussed him out right to his face and dared Riley to do something about it! Riley did absolutely nothing, and W9ART is still on the air.

Let us hope that AF2Y will finally get the "root canal" that he so justly deserves, but don't get overly optimistic.

But, in the meantime, have another brew.

I recently also signed up with http://www.ifreedom.com/ which does not
require IE 4+ and pops up an ad window you must click on every 20
minutes but no banner ad like NetZero. Ifreedom.com gives you email and
web page and 20 megs online storage, but it seems to be a bit slower
than NetZero and the ads
open up in IE 3.02 for some reason instead of my default Netscape
browser (Corel WordPerfect suite 8 version).

Here are eight more I got from
http://www.freeyellow.com/members7/theypayu/freenets.htm

FREE INTERNET ISPS:
http://microav.com/ IE 4.0+

http://go.freei.net/www/ IE 5 Win95, Win98 Power Mac OS 8.0-8.5 stuffit
5.1.3+

http://www.dotnow.com/ Win95-98, IE 4.0+ if win95A windowAD

http://www.netzero.com/ totally free, win95-98, 16 megs, windowADs

http://www.freewwwebusa.com/ installs special netscape version,
Win95-98, MAC 32megs. Asks for credit card number for id?!! limited to
100 hours a month

http://www.address.com/ NO INFO, has adwindow PORTAL

http://www.worldspy.com/ IE 4.0+, small fonts, 14.4kbs, 16megs,Win95-98

http://www.ifreedom.com/ 32megs, Win95-98, 20megHD, 28.8, SVGA, mouse

We can thank Germany for making a valiant attempt to destroy the most evil political entity ever to exist on the face of the earth ... mainly Jewish communism.

Instead of helping the Nazis destroy this
evil communism, we stopped them, thus
plunging half of Europe and much of Asia into decades of a communist tyranny that
still exists to a lesser extent today.

Yes, thank you Germany for your valiant effort, and we APOLIGIZE to you for not recognizing your wisdom and foresight in what you were trying to accomplish. We deeply regret our stupid mistake, which we are still paying for today with socialists, communists, and Zionists running our government and trying to meld us into a one-world socialist tyranny.

Pop quiz next week! A smart guy like you ought to be able to have this easily memorized by then.

THE WHINING CRANK'S CODE

- I am entitled to what I want when I want it.
- My time is important and I should not be inconvenienced by others.
- I have a right to be rude when I think other people are behaving stupidly.
- I am entitled to special priveliges because I am who I am.
- I'm a taxpayer; I own this part of the road.
- I not only have the right to pursue happiness, I *deserve* to be happy.
-- I'm too busy to mince around with false politeness.
- So what if I'm being rude? No one knows who I am, so what difference does it make?
- My problems take precedence over everyone else's..
- My opinions and views are more valid than anyone else's.

--C. Leslie Charles

KK7HO lied:

> Hell, anyone with two brains cells can tell by listening to the "So Called" net
> that they are an International Embarassment to the hobby.

No Tim, an International Embarassment is your death threats and continual
harassment of other amateur radio operators. Anyone may hear you in
action as recently a few weeks ago, at the URLs listed below.

Please stop the jamming KK7HO.

Latest example of KK7HO's
criminal jamming operation:
http://members.xoom.com/_XOOM/sixisone/k5blb_kk7ho_obscenejamming_19990509_0254cdt.wav

Volz's "mean spirited badgering" of Harvey:
http://members.xoom.com/_XOOM/sixisone/volz.wav

KK7HO shopping for the murder of W1WCR at: http://members.xoom.com/frg9600/500.wav

Further info on KK7HO is at: http://www.angelfire.com/ky/libertynet/KK7HO.html
http://x34.deja.com/getdoc.xp?AN=325442830&CONTEXT=936559274.177930328&hitnum=50

KK7HO is an embarassment to the amateur radio service.
To complain about Volz's criminal actions on 3.950, email Riley Hollingsworth, at:
rholling@fcc.gov

To complain about Volz's internet newsgroup harrassment email: abuse@aol.com

2597. Re: 3950 Liberty Net? --->> More like Idiot net!

KK7HO lies again:

> I doubt that's the case Tim, unless of course your part of the "So called"
> liberty net.

Tim Volz displays another conspiracy delusion here.

> Don't get me wrong, i don't condone the jamming but can certainly understand
> the outrage being directed at the "So called" net.

I almost choked at your nauseating hyprocracy, containedin this spin.

You are one of the most militant, persistant jammers on HF
today. You have threatened the lives of other hams. You
have joked about urinating on the corpses of other amateur
radio operators. These and other recordings of your crimes
can be heard below.

What kind of fantasy world do you live in Tim? This pretty well
confirms that you have a serious mental problem.

You should consider getting an psychiatric evaluation for your
delusions. Your obviously living in denial of your own statements.

Please get professional help!

Just as KK7HO (AKA Tim Volz) has become known as the
the most militant jammer on HF; he has established a reputation
of the "Sultan of Slander", here on the newsgroups. Volz uses
one of 3 tactics here to attack other amateurs' posts:

(1) "Role Reversal" tactic. Volz attempts to confuse the issue,
by accusing the victims of his crimes with his own tactics.

(2) Volz diverts the issue by shifting the topic to the identity
of the poster, or other irrelevant 'off topic' subject. He does
this when he can't lie or the evidence is overwhelming.

(3) When cornered with evidence, Volz just calls it "Lies",
and refuses to address the specific facts.

An example of number 3, is his recent claim of his daughter
mass-emailing the Liberty Net members with a pornographic
message. He refuses to address this issue, but instead calls it
"Lies". Even though it was he that stated this on the air two
weeks ago.

This group is rife with examples of #2. Just read any thread
that contains KK7HO in the title. You'll see Volz babbling
about screen names as a diversion from the facts of the post.

And he will undoubtedly use tactic (1) to address this post.
Rave on Tim. But please get some professional help. Your
family will appreciate it!

Please stop the jamming KK7HO.

Not as a ham you weren't, There is no regulation limiting
sending speeds in amateur radio except for repeater ID's.
There IS such a regulation in commercial radio regarding
emergency comm.

So what you've done is poke a hole in YOUR credibility. You
were''t sending CW at 24WPM. Your repeater IDer was. That's
the ONLY regulation relating to CW speed within the ARS. It
has to do with an adjustment, not an opeator sending code.

I love Morse code

Give it up Carroll. The station operated by K0HB and
signing that call got a citation from the FCC for sending
Morse at a speed in excess of the regulations. Therefor
(contrary to Jeff Hermans' repetitive chant) stations which were
operating Morse have been cited for violations.

Therefor Jeffreys' pat little assertion is proven false.

Except..... except..... your uncle would have been your aunt
except he had testicles.

My station (a repeater in this case) was sending Morse at 24WPM
which is 4WPM in excess of the speed limit. Therefor I *did*
(as an Amateur Radio Licensee) get a citation from the FCC for
sending Morse code too fast.

Come back, and bring Jeffrey with you, when you guys want to play
some more.

Message-id: <4653-3829329D-1@storefull-245.iap.bryant.webtv.net>

Doc, surely you have more intellect than to stereotype all "Shoenbohm cronies." Had it occurred to you that some of us discriminate, legitimately occupying different ground on different issues?

There is no question that Herb Schoenbohm misbehaved, also that the government produced key evidence against him in his criminal trial that was fabricated.

The evidence issue shouldn't be taken lightly. As life isn't wholly black or white, good or bad, there are bonafide shades of grey which men of good conscience champion. If the ACLU, for example, had standing in defending neo-Nazis' right to march through Skokie years ago, those of us who care about government misuse of evidence have every right and reason to support Schoenbohm in that regard and to that extent.

Notwithstanding my raw deal with him on his corroded amplifier, your nemesis needn't be mine!! Seems to me, Doc, that you are driven by malice, a no-no in our society!!!

Bob Sherin, W4ASX

You are a disgrace to me, my faith, my people, their great tradition. There is nothing lowlier in this world than someone who turns his back on his own which you have done. During W.W.II the French Maquis(resistance) had a solution for people like you. BANG! As far as I'm concerned you're a bigger menace to me and my people than Schoenbohm ever was or will be because he's a visible enemy while you're a goddamned sneak. Your support of that two bit crook and major anti-Semite was and is the lousiest thing I could ever imagine any Jewish ham radio operator doing. You used to talk about your being "brain mapped." It figures. You're lacking synapses, common sense and loyalty. You don't need anti-depressants my good man; what you need is a good kick in your behind. Riley doesn't want any major confrontations on 14.313 and I respect his wishes but the Internet is wide open to let off steam and you're getting an eyefull and you deserve it. God, you disgust me!

Not to sweat it, Jeff. Hans had his Vibroplex cranked up
ID'ing his repeater as two meter repeater CW operator when
he stepped across the Morsen-Dixon speed line and got
whacked....

You did say "No CW operator has had a NAL" didn't you? Seems
Cecil is not the only $hit-picker on the channel.

>It's supposed to be "difficult". What's easy is not valued. The concept

An interesting assertion. The system might make sense if it were true,
but the ease of something is not the measure of value to many people,
the normal measure of value is the ratio of effort to reward.

Unlike you I guess I value something useful that comes easily, like
say my license to drive and my Tech license, both very usefull but
easily obtained. Anyone that looks at the current system whereby less
and less reward is paid for by harder and harder work would wonder
that it has not completely broken down by now

2630. KE9RY-STOP YOUR SLOBBERING!

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-11 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991111063203.05566.00000002@ng-cq1.aol.com>
Source record: 127868

Last Sunday KC3AU was on .313 talking about the Hamvention and meeting with K4ZDH, Riley Hollingsworth. John talked straight from the shoulder and imparted interesting information to all. Someone here called him a brown noser which was uncalled for about which I took issue
KE9RY is something else. First off he's gone off his trolley in a big way. Tom now considers friends ,enemies and vice versa. His statements about my dishonoring the memory of his late daughter is nothing but slander taught to him by "Getback" Polly, Lenny,Herbie and other assorted nuts and bolts. I shall not continue on that subject because it's so ridiculous, so way off base that it merits nothing more than shock from me.
Yesterday I was on 14.313 demonstrating the effectiveness of my Cloudwarmer wire beam by speaking to Belgium, Austria, Idaho, Tennessee and elsewhere while the listeners-on weren't able to work around their own corners. About twenty minutes after finishing while listening on my Kenwood R1000 with a hank of wire trailing out of the back, Riley came on to say hello. If you didn't hear KE9RY's reaaction you missed a beaut.
"How are you Mr. Hollingsworth? Can I get you a cup of tea Mr. Hollingsworth? Thank you for your QSL, Mr. Hollingsworth. Shoes need shining, Mr.Hollingsworth?" and so on and so forth. You want to talk about slobbering patronizing-WOW. He should be renamed "Tommy Ooze." I think it was in '75 or '76 when upon seeing the late great Barry Goldwater at Dayton, I walked up to him, shook his hand and said, "It's a pleasure meeting you Senator Goldwater. I also want to say I voted for you for President in 1964." He looked at me and replied, "I'm glad somebody did and my name is Barry."
K4ZDH is of course a high profile ham and should be respected but this "Mr. Hollingsworth this and Mr.Hollingsworth that" is nauseating. Riley puts on his trousers as we all do-one leg at a time and although his signal was weak here in North Jersey, I had a feeling he wanted to say to Tom, "Cut the you know what."
Perhaps if recipients of warning letters such as Dumboears Polly Getback, or Queenie Wetback or Badblood noback or whomever decided to slobber all over the man on the air, it would be expected but Tom Steckbauer, a nice guy turned psycopath? What? As KE9RY would say, "Anyways....." it was good seeing that Riley is indeed playing an active role and I welcome him to my frequency which has been taken over by the world. And moreoever I noticed that a certain jamming North Jersey palooka whom I believe is in Andover was not on playing his noise makers and music or someone else much closer to me, behaved quite nicely during Riley's visit. Wise up jerk, he's got a bead on you.

At at the National Memorial Cemetary of the Pacific ("The Arlington of
the Pacific") we'll have our annual Massing of the Colors which includes
an Army 21-cannon salute and an Air Force Missing-Man flyover. I hope
you all will also take time out at "... the 11th hour of the 11th day
of the 11th month..." to salute and give thanks to those who've kept
us and continue to keep us safe. We owe them so much.

Semper Paratus,
Jeff KH6O
U.S. Coast Guar >>

<<Congrats Jeff. It was the war to end all wars. Hah. The prelude to W.W.II
began 11/11/11. In a way all those Yanks, Brits, French and the rest of the
Allies who fought the Central Powers simply died to allow the world to give up
another 50 million beginning just 21 years later. In 1918, Germany should have
never again be allowed to make war on anyone. The head of the snake was not
chopped off and because of our great Depression and the rise of the Nazis..the
rest is awful history. When one thinks of all the lives lost because of that
damn Germany, beginning with the Franco-Prussian War in 1870 extending to May
7,1945, one can only shake his head in disgust. Do you realize that because of
that Kaiser, with one event causing the next,we had been at war, hot or cold
from July 1914 until the Soviet Union collpased in 1989-1990? Thanks Germany
for adding so much goodness and peace to mankind.

Jeffrey, we've gone around on this one a few times before...

MCW IS ALLOWED ON HF! Hint, read the definition of phone in Part 97 and then realize that in that context you'll see there are opportunities to use MCW on HF.

Conclusion, as usual, YOU'RE trolling.

>
> So YOUR ludicrous interpretation that no-code techs work CW
>is more accurate then?

I never said that. I merely responded to your statement that one-way transmissions are illegal by pointing out that it was incorrect. And when you then backtracked to confine your statement to NCTs sending CW, I pointed out that there are one-way CW transmissions that a NCT is authorized to send, for example code practice. At no time did I discuss whether such practices are in use, much less widespread.

In short, I objected to your misstatements about what's legal and made no comment about what NCTs are actually doing on the air.

If it comes to that, however, I bet there are more NCTs transmitting code practice via the local repeater than there are transmitting signals to nobody for the purpose of practicing sending.

> With all the hatred of Morse code
>they spew here? Since when?

Dick, the spewers of hatred on this NG of both the no-code and pro-code persuasions are not, thank God, typical of either NCTs or code-tested hams. They aren't even typical of opponents or supporters of Morse code testing.

IncorrectCW can certainly be sent and received without any
personal knowledge of or skill at the mode. even I have manged to use
in style that is like RTTY in use.

Addditonaly even if your gaol is accepted and the use of computers is
overlooked then the mere fact that one is limited to nonCW mode does
not show that siad ham is limited in his/her ability to meet that
goal, since his station may conpensate for the lack with such things
as higher power better anttenas DSP etc.

Acepting your notion incdiently also suggests that QRP only
operation is wrong becuase it would tend to confict with that goal.

The final point is that we are not required to allow YOU to determeine
OUR goals, that preledge belongs to us

Thank you very much for twisting my arm, so that I may have another
brew, cold and with a frosty mug. You are 100% correct about the
situation with K5BLB, and most of us heard the exact exchange that you
reference. But take this to the bank, AF2Y is on the plank and the seas
are getting rough. He has been warned repeatedly and is causing many

problems. The warnings from Hollingsworth are ignored and I will bet that the ole boy is getting pretty tired of it all. He warned ole Charlie many times and Charlie has lied about his involvement in jamming, but the truth is coming out. It was a classic the other day when Charlie made a fool of himself and Hollingsworth came on the freq. Take notice of his all of a sudden attitude change and sit back and laugh.

Dick trotts out the big lie again. It is the CW test that
is "hated", it is not the use of morse code at all.
Additionally, it appears that the people most vocal
against the morse code test "here" are all coded
hams...NOT nocode techs.

OK,

My ham shack is on the second floor of my house.
I really do not have a good earth ground, and a friend suggested that
I place a length of 4 aught solid copper from a ground stake, up to my
second floor
window, and then to my ham rig. I then started thinking about the skin
effect
and started wondering if I should use the solid copper wire or a
large gage wire braid? Any opinions on this?

Thanks

Chip

Braid will generally have a larger surface area than solid wire
therefore it would be better from an RF standpoint, due to the skin
effect. On the other hand, the length from ground to the second floor
is great enough that it's probably not going to be a reliable RF
ground anyway. If all you're providing is lightning protection then
it won't matter much if you use braid or wire.

I had the same discussion with my electrician and we decided to use #4 stranded. The ground to the "box" goes back to the "street side" of the water meter.

When the ground was "fixed" I suddenly did not have triggering problems with my Tektronix 545A! (It was a problem on one of the outlets.)

Sometimes the least expensive fixes just work wonders. (in photography, investment in a decent tripod is better than investment in an expensive lens.)

Net groupies are losers too, and often nets are crap, I did not comment
on that. If you "earn" DXCC on one frequency, you're a dim wit. However,
they are just as viable a tool for occasional use as a Packet Cloister.
How are the two different ? In a cluster do you not hang out on 144.xx
and wait for the NCS to send you the frequency and call ? Does the fact
that you then get on the same frequency in a disorderly, over powered
(often illegal) rucous make you a man or your QSO any more real than if
conducted with the very same station on a net ?

Honk-honk back at you.

I feel generous today. 28.500 to 28.525.

But you knew that already having 300 confirmed, didn't you ?

Actually, Jon, Dick is right in some cases, although I offered a number of cases where one could transmit Morse CW and be decoding it with a reader, talking to a voice or data station, etc. The point, though, is that there are many ways to make legal one way transmissions with Morse code, and they would be legal above 50 MHz for an NCT. By my read of the rules that permit one-way transmissions for for the purpose of "assisting persons in learning, or improving efficiency in, the international Morse code," doing so to assist one's self in learning Morse code would not necessarily be illegal, either.

What I am wondering, though, is why Dick would want to prohibit this hypothetical NCT from operating Morse code at all? It seems that getting someone on the air and using it is a pretty good way to get someone on the air and using it. Is that not the intent of Dick's position wrt Morse code testing?

What is this - starting a new message with OK - are you related to Shania Twain ?

Use broad flat copper strip, as wide as you can find, but don't expect it to be like a true ground. If you are after a fake ground for the RF, you can make several counterpoises, one for each band, a quarter wavelength long, trailed where convenient and all connected together.

Really! I doubt the FCC would accept that transmitting a signal is
"necessary" for that purpose, which is what the regulation says.

You've drawn an incorrect conclusion. I want(ed) no such thing. The reference was to the fairly ludicrous idea that someone (anyone) who had absolutely no training nor experience in radiotelegraph operation would even attempt such a thing on the air. And the implications of such activity if they should.

It seems that
> getting someone on the air and using it is a pretty good way to get
> someone on the air and using it.

Sure, once some small amount of effort is offered toward finding out what its all about and how to actually go about it. From the attitude of most anticode posters here that's about the least likely occurance.

Wrong, wrong, wrong, Dick. My neices and nephews do it
all the time. I don't know what frequency they use. But
if 5-10 year olds can do it on CB, why cannot adults
do it on ham frequencies? What would be wrong with
a couple of NCTs using charts to learn Morse code
by practicing on the only CW-only bands in ham radio?

I'm sorry, but I don't see what your point is really about. If it's the tired old contesting vs anti-contesting thread, then I'm sure everybody on this newsgroup has overdosed on this topic. As far as the QST editorial is concerned, as I understand it, using just the "last two" for identification is an infringement of the license, albeit a minor one. In that respect, Bernie is probably correct.

Regards,
Darrell (NR3Y)

ps. If all you want to do is slag-off W3UR, then perhaps you'd have the courage to sign your posts with a callsign - it would help to add credibility to your point of view.

:>Now clowntester Good Buddy W3UR has raised the standard of bitching to
:>Hollingsworthless about the "last two" phenomenon. Could it be that
:>these clowntesters, who think manhood (not to mention succes in life) is
:>determined by the size of their towers, have decided this is the best
:>way to shut down the DX nets they find so annoying ?
:>

I see you must have read the article in last month's QST about
this subject. And Mr Hollingsworth shot this crapolla down when
he made it known that the practice of using last two's, such as
was described by W3UR, is not illegal as long as the station is
not being deceptive about their identity. (I take this to mean
that once Mr Last Two is recognized and given the opportunity,
he will make his full call know for those that are there & care)

Gee whiz, I think if I had written that article in QST and then got
a response like that from the Big Man himself???

Now I don't use DX nets anymore. But that was how I got started
in DXing in the first place. After I moved on to other methods it
was perfectly OK with me that they keep doing what they liked.
I don't work clowntests anymore but it is perfectly OK with me
that they keep doing what they like.

Something I thought was kinda funny just the other day on one
of the DX mailing "LISTS". One fella made a comment about
how Hams were losing interest in the so called fine art of DXing.
As example he stated how a large DX club now had few members
and some of those were not DXers and such. And in counter point,
another fella mentioned how he didn't think that interest in DXing
was falling off at all. He mentioned that there were more people
out there working & QSLing DX now more than ever. He also
mentioned how more groups were going to more places just to
pass out that contact and so on.

Then he went on to mention how he WOULD go along with the
idea that interest in clubs & organizations with a CERTAIN MIND
SET is most certainly on the down swing. He gave an example of
how a local club in his area basically went bust after an interior
faction managed to seize control. Yet, former members re-formed
in another place and were flourishing bigger and better than ever.

I think the whole thing has to do with consideration, cooperation, and tolerance. I call this the BIG 3 of Ham Radio. Without it, ALL of us know just how well off Ham Radio will really be. Maybe one day Bernie will consider the Big 3 a worthy topic for his column.

I feel compelled to respond to this insult of those who served, even though I was never in the military. But the greatest man I've ever known was. My father served in WWII, in of all things the glider infantry. He was an old man at the time, all of 20 when he was drafted. Towed aloft in a plywood box that was about as aerodynamic as a milk crate - but he was scared as hell to jump out of a plane, so this was the only other choice. He served in virtually every major campaign in the European theatre - from North Africa to Sicily to behind the lines at Normandy. He talks of marching up to his armpits in snow at the Bulge, and of to liberating a concentration camp where the horrors of the living matched those of the dead. To marching into Berlin, racing the Russians, seeing the traincars of stolen toilets heading East to the Soviet Union :-). Yes, his time in the army WAS the greatest thing in his life. And yes, in his old age he spends many hours reminiscing on those years, for the country asked much of its youth then. Asking a poor farm kid raised in the depression to become a champion of liberty was beyond anyones expectations, yet an entire generation rose to the challenge. No, my father didn't come back and become a senator or an astronaut. He came back to work second shift in the mill and raise a family. No he wasn't a Rhodes Scholar, he didn't have your great "agenda". He was a graduate of the 8th grade and the pitch fork. Can he forget the time he served? Absolutely not. Should we forget the men and women who have and continue to serve this country? Hell no. We remember and we give thanks.

You mean so his call can be added to the Ol "Hate List" don't you?
That's what happens here if you are not familiar with the practice
already. It really does amaze me at what some Hams will do if
you have a different opinion and voice it. Now I'm not talking
about the usual "trolling" or ego fights that go on here such
as the 3950, 14313, and other such stuff. I'm talking about when
one Ham has a difference of opinion from another and speaks it.
I have seen relatively cool-headed people just about go to war
over "He said something different than mine and I think it made
me look bad. I'll show HIM!!!"

Credibility goes right out the window when this happens and I've
seen some of the most credible get sucked into it. Cool-headed
credible responses arn't worth a darn when you are engaged in
battle over "He said, They said, She said". Its still the same old
thing.

State your opinion, support it with your facts, and then let the
others make up their minds. Believe it or not, MOST of the level-
headed people out there will make the right choice. But then again,
that will make some Hams pretty ticked off when this happens.
That's when they decide to use some sort of "tactic" hoping that
it will silence the other opinion. The idea being, "If no one says
different, and the others are made to look bad enough, THEN I'M
RIGHT"

Good thing we all know better,

2682. how to use psk31 xmit interface w/ft920?

Newsgroup: rec.radio.amateur.misc

I'm trying to setup my pc soundcard(sblive) with the psk31 xmit
interface
described in the May 99 issue of QST. Was wondering if anyone had
built this simple circuit and how they connected it to the ft920 with
the
simplest / most straightforward conncection.

Any response would be appreciated.

Hi all,

I am looking for a Motorola Minitor II pager, UHF band with carrier squelch to be used to monitor one or two channels. I don't need tones, etc. as I'll only use it to monitor and not receive pages. Please reply to pentiumchris@rocketmail.com

Thanks

Chris

>No more ARRL and QST for me..!!! The ARRL is turning into just a
>Publishing House...and QST is mainly Advertising...!!!

Well of course the League is a publishing house. On January 29, 1915, the Connecticut Secretary of State recorded the incorporation of the League under the following three articles:

"Article 1. The name of said corporation shall be The American Radio Relay League Incorporated.
"Article 2. The purposes for which said corporation is formed are the following to wit: The promotion of amateur radio, the organization of amateur radio stations, the promotion and regulation of amateur radio inter-communication, and the relaying of messages from station to station, and the printing and publishing of documents, books and pamphlets necessary to any of the above purposes.
"Article 3. The said corporation is located in the town of Hartford and the State of Connecticut."

Lucky for us that second article includes printing and publishing:
We participate in a self-taught technical hobby/service; not a day should go by without us gaining new knowledge WRT to electronics. The only publications I have always been able to turn to when questions arose which needed immediate answers were the League's pubs.

For some 85 years the ARRL has produced a handbook written so that even a novice can learn and understand from it. The government thought so highly of the Handbook that it was used to train military communicators during WWII. For the longest period, the Handbook was the greatest selling technical book ever published, in and out of ham radio.

During the 50s when SSB was finding its way into ham radio, there was no pub one could turn to to learn about this new mode except the League's SSB Manual. Also during that decade the FCC relaxed the regs regarding mobile operation - no one else published a mobile manual except the League.

To whom could you turn to for the great ideas and techniques that appear in the Hints and Kinks booklets? Propagation and antennas: The Antenna Manual. Who else in the 60s produced a VHF Manual? And when that VHF crowd began exploring FM: The FM and Repeater Manual. The very first book in the 80s devoted to amateur digital comms was the League's Get Connected.

Publishing affordable technical books was one of the original goals in the League's charter; for 85 years they've made information available to the layman that was nearly impossible to find elsewhere. How in the world could you possibly find fault with this business side of the League?

Every ham shack I've ever visited in the last 30 years has had many League pubs on its bookshelves. We are (or at least were) a group with a voracious appetite for reading and learning. Luckily, the League has been able to feed us what we most desired.

Ham radio and reading are inseparable; and it takes a business to do what the League has accomplished.

Hi Jon,

Not that I disagree with you necessarily, but I always thought that the FCC was referring to the one-way code practice transmissions of stations like W1AW, or the code practice nets where the net control sends code and everyone listens and works on their copy. It might be a matter of interpretation as to whether this would include other types of code practice transmissions. It seems to me that it would be better to practice sending code with the VOX switch turned off.

You ever try to send anything sounding like code with the buttons on one of those things, Cecil? It would be easier to yank the switch loose from the roots and just tap the two wires together.

> strength-in-numbers "clout", small as it is.

This is one reason why I intend to personally file comments
with the FCC on each and every issue unrelated to code
testing that NCI files comments on, informing the FCC of
the steps (or more likely, lack thereof) that NCI took to
determine their member's positions WRT the filed comments.

If NCI wants to file comments outside of their charter with
the FCC then they must be accountable to the membership --
in absence of that accountability, any comments filed with
the FCC on NCI's behalf represent nothing more than a
consensus view of 11 individual hams, not the membership
as a whole.

> That's two of the ~1k membership that has been shown here
> on rrap to have 'resigned'. One can only wonder how many
> more have, intend to or are leaning in that direction.

I really tend to doubt that, Dick. If some of the posters on RRAP
are any indication, they would sell their sisters into slavery to
gain access to HF w/o taking a code test. I doubt people are
leaving NCI in any large numbers -- no doubt most of the
membership are willing to allow themselves to be used in
exchange for a free HF ticket.

I have a brand new, keypad programmable GP-68 VHF, 20 channel with
1200mAh battery and rapid charger / antenna. All original packaging and
instructions

Sell for $310 shipped

I have a Dish Network Model #2700 with SMARTCARD and remote for sale.
Card I believe to be invalid, best offer plus shipping

I have a NIB phoebe TV master Video capture card with all software,
box, manual and cables. TV/NTSC & S-Video inputs, DOES NOT require video

card loop to run. Follow below link to view complete specs
http://www.phoebemicro.com/multimedia/tvmaster/tv.htm
Asking $75 shipped

I have 2 UHF P110 motorola portables, both working with the following
exceptions:
1 has channel knob broken 1 Keys up when turned on, but it times out
OK,
Both receive OK, channel freqs unknown. Otherwise, 8/10 condition with
(2)batteries, (2)antennas and (1) standard charger. I
will take $300 for the pair

Pro-23, 50 channel 800Mhz scanner . Like new with box, manual, antenna
and batteries. Sell $100 shipped

Follow the link to view my other items for sale. If you have any
questions, e-mail me.

Actually, that's not what I meant. I have no problem with people having and airing different/opposing views - in fact, I even think it's healthy providing that it is done politely. If everyone had the same view, the world would be a boring place, and this hobby would stagnate.

However, I still think that people should show the courage of their conviction by not posting things anonymously - particularly if they're making an attack on an individual. Sorry, but in that particular instance I think it's cowardly. Hey, if someone wants to put me on a hate-list, then go for it - I could not care less.

73, Darrell.

2706. Wanted: Dentron DTR-1200L for parts or Info

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-12 00:00:00 UTC
From: "Clifford W. Owen" <n3yyp@radix.net>
Message-ID: <80int5koj1@news1.Radix.Net>
Source record: 127694
Cross-posted to: alt.ham-radio.marketplace,dc.ham-radio,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.swap

Hello All:

I have a Dentron DTR-1200L amplifier. The previous owner "tried" to complete the 10M modification but failed. The amplifier is functional, however, it needs help.

If anyone has a "dead" DTR-1200L or parts of one, please let me know, I am sure that we can work something out. Also, if anyone has the COMPLETE manual for the DTR-1200L I would love to be your best friend for at least a day.
Yes, I am begging.

Please send e-mail to: n3yyp@arrl.net

Thank you,

Cliff Owen
n3yyp@arrl.net

BE VERY CAREFUL WITH DOING ANY BUISNESS WITH GTE MAIL CHECK OUT
THERE POSTING HISTORY TO VERIFY FOR YOURSELF

THIS COMPANY CAN'T DECIDE WHICH IS THE REAL NAME OF THERE BUSINESS, BUT
DOES LIKE ESCORT'S CHECK OUT:

http://x31.deja.com/[ST_rn=ap]/getdoc.xp?AN=537754210&CONTEXT=942365750.
1219231845&hitnum=0

AT THIS LINK, THIS COMPANY IS CALLED "LATCOM INVESTIGATIONS, INC"
THERE IS NO AGENCY LICENSED IN OREGON WITH THAT NAME PERIOD!!!

LINK:
http://x38.deja.com/[ST_rn=ap]/getdoc.xp?AN=513169454&CONTEXT=942366542.
818348151&hitnum=8

THEN THE COMPANY CALLS THEMSELF "LATCOM CONSULTING, S.A"
AT:

http://x38.deja.com/[ST_rn=ap]/getdoc.xp?AN=545444832&CONTEXT=942366542.
818348151&hitnum=3

AND IT THAT COMPANY'S OWN WORDS "Owe IRS (OUCH)!"

http://x38.deja.com/[ST_rn=ap]/getdoc.xp?AN=547040323&CONTEXT=942367079.
822411274&hitnum=0

NOW ASK YOURSELF, DO YOU FEEL CONFIDENT IN DOING BUISNESS WITH GTE MAIL?

Well, that was the implication. If a NCT gets on the air
sending CW-which he doesn't know how to copy, he is either
making a one way transmission or practicing his sending :-)

From one rerun topic to another do their neurotic little repetitive brains jump.

Now clowntester Good Buddy W3UR has raised the standard of bitching to Hollingsworthless about the "last two" phenomenon. Could it be that these clowntesters, who think manhood (not to mention succes in life) is determined by the size of their towers, have decided this is the best way to shut down the DX nets they find so annoying ?

Nets which give those unable to crack the chaos their giant stations, which cost more than their dumpy houses and 2.4 American cars put together, a chance at the same DX ?

How many clowntesters are REAL MEN, stand by their prnciples and boycott Abu Baker, 5A1A, because he checks into nets frequently (presumably to give all a fair crack at the Libya QSL) ? None, because they're hypocrites.

Losers in sports, emasculated by their harpy wives, clowntesters think they'll use their "pull" as self-proclaimed "great ops" to harass others who don't mortgage their house for a listing in QST 6 times a year and a cheap plaque the rest of the world would know not the meaning of if it were to be explained.

Since this discussion centers around a no-code HF privilege,
and there are no sending speed limitations on HF, and MCW is
not permitted on HF, as usual, you're trolling.

Now, name someone who's received a NAL on HF while operating CW.

2734. Repeater location database

Newsgroup: rec.radio.amateur.misc

Does anyone know where I can get latitude and longitude coordinates for VHF/UHF repeaters? I would like to enter this information in my Garmin GPS unit as waypoints so I could easily find the closest repeaters while traveling. ERP and elevation info could also be used to calculate the effective coverage area. Thanks.

Definitely! Rube Lloyd for ham of the month! This quiet unasssuming gentleman from Enterprise Florida is a constant credit to our wonderful hobby/service and I take great pride in awarding him the 14.313 MVH(Most Valuable Ham) for October 1999. I was going to award it to KE9RY but he is going to be mailed the MTG Award instead.. (Most Treacherous Garbage). It's a pleasure greeting Rube on the air since he always is courteous, friendly and sincere. With that six over six up sixty-six feet my sixth sense tell me that sixty-six percent of all the hams in the entire world could copy him if he ran six watts sixty-six percent of the time on six bands. Want to learn something about ancient and medieval European history? Tune in to K4RUB and be mesmerized as I am by his grasp of the subject-he's a walking encyclopedia and if he'd walk daily he'd be in better shape too. I have had the pleasure of knowing this great American for ten years since I made my grand entrance on .313 in November '89 according to my logbooks since I'm a stickler for detail and never once have I heard him wander off the straight and narrow path of excellence in amateur radio. Also I must acknowledge Rube's wonderful wife Mary who has painstakingly given her all to keeping this great man hale, hearty, healthy, happy and pudgy. All of ham radio salutes you Mr. Lloyd and may you reign supreme on the bands for another 40 years.

Like the rest of us, you'll have to earn it, Lloyd. Get off Usenet, hit the books, study your brains out day and night, get as much experience as is possible, make a good showing on your interviews*, work at your job as if you own the company, save and invest every possible penny you earn, start your own business on the side. Only then will you get what is "owed" to you.

*As a business owner conducting interviews, it might be beneficial for me to conduct, among other things, a Deja News "background" check on each prospective employee; I could learn quite a bit about a person's personality, ability to clearly pen his thoughts and communicate with others, and what he "stands" for. I know very well I would never hire you, Lloyd.

The No Code International argument is that Morse Code should be a hobby
only and not be included in the test. Here's my idea:

1. Ham radio is primarily for emergency communications.
2. Morse code is another method of ham radio.
3. IF WE DIDN'T KNOW HOW TO TALK, WE WOULD BE TESTED ON SSB/AM/FM
ALSO!!!

Now does it make any sense to you no-coders?

(Learned much about the Code from my famous post last Spring - "Morse
code" with zillions of replies saying that morse code is better for
emergencies since the band conditions can be bad -- formulated this
idea on my own)

But that's how you're interpreting "self-policing" -- that you're to police others rather than just yourself. But as you've pointed out, it's impossible to police others without police powers. You've weaved yourself into another contradiction again.

"Self-policing" means *self* policing. Is that so difficult to understand?

I am putting troublemakers on alert. I refuse to engage in any argument whatsoever on 14.313 or thereabouts. Having received a phone call this morning from a dear friend who knows what he's talking about, a conspiracy is afoot to entrap innocent wonderful AF2Y in a rhubarb and then go hightailing it to Riley with a crock of doctored tapes and what not. It's become all too obvious that Riley wants to keep contention OFF the bands in order to stop an emerging country like for example, "Mufata Footloose el Bunion" getting our frequencies from a sympathetic I.T.U. You have a gripe? Take it to the INTERNET! Use ham radio as it should be..a meeting place to discuss QSL cards, rigs and hemorrhoids. There's only one thing that might kill this hobby/service--AGE. Have you noticed that graybeards predominate? I stopped going to hamfests after meeting Barry Goldwater in '75 or '76 but the fellows who do attend all say the same thing. It's going to the nursing home and not because of sexy nurses either. Notice as I do that on 14.313 you hear a lot of "B..O..R..I..N..G?" Contentious behavior may be counterproductive, even harmful, but bordeom is an incentive for NOTHING. Isn't there a middle ground to keep a great frequency INTERESTING?And guys and gals, mark my words. When KV4FZ gets that cease and desist, what Riley's going to hear, Riley's NOT going to like. There will be ranting and raving and recriminations the likes of which have never been heard. These Herbie-sucklings will be losing their master and will be in an uproar over it. To think that the law will finally come down and take him out will prove to be more than they can bear thereby creating a ruckus. I ask all the wonderful Goodfellas to steer clear of what's coming because blood will flow and tickets will be impounded and besides, Herbie simply ain't worth it, is he?

Once again, if anyone thinks he's going to engage me in any type of volatile discourse on .313, he's nuts. By nature I'm a peaceful loving person if not pushed. But a long time ago I learned to ACCEDE to power and authority in just about all cases in order to maintain or gain status. Rilkey is that authority. When Schoenbohm goes, we will be entering the period of the Rapture or is it Rupture forecast by the millenialists. Chaos will reign until Moses comes down from the sky riding a chariot guided by ten rabbinic cherubim in the direction of Hialeah to be entered as rider of Ben Hurberg in the 6th. And 144,000 top bookies will be escorted to the clouds to sit with Jehovah to ask, "For God's sake, why didn't I take in more gelt while I was on earth?"

Hi,

I need a part for an old DRAKE TR-4C transceiver
made in the sixties. I know some companies still
produce this part today but I couldn't find out
who and where to purchase from. Could anybody
point me to the right contact?

It's R10E1-Y4-V2.5K 48V DC AMF for TR-4C DRAKE.

Please reply to kaijiang@stanford.edu

Thanks a lot.

Regards,

Kai

2769. Winradio 1500, internal or external ??

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-13 00:00:00 UTC
From: cmos@shol.com
Message-ID: <382ed0df.13149538@news.shol.com>
Source record: 127601

Hello,
I am thinking about buying a winradio 1500.
But I am not sure if I want the internal card, or the external box.
One of the biggest uses I have for it would be useing it as
a spectrum anilizer.
Yes, I know it is not the best in the HF range, but that is not
were I plan to spend most of my time.
If there is no differents between the internal and external, I would
like to get the internal.

Ok, now for my questions.
Taking into acount I have good grounding and coax connection to an
outside anntenna, which one would have more computer noise ?

Along those same lines, what one would have better sensitivity ?

Besause one oh my biggest uses would be as a spectrum anilizer,
I would like a compleat coverage from 150khz to 1.5ghz with
no cell block. But I live in the US, can I buy one from Canada
with no cell block, and have it shiped to the US ?

Can the winradio be modified to remove the cell block easly ?

In geteral, given what I want to use it for, should I go internal or
external ?

Thanks for any help.

I have a Yaesu FT101ZD that is perfect in every way but one. The audio from the unit is very low. I can turn the volume all the way up and it is loud enough as long as there is no other noise in the house. It has been this way for years, maybe since new.
All frequencies and bands work great, it transmits great, it recieves signals great even low ones, it's audio volume is just low.
I would like any suggestions anyone has. I have an Tek 454A scope, freq counter, audio and rf signal generator, just about anything you would need to solve the problem but need some starting points. I have not ever even taken the cover off this unit.
I would like to buy a service manual or copy of one if anyone has one for sale.
Please respond to blueglow@mindspring.com.

Thanks,
Mark

First make sure there is a problem. Maybe the speaker is bad; is the volume low on headphones too? Check the external speaker jack; it may be a closed circuit unit that isn't making good contact.

If that all checks out, measure the audio at the volume control. If you see around one Volt peak to peak, the problem is in the audio amplifier. If this unit has squelch, it may be closed. That would only be if the radio has FM capability.

If you see much less than a Volt at the volume control, the problem is in the detector circuitry.

That's as far as we can go without you making some tests.

My son has ask for a 10 meter SSB kit for Christmas. Are there any kits like this available?

Thanks

Chip

Lloyd, this thread has nothing to do with the silly pseudo-ham
"freebanding" activity on 27.555. Instead it concerns "pirate
broadcasting" on 27mHz: FYI, pirate radio is illegal one-way BROADCAST
radio.

Regarding the obnoxious, racist posting you made last week, is READING
COMPREHENSION one of the items you want "take back" for the white race?

I was going to write a humorous reply to the above post
BUT
the subject matter ain't funny and it is so full of oxymorons that I
had better ignore it.

In short I don't think that posts like the above are in agreement with
the basis and purpose of Ham Radio as stated in Part 97 which says:-

(e) Continuation and extention of the amateur's unique ability to
enhanse international good will.

I had better not express my opinion about the above post because I want to comply with (e) as most Hams (but not most Internet chatters) usually do. I do not want to spoil the sentiments of the American soldiers and veterans who started this thread. I do not feel that I need to recount the real facts of the world's history or world's economics, which I know they understand better than AF2Y. Let me only say that IMHO AF2Y's hate and opinions don't belong here, especially in this thread.

I am not looking to find any Hams that I won't like,
Please keep thinking,

Message-id: <80g11soub1@nntp4.atl.mindspring.net>

Date: Monday, October 27, 1997 1:10 PM

Here is some background information that you might find useful.

KV4FZ has been an active amateur radio operator since 1954 when first licensed in the Midwest as W0VXO. While working his way through college (1960-64), he spent summers teaching at several camps for the physically handicapped. He was highly successful in teaching seriously disabled campers about the potential of amateur radio. Many of these campers went on to fully qualify for their amateur radio licenses.

His father, W.B. Schoenbohm, was the founder of Courage Center in Minneapolis. Herb was a major force in pushing for the initiation of the Handi-Ham program, which is now widely recognized as the premier service organization for disabled radio amateurs. After college, Herb worked as a international sales representative for Gates Radio, Harris Corp, and Collins Radio. He sold and distributed broadcast equipment to the international market, primarily Latin America. In 1968, he moved to the U.S. Virgin Islands with the intent of better serving his customers. His wife Monika was, at that time. a service representative for Pan American Airways.

KV4FZ was very active in DX work and, as a frequent traveler, put many new countries on 160 meters. He was instrumental in getting Stew Perry, W1BB, the necessary countries to be the first ham ever to get DXCC on 160 meters. He also gave G3IOR the last country he need (VP2EFZ, Anguilla) for the first ever DXCC via satellite (Oscar 7)

During the 1970's, KV4FZ was able to set CQ World Wide records 160 -10 in almost ever category except 40 meters. He was also very active in supporting the IARU Intruder Watch after encountering frequent yachts in the area that had acquired licenses of convenience for a fee. At that time, FCC Commissioner Margita White appointed KV4FZ as the Virgin Islands SECC. The SECC has responsibility to plan and manage the operation of radio communications resources during island emergencies. Herb fulfilled that role magnificently and was named a Virgin Island "Hero" after Hurricane Hugo destroyed most of St. Croix in 1989. Herb received this award for keeping vital communications circuits open during the crisis.)

Herb also took a detailed interest how most of these "pirates" has a close association with the so- called "service nets" on the top end of 20 meters. He joined the net and attended several of the hamfest functions. Only then

did he learn how deliberate and sordid was the manner in which net members misused the amateur spectrum as a means to provide an international telephone toll by-pass service. One of the most flagrant of all these operations was the "INTERCON" network operating, for the most part, on 14.313 MHz. Herb began detailed monitoring of their operation and intercepted many communications that were appalling to say the least.

In 1979, KV4FZ listening to what appeared to be a "business connection" between WB6MID/8R1 in Jonestown, Guyana and WB6MID in Ukia, California. Herb broke in and informed the net personnel that this type of operation on an amateur frequency was illegal. Furthermore, Herb stated that their communication constituted international business communications related to funds transfers and the procurement of equipment and supplies. The net hierarchy reacted by excoriating him for his "embarrassing comments" and ignoring the violations. The net bluntly told him that the Jonestown Operation was a missionary group and that they had special permission from the Carter administration to use ham radio to further their "worthy cause". Herb persisted with his concern and was quickly declared 'PERSONNA NON GRATA" by Robert Sternberg, AA4EE, a tax attorney who claimed to be the nets legal advisor. Herb expressed his concerns to other net operators participating in the companion "Maritime Mobile Net" such as Dick Eastman, N5FX and Mike Galego, KA4MUJ. Several Maritime Net members agreed that some of the more criminal practices, such as one ringers and "maintenance charges" for providing long distance toll free connections practically anywhere in the world, must be curtailed.

Some of the net cabal hierarchy rebuffed all attempts to institute reform and a nasty power struggle ensued. Eastman and Galego where "ex-communicated" by Ruth Hoffman N4LMC, Eddie Ricca K4PT and Art Candell N4PCK. The latter began a propaganda campaign, replete with false stories and personal attacks, that promised to destroy any net opposition that sought reform. The net members objected to the lively participation of KV4FZ, KA4MUJ, and N5FX (a former net director) who frequently brought to the attention of net participants certain stations whose conduct violated the FCC and International Rules.

During the 1980's, net members began a campaign of coordinated complaints to the FCC claiming that the aforementioned three were causing willful and malicious interference to the net. N5FX and KV4FZ both received prefabricated FCC citations at the behest of the net command. Both were able to get the FCC to nullify their actions based on the fact that their constructive comments did not constitute "malicious interference" and that certain members of the net themselves were engaged in a premeditated campaign of harassment and interference.

Several members of the net were subsequently caught interfering with the communications of KV4FZ and KA4MUJ. They include K2BFI and AA5LY. AA5LY later gave the FCC, and supporters of KV4FZ and KA4MUJ, a complete and accurate accounting of the plot by disgruntled net members to "settle the score". That plan included a vigorous campaign of letter writing to politicians in Washington in an attempt to pressure them into punishing the

net detractors.

N4PCK had his own reason to get even. He had known Herb while he was operating in Haiti as HH2A and was very active on the INTERCON net. Herb had learned, through his contacts in Haiti, that Candell had a serious problem. He would solicit young pre-teen boys and pay them a quarter to perform sex acts on him. A prominent Haitian administrator was told, by his son, that the young boy had been abused and sodemized by Candell. There was no arrest or trial. But the arrival of the outraged local citizenry at Candell's hillside villa dictated that Candell receive an armed escort to the airport. Candell then appeared in the Orlando, Fl area, illegally using the call HH2A/W4 and actively engaging in net activities. The net watchdogs, now known as the B.A.R.F. (The Better Amateur Radio Federation), pointed out that Candell was not eligible to use a Haitian call sign in the United States unless he was a Haitian citizen and had been granted a proper permit from the FCC.

Again the net members supported Candell and sought to silence Herb. However, the FCC ruled that Candell could no longer operate from Florida unless he obtained a valid U.S. amateur radio license. Candell later paid off a VEC in Silver Springs, Fl to fraudulently give him a passing grade on a General Class license examination. The VEC was later sanctioned but Candell was neither removed from the air nor required to be re-examined. In 1989 Candell was finally arrested and convicted of multiple incidents of child molestation. He was given a suspended sentence that was partially based upon INTERCON's assertion that he had been rehabilitated by amateur radio service in their net. (Candell was arrested and convicted again in 1994 for carnal assault on several boys between 8 and 10 years of age whom he had invited into home under the pretense of showing them his ham station. He has been institutionalized for several years but his ham license was, nonetheless, renewed in 1996 for another ten years.)

In 1990, Candell continued with his plot to destroy and discredit KV4FZ in retaliation for Herb's alleged "interference" with the net's "business". Candell actively leagued with other enemies of KV4FZ such as Pat Miller, KP2J in St. Thomas, and Richard Whiten, WB2OTK. Miller supplied Whiten the so-called "proof" of a crime by playing a recorded tape on both 20 and 75 meters. Miller introduced Candell to the operator of a long distance resale service that KV4FZ briefly subscribed to in 1987. Some of the users of the CALLS (Caribbean Automated Long Line Service) system (a six digit access code system on which half the possible combinations of digits gained the caller access to a WATTS line) had been illegally abusing the CALLS scheme. Malcolm Ford had claimed losses to the tune of $200,000 and needed a scapegoat. Thereupon, it was decided that a criminal case should be manufactured against Herb, KV4FZ.

Ford needed this falsification to support his ludicrous claim that the impending bankruptcy of CALLS was not due to his inept management. Instead, it proffered that somehow Herb had caused his business to fail. This was vital to Ford because he was still salaried as the GM of CALLS even though they were in receivership. Ford's efforts failed and he was physically

removed from the operation after the Federal Bankruptcy judge found him raiding the treasury and assets of CALLS.

However, all during this time, Ford was fabricating evidence in an attempt to establish a connection between CALLS financial failure and KV4FZ. Yet the Department of Justice continually refused to prosecute Herb. This resulted in even more acrimonious letters to officials and politicians in a further attempt to implicate Herb as the culprit.

Malcolm Ford, the previous owner of CALLS, was then under investigation for bankruptcy fraud. In an attempt to escape indictment, Ford hired John Ackley, KP2A, to fabricate various reports that would designate Vitelco(a local phone service), STSJ Long Lines, ITT and Herb as coconspirators who were attempting run him out of business. While this was going on, Ackley was attempting to buy the nearly defunct company for ten cents on the dollar. (Ackley failed but STSJ was able to get the company back on its feet.)

Miller, Hoffman, Candell and others intensified their letter writing campaign to hundreds of politicians in Washington urging them to investigate. They even began writing letters to newspapers, claiming that politicians were shielding KV4FZ from prosecution. In these hate letters to public officials, Herb was equated with organized crime, drug trafficking, and high level political corruption. In 1991, KV4FZ was writing a hard-hitting column for the St. Croix Avis newspaper. Herb frequently attacked political corruption so it stood to reason that he might have some enemies in government. Herb had articles published about the check kiting and House Banking fraud perpetrated by the Virgin Island Delegate to Congress, Ron Delugo. Outraged and distraught, Delugo (who had designs upon becoming the next governor of the Virgin Islands) assigned a full time staff attorney (Sylvester Julian) to explore methods of pressuring the FCC, the Secret Service, and the Department of Justice into investigating Herb and "putting a 'severe hurting' on him".

However an obstacle remained in the path of their plan to annihilate KV4FZ. Some at the FCC supported Herbs activities on behalf of the amateur radio service. Additionally he was elected as Vice Chairman of the Virgin Islands Republican Committee, which made him a frequent delegate to the GOP Conventions. Furthermore, Herb was personally acquainted with President Bush. Herb's father had served on the President's Commission for the Handicapped.

Initially, each and every involved agency claimed there was not enough evidence to support a charge against Herb. Subsequent to this, John Ackley, KP2A, manufactured a list of 660 telephone calls that were prearranged to add up to $1,047 in value. This was exactly forty-seven dollars over the amount needed to achieve the threshold of prosecution. Delugo wrote threatening letters to various government agencies threatening that he would see to it that their funding was severely curtailed if he did not receive figuratively receive Herb's head on a silver platter.

Ruth Hoffman constantly badgered the acting U.S. Attorney for the Virgin Islands, Terri Halpern. This continued to the point that Hoffman was finally

ordered to stop harassing Halpern. However, as a Congressman to the VI, Delugo was in a position convince colleagues not to block Halpern's confirmation. Delugo reportedly told Halpirn that, unless she prosecuted Herb Schoenbohm, she would never become U.S. Attorney. (Halprin was fired in 1992 by the DOJ for ethical lapses after the Office of Professional Responsibility investigated the severe criticism, from the 3rd Circuit Court of Appeals, that Halpern received for the "knowing use of false evidence" to secure a conviction. Nevertheless, the trial prosecutor was cleared by OPR because they were unable to prove that the prosecutor actually knew the evidence used was false.)

Herb's trial took place in April 1991 (four months past the five-year statute of limitations). Both Ackley and Miller testified, under oath, as to the veracity and accuracy of the incriminating evidence they had assisted in concocting. (Miller offered his so-called "caught in the act" tape of Herb dialing "illegal access codes". Ackley presented his list of random numbers that he verified, as a government expert witness, were all telephone numbers dialed by defendant Schoenbohm.

The puzzled and confused jury convicted Herb on all three counts of Title 18, SS 1029(a): 1,2 and 3, which is, in reality, an illegal credit card statute. This statute has been used infrequently to curb the illegal use of cloned cellular telephones. After trial, Schoenbohm with the help of Bob Sheron, W4ASX, closely scrutinized the evidence and began tracking down the parties that Ackley had claimed, under oath, that Herb had illegally called. A most amazing discovery unfolded: most of the persons contacted did not know Herb Schoenbohm or had never had a telephone conversation with him. Amazingly, they had already given statements confirming this fact to the Secret Service investigators. Most had even identified persons, other than Schoenbohm, whom had called them from the Virgin Islands during the timeframe in question (1987). Interestingly, the court refused to allow Schoenbohm to verify the numbers before trial. The court incredibly claimed that it needed to protect the potential witnesses from pre-trial disclosure!

After trial, armed with affidavits from the persons alleged to have received Herb's "illegal" calls, Herb moved for a Judgement of Acquittal not withstanding the jury verdict. The court granted the motion on all counts but one (Possession or Use of a Counterfeit Access Device). The court maintained that the Miller tape proved that something was amiss and the jury could correctly deduce from this that the law had been broken. This court decision differs from the previous decision in that the device is similar to, but not exactly the same as, a valid device and does not require the threshold of over $1000 in use. (The irony in this entire matter is that Herb freely admitted to using the service briefly in 1987. He was a bona fide customer and the total actual use amounted to $106. CALLS finally was required by the court to produce Herb's check for $104 that they had received in1987. They admitted that they did not cash the check but, instead, held it as aid in the plot to entrap KV4FZ.)

When the court vacated the judgement requiring two months prison time, Herb's detractors were enraged and, once again, began the political letter

writing campaign. Now the claim was that Herb had used amateur radio in the commission of a crime and should be taken off the air. They sent the highly doctored Miller Tapes to the FCC in an attempt to prove their incredible theory. Their letters were full of outrage over the fact that Herb had once more cheated Madam Guillotine and he still on the air making waves. Some were furious due to the fact that they had given financial support to certain political candidates and nothing permanent had been done to rid the airwaves of this "pest", KV4FZ. (Ruth Hoffman even conveyed gifts to officials at the FCC in attempt to bribe public servants. One such official, William Cross, was investigated for leaking internal information to Ruth Hoffman in the KV4FZ matter. Hoffman then disseminated this information for use in the hate campaign against Herb.)

KV4FZ then was subsequently forced to embark upon a long and costly struggle for justice. He has had to fight the refusal to renew his amateur license by demanding a hearing before the FCC. (The refusal to renew is rarely used as a procedure and has been given the title: "The FCC Death Penalty" because the entire burden of proof is placed upon the licensee.)

At the first FCC hearing, Administrative Law Judge Luton ruled against KV4FZ. However, upon higher review, the FCC General Counsel refused to accept Judge Luton's findings and remanded the matter for reconsideration. The principle issue is whether or not KV4FZ had used amateur radio in the furtherance of the commission of a crime. This time the ALJ ruled that there was nothing in the evidence (The Miller Tape) that was illegal in any way. The concluded that Schoenbohm actually was dialing ordinary and valid Virgin Islands telephone numbers. He was not entering illicit access codes to make long distance calls.

The ALJ did, however, agree with the Wireless Telecommunications Bureau (WTB) assertion that, by giving out the telephone number, in 1994, of Herb's future boss, Congressman Frazer (whom, incidentally ran Delugo out of office), Herb was violating a solicitation restriction of ex-parte rules. This was despite the fact that WTB had conceded that no actual ex-parte violation had taken place. The ALJ ruled that, by attempting to explain his conviction as a De Minimus violation rather than a crime of major impact, he was trying to mislead the trial of fact. (In administrative law, the assertion of innocence is a crime even if the accused is actually innocent! It is akin to Hobson's Choice or the Salem witch trials whereupon, if the tied woman is thrown into the pond, and she does not drown, then she must surely be a witch and, thus, must be burned to death.

Herb had been fighting the remaining count through the Federal Courts and has even succeeded in convincing the courts to severely criticize the DOJ for their handling of the case. Nevertheless, they refused to reverse the remaining conviction because of the nearly impossible to define "standard of harmless error". The appellate court ruled that the motion for Judgement of Acquittal had been filed too late even though the trial judge had granted an extension based on the emergence of irrefutable proof that the prosecution had used false evidence. As a result they were barred from considering the sufficiency of evidence matter at this late date under the rigorous

standards of Habeas Corpus review. However, a positive revelation in the latest FCC decision is that it clearly vindicates Herb on the original charge of using ham radio in the commission of a crime. It also conclusively proves that his detractors engaged in perjury before a Federal Grand Jury and Petit Jury trial.

Many on the local scene recognized the truth. The Trial Judge, The Honorable Ann Thompson, wrote a letter of support and praise on Herb's behalf. The Governor of the Virgin Islands did not simply restore Herb's government career. He elevated Herb to a position of higher authority with more responsibility to the island and a significantly higher salary. He was also employed, as a part-time field representative, on the congressional staff of newly elected Congressman Frazer.

(The FCC WTB attorneys characterized these as "political jobs", unworthy of consideration as a mitigating factor in Herb's "rehabilitation"!)

Although Herb had a Congressional Floor Pass, granting him direct access to the ears of the politicians, there is no evidence that he ever abused his position to lobby House members against the FCC. This is in spite of the fact that the bureaucrats inside the FCC are very much afraid that Herb might just whisper in the ear of someone who controls their finances. Because of this, Herb is not allowed to take his case to the very people who would be horrified to learn the truth about how he has been treated. These are the people who could finally put a stop to this travesty of justice. Yet, Herb's detractors are on the phone daily, pushing those in power to get him off the air, one way or another. When will the voice of reason and justice be heard?

Some of us do not like the odds and are willing to help end this fiasco. Herb's legal bills are soaring but he continues the fight. His attorney, Larry Colby (a licensed ham), has stated that when this issue gets into the proper arena, Herb will be totally vindicated. But this can only happen if Herb is allowed to fight on and get his case into the proper arena. Right now, it is still in a forum where all the rules are stacked against the licensee. When the matter gets out of the FCC, and into the D.C. Circuit Court, then the playing field is closer to being balanced. There, the Feds don't have the automatic upper hand that allows them to do what their political puppet-masters demand.

A small donation of $25, $50 or $100 will go a long way in continuing the fight for justice. There is an underlying principle that must be preserved. It is not keeping Herb on the air that drives his supporters. It is the realization that if they can deprive KV4FZ of justice then they can deprive any of us of justice. Today they are persecuting KV4FZ. Tomorrow it could be you. You could be railroaded just because somebody doesn't agree with your position on the nets, phone patching, or apple pie.

Herb is working vigorously to get the funds together for his appeal. If you can help in anyway, please contact Herb at herbs@islands.vi or mail your contribution to:

Here is some background information that you might find useful.

KV4FZ has been an active amateur radio operator since 1954 when first licensed in the Midwest as W0VXO. While working his way through college (1960-64), he spent summers teaching at several camps for the physically handicapped. He was highly successful in teaching seriously disabled campers about the potential of amateur radio. Many of these campers went on to fully qualify for their amateur radio licenses.

His father, W.B. Schoenbohm, was the founder of Courage Center in Minneapolis. Herb was a major force in pushing for the initiation of the Handi-Ham program, which is now widely recognized as the premier service organization for disabled radio amateurs. After college, Herb worked as a international sales representative for Gates Radio, Harris Corp, and Collins Radio. He sold and distributed broadcast equipment to the international market, primarily Latin America. In 1968, he moved to the U.S. Virgin Islands with the intent of better serving his customers. His wife Monika was, at that time. a service representative for Pan American Airways.

KV4FZ was very active in DX work and, as a frequent traveler, put many new countries on 160 meters. He was instrumental in getting Stew Perry, W1BB, the necessary countries to be the first ham ever to get DXCC on 160 meters. He also gave G3IOR the last country he need (VP2EFZ, Anguilla) for the first ever DXCC via satellite (Oscar 7)

During the 1970's, KV4FZ was able to set CQ World Wide records 160 -10 in almost ever category except 40 meters. He was also very active in supporting the IARU Intruder Watch after encountering frequent yachts in the area that had acquired licenses of convenience for a fee. At that time, FCC Commissioner Margita White appointed KV4FZ as the Virgin Islands SECC. The SECC has responsibility to plan and manage the operation of radio communications resources during island emergencies. Herb fulfilled that role magnificently and was named a Virgin Island "Hero" after Hurricane Hugo destroyed most of St. Croix in 1989. Herb received this award for keeping vital communications circuits open during the crisis.)

Herb also took a detailed interest how most of these "pirates" has a close association with the so- called "service nets" on the top end of 20 meters.

He joined the net and attended several of the hamfest functions. Only then did he learn how deliberate and sordid was the manner in which net members misused the amateur spectrum as a means to provide an international telephone toll by-pass service. One of the most flagrant of all these operations was the "INTERCON" network operating, for the most part, on 14.313 MHz. Herb began detailed monitoring of their operation and intercepted many communications that were appalling to say the least.

In 1979, KV4FZ listening to what appeared to be a "business connection" between WB6MID/8R1 in Jonestown, Guyana and WB6MID in Ukia, California. Herb broke in and informed the net personnel that this type of operation on an amateur frequency was illegal. Furthermore, Herb stated that their communication constituted international business communications related to funds transfers and the procurement of equipment and supplies. The net hierarchy reacted by excoriating him for his "embarrassing comments" and ignoring the violations. The net bluntly told him that the Jonestown Operation was a missionary group and that they had special permission from the Carter administration to use ham radio to further their "worthy cause". Herb persisted with his concern and was quickly declared 'PERSONNA NON GRATA" by Robert Sternberg, AA4EE, a tax attorney who claimed to be the nets legal advisor. Herb expressed his concerns to other net operators participating in the companion "Maritime Mobile Net" such as Dick Eastman, N5FX and Mike Galego, KA4MUJ. Several Maritime Net members agreed that some of the more criminal practices, such as one ringers and "maintenance charges" for providing long distance toll free connections practically anywhere in the world, must be curtailed.

Some of the net cabal hierarchy rebuffed all attempts to institute reform and a nasty power struggle ensued. Eastman and Galego where "ex-communicated" by Ruth Hoffman N4LMC, Eddie Ricca K4PT and Art Candell N4PCK. The latter began a propaganda campaign, replete with false stories and personal attacks, that promised to destroy any net opposition that sought reform. The net members objected to the lively participation of KV4FZ, KA4MUJ, and N5FX (a former net director) who frequently brought to the attention of net participants certain stations whose conduct violated the FCC and International Rules.

During the 1980's, net members began a campaign of coordinated complaints to the FCC claiming that the aforementioned three were causing willful and malicious interference to the net. N5FX and KV4FZ both received prefabricated FCC citations at the behest of the net command. Both were able to get the FCC to nullify their actions based on the fact that their constructive comments did not constitute "malicious interference" and that certain members of the net themselves were engaged in a premeditated campaign of harassment and interference.

Several members of the net were subsequently caught interfering with the communications of KV4FZ and KA4MUJ. They include K2BFI and AA5LY. AA5LY later gave the FCC, and supporters of KV4FZ and KA4MUJ, a complete and accurate accounting of the plot by disgruntled net members to "settle the score". That plan included a vigorous campaign of letter writing to

politicians in Washington in an attempt to pressure them into punishing the net detractors.

N4PCK had his own reason to get even. He had known Herb while he was operating in Haiti as HH2A and was very active on the INTERCON net. Herb had learned, through his contacts in Haiti, that Candell had a serious problem. He would solicit young pre-teen boys and pay them a quarter to perform sex acts on him. A prominent Haitian administrator was told, by his son, that the young boy had been abused and sodemized by Candell. There was no arrest or trial. But the arrival of the outraged local citizenry at Candell's hillside villa dictated that Candell receive an armed escort to the airport. Candell then appeared in the Orlando, Fl area, illegally using the call HH2A/W4 and actively engaging in net activities. The net watchdogs, now known as the B.A.R.F. (The Better Amateur Radio Federation), pointed out that Candell was not eligible to use a Haitian call sign in the United States unless he was a Haitian citizen and had been granted a proper permit from the FCC.

Again the net members supported Candell and sought to silence Herb. However, the FCC ruled that Candell could no longer operate from Florida unless he obtained a valid U.S. amateur radio license. Candell later paid off a VEC in Silver Springs, Fl to fraudulently give him a passing grade on a General Class license examination. The VEC was later sanctioned but Candell was neither removed from the air nor required to be re-examined. In 1989 Candell was finally arrested and convicted of multiple incidents of child molestation. He was given a suspended sentence that was partially based upon INTERCON's assertion that he had been rehabilitated by amateur radio service in their net. (Candell was arrested and convicted again in 1994 for carnal assault on several boys between 8 and 10 years of age whom he had invited into home under the pretense of showing them his ham station. He has been institutionalized for several years but his ham license was, nonetheless, renewed in 1996 for another ten years.)

In 1990, Candell continued with his plot to destroy and discredit KV4FZ in retaliation for Herb's alleged "interference" with the net's "business". Candell actively leagued with other enemies of KV4FZ such as Pat Miller, KP2J in St. Thomas, and Richard Whiten, WB2OTK. Miller supplied Whiten the so-called "proof" of a crime by playing a recorded tape on both 20 and 75 meters. Miller introduced Candell to the operator of a long distance resale service that KV4FZ briefly subscribed to in 1987. Some of the users of the CALLS (Caribbean Automated Long Line Service) system (a six digit access code system on which half the possible combinations of digits gained the caller access to a WATTS line) had been illegally abusing the CALLS scheme. Malcolm Ford had claimed losses to the tune of $200,000 and needed a scapegoat. Thereupon, it was decided that a criminal case should be manufactured against Herb, KV4FZ.

Ford needed this falsification to support his ludicrous claim that the impending bankruptcy of CALLS was not due to his inept management. Instead, it proffered that somehow Herb had caused his business to fail. This was vital to Ford because he was still salaried as the GM of CALLS even though

they were in receivership. Ford's efforts failed and he was physically removed from the operation after the Federal Bankruptcy judge found him raiding the treasury and assets of CALLS.

However, all during this time, Ford was fabricating evidence in an attempt to establish a connection between CALLS financial failure and KV4FZ. Yet the Department of Justice continually refused to prosecute Herb. This resulted in even more acrimonious letters to officials and politicians in a further attempt to implicate Herb as the culprit.

Malcolm Ford, the previous owner of CALLS, was then under investigation for bankruptcy fraud. In an attempt to escape indictment, Ford hired John Ackley, KP2A, to fabricate various reports that would designate Vitelco(a local phone service), STSJ Long Lines, ITT and Herb as coconspirators who were attempting run him out of business. While this was going on, Ackley was attempting to buy the nearly defunct company for ten cents on the dollar. (Ackley failed but STSJ was able to get the company back on its feet.)

Miller, Hoffman, Candell and others intensified their letter writing campaign to hundreds of politicians in Washington urging them to investigate. They even began writing letters to newspapers, claiming that politicians were shielding KV4FZ from prosecution. In these hate letters to public officials, Herb was equated with organized crime, drug trafficking, and high level political corruption. In 1991, KV4FZ was writing a hard-hitting column for the St. Croix Avis newspaper. Herb frequently attacked political corruption so it stood to reason that he might have some enemies in government. Herb had articles published about the check kiting and House Banking fraud perpetrated by the Virgin Island Delegate to Congress, Ron Delugo. Outraged and distraught, Delugo (who had designs upon becoming the next governor of the Virgin Islands) assigned a full time staff attorney (Sylvester Julian) to explore methods of pressuring the FCC, the Secret Service, and the Department of Justice into investigating Herb and "putting a 'severe hurting' on him".

However an obstacle remained in the path of their plan to annihilate KV4FZ. Some at the FCC supported Herbs activities on behalf of the amateur radio service. Additionally he was elected as Vice Chairman of the Virgin Islands Republican Committee, which made him a frequent delegate to the GOP Conventions. Furthermore, Herb was personally acquainted with President Bush. Herb's father had served on the President's Commission for the Handicapped.

Initially, each and every involved agency claimed there was not enough evidence to support a charge against Herb. Subsequent to this, John Ackley, KP2A, manufactured a list of 660 telephone calls that were prearranged to add up to $1,047 in value. This was exactly forty-seven dollars over the amount needed to achieve the threshold of prosecution. Delugo wrote threatening letters to various government agencies threatening that he would see to it that their funding was severely curtailed if he did not receive figuratively receive Herb's head on a silver platter.

Ruth Hoffman constantly badgered the acting U.S. Attorney for the Virgin Islands, Terri Halpern. This continued to the point that Hoffman was finally ordered to stop harassing Halpern. However, as a Congressman to the VI, Delugo was in a position convince colleagues not to block Halpern's confirmation. Delugo reportedly told Halpirn that, unless she prosecuted Herb Schoenbohm, she would never become U.S. Attorney. (Halprin was fired in 1992 by the DOJ for ethical lapses after the Office of Professional Responsibility investigated the severe criticism, from the 3rd Circuit Court of Appeals, that Halpern received for the "knowing use of false evidence" to secure a conviction. Nevertheless, the trial prosecutor was cleared by OPR because they were unable to prove that the prosecutor actually knew the evidence used was false.)

Herb's trial took place in April 1991 (four months past the five-year statute of limitations). Both Ackley and Miller testified, under oath, as to the veracity and accuracy of the incriminating evidence they had assisted in concocting. (Miller offered his so-called "caught in the act" tape of Herb dialing "illegal access codes". Ackley presented his list of random numbers that he verified, as a government expert witness, were all telephone numbers dialed by defendant Schoenbohm.

The puzzled and confused jury convicted Herb on all three counts of Title 18, SS 1029(a): 1,2 and 3, which is, in reality, an illegal credit card statute. This statute has been used infrequently to curb the illegal use of cloned cellular telephones. After trial, Schoenbohm with the help of Bob Sheron, W4ASX, closely scrutinized the evidence and began tracking down the parties that Ackley had claimed, under oath, that Herb had illegally called. A most amazing discovery unfolded: most of the persons contacted did not know Herb Schoenbohm or had never had a telephone conversation with him. Amazingly, they had already given statements confirming this fact to the Secret Service investigators. Most had even identified persons, other than Schoenbohm, whom had called them from the Virgin Islands during the timeframe in question (1987). Interestingly, the court refused to allow Schoenbohm to verify the numbers before trial. The court incredibly claimed that it needed to protect the potential witnesses from pre-trial disclosure!

After trial, armed with affidavits from the persons alleged to have received Herb's "illegal" calls, Herb moved for a Judgement of Acquittal not withstanding the jury verdict. The court granted the motion on all counts but one (Possession or Use of a Counterfeit Access Device). The court maintained that the Miller tape proved that something was amiss and the jury could correctly deduce from this that the law had been broken. This court decision differs from the previous decision in that the device is similar to, but not exactly the same as, a valid device and does not require the threshold of over $1000 in use. (The irony in this entire matter is that Herb freely admitted to using the service briefly in 1987. He was a bona fide customer and the total actual use amounted to $106. CALLS finally was required by the court to produce Herb's check for $104 that they had received in1987. They admitted that they did not cash the check but, instead, held it as aid in the plot to entrap KV4FZ.)

When the court vacated the judgement requiring two months prison time, Herb's detractors were enraged and, once again, began the political letter writing campaign. Now the claim was that Herb had used amateur radio in the commission of a crime and should be taken off the air. They sent the highly doctored Miller Tapes to the FCC in an attempt to prove their incredible theory. Their letters were full of outrage over the fact that Herb had once more cheated Madam Guillotine and he still on the air making waves. Some were furious due to the fact that they had given financial support to certain political candidates and nothing permanent had been done to rid the airwaves of this "pest", KV4FZ. (Ruth Hoffman even conveyed gifts to officials at the FCC in attempt to bribe public servants. One such official, William Cross, was investigated for leaking internal information to Ruth Hoffman in the KV4FZ matter. Hoffman then disseminated this information for use in the hate campaign against Herb.)

KV4FZ then was subsequently forced to embark upon a long and costly struggle for justice. He has had to fight the refusal to renew his amateur license by demanding a hearing before the FCC. (The refusal to renew is rarely used as a procedure and has been given the title: "The FCC Death Penalty" because the entire burden of proof is placed upon the licensee.)

At the first FCC hearing, Administrative Law Judge Luton ruled against KV4FZ. However, upon higher review, the FCC General Counsel refused to accept Judge Luton's findings and remanded the matter for reconsideration. The principle issue is whether or not KV4FZ had used amateur radio in the furtherance of the commission of a crime. This time the ALJ ruled that there was nothing in the evidence (The Miller Tape) that was illegal in any way. The concluded that Schoenbohm actually was dialing ordinary and valid Virgin Islands telephone numbers. He was not entering illicit access codes to make long distance calls.

The ALJ did, however, agree with the Wireless Telecommunications Bureau (WTB) assertion that, by giving out the telephone number, in 1994, of Herb's future boss, Congressman Frazer (whom, incidentally ran Delugo out of office), Herb was violating a solicitation restriction of ex-parte rules. This was despite the fact that WTB had conceded that no actual ex-parte violation had taken place. The ALJ ruled that, by attempting to explain his conviction as a De Minimus violation rather than a crime of major impact, he was trying to mislead the trial of fact. (In administrative law, the assertion of innocence is a crime even if the accused is actually innocent! It is akin to Hobson's Choice or the Salem witch trials whereupon, if the tied woman is thrown into the pond, and she does not drown, then she must surely be a witch and, thus, must be burned to death.

Herb had been fighting the remaining count through the Federal Courts and has even succeeded in convincing the courts to severely criticize the DOJ for their handling of the case. Nevertheless, they refused to reverse the remaining conviction because of the nearly impossible to define "standard of harmless error". The appellate court ruled that the motion for Judgement of Acquittal had been filed too late even though the trial judge had granted an extension based on the emergence of irrefutable proof that the prosecution had used false evidence. As a result they were barred from considering the

sufficiency of evidence matter at this late date under the rigorous standards of Habeas Corpus review. However, a positive revelation in the latest FCC decision is that it clearly vindicates Herb on the original charge of using ham radio in the commission of a crime. It also conclusively proves that his detractors engaged in perjury before a Federal Grand Jury and Petit Jury trial.

Many on the local scene recognized the truth. The Trial Judge, The Honorable Ann Thompson, wrote a letter of support and praise on Herb's behalf. The Governor of the Virgin Islands did not simply restore Herb's government career. He elevated Herb to a position of higher authority with more responsibility to the island and a significantly higher salary. He was also employed, as a part-time field representative, on the congressional staff of newly elected Congressman Frazer.

(The FCC WTB attorneys characterized these as "political jobs", unworthy of consideration as a mitigating factor in Herb's "rehabilitation"!)

Although Herb had a Congressional Floor Pass, granting him direct access to the ears of the politicians, there is no evidence that he ever abused his position to lobby House members against the FCC. This is in spite of the fact that the bureaucrats inside the FCC are very much afraid that Herb might just whisper in the ear of someone who controls their finances. Because of this, Herb is not allowed to take his case to the very people who would be horrified to learn the truth about how he has been treated. These are the people who could finally put a stop to this travesty of justice. Yet, Herb's detractors are on the phone daily, pushing those in power to get him off the air, one way or another. When will the voice of reason and justice be heard?

Some of us do not like the odds and are willing to help end this fiasco. Herb's legal bills are soaring but he continues the fight. His attorney, Larry Colby (a licensed ham), has stated that when this issue gets into the proper arena, Herb will be totally vindicated. But this can only happen if Herb is allowed to fight on and get his case into the proper arena. Right now, it is still in a forum where all the rules are stacked against the licensee. When the matter gets out of the FCC, and into the D.C. Circuit Court, then the playing field is closer to being balanced. There, the Feds don't have the automatic upper hand that allows them to do what their political puppet-masters demand.

A small donation of $25, $50 or $100 will go a long way in continuing the fight for justice. There is an underlying principle that must be preserved. It is not keeping Herb on the air that drives his supporters. It is the realization that if they can deprive KV4FZ of justice then they can deprive any of us of justice. Today they are persecuting KV4FZ. Tomorrow it could be you. You could be railroaded just because somebody doesn't agree with your position on the nets, phone patching, or apple pie.

Herb is working vigorously to get the funds together for his appeal. If you can help in anyway, please contact Herb at herbs@islands.vi or mail your contribution to:

Don't accuse me of anything you sick SOB. If it was me YOU'D KNOW IT. I'm not like these other lying chickensh*t people that YOU associate with. If say or do something to you I would damn well WANT YOU TO KNOW IT WAS FROM ME. Furthermore, you can't warn me of anything, especially something that's in your damn imagination. Get some phychiatric help !
Your a busy body. You have your nose in everything and cannot participate in any of it except for on this board. Maybe that's why you keep the crap going. You stick your nose in 14.313, 3950, 3901, Barf, stumpjumpers, liberty net, Herb (kv4fz), af2y, and me , everyone's business but your own. You cannot even get on ANY HF frequency but continually try your damndest to keep the fighting going. Get some damn mental help and don't falsely accuse me of one more thing unless your ready to prove it.
Now You've been Warned Lloyd Davies!

The FCC is referring to any station that is sending code so that others can
listen to it and practice copying it.

> constructive comments did not constitute "malicious interference" and
that
> certain members of the net themselves were engaged in a premeditated
> campaign of harassment and interference.
>
> Several members of the net were subsequently caught interfering with

the
> communications of KV4FZ and KA4MUJ. They include K2BFI and AA5LY.
AA5LY
> later gave the FCC, and supporters of KV4FZ and KA4MUJ, a complete and
> accurate accounting of the plot by disgruntled net members to "settle
the
> score". That plan included a vigorous campaign of letter writing to
> politicians in Washington in an attempt to pressure them into
punishing the
> net detractors.
>
> N4PCK had his own reason to get even. He had known Herb while he was
> operating in Haiti as HH2A and was very active on the INTERCON net.
Herb had
> learned, through his contacts in Haiti, that Candell had a serious
problem.
> He would solicit young pre-teen boys and pay them a quarter to
perform sex
> acts on him. A prominent Haitian administrator was told, by his son,
that
> the young boy had been abused and sodemized by Candell. There was no
arrest
> or trial. But the arrival of the outraged local citizenry at Candell's
> hillside villa dictated that Candell receive an armed escort to the
airport.
> Candell then appeared in the Orlando, Fl area, illegally using the
call
> HH2A/W4 and actively engaging in net activities. The net watchdogs,
now
> known as the B.A.R.F. (The Better Amateur Radio Federation), pointed
out
> that Candell was not eligible to use a Haitian call sign in the United
> States unless he was a Haitian citizen and had been granted a proper
permit
> from the FCC.
>
> Again the net members supported Candell and sought to silence Herb.
However,
> the FCC ruled that Candell could no longer operate from Florida
unless he
> obtained a valid U.S. amateur radio license. Candell later paid off a
VEC in
> Silver Springs, Fl to fraudulently give him a passing grade on a
General
> Class license examination. The VEC was later sanctioned but Candell
was
> neither removed from the air nor required to be re-examined. In 1989
Candell
> was finally arrested and convicted of multiple incidents of child
> molestation. He was given a suspended sentence that was partially

based upon
> INTERCON's assertion that he had been rehabilitated by amateur radio
service
> in their net. (Candell was arrested and convicted again in 1994 for
carnal
> assault on several boys between 8 and 10 years of age whom he had
invited
> into home under the pretense of showing them his ham station. He has
been
> institutionalized for several years but his ham license was,
nonetheless,
> renewed in 1996 for another ten years.)
>
> In 1990, Candell continued with his plot to destroy and discredit
KV4FZ in
> retaliation for Herb's alleged "interference" with the net's
"business".
> Candell actively leagued with other enemies of KV4FZ such as Pat
Miller,
> KP2J in St. Thomas, and Richard Whiten, WB2OTK. Miller supplied
Whiten the
> so-called "proof" of a crime by playing a recorded tape on both 20
and 75
> meters. Miller introduced Candell to the operator of a long distance
resale
> service that KV4FZ briefly subscribed to in 1987. Some of the users
of the
> CALLS (Caribbean Automated Long Line Service) system (a six digit
access
> code system on which half the possible combinations of digits gained
the
> caller access to a WATTS line) had been illegally abusing the CALLS
scheme.
> Malcolm Ford had claimed losses to the tune of $200,000 and needed a
> scapegoat. Thereupon, it was decided that a criminal case should be
> manufactured against Herb, KV4FZ.
>
> Ford needed this falsification to support his ludicrous claim that the
> impending bankruptcy of CALLS was not due to his inept management.
Instead,
> it proffered that somehow Herb had caused his business to fail. This
was
> vital to Ford because he was still salaried as the GM of CALLS even
though
> they were in receivership. Ford's efforts failed and he was physically
> removed from the operation after the Federal Bankruptcy judge found
him
> raiding the treasury and assets of CALLS.
>
> However, all during this time, Ford was fabricating evidence in an

attempt
> to establish a connection between CALLS financial failure and KV4FZ.
Yet the
> Department of Justice continually refused to prosecute Herb. This
resulted
> in even more acrimonious letters to officials and politicians in a
further
> attempt to implicate Herb as the culprit.
>
> Malcolm Ford, the previous owner of CALLS, was then under
investigation for
> bankruptcy fraud. In an attempt to escape indictment, Ford hired John
> Ackley, KP2A, to fabricate various reports that would designate
Vitelco(a
> local phone service), STSJ Long Lines, ITT and Herb as coconspirators
who
> were attempting run him out of business. While this was going on,
Ackley was
> attempting to buy the nearly defunct company for ten cents on the
dollar.
> (Ackley failed but STSJ was able to get the company back on its feet.)
>
> Miller, Hoffman, Candell and others intensified their letter writing
> campaign to hundreds of politicians in Washington urging them to
> investigate. They even began writing letters to newspapers, claiming
that
> politicians were shielding KV4FZ from prosecution. In these hate
letters to
> public officials, Herb was equated with organized crime, drug
trafficking,
> and high level political corruption. In 1991, KV4FZ was writing a
> hard-hitting column for the St. Croix Avis newspaper. Herb frequently
> attacked political corruption so it stood to reason that he might
have some
> enemies in government. Herb had articles published about the check
kiting
> and House Banking fraud perpetrated by the Virgin Island Delegate to
> Congress, Ron Delugo. Outraged and distraught, Delugo (who had
designs upon
> becoming the next governor of the Virgin Islands) assigned a full
time staff
> attorney (Sylvester Julian) to explore methods of pressuring the FCC,
the
> Secret Service, and the Department of Justice into investigating Herb
and
> "putting a 'severe hurting' on him".
>
> However an obstacle remained in the path of their plan to annihilate
KV4FZ.
> Some at the FCC supported Herbs activities on behalf of the amateur

radio
> service. Additionally he was elected as Vice Chairman of the Virgin
Islands
> Republican Committee, which made him a frequent delegate to the GOP
> Conventions. Furthermore, Herb was personally acquainted with
President
> Bush. Herb's father had served on the President's Commission for the
> Handicapped.
>
> Initially, each and every involved agency claimed there was not enough
> evidence to support a charge against Herb. Subsequent to this, John
Ackley,
> KP2A, manufactured a list of 660 telephone calls that were
prearranged to
> add up to $1,047 in value. This was exactly forty-seven dollars over
the
> amount needed to achieve the threshold of prosecution. Delugo wrote
> threatening letters to various government agencies threatening that
he would
> see to it that their funding was severely curtailed if he did not
receive
> figuratively receive Herb's head on a silver platter.
>
> Ruth Hoffman constantly badgered the acting U.S. Attorney for the
Virgin
> Islands, Terri Halpern. This continued to the point that Hoffman was
finally
> ordered to stop harassing Halpern. However, as a Congressman to the
VI,
> Delugo was in a position convince colleagues not to block Halpern's
> confirmation. Delugo reportedly told Halpirn that, unless she
prosecuted
> Herb Schoenbohm, she would never become U.S. Attorney. (Halprin was
fired in
> 1992 by the DOJ for ethical lapses after the Office of Professional
> Responsibility investigated the severe criticism, from the 3rd
Circuit Court
> of Appeals, that Halpern received for the "knowing use of false
evidence" to
> secure a conviction. Nevertheless, the trial prosecutor was cleared
by OPR
> because they were unable to prove that the prosecutor actually knew
the
> evidence used was false.)
>
> Herb's trial took place in April 1991 (four months past the five-year
> statute of limitations). Both Ackley and Miller testified, under
oath, as to
> the veracity and accuracy of the incriminating evidence they had
assisted in

> concocting. (Miller offered his so-called "caught in the act" tape of
Herb
> dialing "illegal access codes". Ackley presented his list of random
numbers
> that he verified, as a government expert witness, were all telephone
numbers
> dialed by defendant Schoenbohm.
>
> The puzzled and confused jury convicted Herb on all three counts of
Title
> 18, SS 1029(a): 1,2 and 3, which is, in reality, an illegal credit
card
> statute. This statute has been used infrequently to curb the illegal
use of
> cloned cellular telephones. After trial, Schoenbohm with the help of
Bob
> Sheron, W4ASX, closely scrutinized the evidence and began tracking
down the
> parties that Ackley had claimed, under oath, that Herb had illegally
called.
> A most amazing discovery unfolded: most of the persons contacted did
not
> know Herb Schoenbohm or had never had a telephone conversation with
him.
> Amazingly, they had already given statements confirming this fact to
the
> Secret Service investigators. Most had even identified persons, other
than
> Schoenbohm, whom had called them from the Virgin Islands during the
> timeframe in question (1987). Interestingly, the court refused to
allow
> Schoenbohm to verify the numbers before trial. The court incredibly
claimed
> that it needed to protect the potential witnesses from pre-trial
disclosure!
>
> After trial, armed with affidavits from the persons alleged to have
received
> Herb's "illegal" calls, Herb moved for a Judgement of Acquittal not
> withstanding the jury verdict. The court granted the motion on all
counts
> but one (Possession or Use of a Counterfeit Access Device). The court
> maintained that the Miller tape proved that something was amiss and
the jury
> could correctly deduce from this that the law had been broken. This
court
> decision differs from the previous decision in that the device is
similar
> to, but not exactly the same as, a valid device and does not require
the

> threshold of over $1000 in use. (The irony in this entire matter is
that
> Herb freely admitted to using the service briefly in 1987. He was a
bona
> fide customer and the total actual use amounted to $106. CALLS
finally was
> required by the court to produce Herb's check for $104 that they had
> received in1987. They admitted that they did not cash the check but,
> instead, held it as aid in the plot to entrap KV4FZ.)
>
> When the court vacated the judgement requiring two months prison
time, Herb'
> s detractors were enraged and, once again, began the political letter
> writing campaign. Now the claim was that Herb had used amateur radio
in the
> commission of a crime and should be taken off the air. They sent the
highly
> doctored Miller Tapes to the FCC in an attempt to prove their
incredible
> theory. Their letters were full of outrage over the fact that Herb
had once
> more cheated Madam Guillotine and he still on the air making waves.
Some
> were furious due to the fact that they had given financial support to
> certain political candidates and nothing permanent had been done to
rid the
> airwaves of this "pest", KV4FZ. (Ruth Hoffman even conveyed gifts to
> officials at the FCC in attempt to bribe public servants. One such
official,
> William Cross, was investigated for leaking internal information to
Ruth
> Hoffman in the KV4FZ matter. Hoffman then disseminated this
information for
> use in the hate campaign against Herb.)
>
> KV4FZ then was subsequently forced to embark upon a long and costly
struggle
> for justice. He has had to fight the refusal to renew his amateur
license by
> demanding a hearing before the FCC. (The refusal to renew is rarely
used as
> a procedure and has been given the title: "The FCC Death Penalty"
because
> the entire burden of proof is placed upon the licensee.)
>
> At the first FCC hearing, Administrative Law Judge Luton ruled against
> KV4FZ. However, upon higher review, the FCC General Counsel refused to
> accept Judge Luton's findings and remanded the matter for
reconsideration.
> The principle issue is whether or not KV4FZ had used amateur radio in

the
> furtherance of the commission of a crime. This time the ALJ ruled
that there
> was nothing in the evidence (The Miller Tape) that was illegal in any
way.
> The concluded that Schoenbohm actually was dialing ordinary and valid
Virgin
> Islands telephone numbers. He was not entering illicit access codes
to make
> long distance calls.
>
> The ALJ did, however, agree with the Wireless Telecommunications
Bureau
> (WTB) assertion that, by giving out the telephone number, in 1994, of
Herb's
> future boss, Congressman Frazer (whom, incidentally ran Delugo out of
> office), Herb was violating a solicitation restriction of ex-parte
rules.
> This was despite the fact that WTB had conceded that no actual ex-
parte
> violation had taken place. The ALJ ruled that, by attempting to
explain his
> conviction as a De Minimus violation rather than a crime of major
impact, he
> was trying to mislead the trial of fact. (In administrative law, the
> assertion of innocence is a crime even if the accused is actually
innocent!
> It is akin to Hobson's Choice or the Salem witch trials whereupon, if
the
> tied woman is thrown into the pond, and she does not drown, then she
must
> surely be a witch and, thus, must be burned to death.
>
> Herb had been fighting the remaining count through the Federal Courts
and
> has even succeeded in convincing the courts to severely criticize the
DOJ
> for their handling of the case. Nevertheless, they refused to reverse
the
> remaining conviction because of the nearly impossible to define
"standard of
> harmless error". The appellate court ruled that the motion for
Judgement of
> Acquittal had been filed too late even though the trial judge had
granted an
> extension based on the emergence of irrefutable proof that the
prosecution
> had used false evidence. As a result they were barred from
considering the
> sufficiency of evidence matter at this late date under the rigorous

> standards of Habeas Corpus review. However, a positive revelation in
the
> latest FCC decision is that it clearly vindicates Herb on the original
> charge of using ham radio in the commission of a crime. It also
conclusively
> proves that his detractors engaged in perjury before a Federal Grand
Jury
> and Petit Jury trial.
>
> Many on the local scene recognized the truth. The Trial Judge, The
Honorable
> Ann Thompson, wrote a letter of support and praise on Herb's behalf.
The
> Governor of the Virgin Islands did not simply restore Herb's
government
> career. He elevated Herb to a position of higher authority with more
> responsibility to the island and a significantly higher salary. He
was also
> employed, as a part-time field representative, on the congressional
staff of
> newly elected Congressman Frazer.
>
> (The FCC WTB attorneys characterized these as "political jobs",
unworthy of
> consideration as a mitigating factor in Herb's "rehabilitation"!)
>
> Although Herb had a Congressional Floor Pass, granting him direct
access to
> the ears of the politicians, there is no evidence that he ever abused
his
> position to lobby House members against the FCC. This is in spite of
the
> fact that the bureaucrats inside the FCC are very much afraid that
Herb
> might just whisper in the ear of someone who controls their finances.
> Because of this, Herb is not allowed to take his case to the very
people who
> would be horrified to learn the truth about how he has been treated.
These
> are the people who could finally put a stop to this travesty of
justice.
> Yet, Herb's detractors are on the phone daily, pushing those in power
to get
> him off the air, one way or another. When will the voice of reason and
> justice be heard?
>
> Some of us do not like the odds and are willing to help end this
fiasco.
> Herb's legal bills are soaring but he continues the fight. His
attorney,

> Larry Colby (a licensed ham), has stated that when this issue gets
into the
> proper arena, Herb will be totally vindicated. But this can only
happen if
> Herb is allowed to fight on and get his case into the proper arena.
Right
> now, it is still in a forum where all the rules are stacked against
the
> licensee. When the matter gets out of the FCC, and into the D.C.
Circuit
> Court, then the playing field is closer to being balanced. There, the
Feds
> don't have the automatic upper hand that allows them to do what their
> political puppet-masters demand.
>
> A small donation of $25, $50 or $100 will go a long way in continuing
the
> fight for justice. There is an underlying principle that must be
preserved.
> It is not keeping Herb on the air that drives his supporters. It is
the
> realization that if they can deprive KV4FZ of justice then they can
deprive
> any of us of justice. Today they are persecuting KV4FZ. Tomorrow it
could be
> you. You could be railroaded just because somebody doesn't agree with
your
> position on the nets, phone patching, or apple pie.
>
> Herb is working vigorously to get the funds together for his appeal.

>
> Here is some background information that you might find useful.
>
> KV4FZ has been an active amateur radio operator since 1954 when first
> licensed in the Midwest as W0VXO. While working his way through
college
> (1960-64), he spent summers teaching at several camps for the
physically
> handicapped. He was highly successful in teaching seriously disabled
campers
> about the potential of amateur radio. Many of these campers went on
to fully
> qualify for their amateur radio licenses.
>
> His father, W.B. Schoenbohm, was the founder of Courage Center in
> Minneapolis. Herb was a major force in pushing for the initiation of
the
> Handi-Ham program, which is now widely recognized as the premier
service
> organization for disabled radio amateurs. After college, Herb worked
as a
> international sales representative for Gates Radio, Harris Corp, and
Collins
> Radio. He sold and distributed broadcast equipment to the
international
> market, primarily Latin America. In 1968, he moved to the U.S. Virgin
> Islands with the intent of better serving his customers. His wife
Monika
> was, at that time. a service representative for Pan American Airways.
>
> KV4FZ was very active in DX work and, as a frequent traveler, put
many new
> countries on 160 meters. He was instrumental in getting Stew Perry,
W1BB,
> the necessary countries to be the first ham ever to get DXCC on 160
meters.
> He also gave G3IOR the last country he need (VP2EFZ, Anguilla) for
the first
> ever DXCC via satellite (Oscar 7)
>
> During the 1970's, KV4FZ was able to set CQ World Wide records 160 -
10 in
> almost ever category except 40 meters. He was also very active in
supporting
> the IARU Intruder Watch after encountering frequent yachts in the
area that
> had acquired licenses of convenience for a fee. At that time, FCC
> Commissioner Margita White appointed KV4FZ as the Virgin Islands
SECC. The

> SECC has responsibility to plan and manage the operation of radio
> communications resources during island emergencies. Herb fulfilled
that role
> magnificently and was named a Virgin Island "Hero" after Hurricane
Hugo
> destroyed most of St. Croix in 1989. Herb received this award for
keeping
> vital communications circuits open during the crisis.)
>
> Herb also took a detailed interest how most of these "pirates" has a
close
> association with the so- called "service nets" on the top end of 20
meters.

: machine and has no intent nor capability to communicate and
: lacking an emeregency

What does "intent" have to do with it? Either there are "legal one-way transmisstions" or there aren't.

There are things known as beacons Dick. Some are even on the CW only portion of 2 and 6m. Have you checked them *ALL* to be sure that none are operated by "nocoders".

I even ran my 2m repeater in "beacon" mode (CW ID every three minutes) for THREE YEARS from 1976 to 1979. And we even handled emergencies on it.

: Since this discussion centers around a no-code HF privilege,

Oh? I thought it was about "anyone" receiving a citation while operating
"CW". (What privileges -do- Techs have on HF?)

: and there are no sending speed limitations on HF, and MCW is
: not permitted on HF, as usual, you're trolling.

MCW isn't allowed? Here's spliting a fine hair. What is PSK sending when
ID'g? (A -tone- into the mic connector of the rig. Ask Dick about this,
the suppressed carrier is still there, although he can't find it on his
specterurm anie-lyzerS)

: Now, name someone who's received a NAL on HF while operating CW.

You had your turn, first name someone who got one while operating on
SSTV. We already know that CW causes HF hams to get the most NALs. ;)

Look at the subject line in the header; NCI is asking for the code
exams to be axed for access to *HF*.

>: and there are no sending speed limitations on HF, and MCW is
>: not permitted on HF, as usual, you're trolling.

>MCW isn't allowed?

Not in the context of amateurs utilizing it for CW encoded via
Morse. I'd love to be able to carry on a QSO using MCW -- it
sounds quite pleasant through the BFO (sort of like sending code
on a piano keyboard [using all the keys at once!]). But it's
wide band nature is why it's prohibited; the tone mixing with
the carrier creates harmonics. (Interesting to note that all
distress comms on the marine bands *were* to be conducted using
MCW; in fact, a 500 kHz Auto-Alarm receiver *only* responds to an
A2 signal.)

>: Now, name someone who's received a NAL on HF while operating CW.

>You had your turn,

and I'm still waiting.

I assume that you are using an end-fed antenna, otherwise you won't really be needing an RF earth connection. My shack is upstairs in a two-storey house. For a simple inverted-L end-fed antenna, I recommend feeding it with coax (the best, lowest-loss coax, possibly scrounged from you local CATV company!). Coax runs from shack to far end of the garden, where there is a good earthing system connected to the braid. Antenna length is appx 150'. An ATU in the shack takes care of whatever SWR is presented at the shack end of the coax.

A high SWR on the coax does not necessarily mean unacceptably high power loss (many purists dispute this, but it's true). I reckon that I could be losing about 3dB (half an S-point) where the SWR is worst (20m). This is a small price to pay for a simple, TVI resistant, multi-band antenna. You can experiment with somewhat different antenna lengths if the SWR /loss is too high on your favourite band. The shack is totally 'RF dead' (and I don't mean that the antenna isn't radiating!). Most critics of this system have a phobia about ATUs, for various reasons (fiddlyness, additional loss, COAX burn-out (!), 'my ATU won't handle funny impedances' etc).

73,
Ian.

Thank you for voicing your opinion. So I'm assuming since you're here too, the internet has apparently killed your hobby of sitting home (probably still living with your mom) up in your room alone watching porn and touching yourself? Just a thought.

2806. Re: Rather than demanding non-US HAMS to learn English.....

Newsgroup: rec.radio.amateur.misc

Out of curiosity what is the standard for English?
Brit, Aussie or what ever?

Every language I have encountered has regional dialects. For example, a woman whom I worked with was of European Spanish decent. She worked in an American Factory in Colorado, the management was having labor problem with a group of Mexican workers, she was asked to translate the workers concerns. She said they made very little sense to her as their Spanish dialect was foreign to her.

2808. European ATV discussion group

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-13 00:00:00 UTC
From: Gary <gary@franklin49.freeserve.co.uk>
Message-ID: <80jl78vbb1@news4.svr.pol.co.uk>
Source record: 127720
Cross-posted to: alt.ham-radio.dxing,alt.ham-radio.uwave,alt.radio.amateur,rec.radio.amateur.misc

The primary purpose of this discussion group/mailing list is to alert
members to any 'lift' conditions and ATV activity that may be occuring.
A secondary function will be to provide advice and help on ATV equipment and
components, particularly of an urgent nature (such as when you've blown up
your GaAsFET preamp when you need it the most!).

To become a group member, just send a blank email to:
atv_euro-subscribe@egroups.com

To access via the web, go to:
http://www.egroups.com/list/atv_euro/

Note that all postings will be available via the web and also sent to each
group member's email address.

Regards
Gary

Hi DMG;

Your reaction is understandable.

There are lots of scams that charge money to join their selling club and that money is used to pay some upline and eventually many duped people at the bottom of the pyramid get left holding the bag because the product they are selling isn't worth the money.

But Virtually Free Internet doesn't charge anybody to become an affiliate, and their monthly dialup access is a reasonable $15.00 per month. Nothing else. That's it.

They just decided to pay their customers and affiliates to tell other people instead of paying the broadcast media. I think it's a great idea.

The reason I posted the information was because it is an alternative to simple Free Internet access. You can do a *LOT* better than simple free Internet access with Virtually Free.

Sorry for the long winded post and thanks for raising the point. I've got the complete story here:

This is -without a doubt- the most sickening thing I've read
from KK7HO in 2+ years of his internet vomit. The evil one
has succeeded in emasculating his most strident opponent
here on the newsgroups, with an empty threat of litigation.

Unless KK7HO is ready to pony up a 5 figure legal fee,
he wasn't going to do squat, legally or otherwise. Poor
Lloyd went for another KK7HO lie.

And of course Volz was shopping for murder, unless he
can explain what he ment by his statements on:

http://members.xoom.com/frg9600/500.wav

In which Volz says; "what he don't know is that
now-a-days $500. will get his head blown off".

KK7HO wrote:

> I also was not shopping for the murder of anyone Lloyd and you know it - being
> called a jammer don't bother me.

Well the evidence is clear, KK7HO is a militant jammer. The
evidence below shows it clearly.

> it's when you start lying to implicate me in
> something as illegal as that - that i'll take action. hell yes you would too.

again, what did you mean when you said:
"What he don't know is that now-a-days $500. will get his head blown off".

Stop the jamming KK7HO.

Latest example of KK7HO's
criminal jamming operation:
http://members.xoom.com/_XOOM/sixisone/k5blb_kk7ho_obscenejamming_19990509_0254cdt.wav

Volz's "mean spirited badgering" of Harvey:
http://members.xoom.com/_XOOM/sixisone/volz.wav

KK7HO shopping for the murder of W1WCR at: http://members.xoom.com/frg9600/500.wav

Further info on KK7HO is at: http://www.angelfire.com/ky/libertynet/KK7HO.html
http://x34.deja.com/getdoc.xp?AN=325442830&CONTEXT=936559274.177930328&hitnum=50

KK7HO is an embarassment to the amateur radio service.
To complain about Volz's criminal actions on 3.950, email Riley Hollingsworth, at:

rholling@fcc.gov

To complain about Volz's internet newsgroup harrassment email: abuse@aol.com

If your are looking for a inexpensive repeater controller this is for
you.
The RM-10 Repeater maker includes
Courtesy Beep
Auxiliary Relay
Adjustable Hang-Timer
Remote Repeat Inhibit.
Compact Case
Adjustable Time-Out Timer
Power, COS and Push to talk L.E.Ds.
Connections For CTCSS Decoder/Encoder (CSI TS-32P included)
Repeat Inhibit Front Panel Switch
Inputs for Full or Half Duplex Telephone Interconnect
Note: This is not an Auto-patch. It is only a Push to Talk output for
an external Patch.

This controller is like new. I don't think has ever been used.

Asking @75.00 for all
Please contact me by E-Mail if you are interested or have any questions.

Roger

KK7HO attempted:

> You simple minded SOB's, if you'd do anything besides twist, spin, or distort
> the
> truth along with changing screen names everytime you have another LIE to tell
> you'd realize that the link in my sign. file wasn't what was being discussed.
> These were POSTS. Are you able to tell the difference ?? LOL LOL

Huh? Either you posted the URL or you didn't. This is your classic
tactic #3. If all else fails just call 'em lyers. You're really loosing
this one Tim.

It reminds me of that famous defense by our lyer and chief:
"That depends on what the meaning of the word is, ... is."
Bill Clinton would be prowd of you Timmie.

> Yeah I have it in my file SO WHAT? Now Bitch, whine and Moan about that too you
> NO Name Liars. No Name, No Callsign, No Integrity, No Credibility!
> bwwak bak bak bak ROFLMAO

Stop the spamming and jamming KK7HO.

SB DX @ WW $OPDX.435
Ohio/Penn DX Bulletin No. 435

The Ohio/Penn DX PacketCluster
DX Bulletin No. 435
BID: $OPDX.435
November 15, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, N4AA & QRZ DX, N4KU, N5PO, N6CW, N6RT, ND6S, K8YSE, KQ0B, N0ODK, W0YR, CO8TW, DJ5AV & DX News Letter, DK5WL, G4UOL, HK6DOS, LA7MFA, LZ1PJ, PR7FN, S53R, SM5MX, SM0BFJ, SM0GNU, UN7LZ, V73CW, VK1ZL, VK9NL and Newsline for the following DX information.

3A, MONACO. Operators Mike/W0YR, Tom/K6CT and Gyuri/HA5JI will be active as 3A/W0YR from November 26-30th. Possibly Thomas/N9NC and Gyorgy/VA3EU may join them. Activity includes the CQWW CW Contest. Mike states to OPDX that once the station is set up he will try to do his best to get on RTTY before the CQWW CW Contest.

3W, VIETNAM (Update). Mike, N0ODK, informed OPDX that he will be active as 3W6DK from Ho Chi Minh City during November 16-29th, 1999. He plans to operate SSB on 15 and 20 meters (both advanced and general portions of the bands), and will try to get on 10 and 40 meters. Mike states that he may try some CW, but it will be at a slow speed. QSL direct to N0ODK. ADDED NOTE: Mike mentions that this will be his first DXpedition. He also mentioned that he will activate some Cambodian (XU) and Vietnamese Island in February 2001.

9M6OO SPRATLY ISLANDS DXPEDITION. The 9M6OO operation is now active until November 17th. Activity is all over the bands. Just listen and read below about the "LAST TWO CRACK DOWNS"!

A5, BHUTAN (Update). Jim Smith, VK9NS, should have left Bhutan and was expected to arrive back on Norfolk Island on November 14th. Kirsti, VK9NL, (Jim's XYL) states that "the amateur radio legislation in Bhutan is almost ready, but not quite and nobody gets permission to operate until everything is properly done. Jim has been helping Yonten to get his station set up and ready for operation as soon as the legislation is in place..... With a bit of luck we may hear Yonten on the air in the near future. So we shall wait and see....."

BY1, CHINA. Pertti, OH2PM/XX9TRR, will activate his current "home staion" BY1DX in the upcoming CQWW CW Contest as a Single Op/All Band entry.

C2, NAURU ISLAND. Jack/VK2GJH and Nev/VK2QF plan to be active next year (March/April) as C21JH and C21/VK2QF. Their activity will be mainly 6 meters with some HF operations. QSL via CBA.

C6, BAHAMAS. Ray, ND6S, will be at Treasure Key from November 19th until December 3rd. His callsign will be ND6S/C6A and C6AGY during the CWWW CW Contest. During the contest he will be a Low Power Single OP entry using a a vertical antenna from Steve Rutledge's Villa. QSL to ND6S.

CO, CUBA. Eduardo, CO8LY, is expected to be active in the CQWW CW Contest as a Single Operator/All Bands/Low Power (100w) entry. QSL cards must go to his QSL Manager EA7ADH.

E4, PALESTINE. Robert, S53R, will be active as E4/S53R from November 24th through December 1st. He will operate from the residence of Peter, E4/G3WQU, in Beit Jala, as Single Op/All Band entry in the CQWW CW Contest. A "FORCE 12" yagis will be used and also wire antennas for 80/160 meters, plus a multi-band vertical. Operations are also planned for activity on the WARC bands before and after the contest. QSL via S53R, Robert Kasca, P.O. Box 23, Idrija 5280, Slovenia.

GD, ISLE OF MAN (Update, refer to OPDX.434). Steve, G4UOL, reports to OPDX that he has received several GD4UOL sked requests for FM and SSB. Steve states that he will ONLY be active on CW between November 19th and December 3rd.

HI, DOMINICAN REPUBLIC. Dr. Heinz-Josef Pick, DK5WL, plans to be active as HI9/DK5WL in the CQWW DX CW Contest as Single Op/All band entry (160-10 meters). He will be active after the contest until December 8th, were he will be active on 160 meters and WARC bands. QSL via DK5WL. All contest QSOs will be confirmed via the bureau.

HF0, SOUTH SHETLAND ISLANDS. "The 59(9) DXReport" states to look for SP3GVX to be active next year from the Polish Antarctic Base on King George Island as HF0POL. QSL via SP3WVL.
Also, look for Oleg, R1ANF, to be active again as R1ANF/A from the Chinese Antarctic Base "Great Wall" on King George Island. QSL via RK1PWA.
Also expected to be active soon is Danny, LZ2UU, as LZ0A from the Bulgarian Antarctic Base on Livingston Islands. Currently, the trip is being arranged and possibly will start in 2-3 weeks.

IOTA NEWS.....
AF-NEW. The Italian team composed of I8IYW, IK8UHA, IK8VRH, IK7XIV, IZ7ATN, IZ0CKJ and IS0JMA plan to activate Giftun Island, an Egyptian island in the South Red Sea Group. The callsign will be SU9DX and the activity will take place in May 2000. This will be a new IOTA. However, the team is looking for sponsors to help offset the estimated cost of 10,000 USD for their 5 day operation. If they succeeded in retrieving enough funds, they may also activate Tawila Island, also an Egyptian island in the North Red Sea Group (Also a new IOTA). The QSL

Manager will be IK8UHA: Antonio Barbato, PO Box 5039,
80144 Naples, Italy. For more information, sent E-mail to
" su9dx@qsl.net " or check the Web page: http://www.qsl.net/su9dx

NA-086. Operators from the city of Nuevitas will be active as CO0DX
from Cayo Sabinal (Camaguey Archipielago) from November 25-28th.
Activity will be on 80-10 meters CW/SSB and maybe RTTY. The
provider of this information states that this IOTA was last
activated 11 years ago. They will also be active during the
CQWW CW Contest as Multi-Single category. QSL via CO7DS.

NA-201. Cuban operators will activate Cayo Breton (Jardines de la Reina
Archipelago) from December 9-13th. Operators included: CO6ZG/
Pedro, CO6ZP/Alberto, CO6XN/Abel, CO7PH/Edor, CO6RD/Reinaldo,
CO6WD/Edelve, CO6JL/Jose, CO6SE/Manuel, CO6MZ/Manuel and
CM6MNG/Mario. Activity will be CW/SSB on 80/40/30/20/17/15/12/
10/2 meters.

KP1, DESECHEO. Harry, W8KKF, reports that over the past few months he
has attempted to obtain a landing permit for Desecheo and has been turned
down. He has all but given up in any further attempts. However, after
several amateurs recently inquired Harry about the island, Harry has made
one last attempt by sending a rather long E-mail to the Vice President
of the United States. Harry feels others should do the same if they
want KP1 on the air. If you are interested in doing the same, you can
send a message (using the Web site below) in your own words requesting
consideration to issuing a landing permit, and your desire to make amateur
radio contacts with stations on the island. Harry states, "Do try to keep
your message rather short. You might mention your state or Country in
the message. A very large number of messages, might just be what is
needed." To send a message to the Vice President, go to the Web page:
http://www.whitehouse.gov/WH/Mail/html/Mail_Vice_President.html
The above line should take you right to the form. You have to fill in a
few blanks and put in your message.

LAST TWO CRACKDOWNS. Reports from "Newsline" and "QRZ DX" indicate that
the practice of only using the last two letters of your callsign while
calling on a net or working DX "is not legal under Part 97" as per FCC
Enforcement Chief Riley Hollingsworth. The FCC "is" going to crack down
on anyone not IDing according to the rules. This current decision will
surely effect nets, DXing and contesting "BIG TIME".

QSL INFO AND NEWS.....
Leif, SM0BFJ, QSL Manager for 9U5D, states that those who request QSLs
for 9U5D and enclose IRC for return postage must be aware that the
IRC must be postmarked at their post office. Otherwise, it is not
valid at the Swedish post office.

QSL P40R via NK4U. Allan, N4KU (not NK4U), reports that since the CQWW
SSB Contest he has been receiving a couple of cards and SASES destined
for P40R. The problem is that he is NOT the manager for P40R. P40R's
QSL Manager is NK4U not N4KU! The few that he has received have been

passed on to NK4U.

QSL ZY7W via PR7FN to the Bureau or direct to: Antonio Fernando Alves,
rua Sim&#65533;o Bolivar, 107, 58102-178 - Campina Grande - PB

QSL GU0AZT via Eddie Schneider, P.O. Box 5194, Richmond, CA 94805.
Operators Eddie/G0AZT and Phil/GU0SUP were active in the WAE RTTY
Contest.

Doug, N6RT, reports that the following new/updated logs are now on:
http://dx.qsl.net/logs

5R8FU (thru October 31, 1999) NH0E (thru November 9, 1999)
9K2HN (thru November 1, 1999) VQ9CV (thru October 31,1999)
DK3EG (thru December 1998) VU2WAP (1999 CQWW SSB Contest)
E44A (thru October 6, 1999) WP3C (thru October 30, 1999)
GB0LI (IOTA EU-120, October 1997 YC0LOW (thru November 7, 1999)
& November 1999) ZX4Y (1999 CQWW SSB Contest)
JY4NE (thru October 19, 1999) ZY4K (1999 CQWW SSB Contest)
JY4NE/OD5 (thru September 21, 1999)

T31, KANTON ISLAND. Lech, LA7MFA, reports a correction to Ueata's callsign
which is T31UT (not T31UA), and his name is Ueata Tetabo. He goes on and
states that he has had skeds with Ueata on 40/20/15m SSB and feels Ueata
is making very good progress and will be able to handle QSOs on his own
very shortly. Times/frequencies were not provided and no QSNs were not
reported on the cluster network. Hopefully, they will be forthcoming.

T32, EASTERN KIRIBATI ISLANDS. Paul/WC5P (T32BE), Bob/N5RG (T32BO), and
Lee/N5PO (T32PO) will operate from Christmas Island (T32) November 24-29th.
Activity will be on 160-10 meters CW and SSB. They will operate in the
CQWW CW Contest using T32PO. QSL via home callsigns.

TI5, COSTA RICA. Fred/K9VV and Bob/K4UEE will be another group active
from here during the CQWW CW Contest as a Multi/Single using the callsign
TI5N. QSL via TI5KD.

UP4, KAZAKHSTAN. Valery, UN7LZ, will operate as UP4L during the last
weekend of November on 10 meters or on all the bands in the CQWW CW DX
Contest as Single Operator. All QSL cards must be sent direct ONLY to
UN7LZ (No Bureau cards) to: Valery Zhilyaev, P.O.Box 7, Kostanay, 458000,
KAZAKHSTAN.

V7, KWAJALEIN ISLAND. Bruce, AC4G, signing as V73CW from here, reports
to OPDX that he is active on all bands 160-6 meters and also on the
satellites. He was heard this past weekend on 6/10/12/15 meters at various
times mainly on CW, but there was some SSB. Bruce want to tell OPDX
readers to only QSL directly to the following address: Bruce Smith,
PO Box 1436, APO, AP 96555 USA. He states that his AC4G mail was being
forwarded, but the postmaster is going to discontinue this. So the AC4G
address is no longer any good. Bruce will be on Kwajalein Island for
a year and a half.

XV7, VIETNAM. Rolf, SM5MX, is about to travel from Tokyo, his present QTH, to Hanoi to re-activate his callsign XV7SW from November 25th to December 3rd. Look for Rolf to take part in the CQWW CW Contest. He is now the only remaining XV station on CW, since only 3W calls are issued nowadays. QSL via SM3CXS as usual.

XX9, MACAU. Ulf, SM0GNU, will be active from Macau as XX9TDX from November 25th through December 2nd. He will also be active in the CQWW CW Contest as an all bands low power (100w) entry. QSL via SM0GNU.

ZD8, ASCENSION ISLAND. Glenn Rattmann, K6NA, will be active once again as ZD8A from November 15th through November 30th. Operations are planned for all bands including the WARC bands prior to the CQWW CW DX Contest. Glenn will also operate during the contest. QSL via N6CW: Terry Baxter, 5243 Mt. Burnham Drive, San Diego, CA 92111. All previous ZD8A and ZD88A operations are being confirmed by N6CW, and all direct cards should be in the mail by the end of the month. Do not resubmit QSLs previously sent to K6NA.

>That's exactly true and that's exactly why the Morse code exam
>should be dropped as a *stand-alone* element.

Actually, the 10-question, multiple-choice Morse exam (in which one
only needs to correctly guess seven answers) can be considered part
of the written exam; the only thing that necessitates it being
a separate element is the various rates at which it's sent.

>Modes should be
>tested according to their importance to the service,

There are many measures which could be utilized to determine a mode's
importance to the service, including but not limited to: popularity,
commonality, robustness, constructibility in regards to hams with
average building skills, et al.

Why should you pay a damn thing, after all the world owes hams a life.
The world should kiss your butt to have you honor them with your word.

Welcome to ham radio-set your watch back 40 years

Please visit my World Wide Web Site, you have never seen a page like it.
You will see:

1. How to pass the A+ Certification
2. Really interesting answering machine messages
3. A blond naked chic being held by a female ham!.
4. How you know you are a ham.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in".
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.

Burt Fisher
A Plus Certified Teacher of video, broadcasting and electronics
Amateur call South Dennis, Ma. (Cape Cod)
K1OIK Bacteria-the only culture most hams have

Regardless of what tense you choose to be in, this is an HF-oriented
thread regarding HF access without knowledge of Morse.

>: sounds quite pleasant through the BFO (sort of like sending code
>: on a piano keyboard [using all the keys at once!]).

>????? Why would you use a BFO to listen to MCW ??????

Sorry, I thought you were familiar with how MCW is utilized in two-
way Morse communications; since MCW is not permitted in that context
on the ham bands, we'll draw from its use in the maritime bands: The
modulation of the tone is set way below 100% (my Mackay 500 kHz
transmitter has the tone factory-set at about 50% modulation);
otherwise QRM is caused to adjacent channels due to its wide-band
nature. Hence, a receiving station would have quite a bit of trouble
copying transmissions with his BFO off. Also, turning off one's BFO is
inviting disaster (literally!), for once the traffic from the A2
transmission has been copied, one's memory cannot always be trusted
to turn it back on again; missed calls might mean missed calls for
help.

>; But it's wide band nature is why it's prohibited;

>It is?

Yes. On your receiver, with BFO on, the harmonics would seem to extend several kilohertz on either side of the transmission frequency. That's the whole point of using it (off the ham bands, though).

Note the FCC's push (in the early days) for well-filtered power supplies. Today, a CW operator using a poorly-built supply will literally stand out from the crowd with his wide-band signal, having a 120 Hz "tone" modulating his carrier. (I'm told this is pretty common among Cuban hams.)

All I did was post the users of that PO Box in the FCC database. Someone else must have taken the initiative to entice you to engage in mail order commerce.

I am on HF. Go sell your morse code tapes somewhere else.

Too bad about your junk mail. I get junk mail. You get junk mail. I'll bet that all the other subletters to your PO Box get junk mail too - only at their real residences.

73,
Brian

I *can* be considered as 50% of the written exam for upgrading
from tech+ to general. Why is Morse code considered equal in
importance to everything else in ham radio combined?

Really? I had no idea that Larry Linville from the TV series M*A*S*H was no longer with us, Mr. "CeeBee Rambo." Let us all pause for a moment of silence as we remember the dear departed Frank Burns. By the way, has "Hawkeye" also gone to that great Mobile Army Surgical Hospital in the sky, oh all-knowing "CeeBee Rambo?"

>Then, you have a
>obsession with Eric "Oye Boy" Oyen

Still parroting the words of your mentor Drew Durigan, eh Lloyd? Of course you are, because you are not capable of thinking for yourself. So you merely reiterate what your buddy Drew has told you about me.
Get a life, Lloyd--your ignorance is showing.

Of course "CeeBee Rambo" is Lloyd. VFP's new "screen name" is just another one of his gutless anons, along with CBRambo1, Rileygotcha, DX302MAN, DX394MAN, etc. In fact, a very reliable source informs me that Mr. Davies has had a Deja.com email account for some time now. Lloyd ain't fooling anybody but himself with all of his aliases--his writing style is instantly recogizable. Lloyd, a few weeks ago you said your work (i.e. spamming this NG with off topic posts) was done here. Aren't you just a wee bit afraid that the god you worship who hates fags is going to punish you for telling such a bare faced lie?

I found it very instructional on using a tape recorder, hitting the pause button, judging how much time it takes to rewind back to the letter I was studying, and just how long a set of alkaline C-cells would last. Now I use it to document Extra abuse on the HF bands. All good ham radio stuff.

Jeff, I'm sorry that happened. It might have been the result of me posting the users, but I did not instigate the mail campaign. I figgered that your association with MD would be embarassment enough.

I will avoid future reference to your mailbox, although it appears that the damage is done. It really is impossible to get off those damned mailing lists. We've tried.

Couple it with a 100% score on the written exam and it is still
a failure. The importance of the single code score is obviously
over-weighted compared to everything else in ham radio combined.

>And if you were learning code to pass the old Telegraphers license would
>you have -also- "learn[ed]" about amateur radio? Learning CW teaches you
>one thing, the -skill- of sending/receiving code (period).

How did you miss the "...more like..." in his statement? Learning
the code certainly is *more like* learning about AR than digging then
filling a hole. I certainly would not have been able to communicate
with any of the CW stations on 10m this afternoon (Korea to New Zealand
and everything in between) by digging then filling a hole; I wouldn't
have gotten past the beach doing that let alone made it to the Western
Pacific.

(BTW, I asked a JA ham to shift to SSB just to see how that would work;
he declined, saying he couldn't speak any English at all -- here we were
able to work Morse quite well with his limited ability in reading and
writing English, yet phone was completely out of the question. This
pleasant QSO would have never taken place without us knowing Morse.)

Usually, one studies the code along with the more popular prosigns and
procedures hams use on the air, so yes, while learning the code one is
in fact learning about amateur radio, too. The two complement each other
quite well.

I don't believe this fairy tale for a moment, but just supposing
it were true in another universe, what content would be in a "pleasant
QSO" in which one participant couldn't speak the language of the
other, except in communications op-sigs like QRV QSA QRU RST ZBM2.

Well, I certainly believe it. Did you ever attempt to carry
on a conversation with one from another country who knew the
words in English but couldn't put them into sounds that you
could understand? That's exactly what we mean when we say
that CW operators can carry on a conversation with persons
of other native languages where it couldn't be done on
voice.
It's common for persons whose native language is other than
English to be in that situation. Many of them are
sufficiently schooled in written English but don't get
enough verbal practice to be fluent in the spoken version,
particularily so the constricted audio bandwidth of SSB
radio. And some languages are so different in their basics,
with nonexistant vowel sounds, etc. that it presents
particularily difficult problems.

K5BLB's breathtaking response to the Commission's enforcement demands may now be seen at:

http://www.3950.net

Click on the link entitled "K5BLB's Astonishing Hypocrisy." BLB's response can be seen both as a photographic reproduction and a typed transcript.

Also available is a link to the FCC Enforcement Log's audio announcement of a warning letter sent to one of the stations known to make unidentified interfering transmissions on 3950.

There will more news to come in the near future on this station, who may well be the first unidentified 3950 jammer to receive FCC attention.

With all good wishes,

Kevin, WB4AIO.

I'm not aware of any kits for 10 Meter SSB, however I would check
ebay.com for used equipment. I'm assuming that your son is licensed
to operate 10 meter phone band. If not a license manual and tutoring
material would make a better gift.

Thanks for the compliment on my detective work, Frank, but I must
add that I would never treat helpless animals in such a manner.

One can learn quite a bit about a man's character by observing how
he treats those who are utterly in his power, such as small
children, animals, and readers of newsgroups.

Wonderful world,

We're not talking about you, Jeff. Some people learn Morse code and
NEVER use it on the air. That's what is like digging a hole and
filling it up. For some people, it is just busy work for the
purpose of getting a license.

The question is, are you going to force US hams to communicate
with foreign hams using Morse code? If not, why do you want to
force them to learn Morse code. What is wrong with live and
let live?

I can read and write Vietnamese (took two years of that language)
but have a hell of a time speaking it, let alone understanding someone
else speaking it with it's six tones. I learned the Northern dialect;
all the Vietnamese in Hawaii are from the South. They can't understand
me and I can't understand them, but the written language causes me
no trouble.

Another example is the Greek language; experts read and write with
it but don't speak it.

The fellow and I exchanged info about our jobs, food, bon dance,
then settled down to a game of chess: It was easy for him to read
and send Nc3 Nf6 Pd4 Pd5 Nf3 Nc6 Bg5 Bg4 et cetera. I happen to
believe that every chess game I play on the air is a pleasant QSO.

I'm glad to see you've stopped sending the harrassing emails and
are limiting your comments to just the NG.

We can't create a custom exam consisting only of those elements
of interest to a particular examinee. I know of someone who's only
interested in operating CW; he doesn't understand why he has to
learn about any of the items on the written exam which don't
pertain to operating CW. To him, those items are "just busy work
for the purpose of getting a license."

Put your thinking caps on. Why would anyone risk his own ticket by hanging around and annoying a frequency run in perpetuity by a bunch of low class ignorant neo-Nazis who refuse to believe that Hitler is dead? Why must you good guys try to exercise hegemony over 3.950 while it's obvious that Riley will take care of things HIS WAY? Leave Saggyboy and Fat Slob Gene and Victoria Secret and whomever ALONE. Do you think you'll ever make successes out of failures? 75 meters offers a lot of spectrum, doesn't it, so why must good folks congregate on the corner of a BAD neighborhood? THINK! Would you go walking down a crime ridden street at ten o'clock any night? You're smarter than that so why jeapordize your welfare in an analogous situation on ham radio? Let Nature and Riley take its course. Free speech is great and the if these Liberty Netnuts wanted to stand on street corner soapboxes screaming that every Black is an "N" and every Jew is a Red and every immigrant is ruining the U.S. and all the rest of the ridiculous stuff for which they're noted, they're entitled. But get it through your heads that ham radio is "it's own man." Here's an example. America Online is a server but look at it closer. The Internet is an enormously vast network linking millions upon millions of computers worldwide. And there's an unwritten agreement on it that censorship is VERBOTEN. It does NOT exist. It SHOULD NOT exist. Now AOL is in itself a mini-Internet which not only allows passage into the BIG BABY but establishes its own rules for accessing ITS own features. It's sort of like a house within a house. The lack of censorship unseen on the World Wide Web does NOT apply to AOL. When in Rome do as the Romans do.When using AOL facilities, do as THEY demand instead of thinking that their house is run like the unbridled vast Internet. And if you don't like stringent AOL policy, then leave. Once that's understood we now can understand the relationship of the FCC to the vast guarantees afforded us by the Bill of Rights. The FCC=AOL and the Bill of Rights =World Wide Web. Once again the FCC is its OWN MAN, having established its OWN rules whereby certain basic freedoms relating to the Bill of Rights are NOT recognized. Riley's made it clear that foul language any place on ham radio as well as the type of bigotry heard on the LibNet are OFF LIMITS, and so detrimental to the best interests of this country that if uncontrolled can lead to our forfeiting valuable ham radio frequencies to either commercial interests here or to international broadcasters. And the same principle applies as well to on-the-air confrontation be they on a one to one between two hams or an assault by many hams on a net or a net which might be unfettered by jamming yet exists to promote hatred by means of its white extremist tenets. I'm on SSB for close to thirty-one years and from 1969 when I began to '89 when I first heard the rantings of the jackbooted morons like KV4FZ, WA2EXQ, KA4MUJ and WB4GDP ably assisted by naive morons such as W2OOQ, KB4MXL and others assaulting Ruth Hoffman and the Intercon Net, I never realized that such a thing could ever exist in this hobby/service. I hated what I heard and wrote to the FCC about it and do you know what I got in reply? "FIRST AMENDMENT RIGHTS." And so you then ask, "Where are they now? If those words allowed ham radio to become a

cauldron of discontent then, why not now?" The truth is now evident. For far too long the FCC used those three words to ESCAPE RESPONSIBILITY because our frequencies were not endangered by outside sources. However now the scenario has changed and it became imperative for the FCC to act TO SAVE OUR AMATEUR RADIO FREQUENCIES therefore we hams must decide between two options (1) to carry on as before while screaming FIRST AMENDMENT RIGHTS or(2) understand the change in FCC attitude and acquiesce to it. Challenge or accept? And here's the rub. Challenging might be certainly legitimate but UNACCEPTABLE if in your own heart you truly want to preserve this hobby/service. What then is more important-your personal interests or the viability of amateur radio? Remember what J.F.K. said in his 1/20/61 Inaugural Address? "Ask not what your country can do for you.Ask what you can do for your country." I guess it's become an analogous situation. Ask not what ham radio can do for you. Ask what you can do for IT.

Howdy, it was posted here...

"After 50 years as a Ham..Why should I spend over $30.00 a year for a
publication that is around 40% ADS...!!!!"
==========

What, you've been paying ARRL dues for 50 years? That's your problem.

My QST is FREE. How's that, you say??
In the early seventies I paid a measly $225 for a LIFE membership.

Of course $225 at 6 percent would be worth nearly 1 kilobuck now. But you'd
just spend it on something frivolous. :-)

When I was American Applications Manager for Oki Semiconductor, I
spent a lot of time in Hachiohchi, Japan where all the street signs
and store signs were in Kanji. Most store signs say something pretty
simple in Japanese, like "Big Mountain" resturant. I learned to
translate the Kanji character for "big" directly into "big" in
English without knowing the spoken Japanese word for "big". Add
a stroke to the Kanji character for "man" and you have "big". Add
another stroke and you have "tree".

Howdy,

Leonids meteor "STORM" this week.

Let' make lots of six-meter contacts.

It's hard to stay in the shack and work ham radio if the sky is clear and they are "raining" down as has often been the case in the past. (It's a 33-year cycle.)

That's exactly true and that's exactly why the Morse code exam
should be dropped as a *stand-alone* element. Modes should be
tested according to their importance to the service, not
according to an outdated arbitrary whim that sets one
mode on the alter to be worshiped. The present testing
setup considers Morse code to be as important as everything
else in ham radio combined in upgrading from tech+ to
general, for instance. That inequity needs to be changed.

You're the Esperanto pusher. You encourage everyone to learn it while I said it's a dead unused and unnecessary lingo designed to waste a person's time. I just upgraded the operating system of my MAC from 7.5.1 to 7.5.3 and finally 7.5.5. Before the last download and final installation, I had to agree with Apple's terms of usage. I had a choice of languages in which to read them. Offered were English,German, French, Italian, Spanish, Dutch, Danish, Swedish, Norwegian and Catalan. Apparently Apple also considers Esperanto a waste.

: dead man's CB handle as some sort of sick joke. Then, you have a
: obsession with Eric "Oye Boy" Oyen. You are very sick Frank or who
: ever you are.

Love him or hate him, the real Drew/CB Rambo had fairly good written skills, and the above posting is not from him. Drew would have spelled "who ever" correctly as "whoever", and would have put a comma between "sick" and "Frank".

Not only do you not have the courage to sign your real name, you're not even doing a decent job impersonating another person, nor are you intelligent enough to create an original online persona.

I suggest you instead try impersonating someone within your limited range, like Masa or Lloyd. (Lloyd should be exceptionally easy for you, as I strongly suspect you ARE Lloyd.)

Hello,

I was wondering if the FCC has an online renewal system for Amatuer Radio liscenses? I looked around on the FCC home page and didn't have any luck...

Thanks

Fritz

They would probably come across some of our specialty groups, first,
if their newsreader spit out the NG titles in alphabetical order:
rec.radio.amateur.antenna, rec.radio.amateur.digital.misc, or
rec.radio.amateur.homebrew would pop up before this one would;
they'd get a pretty good impression of amateur radio after perusing
those subgroups. It's pretty well known that the "miscellaneous"
subgroup in any NG hierarchy contains lots of ongoing battles;
I think most would know better than to judge an activity by what
appears in its .misc catch-all.

>Lord knows I have tried to visit this group hoping things have changed,

Go to one of our specialty groups; quite a lot of extremely useful
knowledge is handed out on them.

>No one except ya'll care about your pet causes.

But that contradicts your comment above regarding newcomers; if they
don't care, then they won't hang out here and get a bad impression.

>Ivan Ivanovich,UR-0-NUT

2937. N0VFP's serious problems!

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-15 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991115143827.07208.00001372@ng-cl1.aol.com>
Source record: 127283

Look at this posting from Lloyd Davies, Chief of Constipation of an idiotic prejudiced group of palookas.

I am making a public retraction about KK7HO - only because I don't want to be sued and I don't have the money. I work 2 jobs just to keep myself fed, clothed and a roof over my pitiful little soul. I did not want to do this, but feel complled anyway. Would anyone help me? I'm at a impass in my life, and I really don't what to do about it. I really like the Liberty Net, I agree with alot that they stand for. I just really don't like those nasty JEWS. So I am taking back what I said about that KK7HO is a jammer, only because I don't want get into leagal trouble, hell, I can't even afford a lawyer, let alone a trip to Las Vegas.

LLoyd Davies, N0VFP /4 NCI 2841
B.A.R.F. Chief of Communications
Now I understand what's going on. He's a pathetic lost soul. He's at an impasse. He works like a dog to put rags on his back and a roof over his soul(sic) head. And he likes the Liberty Net but not "nasty Jews." Oh hell, that's been an excuse of dropouts and boneheads for centuries. Look for a scapegoat for their own failures and inadequacies-so why not Jews? Just about every despot has for God knows how long. Lloyd views his twisted world as one filled with repression and suppression ganging up on him to rob him of a decent life. Having a pliable malleable mind, he then emerses himself into the demented philsosophy of an ultra rightwing white extremist church and his shortwave saviours who pump his brain full of crazy distorted notions about Jews and people of color and moderates, liberals, middle of the roaders, those who want to help the poor and just about anything progressive. What he views as things of value for all is interpreted by him as stealing from him. I knew there was more to Lloyd than just superficial stupidity. It's a PROFOUND feeling of failure, insecurity and instability which is evident in that post. He's grist for the mill of hate. Lloyd, instead of disliking Jewish persons, why don't you try to emulate them? You see ,in order to bust out of the ghettoes of Europe, we had to establish ourselves as independent but higly important entities. Because we were denied entrance into European universities, we FOUNDED OUR OWN and became the standard for academic excellence. And you hate us for that? Because the only jobs open to us in Europe under despotic anti-Semitic kings, especially in Slavish areas, we were forced to become tax collectors which fostered hate against us. But even so, this too was used advantageously in time to classify us as experts in money. management. Because we were denied decent employment, we became experts in gems, hence the name JEWelry. If we had a large piece of cloth, we managed to cut it in parts to profit. Anything we could do to survive we did including the genocide of a hostile Europe gone mad between 1933-1945. Lloyd your problem can be solved and your dislike dissipated through diligence and work. Turn away from hatemongers while channeling your zeal to success. Do you realize that if you

started your own business, never would you openly profess dislike for anyone because money from all is still green. You have to take hold of your life Lloyd so you won't have to just about confess to terrible inadequacies as you did in that post. Nobody's going to sue you so why torture yourself? Once the breaks go your way, you will disassociate yourself from the kind of extremist hatred for which you're too well known.
AF2Y,Doc

2938. Re: To clarify N8WGM's LIES

Newsgroup: rec.radio.amateur.misc

Source record: 127284

Timothy,
First, you do post a link to the pee giff page----quite stupid---but you keep posting that it is funny. It is not! Your sense of humor is in the toilet.
In reference to the hate directory---that web site mentioned was put up by a former non-participant of the Liberty Net. He does not even check in any more! I haven't heard him in ages. I simply made the point that this individual does not get on the Net and even when he did, it was infrequent. And if you check the links in that hate directory, you can't even find the Liberty Net mentioned in the WIN page.
Tim you seem to be overly infatuated with the Liberty net. I make mention of you and you go all half cocked calling me a liar. I simply stated the facts------as some in this newsgroup have more than adequately supported. What I said still stands the test-----you spend too much time posting about and listening to 3950. I can spend only a few precious minutes due to time constraints of work and living.
I do have one question to ask of you. Why is it that you continually advertise this 3950 oppion poll web site and all of these links? Is it that you get paid to do this? I just can't understand how advertising a web site that has a little man exposing himself and then peeing on call signs can be funny. I hope you are being paid because if you are not---well then maybe I will just have to chalk it up to One who flew over the kkkoo kkkooo's nest.
73's and no I will not make my oppinion heard on the 3950 oppinion page.----N8WGM

What's "known" is that you no longer have a dental practice. The question is "why?" Would you care to shed some light on the subject?

Hi Guys,
I turn to amateur radio once again for the answer!!! I am looking for a way to prob into a circuit which uses co-planer waveguide as th transmission medium. We would like to be able to calibrate using a VNA at the end of these probes, so that the reference plane is there. Our characteristic impedance is 75 ohms. Thanks for any help you can give.

73,

Stan

5-4-3-2-1.

The following is a Q-S-T. Use your full call or face the wrath of the FCC. Also, fallout from the D�wana Terry letter on repeater coordination. These stories and more on Newsline report number 1161 coming your way right now!

(Billboard Cart Here)

*****

NO PARTIAL CALLS ANYMORE

United States hams may not identify using only the suffix of their call sign, even if it is in the heat of battle trying to work a rare and exotic D-X station. So says FCC ham radio rules enforcer Riley Hollingsworth, K4ZDH. Newsline�s Bill Burnett, KT4SB, in Miami has this report:

Hollingsworth: "Our position is that the practice of stations ID"ing with only the last two letters of their callsigns is not legal under Part 97."

The not so gentle reminder of how the F-C-C expects United States hams to identify their transmissions comes in a letter to Alan Strauss, W-A-4-J-T-K, of Carol City Florida. Strauss is a regular net control operator for the 14.247 MHz D-X Group. Hollingsworth recently wrote Strauss concerning complaints that the "14.247 DX Group. The F-C-C has received complaints that this net monopolizes that frequency and interferes with ongoing communications when starting its net operations.
